Since the establishment, four months ago, of the Odessa bacteriological station, 322 patients from all parts of the empire have been treated for hydrophobia by Dr. Gamalea, on the Pasteur system. Of these, seven died subsequently to their dismissal from the institute. Two of Dr. Gamalea's present patients are young lady nurses who were recently bitten by a person suffering from hydrophobia, whom they were attending.

Possible Danger from Pepsin.

It is suggested by Dr. Wood (*Therapeutic Gazette*) that in ulcerated conditions of the bowels or stomach pepsin may enter the blood and cause septicæmia. Dr. E. Chenery reports a case which he thimks confirms this view.

Correspondence.

Ligation of Femoral Artery and Vein.

Eds. Med. and Surg. Reporter:

Was called July 12 to see J. T., a blacksmith, twenty-eight years of age; by birth a Frenchman. Found a wound in left thigh four inches below Poupart's ligament, three inches deep by one and a half long, caused by the buttress which he used in paring the horses' hoofs; the instrument passed obliquely between the femoral artery and vein, slitting both through, severing neither entirely.

Dr. C. M. Chandler, of Montpelier, was called; the vessels both ligated; the wound closed; patient put upon his back. I visited him daily, with the following results:

2d day. Ligament was warm, not swollen; sensibility good; pulse weak; temperature 99°. Did not look at wound.

3d day. Pulse weak; temperature 100°; tongue white; bowels did not move; gave blue mass. Did not examine wound.

4th day. Same as the day previous; gave in addition to blue mass, rhei and spts. nit. dulc.; dressed wound; seemed healthy.

5th day. Pulse good; temperature natural; bowels moved morning and evening; kidneys acted freely; appetite fairly good.

6th day. Same as day previous; wound discharged profusely, but healthy; no inflammation; no œdema. Gave cinchona bark.

Patient presents no change in condition only continual gain until—

10th day, Saw patient in the morning; was same as the day previous—progressing finely. At 3 p. m. was called to see patient; found he had been having chills, which began at noon; pulse 130; temperature 104°; pain in calf of leg; diagnosed phlebitis; placed leg on an inclined plane, wrapped in cotton wadding; gave aconite.

11th day, a. m. Symptoms modified, though the leg had swollen one-third in size; continued treatment. 6 p. m. Patient restless; gave cool soda bath, after which he rested.

13th day. Patient rested well the night previous; leg did not give him any pain; wound entirely healed; calf flabby; foot a little œdematous; action in ankle and toes fairly good. Patient remains same for several days, gains each day a little; no other treatment than that indicated.

24th day. Had chills; pain in leg returns; temperature 103°, pulse 120.

25th day. Leg swollen and tender; applied poultices of flaxseed meal and lobelia; pain subsides; swelling continues; diagnosed abscess in the calf.

28th day. Opened abscess on anterior surface; still leg seemed hard on posterior surface; continued poultices.

30th day. Opened abscess on posterior surface of leg at lower third; discharged laudable pus to the amount of 14 ounces. Leg discharged from these two openings; no swelling above knee.

40th day. Opened another abscess near the knee, which discharged freely; pain continued in the knee, which was swollen, red, and very tender; gave him cinchon. brom., beef, eggs, brandy; kept bowels well open.

78th day. On account of friends moving, put him in the hospital. He was placed in an airy room; leg in an inclined plane; nourishment good, etc.

139th day. I am informed by one of the hospital staff that the inflammation about the knee-joint is subsiding and the patient doing nicely, gaining flesh and strength rapidly.

Barre, Vt.

Remarkable Injury of the Finger.

Eds. Med. and Surg. Reporter:—

The last two or three numbers of the Reporter contain articles under the caption, "Remarkable Injury of the Finger." When the "returns are all in" it may be found that the injury is nothing "remarkable" after all. A few days ago, H. R., a strong, hearty, laboring man, caught three fingers of hand in some machinery. He *yanked* his hand away and came to my office for repairs. Two of the fingers only required amputation. The second was found with first phalanx of the bone gone, and with it nearly all of the soft parts up to the hand, leaving the bone in a nude state. He said that there was a "long leader, at least a *foot* in length," torn out with the end of the finger. Assisted by Dr. Ritz, I amputated this finger at the metacarpo-phalangeal articulation. The following day I was shown the lost finger, which had been found at the place where the accident occurred. Comet-like, the tail was the chief part of it. The flexor tendon had been torn from its attachment to the ulna near the elbow. The hand is now nearly well, and we have had no trouble from the tendon complication, slight tenderness along the inner aspect of the forearm being the only symptom.

Walter H. Parcels, M. D.

Lewistown, Pa.

How do Quacks Expel Tape-worm?

Eds. Med. and Surg. Reporter:

Under the head of queries in your journal I would like to seek from some of your numerous readers a solution to a problem that has been a source of embarrassment to me on more occasions than one: How do quacks accomplish the expulsion of tænia solium so readily and effectually? In all of our text-books we are instructed to give kousso, male fern, pelletierine, and various other teniafuges, and sometimes we find these effectual; but I have often been disappointed in their use. I believe our lack of success is frequently due to the small doses given. But when they satisfy our greatest expectations their administration has to be preceded by a preliminary course of treatment, which is always distasteful to the patient, and their action is harsh and nauseating.

Some years ago one of these traveling quack "doctors" put up at a house where I was boarding. He soon had his advertising circulars all over town, and it was but a short time before callers came in abundance. He would make appointments with his patients, call at their house early in the morning, give a couple of small powders, one white and one yellow, without any previous purgation, fasting, etc., and call back in three or four hours to find his worm dislodged and awaiting him. He assured me he never failed, and that his remedies never nauseated and were not more disagreeable in their action than a gentle purgative. I had occasion afterwards to verify his statement by meeting some of his patients. If there is such a safe, sure, and easy method, why cannot the medical profession possess itself of it? I should like to hear through the Reporter the favorite remedies and methods in detail, as practiced by different members of the profession.

S. R. O., M. D.

New Orleans, La.

Injury by Finger-ring.

Eds. Med. and Surg. Reporter:

Allow me to add another case to your list of injuries by finger-rings.

Last winter a heavy woman slipped on an icy walk, and seized a fence to save herself. Her wedding-ring caught on the top of a picket as she fell, and the entire skin of the finger was inverted and the bone of the second phalanx fractured.

I endeavored to save the finger but failed, and amputated by disarticulation at the metacarpo-phalangeal joint.

A. Jacobi, M. D., *Pres. Med. Board.*

News and Miscellany.

The Population of France and Italy.

A lively controversy has been going on in the journals of those two nationalities as to their respective populations, France maintaining that that of Italy is decimated by emigration; Italy hotly rebutting the statement, and contending that of the two it is France that is showing signs of decrease. The outcome of the contest may thus be summarized: Italy in 1871 had 26,801,154 inhabitants, and in 1881 she had 28,459,628—in other words, an increase of 1,658,474 within the decennium. Again, on December 31, 1885, by the excess of births over deaths, her population was computed at 29,699,785. In France, on the other hand, the increase of the population is distinctly less. At the end of 1876 her census showed 36,905,788 inhabitants, and at the end of 1885 37,918,745—an increase of but 1,009,953, as compared with the preceding return. Again, France, on an average, has 102 births annually per 1,000 women between the ages of fifteen and fifty, while in Italy the proportion is of 157 births. The emigration of Italians by no means neutralizes the excess of births over deaths. From 1876 to 1885 about 449,000 emigrated to transatlantic countries, of whom a considerable number after a year's absence came back. True, there has been an increase of emigrants in the years immediately preceding 1885, but still it is much lower than the numbers that annually leave Britain, Germany, and the Scandinavian countries. On an average, in the decennium 1876–85 there left Italy for non-European countries 158 per annum for every 100,000 of the population, while in the decennium 1875–84 the yearly emigrants from England were 440 per 100,000; from Scotland 520; from Ireland 1146; from Germany, 212; from Switzerland, 221; from Sweden, 423; and from Norway, 731. France, with her not inconsiderable colonies, not only cannot keep up a strong emigration, but has to reinforce by the foreign arm her national labor. Indeed, it is computed that she has a standing immigration yearly of between 40,000 and 50,000 workmen, mainly Germans and Italians, who become domiciled within her borders. In her last census (1885) over a million of such immigrants were calculated to have taken up their abode in her midst. The proportion of her births is very insignificant; insomuch that her political economists and hygienists are seriously pre-occupied with the phenomenon, seeing in it a menace to the future prosperity and power of the country, as well as to her influence in competition with other states. For with existing means of defence and offence it is, above all things, numbers which tell in securing respect for a nation's integrity and independence.

Appointment of a Commission on the Mode of Capital Punishment.

From the *Med. Times* we learn that the New York Legislature, at its recent session, passed a law of considerable general interest. It provided for a commission to investigate and report to the Legislature, on or before the fourth Tuesday of January, 1887, "the most practical and humane method known to modern science of carrying into effect the sentence of death in capital cases." The following persons were appointed commissioners: Elbridge P. Gerry, of New York city; Dr. A. P. Southwick, of Buffalo; and Matthew Hale, Esq., of Albany. This law is the outcome of a determined effort on the part of many citizens to have a competent commission investigate and see if a better method of inflicting the death-penalty than hanging could be devised. There is no public sentiment in New York averse to the infliction of death as a punishment for murder, but hanging is repulsive for many reasons. The Medico-Legal Society has discussed the subject, and many methods have been proposed in place of the scaffold and noose. The report of the commission will be awaited with considerable interest.

A Humorist on Bright's Disease.

Bill Nye, the humorist, thus discourses in the *Boston Globe:*

John Bright was born in 1811. He made a tour of the Holy Land at the age of twenty-four, but did not decide to purchase it, owing to the existence of a flaw in the title. On his return from the Orient he discovered that what was most needed both in Europe

and America was a good, reliable disease for the use of the better classes. The poor and humble were well supplied, but the rich, the aristocratic, and patrician statesmen, corned heads and porkists of the two lands, languished for a good, reliable disease that poor people could not obtain. So he began to sit up nights and perfect Bright's disease. He gained the prize at the Paris Exposition and honorable mention at the great Centennial celebration at Philadelphia "for meritorious and effective disease for the better classes." Since that time he has been gratified to notice that the very best people, both in his own land and in this, are handling Bright's disease. It has been kept out of the reach of the poor, and to die from this ailment has been regarded as a proud distinction.

A German Medical Society in Philadelphia.

At a meeting of the German-speaking physicians of this city, held recently, it was decided to form a new medical society, the objects of which would be to afford a means of increasing the knowledge of the German language and medical literature on the part of its members, and in general to serve the ends of advancing medical science by holding monthly meetings for the reading of papers, the reporting of papers, and discussing questions of interest which properly would come before such an organization. Ferdinand H. Gross, M. D., of the staff of the German Hospital, was elected temporary chairman, and a meeting for organization will soon be held, at which the charter, constitution, and by-laws will be submitted by a committee appointed for the purpose, which is now engaged in translating the constitution of the Philadelphia County Medical Society into German, with a probability of its adoption as the organic law of the new society. The proposed association has every prospect of a useful career. With the *Medical Times*, we heartily wish it success.

Botanical Explorations in Costa Rica.

The district of Chiriqui in Costa Rica, whence the bulk of the so-called Jamaica sarsaparilla comes, was lately explored by an English botanist, who gives an interesting account of his journey in the *Gardener's Chronicle*. Among other things, he mentions finding an anonaceous plant, probably a Hylepia, exhaling a perfume very like that of *Cananga odorata* (ylang-ylang), and a tree known as the "samba gum tree," which yields on incision a creamy-looking yellowish sap, which after a time becomes hard and resinous, and then resembles the tenacious hog gum of Jamaica, the produce of *Symphonia Globulifera*. He also met with a thin-coated cocoanut, one-third larger than the ordinary kind, and which he thinks deserving of cultivation. The natives ornament their cheeks with paint made, among other things, from an oleo-resin resembling elemi, yielded by a tree called "potnapée." This paint is prepared by burning the oleo-resin and collecting the lamp-black, a purpose for which it is doubtless well adapted.

Disinfecting Nurses.

In a report recently presented to the Local Government Board (England), on a serious outbreak of scarlet fever at Wombwell, in Yorkshire, Dr. Franklin Parsons revives an old suggestion, made years ago by the late Dr. C. O. Baylis, but never, so far as we know, recommended in an official report before. Dr. Parsons suggests the engagement of a "disinfecting nurse," to visit the households in which infectious disease is present, to see that disinfection and other precautions are duly carried out. He points out that this expedient has been found useful in other districts, and thinks that under the special circumstances of Wombwell, the inhabitants of which are almost all manual workers, it would promise to be of use there also. It is sometimes found, as he truly remarks, that mothers pay more attention to advice on sanitary matters from one of their own sex than from a sanitary official.

The Teeth from a Medico-legal Aspect.

The identification of dead bodies and criminals is sometimes a matter of much perplexity. For instance: the features of a dead body may be distorted or destroyed; the clothes changed or unrecognizable; and no ordinary circumstances left to make identification clear. Some such a case occurred in Michigan. A man was found in a lake murdered. As the coroner was about dismissing the case as "unidentified," the neighboring dentist had the curiosity to look into the mouth. In a moment he said: "I have a chart of that mouth in my office," and though he could not then remember the name, he soon found it by referring to his chart-book. It resulted in tracing the murderer.

Venereal Infection Pronounced a Crime.

Some consternation may be caused among a certain class by a recent judgment of Jus-

tice Wills, of the Central Criminal Court, England. The charge against the prisoner was on two counts, one with having carnal knowledge of an imbecile woman, aged eighteen, and another, under 24 and 25 Vict., c. 100, s. 47, for a "fraudulent assault" upon the same woman, occasioning her actual bodily harm. The harm done was the wilful infection with syphilis. The prisoner was found guilty on both heads, and sentenced to two years' imprisonment for the first, and five years for the second. The more remarkable piece of information is that a man who has immoral sexual connection with a woman, knowing himself to be suffering at the time from gonorrhœa or syphilis, is liable to prosecution and penal servitude.

The Work of Lightning.

A Spanish shepherd killed by lightning recently, was made the subject of a scientific post-mortem to discover how the electric bolt had done its fatal work. His eyebrows and eyelashes were burned off, the eyeballs were dried up, all his left side was scorched and burned in spots down to the ankle, while the right side of the body and right leg were uninjured. Serious as these injuries were, none of them appeared sufficient to have caused his instant death. But as soon as the breast was opened the cause of death was apparent. The lungs were frightfully congested, and the heart was enormously dilated and filled with coagulated blood. With all this damage to the man, his clothing was very little injured, the only traces of the lightning upon it being a small hole bored through the rim of the hat and a slight singeing of the shirt collar.

The Awful Crime Charged Against a New Jersey Farmer.

The *Sunday Press* of this city reports that Asa R. Hughes, a well-to-do farmer, living near the little Danish settlement of Janvier, Franklin township, Gloucester county, N. J., was held in $300 bail recently for assault, the complainant being Dr. J. Gaunt Edwards, of Williamstown.

The circumstances of the case have shocked the community, Hughes' daughter Alice, twelve years of age, charging her father with an unnatural crime. Hughes' oldest daughter, twenty-three years, has since made similar charges. Mrs. Hughes is still alive, and of eight children, four have left the house and gone to Vineland to live, warning their father not to cross their path.

Hughes has admitted his crime, but under advice of his lawyer, W. Berault, pleaded not guilty at the hearing.

A Very Perverse Patient.

Little Tommy has a very perverse disposition—a fact which the doctor who was called to prescribe a course of treatment for him recently seems to have taken fully into account. When the doctor called two weeks after he had told Tommy what to do in order to get well, he found the boy plainly very much better. "Well, how are you, Tommy?" the doctor asked. "Oh, I'm all cured now," said Tommy with a grin. "That's very good, I'm sure." "Yes, but I didn't do a single one of the things you told me to, doctor." "Of course you didn't! I knew you wouldn't, and that's the reason I told you to do them," said the doctor.

The Salt Mountain of Palestine.

U. S. Consul Merrill states that this mountain is situated at the south end of the Dead Sea. Its length is six miles, width three-quarters of a mile, and height not far from 600 feet. The mass of the mountain is composed of solid rock salt, some of which is as clear as crystal. How far this deposit of salt extends below the surface of the ground, no one at present knows. This salt, and that obtained from the Dead Sea, are a government monopoly. Consul Morrill believes there is a mine of wealth in the mountain, and if capitalists were allowed to work it, the prosperity of the country would be greatly increased.

Medical Extravagance.

The *Polyclinic* speaks editorially of medical extravagance in the number of societies for medical improvement which exist, and which are a burden to the physician's pocket and time without an equivalent return to him. In Philadelphia a man cannot well avoid belonging to three societies, which cost him $25. A heavy assessment from the county society goes yearly to printing the state society's proceedings, which are made up with so little censorship that men generally do not take the trouble to call for copies.

She Swallowed Her False Teeth.

A despatch from Paterson, New Jersey, says that, on December 3, Mrs. Henry Lowe, while drinking a glass of water, loosened a gutta percha plate with five false teeth, and they slipped down her throat. The physi-

cian, in trying to get the plate out of the throat, moved it so that it slipped down into her stomach. It is now proposed to remove the teeth by the operation of opening the stomach.

Novelties and Sanitary Agents.

Birdsall's Hitching Strap.—This is an extremely convenient and ingenious strap—just what doctors need. It can be had in russet or black leather, and the dollar which it costs will not be regretted. Invented by Dr. S. Birdsall, of Susquehanna, Pa.

Platt's Chlorides.—We can speak of these after considerable employment of them under our own supervision. They are admirable for use in the sick-room, and at all times in families to disinfect drains, water-closets, night-jars, cess-pools, sinks, and the like. We have never used any disinfectants which gave greater satisfaction.

A College's New Lecturer.

Dr. William Wile, of Newtown, Conn., was elected last Monday lecturer on nervous diseases and electro-therapeutics at the meeting of the faculty of the Medico-Chirurgical College. Dr. Wile has been for some years a most active member and writer in his profession. He is editor of the *New England Medical Monthly*, vice-president of the American Medical Association, and a member of the British Medical Association.

Washington Obstetrical and Gynecological Society.

The following are the officers for the ensuing year:

President.—A. F. A. King, M. D.

Vice-Presidents.—Drs. H. C. Busey and W. W. Johnson.

Recording Secretary.—H. M. Cutts, M. D.

Corresponding Secretary.—S. S. Adams, M. D.

Treasurer.—Geo. Byrd Harrison, M. D.

Tea as a Cause of Sterility.

Dr. James Davies states, in the *Therapeutic Gazette*, that the Druidic College of the twelfth century considered tannin the most potent of all the products of nature in producing sterility, and that tea-drinking, as practiced by the public, undoubtedly acts in the same direction.

Regulating Medical Practice in Tennessee.

Dr. F. L. Sim, editor of the *Mississippi Valley Medical Monthly*, and Chairman of the Committee on State Legislation, has issued a circular to the profession of Tennessee, urging co-operation in securing the passage of a medical registration law. It seems that such a law could readily be obtained of the Legislature if it were not for the opposition exerted in the profession itself.

Bill of Fare for a Christmas Dinner.

Raw oysters, tomato soup without meat, roast turkey, giblet gravy, mashed potatoes, canned corn pudding, cranberry jelly, beets sliced, salad, mayonnaise of salmon, cheese, water crackers, sweet potato pudding, creamy sauce, fruits, nuts, raisins, coffee.

The University of Virginia.

We regret to learn that the medical department of the University has lately met with a serious loss by reason of the breaking out of a fire in one of the lecture-rooms. The destruction is said to have been confined chiefly to the anatomical drawings.

Personal.

—Dr. Charles S. Turnbull has removed to 1719 Chestnut street, Philadelphia.

—Dr. W. J. Freeman has resigned as a member of the staff of the Episcopal Hospital.

Items.

—Terra-cotta coffins are suggested by a progressive undertaker.

—That belladonna often cures sterility is the statement which has been made by several writers recently.

—By an ordinance of the Bohemian Government, all district physicians are now obliged to pass through a course of studies in practical bacteriology.

—A new medical society has been organized in Birmingham, Ala., which is to be known as the Alabama Surgical and Gynecological Association.

—An eminent Swiss painter, Professor Rudolf Holzhalb, who lately died in Zurich, bequeathed 80,000 francs to ten hospitals and asylums of the town.

—The cholera continues to spread in towns of the Argentine Republic, and has reached Montevideo, where there were fifteen new cases one day recently.

—The Medical Society of the County of New York has recently expelled a member

by a unanimous vote, in accordance with the recommendation of the Comitia Minora.

—The Cremation Cemetery Company of Baltimore has just bought a lot in that city, on which it will soon build a handsome crematory, similar to the one recently erected in Buffalo.

—According to recent news from Chicago, no one longer doubts the success of the International Congress. The most eminent physicians of Europe have promised to go to Washington in 1887, and many have promised original communications.

—One of the largest and most brilliant social entertainments in this city recently was the tea given by Dr. and Mrs. W. H. Pancoast to introduce their daughter, Miss Gertrude Pancoast, who will be one of the Assembly belles.

—Duhring's "Treatise on Diseases of the Skin" has just been published in the Russian language. This is an additional compliment to a Philadelphia author, whose work has already appeared in two editions in English and has been translated into French and Italian.

—Journalism in Boston evidently promotes longevity. Major Ben Russell died at eighty-three, Joseph F. Buckingham at eighty-one, William W. Clapp at eighty-two, Nathaniel Greene at eighty, Nathan Hale at seventy-eight, and John S. Sleeper at eighty. That much-maligned east wind, which Boston editors live on, must be salubrious.

—The *Popular Science News* says that the statement is made that all the varied machinery of Great Britain now operated by steam-power is capable of performing more work—and, hence, of producing more products—than could be produced by the labor of 400,000,000 able-bodied men, a greater number than all the able-bodied men on earth.

—The London *Lancet* defines "moderate drinking" as that which consists with a clean tongue, a good appetite, a slow pulse, a cool skin, a clear head, a steady hand, good walking power, and light, refreshing sleep, and asserts that "odd glasses of beer and spirits in a forenoon do not come within the range of moderate drinking." Paste this in your hat.

—In Switzerland, in 1885, among the recruits recognized as unfit for military service, were 66 per cent. of the tobacco and cigar workers, 67 per cent. of the basket-makers, 60 per cent. of the tailors, 25 per cent of the butchers, and 26 per cent. of the stonemasons and carpenters. Of 6,154 recruits in Canton Berne, 1,833 were refused; of these, 581 suffered from goitre, and 162 from flat-foot.

—Before an English medical society recently, Dr. Saundby showed Voltmer's artificial human milk, and demonstrated the small proportion of casein contained in it. The casein is got rid of by peptonization, while by the addition of cream and sugar of milk the composition of average healthy human milk is imitated. This milk has been in use for the last three years in Germany, where it has proved a very successful infants' food.

—Emperor William, of Germany, has three physicians always in attendance—Von Lour, physician-in-chief of the imperial staff; Leuthold, and Firman. Whenever his majesty is indisposed, these three physicians hold a consultation. The emperor is fond of fish, but as sea-fish is difficult of digestion, he lives to a large extent on trout. In order to meet the imperial want in this respect a species of trout has recently been introduced from California in the river on the land of the Grand Duke of Baden.

—The fact that a son of a wealthy and well-known citizen of Boston has decided to become a horse-doctor, to the horror of some of his friends, reminds a writer in the *Boston Post* that one of the sons of that most fastidious gentleman, Edward Everett, became a veterinary surgeon with his father's approval, and had his sign on his father's house in Sumner street, and that one of the oldest and best horse-doctors in Boston to-day is an honored member of one of the best families of the Hub.

QUERIES AND REPLIES.

T. I. D.

EDS. MED. AND SURG. REPORTER:

Please inform me what the initials T. I. D. mean. See page 518, MEDICAL AND SURGICAL REPORTER of October 23, 1886. R. E. SMITH, M. D.

Coal Creek, Colorado.

Reply.—T. I. D. means thrice daily.—EDS. REPORTER.

ECZEMA IMPETIGINOSUM.

A physician writes to us asking for suggestions in the treatment of a case of the above disease, where there is no syphilitic taint. The disease has persisted for nine weeks, despite the internal use of arsenic and sulphur, and the external use of many applications, including iodoform, bismuth, chrysophanic acid, etc.

IODOFORM IN ULCERATIONS OF THE OS UTERI.

EDS. MED. AND SURG. REPORTER:

Will you oblige a constant reader by informing him where can be procured a monograph "on the use of iodoform in the treatment of various ulcerations of the os uteri," which was issued last year by some gynecologist of one of the Northern States? If you cannot recall the article, probably some of your readers can do so by inserting the notice for it in your Queries column. S. H. BARHAM, M. D.

Lone Oak, Texas.

Pallas Syringe."

SOLUBLE

PILLS AND GRANULES

UNEQUALLED FOR
Purity in Composition, Solubility in Coating, Uniformity in Size, Perfection in Form and Finish.

We desire to call the attention of physicians and others to the following points:

1. The best materials are used in their manufacture.
2. No article required by a formula is ommitted on account of its high cost.
3. No Pills are deficient in weight.
4. The Pills are Coated while soft.
5. There is but one Coating, which is perfectly soluble, and there is no sub-coating of resinous character.
6. The coating is so thin that the Pills are not perceptibly increased in size, and yet it is entirely sufficient to protect the Pills from atmospheric influences, and effectually covers any nauseous taste, thus rendering the Pill easy to be swallowed.
7. The Coating is so transparent as to clearly reveal the color of the mass, and its solubility is not impaired by age.
8. The various masses are so thoroughly worked that the materials are perfectly distribute.
9. Vegetable or organic matters are not charred, nor are volatile principles lost by the use of heat at any time throughout the process of manufacture.
10. The excipients are peculiarly adapted to the permanent solubility of the mass and its efficient therapeutic action.

GREEN SPRING SANITARIUM,
AND
WATER CURE.

For the treatment of all forms of Nervous Diseases, including the Alcohol and Opium habit; also diseases incident to Women, Rheumatism, Skin Diseases and Dyspepsia. Seventy miles west of Cleveland, in a natural grove of ten acres. Sixteen years successful operation. Means and appliances complete. Treatment by baths, electricity and massage, a specialty. One of the largest medicinal springs in America. Elegant apartments. Moderate terms. For particulars address **JOHN S. MARSHALL, M. D., Superintendent, Green Spring, Ohio.**

THE PHYSICIAN'S
DAILY POCKET RECORD AND VISITING LIST.

By S. W. BUTLER, M. D. TWENTY-FIRST YEAR.

A New Revised Edition for 1887, with Metric Posological Table, &c., strongly bound in Dark Morocco, with Pocket for Blanks, and a Patent Steel Spring.

THIS VISITING LIST has been a favorite for many years. It is "perpetual" in arrangement, and may be used continuously one full year from the date of the first entry. Besides the Posological Table, it contains Tables of Doses for Hypodermic Injections, Inhalation, Suppositories, &c.; Directions for the treatment of Poisoning, Drowning, and other emergencies; Simple Directions for Testing the Urine; Obstetric Record, Cash Record, &c.

☞This RECORD has met with the Highest Praise from those who have made use of it.

PRICES.

Editions for Thirty Patients Daily, Patent Clasp, ... $1.50
Editions for Sixty Patients Daily, Patent Clasp, ... $2.00

☞ The Name of the Purchaser will be Stamped in Gilt Letters, on the Back, for Ten Cents Extra.

A reduction of 50 cents on these prices will be made to subscribers to THE MEDICAL AND SURGICAL REPORTER and QUARTERLY COMPENDIUM when taken together.

TREATMENT OF FISSURES AND ULCERS OF THE RECTUM AND ANUS WITH THE AID OF AN IMPROVED RECTAL SPECULUM.

BY W. S. WATSON, M. D.,

Of Matteawan, N. Y.

Fissures and irritable ulcers most frequently occur on the posterior aspect of the anus or rectum, and occur for the most part in persons of costive bowels or hardened stools, by which means the mucous membrane is abraded or lacerated. This process daily repeated not unfrequently results in what is called or known as fissures of the rectum or painful ulcers of the parts, which condition is not unfrequently associated with hemorrhoidal diseases, though distinct, and requiring widely different treatment for a successful cure. A mistaken diagnosis is productive of perhaps more suffering than almost any other local disorder to which we are subject. In our search for rectal diseases, a mistake is more easily made than discovered. Just how a differential diagnosis can be arrived at without ocular inspection is, we confess, beyond the reach of our conception. In other words: Is it possible to know the real pathological condition without careful inspection? Can a correct diagnosis be arrived at without the aid of a speculum to admit light? Can sufficient light be admitted into the numerous intricate folds of the lower rectum without dilatation to the extent to efface these folds? Will our pretentious brother tell us how it is possible to find a small fissure situated within one of the deep folds without distension, or with the aid of a small cylindrical or tubuliform speculum, that does not mechanically dilate the parts which are naturally contracted, to efface these natural folds of which there are a number? These are usually found one on the right and one on the left, opposite the middle of the sacrum. The largest of the natural folds and the most constant projects backwards from the front part of the rectum opposite the base of the bladder. When the fourth fold is present it is usually located about one inch within the anus on the back part or posterior aspect of the rectum. This one of all others is most vascular, and being situated nearest the outlet is easiest found by pile-searchers, consequently receives more punctures from the hypodermic needle than all others. (In fact, a small tubuliform speculum seldom if ever reveals anything more through their single fenestra or opening.) We believe it to be quite a difficult matter to differentiate one of these natural folds or a portion of one of them from an abnormal growth, except by the carefullest examination, and with the aid of good light. These folds do not long retain their natural appearance. After a portion once gets wedged through the fenestra of a speculum, their natural vascularity rapidly increases so as to in a few moments' time make it practically impossible to discriminate between such a constricted fold and that of a vascular tumor, except it be by a careful comparative examination of other parts at the same time, which can only be done with the aid of good light, and free distension of the parts by mechanical manipulation. A

rent in the mucous membrane must, we think, positively be seen to be apprehended and successfully treated. Unless local treatment is resorted to a cure is impossible in consequence of the periodical evacuations of hardened fæces over the parts. The rent or ulcer is consequently prevented from healing, and that which at first was only a slight abrasion of the mucous membrane soon becomes a decided ulcer. It is not uncommon to find hemorrhoidal tumors at the verge of the anus in connection with these fissure troubles. Hence the frequent mistaken diagnosis. Too often the small tumors at the verge of the anus are looked upon as the whole trouble, and should blood occasionally appear on the evacuations, the difficulty is at once conceded to be bleeding piles. We believe fissure of the rectum in the female ofttimes is produced during confinement by the attending force exerted by her and the distension during the delivery of the fœtal head. This condition being most frequently met with in women who have borne children forces the conclusion.

The symptoms peculiar to this affection are so well marked that it is surprising why the real condition should go on unsuspected, as it does many times, for months—even years—until the constitutional symptoms are so well marked as to leave no longer a doubt as to the seriousness of the case. The patient's health runs down, he becomes irritable, peevish, is easily fretted, loses flesh, becomes anæmic, and is depressed in spirits—these are among the constitutional symptoms that should lead to a proper investigation. As a rule, sufferers from fissure of the rectum think their sufferings all due to hemorrhoids alone; they are forced to believe such is the case from a lack of knowledge, and their having frequent discharge of blood and matter from the parts; and pain while at stool, an intense suffering after the bowels have been evacuated, a smarting or burning is to them conclusive ofttimes. The sufferer's diagnosis has been confirmed by the attending physician, who has hazarded an opinion on the strength of the patient's statements without ocular inspection—a weakness by far too common among the profession. We think it safe to say that when a patient complains of a great amount of suffering and a burning pain following defecation, his trouble is seldom piles alone; surely there are some complications, and we insist that a careful examination be made, and not a digital one alone. A careful ocular inspection is the only positive means of arriving at facts. The surgeon who ventures an opinion without it, hazards his own reputation and brings the treatment of this class of ailments into disrepute, and entails an unmentionable amount of suffering on his patient; for it is a fact that such ulcerative troubles of the rectum are unquestionably progressive—simple at first, and a cure easy, in time it is not simple, and will, with an unerring certainty, wear out a patient's health. The pain and irritation attending the disease, and the ultimate effect on the nervous system, is more than most people can bear; yet it is wonderful how long the attendant suffering is endured rather than submit to an examination. It is no less wonderful to find fissures or painful ulcers of many years' standing, especially in women, who, through delicacy, have concealed their real condition—delicacy on the part of the patient, censurable timidity of the attending surgeon—has prevented discovery of the real complaint until the patient's condition is ruined for want of a careful ocular examination. Had an examination been made sooner, much valuable time would have been saved, as well as deeper ulcerations prevented. Often after months of needless delay, such patients fall into other hands, when a searching examination reveals the fact that the ulceration extends through the integument, and a small, if not a large and painful fistula is found—a serious complication for an already broken-down constitution.

Aside from delicacy and timidity, there is one other pertinent reason for the non-discovery of many of the diseased conditions of the parts under consideration—namely, a want of better and more efficient means of diagnosis. An attempt to diagnose the presence of slight ulcerations within the rectum with the finger alone, we consider mere guesswork, nothing more. Our experience warrants the conclusion, notwithstanding there are medical men who claim to be possessors of fingers sufficiently sensitive to positively detect their presence. We confess ours are not entirely reliable: sometimes we have been right, other times wrong. And we are afraid, judging from the sequelæ following the treatment by others, that they too have placed too much confidence in a sensitive finger. We are unable to conceive of but one positive means of diagnosis—that of *seeing* the real condition of the parts, with the aid of such a rectal speculum as will afford an unobstructed view. Such devices heretofore have been quite unsatisfactory. They have all come short of the object aimed at; they have been defective in construction, have either been made of too fine fingers or blades, or have had blades that

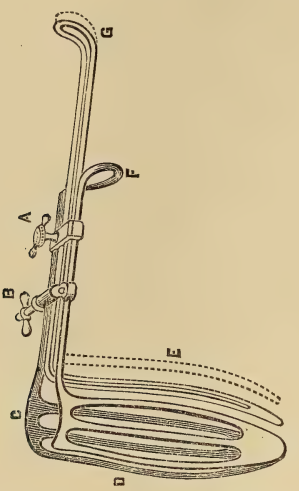
were too narrow to serve the purpose, others have been made of cylindrical tubes of glass or rubber. In the first place, they do not give the needed support against the walls of the parts to prevent a bulging of the folds to obstruct the view. Bivalve speculums are inefficient from narrowness of blades, and in affording only a lateral dilatation; hence the mucous folds of the parts of necessity fall in antero-posteriorly, and almost entirely obstruct the view.

The old-fashioned glass cylindrical speculum of course held apart the folds, but in doing so they cover up about all of the parts. Should they be provided with a fenestra in one side, so much turning and returning is necessary in the attempt to bring to view or finding a diseased spot, that we are more likely to make an abrasion by reason of the mucous folds being dragged through the fenestra than we are to find an old sore. This class of speculums we are sure have done a great amount of injury to the parts by reason of a bulge of the mucous membrane getting wedged through the sharp-edged fenestra. The writer well remembers an experience of this kind that happened in the rounds of his practice. Some years ago, when there were very few other speculums in use, he had occasion to use a rectal speculum. One of the small glass speculums was used, in fact at that time he thought them all sufficient. The speculum was readily introduced to the desired depth and an unsatisfactory examination made. Upon his attempting to withdraw the speculum, it was found to be immovable, and was firmly held in place by reason of a bulge or fold of the mucous membrane, which had got wedged through the fenestra. So firmly was the instrument held that it was with difficulty he got the parts disengaged, and not until after his patient had suffered quite an amount of pain, and no doubt some laceration of the parts. After such an experience he decided that such imperfect devices were unsafe to use. He verily believes they have done a great deal of harm in the hands of others, for doubtless others have had a like experience. Rectal speculums, to meet the requirements, must of necessity possess the following advantages: They must be so constructed as to afford an equal antero-posterior and lateral dilatation, and give sufficient support against the loose folds of the parts to prevent a possibility of their bulging and obstructing the view. They are best made of wire, flattened in part to form the blades or valves, which on their exterior when closed should be cylindrical in form, the better to facilitate rotating within the parts when necessary, and should be self-retaining, with no part or place where the mucous folds can possibly be caught and injured by introduction, expansion, or removal.

With this end in view, and recognizing a necessity for something better, we have had made by the well known firm of Tiemann & Co., instrument makers of New York, a model of an instrument that we feel sure meets the requirements for examinations and successful management of the several diseased conditions of the parts under consideration. These speculums are most perfect dilators. They are made with three fingers or blades of flattened steel, but in such a way as to make each finger or blade concave on its inner surface, and convex on its outer, with eight supports against the walls or folds, and are so constructed that each finger or blade is separable in their transverse diameter, with a contraction on the exterior of the blades suited to the position and action of the sphincter muscle, which said contraction, together with their lightness, makes them self-sustaining, wholly dispensing with the necessity of an assistant to hold the speculum in place while operating on the parts. With the aid of such a device for exposing to view the diseased parts, the treatment of fissures is made comparatively simple. All ulcerations or fissures are readily seen, and can be thoroughly cleansed of all feculent matter preparatory to making such applications as are required. After a thorough cleansing of the parts, such applications or operations as are required may be made through numerous openings between and through the spaces in the blades.

Before making any examinations or treating any disease of the rectum the lower bowel must be freely washed out by free injections of warm water, the washing must be continued until all particles of fæces are washed out. Before an operation is to be made for a radical cure of fissure, the entire intestinal track should be cleared of all accumulations by free purgation preceding the time for operating and preparatory to the washing out of the lower part of the rectum. It is our preference that the patient be placed in the Sims position. Before introducing the speculum a small amount of vaseline should be applied to the verge of the anus, also on the blades of the speculum that have already been closed to the smallest possible transverse diameter, when the conical point can be easily passed through the sphincter by a firm yet not painful pressure to the desired depth, when the contractile

force of the sphincter muscle will accommodate itself to the contraction in the blades, and will hold the instrument in place. The required dilatation laterally is effected by turns of the transverse screw *B* attached to and working across the top of the handle. Antero-posterior dilatation is made by a horizontal movement of the retractor part *G* of the handle represented in the cut by dotted lines *E*. Any amount of dilatation



can, in this way, be obtained and retained. After the required dilatation is effected the fissures or ulcers can be seen and carefully cleansed and dried with the aid of a pledget of absorbent cotton held by a sponge-holder, or better, a pair of uterine dressing forceps. After the parts are properly dried, we, by preference, apply strong nitric acid by means of a stick, carefully avoid touching the surrounding healthy tissues, only the slightest amount possible to apply being necessary, and that must be followed at once with a pledget of absorbent cotton that has previously been saturated with a mixture of olive oil and glycerine in equal parts, which must be placed in close contact to the part operated on by the acid, and held there with a probe while the speculum is withdrawn, the dilating adjustments having already been loosened.

It may seem a little harsh to use nitric acid on these parts. It is true it produces some more pain than applications of stick caustic of silver, but the after-effect more than compensates for the extra suffering. Nitric acid applied to these parts does not produce the same degree of hardness and contraction of tissues as that produced by applications of nitrate of silver stick, and after the separation or slough comes off we have a much cleaner surface left to heal up; hence our reasons for its use. However, we frequently use a solution of nitrate of silver to slight ulcerations by means of a hair pencil, and have good results at the time of operating. For a radical cure of fissure or ulcerations within the rectum a sufficiently large dose of opium should be given to restrain further movement of the bowels for two or three days, and before the accumulation of two or three days be allowed to pass through the now constricted and partly healed parts, it must be rendered as near liquid as possible by free injections of warm water. After the contents of the bowels have passed, the lower bowel must again be washed out; no particles of fæcal matter must be left back to irritate the parts. A second application can be made in the same manner as before, pursuing the same plan throughout until a cure is effected. It should be remembered that a cure largely depends on rendering the evacuations soft and non-irritating, and the washing out after each evacuation all the residue. In fact, we have seen many cures effected by such means alone where the ailment was yet slight and of recent origin and the patient otherwise healthy. To effect a cure, even in the simplest cases, the plan has to be long continued and thoroughly carried out. No hardened fæces must be allowed to pass over the diseased spots, for at each passage of hardened fæces the lower part of the rectum is so greatly distended that all partly healed rents are torn open afresh, and the healthy granulations are scraped off; new irritation is added, and cicatrization is of necessity retarded.

In conclusion, we again insist that it is mere presumption for a surgeon to attempt to diagnose many of the diseased conditions of the rectum digitally: an accurate diagnosis is only arrived at after a careful ocular inspection. A false delicacy that prevents such an examination is radically wrong, and has brought the treatment of this class of ailments into disrepute among the laity; yet a majority of such afflictions are amenable to treatment, frequently requiring only a trivial operative interference for a cure, once the real pathological condition is known and understood by the attending physician or surgeon.

November, 1886.

—The Aargau Grossrath has resolved upon using a part of the money resulting from the abolition of nunneries, for establishing a cantonal refuge for incapacitated and crippled paupers of both sexes.

Medical Societies.

NEW YORK ACADEMY OF MEDICINE.

Regular meeting, December 2, 1886. A. Jacobi, M. D., President, in the chair.

Nomination of Officers.

Among those nominated for office were: For President, A. Jacobi, M. D., A. L. Loomis, M. D., John C. Dalton, M. D., and Cornelius R. Agnew, M. D., who declined. For third Vice-President, E. D. Hudson, M. D., and W. H. Draper, M. D.

A Phthisical Lung Injected with Carbolized Iodine.

Dr. J. Blake White presented the left lung of a young man who had died of pulmonary phthisis in October last. He had suffered from night-sweats, profuse expectoration, cough, emaciation, loss of appetite, etc. All of these symptoms improved after the intra-pulmonary injections of carbolized tincture of iodine, with a little morphine and atropia added. The site of the injections, which were three in number, and made at intervals of about a week, being over a pulmonary cavity near the apex of the left lung. No reaction followed, and the aforementioned benefits were observed. Dr. White's term of service having then expired, the injections were discontinued, and the patient died six weeks later. Cicatrization was noticed to have been promoted by the injections. Dr. White referred to the contribution to the subject of intra-pulmonary medication in phthisis by Dr. Pepper and others.

Laryngeal Diphtheria—Intubation and Pathological Anatomy.

Dr. W. P. Northrop read a paper in which he gave a brief outline of the pathological anatomy in eighty-seven cases of death from laryngeal diphtheria during five years at the New York Foundling Asylum, and considered the subject of intubation of the larynx for the relief of laryngeal stenosis. Of the eighty-seven cases fifty were in females and thirty-seven in males, and the average was two years and seven months. The greatest mortality was from three to four years, thirty-six of the patients dying at this age. Fifty-six of the eighty-seven cases began with symptoms indicating that the membrane made its appearance in the larynx either before or simultaneously with that in the pharynx. In thirty-one cases the average time from the commencement of the diphtheria to the beginning of croupy symptoms was two and a fourth days. In fifty-four cases the average time from the beginning of croupy symptoms until death was three and four-fifths days. Of the eighty-seven cases those accompanying or following measles were twenty-two; scarlet fever, eight. In fifty-four cases there was pneumonia. The cases in which the lesions were not plainly declared during life had been subjected to a post-mortem and microscopical examination, and the diagnosis made according to the findings. As a rule, bronchopneumonia was found. It was difficult to attribute death to any one factor when there was such a complication of conditions, such as sepsis, bronchitis, pneumonia, and nephritis. In twenty-nine of the cases there was sufficient pneumonia to account for death; twenty-seven of the patients were believed to have died from the extension of the diphtheria into the bronchi. The usual temperature at the highest was 104° to 105° F. The distribution of the membrane had been as follows: In nine it extended from the tip of the nose to the finest bronchi; in six, from the nose to the bifurcation of the trachea; in seventeen from the pharynx to the finest bronchi; in seventeen also from the larynx to the finest bronchi; in seventeen also from the pharynx to the main bronchi; in seventeen again in the larynx and trachea; in three it was limited to the pharynx and larynx; and in one to the larynx. Interstitial emphysema was found in eight cases, and pronounced vesicular distension in nine.

In the spring of 1881, Dr. O'Dwyre commenced experimenting on the cadaver with intubation of the larynx, and during the past five years he had so far perfected his method that the operation could be performed without a great deal of difficulty, particularly after an experience on the cadaver; it did away with the necessity for an anæsthetic, a trained assistant, the making of a fresh wound, and the fear inspired by tracheotomy; it relieved laryngeal dyspnœa; the parents and friends readily gave their consent to the operation; twenty-eight and a half per cent. of the reported 165 cases of laryngeal diphtheria operated upon by this method for the relief of stenosis had recovered. It had only two objections: one being the embarrassment which the child experienced in swallowing liquids, but which, to a large extent, was usually overcome; the second being the possible danger of pushing the membrane before the tube when introducing it, and thus blocking the trachea. But the latter objection was also applicable

to tracheotomy. The tube to be introduced varied in size according to the age of the patient, and accompanying the set was a mouth-gag, an introducer, an extractor, and a scale indicating the size to be used. The relief following the introduction of the tube was very marked and gratifying to the parents, who, on account of the great improvement in the patient's condition, at once hoped for recovery; but the physician should not allow himself to be deceived and make a favorable prognosis unless the improved condition continued at least forty-eight hours.

Dr. Francis Huber related eleven cases of laryngeal diphtheria in which he performed intubation of the larynx after the development of marked stenosis. Four of the eleven recovered; one was still wearing the tube. Dr. Denhard had likewise operated in eleven cases, five recovering.

Dr. A. S. Hunter had intubed the larynx in two cases of laryngeal diphtheria, and having had previous experience on the cadaver, he found no difficulty in introducing the tubes. He thought the patient could swallow a considerable quantity of fluid with the tube in the larynx better than a small quantity.

Adjourned.

THE BALTIMORE ACADEMY OF MEDICINE.

Stated meeting, November 16, 1886.

Calcification of Coronary Arteries.

Dr. James Carey Thomas said a case had recently occurred at the Almshouse that he considered interesting. The patient, while walking across the floor, suddenly dropped, absolutely dead. Autopsy revealed calcification of coronary arteries and calcification elsewhere in the heart. It has been pointed out that in those cases in which death is instantaneous the trouble will usually be found in the heart.

Dr. J. J. Chisolm said deaths arising from lesions in the brain are never instantaneous.

Dr. Thomas said he was anxious to know what the autopsy had revealed as the cause of death in the case of Dr. Richardson, of Philadelphia.

Dr. Van Bibber related a very amusing experience that he had had in the early days of his medical career. He was suddenly called upon to do a post-mortem examination on a young colored woman who had died suddenly on the street. He, after procuring the assistance of four of his young medical brethren, proceeded to find the cause of death. The autopsy was begun at about ten o'clock on a very warm summer morning, and ended the next afternoon at four o'clock, and he has not yet discovered what was the reason for the woman's death. His description of the method employed for removing the spinal cord was exceedingly amusing, especially as after hours of labor the cord was removed, an unrecognizable mass. He said that this experience had been recalled to his mind by the very strong contrast between the methods employed for these operations at that time, and those used at the present date.

Dr. G. Lane Taneyhill said he did not think the improvements on these methods were all of very recent date, as in 1864, during his service in the civil war, the instruments employed at autopsies were of a very convenient design.

Dr. John Uhler has seen so much blundering by general practitioners who pretend to make post-mortem examinations that he has concluded that when an autopsy is to be made, it should be referred to some one especially trained in this work.

Dr. James Carey Thomas said as regards the case of fracture of cervical vertebræ referred to by Dr. Van Bibber that he had been informed that no definite opinion as to the true nature of the bony lesion had as yet been given, and that the tissues were now undergoing manipulation preparatory to his histological examination.

A Contribution to the History of Hydramnios.

Dr. Robert T. Wilson closed the exercises of the evening with a very exhaustive paper with the above title.

An Anecdote of the Late Dr. Wakley.

Mr. Edmund Yates tells a story of the late Dr. Wakley, who, it appears, was one of the *habitués* of the *bals masqués* which used to reign in London in the days of Julien and his band. On one occasion he appeared dressed as the devil—horns, tail, and other Satanic accessories. Having met with a cheerful reception from almost everybody—for, Mr. Yates says, he was brimful of fun and animal spirits—he at last addressed a languid swell, who looked with infinite disgust on the giddy throng. "Who are you?" inquired the swell. "Can't you see? I'm the devil," said Wakley. "Then go to—your kingdom," replied the swell, and the doctor was not seen for the remainder of the evening.

Periscope.

Undeveloped Sexual Organs and Congenital Defect of Tonsils.

Before the Clinical Society of London, Mr. A. Pearce Gould read a paper on a case of Undeveloped Sexual Organs, associated with Congenital Defect of the Tonsils. It was that of male, aged 27, over six feet high, slender, with fair, soft, smooth face, a boy's voice, and no hair on his face. The penis and both testicles were small, but the right epididymis was thickened, which Mr. Gould attributed to a blow on the part when the boy was eleven years of age. The prostate could scarcely be felt through the rectum, and the seminal vesicles could not be felt. The man had no sexual desire; the only sign of any sexual activity was occasional slight priapism. There was an oblique inguinal hernia on the right side. The pillars of the fauces were close together, and only very small tonsils could be seen or felt between them. Mr. Gould said the case raised the question whether there was any intimate connection between the tonsils and the testicles. It was a popular notion that excision of the tonsils before puberty endangered virility, and Dr. Shorthouse, quoted by Dr. Ogle, was named as a writer who spoke of such an effect as a matter of common observation. The shrinking of enlarged tonsils, and the cessation of repeated attacks of tonsillitis at puberty, were adduced in support of the influence of sexual maturity upon these organs. On the other hand, in Zanzibar, where all boys have their tonsils excised, the testicles are well developed, and the operation now is so common that, were it liable to be followed by such a grave result as non-development of the sexual organs, abundant evidence of this fact would be forthcoming. The removal of an enlarged organ was different from its imperfect development, and might be attended with different results. Mr. Gould had seen two women with absent or undeveloped ovaries, and in whom the tonsils were of full size; and Dr. Langdon Down, who had seen many cases of imperfect sexual development, had not observed any associated change in the tonsils.

Mr. Thomas Bryant considered that there was no special relationship between the atrophy of the tonsil and testicle.

Dr. Felix Semon agreed with this opinion, and said that the size of tho tonsil was very variable in the adult, and appeared to have no relation to virility. There might well be a remote connection between the tonsils and the testicles. Enlargements of adenoid tissue anywhere had a tendency to disappear after puberty. Authors had described cases of defective development of the tonsil associated with longitudinal slits in the anterior arches of the soft palate.

Mr. Warrington Haward, speaking of the alleged connection between the tonsil and testicle, said that in tonsillotomy removal of a portion of hypertrophied tonsil was all that was practiced. What would happen to the testicle if the whole of the tonsil was removed could not be stated. In his opinion the man had as much tonsil as many virile individuals. That there was some connection between the activity of the genital organs and of the tonsils he could not doubt; in many women the process of menstruation was attended with temporary swelling of the tonsils.

Dr. Hingston Fox thought the atrophy of the tonsils and that of the testicles were mere coincidences. The diminution in size of the tonsils at puberty was but part of a general diminution of organs composed of adenoid tissue, and might be attributed to a lessened demand for leucocytes. At the period of menstruation there was general slight temporary congestion of lymphatic tissues.

Mr. Rickman J. Godlee asked whether the patient had had mumps.

Mr. Pearce Gould could not say for certain whether the man had had mumps; the past orchitis was believed to be due to a blow from a cricket-ball.

A Boy with Unilateral Proptosis.

Before the Ophthalmological Society of the United Kingdom (*Brit. Med. Jour.*), Mr. G. E. Walker showed a boy, aged sixteen, with a certain degree of proptosis of the right eye. His history was that he had slipped down some stairs, and had hit his head so as to render himself unconscious for three days. There had been no bleeding from the ears or nose, or other proof of fracture. On recovery, he noticed a swishing noise in his head, and, five months later, his right eye became engorged and protruded; the left also was for a little while unduly en-

gorged. The disease had been slowly progressing since it was first noticed. The diagnosis lay between a communication between the artery and the cavernous sinus and a true aneurism. He had been in favor of tying the common carotid artery, but Mr. Hutchinson and Mr. Holmes had advised delay, and he was anxious to hear the opinion of the members of the Society.

Mr. Hutchinson thought that Mr. Walker deserved the very highest praise for his zeal in bringing from so great a distance on this and on many previous occasions cases to illustrate points in his practice. He was very much interested in the case of proptosis, having seen the boy two months previously. The diagnosis lay between an aneurism of the carotid artery and a communication between the artery and vein; the turgescence of the retinal veins was very marked, and from this and other facts he believed there was a communication between the artery and the cavernous sinus. It was a question what would be the advantage and what the degree of success from ligature of the common carotid; his own opinion was that ligature would not succeed. It was to be remembered, also, that cases sometimes lasted a great many years without serious inconvenience, and the boy was in good general health, and did not really suffer from more than the discomfort occasioned by his appearance and the noise in his head.

Dr. Brailey had seen a very similar case in which double proptosis had come on after an injury.

Mr. Eales mentioned a case in which an orbital aneurism developed after an injury to the head in a coal-mine, and a large visible pulsating tumor, with a murmur and thrill in it, rapidly appeared. Iodide of potassium having failed, the question of operation was raised, but it was decided to wait, and, before the next consultation, the noise in the head suddenly ceased, and the pulsation, murmur, thrill, and proptosis disappeared. It was evident, therefore, that spontaneous cure might take place. He asked whether, in this case, digital pressure had been tried.

Mr. Frost referred to the case he had shown some years previously, in which the symptoms had existed for over thirty years.

The President said that, five years previously, he had tied the common carotid artery in a case of this kind, but the symptoms had reappeared within the last year, and he had seen that happen before. The diagnosis, he thought, depended upon the character of the murmur heard; if continuous, it indicated arterio-venous communication; if intermittent, an aneurism. He agreed with Mr. Hutchinson as to the chronic nature of the disease. A case of Mr. Bowman's showed the difficulties of diagnosis. A woman who had all the symptoms of orbital aneurism had her common carotid artery tied, and died a few days later from secondary hemorrhage. On examination, it was found that the symptoms had been due, not to aneurism, but to thrombosis of the cavernous sinus.

Aneurism of the Artery of the Sylvian Fissure.

A case of aneurism of the artery of the Sylvian fissure has been reported to a Norwegian medical journal by Dr. A. Linboe. The patient, a woman aged forty-nine, came to Gaustad Asylum with melancholia. She had had a cardiac affection for many years. Besides melancholia, she complained at times of pain in the head and a feeling of irritability. There was some distortion of the face, the angle of the mouth being drawn down. One afternoon the patient became suddenly ill, entirely losing consciousness. A puffiness of the cheeks was observed. The left pupil was dilated, and did not react to light; the right pupil was also reactionless. There were slight convulsions, and the woman died at 11:45 p. m. The distortion of the face, which had disappeared, was again present immediately after death. Eleven hours after, a necropsy was made. The anterior portion of the right parietal convolution was covered with a thin layer of coagulated blood. Over the whole of the left hemisphere there was a more or less thick layer of blood, especially in the left Sylvian fissure, where it had a thickness of about five centimetres; on the interior of this, a nodular aneurismal enlargement of the artery was found, about three centimetres in diameter. There was but little atheroma in the trunk of the artery of the Sylvian fissure on the left side, but a considerable amount of it on the corresponding artery on the right side.

A Cow that Gives Down Milk Punch.

One of the novelties in Paris is a big wooden cow built in front of a *cafe*. The milkmaid milks a stream of milk-punch into a glass, and a placard proclaims the following astonishing fact: "France has sent Bartholdi's Goddess to America, and America gratefully sends in return a milkmaid."

THE

Medical and Surgical Reporter.

A WEEKLY JOURNAL,

ISSUED EVERY SATURDAY.

D. G. BRINTON, M. D.,
JOSEPH F. EDWARDS, M. D., } EDITORS.

The terms of subscription to the serial publications of this office are as follows, payable in advance:—

Med. and Surg. Reporter (weekly), a year, $5.00
Quarterly Compendium of Med. Science, - 2.50
Reporter and Compendium, - - - 6.00
Physician's Daily Pocket Record, - - 1.50
Reporter and Pocket Record, - - - 6.25
Reporter, Compendium and Pocket Record, 7.00

For advertising terms address the office.

Marriages, Deaths, and Personals are inserted free of charge.

All letters should be addressed, and all checks and postal orders drawn to order of

THE

QUARTERLY COMPENDIUM

OF

MEDICAL SCIENCE.

The attention of our readers is especially called at this season to the ***QUARTERLY COMPENDIUM,*** which we publish.

It is, in fact, a supplement to the ***REPORTER,*** being made up of articles which have not appeared in the weekly, but yet are of value and interest to the physician.

It contains about 150 pages of reading matter in each number, and the whole four numbers, embracing 600 pages of choice material, will be sent to paid-up subscribers to the ***REPORTER*** for the very moderate price of

ONE DOLLAR,

in advance, for the year.

Address **DR. D. G. BRINTON,**
115 South Seventh Street Philadelphia.

THE CONTAGIOUSNESS OF SCARLET FEVER.

The name of Meigs is so intimately associated with all that pertains to the diseases of children that any utterance is received with great weight. Dr. Arthur V. Meigs stands prominently forward as an authority on the diseases of childhood, not only because of reflected fame from his great father, but because of his individual efforts in this direction. Hence, if Dr. Meigs avows a dangerous belief, it is much more calculated to do harm than were the same pernicious doctrine enunciated by a lesser luminary. And Dr. Meigs has enunciated a most dangerous doctrine, and one which cannot be allowed to pass unchallenged. Before a recent meeting of the Philadelphia County Medical Society, this author read a paper on the "Contagiousness of Scarlet Fever," in which he endeavored to demonstrate that the disease was not nearly so contagious as was commonly supposed, and that an unnecessary degree of anxiety and dread existed among the public on this score. He was, apparently, not very decided in this belief, for he still advocated that it would be well, when one child is taken sick, that the others should be removed, providing they can be kept away for *three months.* His arguments are not strictly logical, for he bases his belief in the lesser contagiousness of scarlet fever on the fact that he has rarely seen the other children in a family taken with the disease when one has been seized; but he says that scarlet fever is not contagious in the early stages, and it is in this very point, coupled with the prevalent fear of the disease, that we find the immunity which he attributes to non-contagiousness. The very fear of the community is its safeguard, for when one child is taken sick the others are usually kept away from it, and as the disease is not contagious in its early stages, they thus escape. It is true that Dr. Meigs cited some cases where intercourse was kept up, yet the disease did not spread. We have known some soil that would not grow potatoes, yet we did not find therein an argument that the ground was not the proper place to plant them. A very general discussion followed the enunciation of these remarkable views, and it was clearly evident that the majority of those present did not share in them. We feel that the public should be, at all times, urged to the greatest caution in all contagious diseases; isolation we know is the most potent means of preventing their spread; and it is an evil hour for the community when a physician, and particularly one of

authority, tells them that they have been unnecessarily solicitous in this respect.

Notes and Comments.

Annual Subscriptions Due.

Our readers will please remember that on January 1st many of their subscriptions fall due for the ensuing year. We trust that they will forward the amount promptly, as this action on their part will increase the efficiency of the management, and save the disagreeable necessity of "dunning" at a later period. We therefore particularly request that *all* whose subscription expires December 31st, will remit as early in January as possible. If bills are wanted, send us a postal card with the request.

Epitheliomatous Tumor of Cæcum.

In the *Progrès Médical* of October 9th, a rare case of primary cancer of the cæcum, occurring in a male, aged 51, is recorded by M. Paul Blocq. Malignant disease primarily attacking this part of the gut is rare, and this case is interesting from the fact that death resulted from perforation of the bowel in the neighborhood of the new growth, producing fatal collapse, and not, as has happened in recorded cases of a similar nature, from obstruction. The patient had, fifteen minutes prior to seeking advice, complained of pain of a stabbing character in the right side. Shortly afterwards, he could detect by the hand the presence of a small tumor, about the size of a walnut. He became rapidly emaciated, and had a cachectic look. He never evinced any special symptoms indicative of grave disturbance of the gastro-intestinal tract, no vomiting, no constipation, no diarrhœa. The tumor was not apparent to the eye, but was readily felt by palpation; it was painful to the touch, smooth, somewhat hard, and mobile. The patient died after having been under observation four months, or fifteen months after the development of distinct symptoms. At the necropsy, a small pedunculated sloughing growth was detected close to and invading the ileo-cæcal valve, as also a small perforation in the wall of the gut, which had been the immediate cause of death. The greater part of the neoplasm, owing to putrefactive change, resisted the action of the stains for microscopic examination; those sections, however, which took up the coloring agents revealed the characters of a cylindrical epithelioma. There was no evidence of cancerous disease in any other organ of the body.

Cases of Renal Surgery.

The following short accounts of two cases, which have been recently operated on, are reported by Mr. Clement Lucas in the *Lancet*. They are illustrative of the renal surgery of the present day, and the fact that they are reported so briefly proves that these operations are becoming more frequently performed:

On September 29, Mr. Clement Lucas operated in this hospital upon a married woman, aged thirty-seven, who had been suffering for some years from a painful movable right kidney, which of late had incapacitated her for household duties. She was sent to London by Mr. Cockell, of West Hartlepool. The kidney was exposed through the loin, and stitched to the lumbar aponeurosis. The immediate effect of the operation was to completely remove the pain. The wound healed primarily, except at one spot (where a stitch afterwards escaped), and she remained free from pain up to the time she left the hospital.

On October 29, Mr. Lucas performed nephro-lithotomy upon a patient sent by Mr. Waller, from Sydenham. She was an unmarried woman, aged thirty-nine, who had suffered from symptoms of renal calculus for six or seven years. A conical stone, seven-eighths of an inch in its two longest diameters, was extracted from the pelvis of the right kidney. The wound is now healed, and the patient convalescent. Since the operation the amount of urine has doubled, indicating that previously the conical stone was acting as a stop-cock to the top of the ureter.

Extemporaneous Examination of Woman's Milk.

The *Journal d'Hygiene* publishes an expeditious proceeding, somewhat empirical perhaps in its nature, for recognizing extemporaneously the quality of the milk of a nurse. This process, suggested by Dr. de Hélot, consists in comparing, by means of a drop-pipette or from the nozzle of a Pravaz syringe; the number of drops which yield a certain volume at 15° C., with the number of drops of water which give the same volume at the same temperature, from the same pipette or syringe. When the milk is of good quality, it gives 35 drops, while water only gives 30. If the milk is of superior quality, the number of drops may rise to 36,

37, or 38. It is prudent to try the milk of both breasts.

A Substitute for Quinine.

The *Moniteur des Produits Chimiques* is informed that Professor Fischer, of Munich, after an extended research on the nature and properties of quinine, has discovered that a substance may be extracted from coal-tar which exercises on the human organism an action identical with that of quinine. The substance appears in the shape of a white crystalline powder. Administered in cases of fever, it has the effect of rapidly lowering the temperature, and its efficacy in this respect is stated to be so remarkable as to permit the use of ice to be dispensed with. In the stomach this wonderful powder assimilates with even greater facility than quinine.

Renal Surgery.

Mr. Clement Lucas performed nephrorraphy in Guy's Hospital, London, on September 29. The patient was a married woman, aged 37, who had suffered from a painful movable right kidney for several years, and of late had been quite incapacitated for household duties. The kidney was exposed through the loin, and stitched to the lumbar aponeurosis. The immediate effect of the operation was to remove the pain completely. The wound healed by primary intention, except where a drainage-tube was inserted, and one of the deep stitches was eventually discharged at this spot before the opening finally closed. She remained free from pain up to the time she left the hospital.

Hyoscyamine in Chorea.

Hyoscyamine has been used by Dr. Dana in a large number of cases of chorea, and in the great majority of cases it caused decided improvement, prescribed as follows:

℞. Merck's cryst. hyoscyamine, gr. j.
Aquæ destillat., ℥j.
M. Sig.—♏viii. t. i. d., increased to ♏xv. or xx.

Children can generally take twelve or fifteen drops, about $\frac{1}{30}$ grain, three times a day. In one case a boy of twelve took nearly thirty drops, or $\frac{1}{15}$ grain, three times daily.

—Dr. Girtanner, of St. Gall, has lately celebrated his sixtieth year as a medical practitioner. He is now 84 years of age, and enjoys excellent health and most active professional life, as well as the deep respect and love of all his colleagues.

Correspondence.

Points in Midwifery.

Eds. Med. and Surg. Reporter:

In a recent number of your journal, I saw an article by Dr. Mitchell, of Addison, Pa., giving the author's views on midwifery, which contain some points so different from my own experience, that I write to ask if my ideas, derived from an attendance on four or five hundred cases within the past seven years, are at variance with the majority of practitioners or not. He says "nothing is better when the os is rigid than a moderate dose of morphia, using the fingers as a dilator."

I have found in that class of cases that five grains of hydrate of chloral, combined with the same quantity of potass. bromid., or even ten grains of the latter, had a much better effect, without retarding labor, as almost invariably happens after taking morphia. Another very simple remedy which has a happy effect on these cases, is obtained by a slight scratching of the cord-like os with the finger nail, when the pain causes it to become very tense. This will often cause it to become spongy, and dilatation will go on rapidly. I have had only one case of lacerated cervix, and this occurred where the child was born before I arrived, the woman not having more than a half dozen pains, and very severe ones. Forceps I have made use of several times, and the longer I practice the more I am convinced that the accoucheur deserves to be censured when he allows a woman to go through the terrible suffering attending a labor of twelve or twenty-four hours after the commencement of the second stage. The forceps skillfully used never injure, and always relieve. Often ladies request that they be applied when confined, after being relieved by them in a previous labor. When for any reason it sems best to do something to relieve, and it is not advisable to apply instruments, chloroform, inhaled moderately, does well, and does not retard in the slightest. During second stage, with primiparæ, it is my custom to use it in nearly every case, unless some good cause, like disease of the heart or lungs, prevents.

One more point—convulsions are controlled in the majority of instances with hypodermatic injections of morphia in full doses, combined with atropia, and when occurring after delivery, it seems to me to be a better remedy.

I fully agree with Dr. Mitchell in his re-

marks regarding the use of the binder, and never feel as easy after leaving a patient without one as when it is properly applied.

H. L. MANCHESTER, M. D.
Pawlet, Rutland Co., Vt.

NEWS AND MISCELLANY.

How to Destroy Cravings for Unwholesome Food.

The New York correspondent of the *Phila. News*, writing of Miss Catharine Wolfe, a very rich lady, who is hopelessly ill, says:

"About five years ago she became aware that rich living had started Bright's disease, and that she could not recover, but her life could be prolonged considerably by assiduous medical attention; and so she engaged Dr. William Tod Helmuth at $50,000 a year to call on her twice a day. Diet was all important, and so Miss Wolfe had to deny herself many accustomed luxuries of the table. She had a curious system of reconciling herself to these deprivations.

"'I got the suggestion at a reception given by a stingy woman,' she said. 'The sideboard was meagerly set out with viands, and the best dish was lobster. Well, right back of that supply of lobster she had put a picture of a live lobster—a horrid, creepy, repulsive thing. What for? Simply to spoil the women's appetite for lobster. It was a device of economy. From that I got an idea. I would study up the sources of all the food that was bad for me, and so destroy my liking for it. And it has worked pretty well. There isn't much we eat that will bear strict scrutiny.'"

Time to Have a Good Cry.

A story is told of an old squaw, who, when found weeping bitterly, with an empty bottle in her hand, explained that she "lost a little papoose twenty years ago, and couldn't stand it any longer!"

Items.

—The water-carts of Lowell are decorated with patent medicine advertisements. An innocent Irishman from the rural districts looked at one the other day, and remarked: "Faith, it's no wondher Lowell is healthy, whin they wather the streets with ———'s Sarsaparilla."

—Dr. J. Solis Cohen has noticed a peculiar perversion of the temperature sense of the tongue and oral cavity, caused by strong solutions of cocaine. While still capable of appreciating heat, the patient cannot recognize cold, and iced water seems of blood-heat, or even warmer.

—An instance of the reckless practice of holding wakes was recently reported to the coroner of Dublin. A physician stated that he found a number of men, women, and children assembled at a wake in Blackhall street, Dublin, where two children had died of malignant scarlet fever.

---Before an English medical society Dr. Sloan exhibited a Hewitt's pessary, which had been incarcerated in the vagina of an aged patient. He detailed the steps taken for extraction, and remarked upon the necessity which rested upon all practitioners to warn their patients that pain, or discomfort of any kind, was a sign to them that the instrument should be removed.

—The Graefe Medal, founded in honor of the great ophthalmologist by the Ophthalmological Society of Heidelberg, is to be awarded every ten years to the person, irrespective of nationality, who has done most to promote the progress of ophthalmology, and the first award has just been made to Professor Helmholtz, the inventor of the ophthalmoscope.

QUERIES AND REPLIES.

FOTHERGILL'S FEVER MIXTURES.

EDS. MED. AND SURG. REPORTER:

E. P. R., Tuscumbia, Alabama, inquires for formula for Fothergill's Fever Mixture. It is as follows:

℞. Acid hydrobrom.,	ʒj.
Syr. simplicis,	ʒij.
Aqua pur. ad.,	ʒj. M.
Sig.—Every hour.	F. J. WHITTEN, M. D.

PRESERVATION OF RUBBER GOODS.

EDS. MED. AND SURG. REPORTER:

Your correspondent, Dr. W. N. Sherman, asks for a method of preserving rubber goods in a dry climate. We have experienced the same difficulty in our chemical laboratory, and here we have the additional action of fumes from acids and other chemicals. I have resorted to the expedient of keeping my stock, when not in actual use, in glass jars filled with water, and would suggest that this method might be applied in all cases where soaking in water would not injure the goods.

E. H. S. BAILEY.
Lawrence, Kansas.

SPOILING OF RUBBER GOODS.

Under "Queries and Replies," page 704, Dr. W. N. Sherman, of Arizona, complains of the spoiling of his rubber articles by the dry climate. We live on the shore, 6,000 feet below him, and our rubber instruments soon spoil, and for the reason not of the climate, but because the rubber in these days is so reduced and weighted by heavy powders that there is no life or strength left in it. In a few months it becomes no elastic and brittle. The American manufacture is worse than the English. I have no doubt that if Dr. Sherman could procure real rubber articles they would stand his climate, since rubber is very little affected by either moisture or dryness. Many rubber instruments of to-day are not worth carrying home. I burst a new syringe bulb the other day the first time I rinsed water through it. Dentists' dam rubber soon becomes powder in the drawer.

Boston, Mass. E. CHENERY, M. D.

A NEW EMMENAGOGUE.

The following is an abstract from a letter written by one of the most prominent gynæcologists of the country, to another:

"Thus far no perfect emmenagogue has been discovered, but I regard the manganese as the best I have met with. It should be styled a regulator of menstruation rather than a pure emmenagogue, for it is useful in the absence of the menses, irregularity of their recurrence, and even in excess of flow.

"The preparation which I now employ is McKesson & Robbins' pills of the binoxide of manganese. Of this preparation I give two grains three times a day throughout the month and during the period.

"I also employ manganese in chlorosis and anæmia, and I think that by its use I obtain better results than I have heretofore done by iron." (See *Medical Record* of March 6th, page 274.)

Specify McK. & R.'s Pills Manganese Binoxide.

Important additions to McK. & R.'s list of Gelatine Coated Pills:

McK. & R. *Cascara Sagrada* and *Nux Vomica*: Ext. Cas. Sagr. gr. ii; Ext. Nux Vom. gr. 1-5.

McK. & R. Cascara Sagrada, Nux Vomica and Belladonna: Ext. Cas. Sag. gr. ii; Ext. Nucis Vom. gr. 1-8; Ext. Bellad. gr. 1-16.

McK. & R. Hydrobromide of Hyoscin 1-100 gr.

McK. & R. Binoxide of Manganese 2 grs.

McK. & R. Valerianate of Quinine ½, 1, 2, and 3 grs.

McK. & R. Valerianates Iron, Quinine, and Zinc: Ferri Valer., Quin. Valer., Zinci Valer., āā gr. i.

McK. & R. Oleate of Manganese 20 per cent. May be used to advantage when the pills cannot be administered.

Always specify McK. & R's.

COCAINE.

Although only eighteen months have elapsed since Koller's announcement of his discovery of the anæsthetic properties of this alkaloid, Cocaine already ranks among the most important agents of the practitioner. In general and dental surgery, ophthalmology, laryngology, and general therapeutics, its value is everywhere attested.

We began its manufacture immediately after the announcement of Dr. Koller, and samples of our product were submitted to many noted specialists for their experiments, and the results were highly gratifying. The demand for our manufacture of the salt, solutions, and oleates, has continued to increase, and we desire to express our sincere thanks to the medical, pharmaceutical, and dental professions for their kind encouragement as shown in their recognition of the merits of our preparations. Our appreciation of this will be shown in our constant efforts to supply all their requirements in chemicals and pharmaceuticals, of a quality worthy of their entire confidence.

Special quotations on Terebene and Cocaine for specified quantities. Very respectfully,

McKESSON & ROBBINS.

TEREBENE.

McKESSON & ROBBINS

WERE THE FIRST IN THIS COUNTRY TO MANUFACTURE THIS VALUABLE REMEDY FOR

Winter Cough, Bronchial and Chest Affections, Flatulency, Acidity, and other forms of Dyspepsia.

It may be used as an inhalation, or taken internally in doses of five or six drops on sugar every four hours, gradually increasing the dose to twenty minims.

Terebene was brought to the notice of the medical profession as far back as 1873, by M. Riban, who read a series of papers on this and similar substances before the Pharmaceutical Society of Paris. It has lately been brought into prominence by Dr. Wm. Murrell, of London, who has given it in over 114 cases; he has also notes of its value in 81 out of 94 cases. Dr. Murrell says that much of the Terebene now being sold may be described as inferior, and to this fact he ascribes some irritating effects noted in a few of his cases.

We would therefore caution the physician in prescribing and the druggist in ordering to, in all cases,

SPECIFY McK. & R.

BROMIDIA.

FORMULA.— **Every fluid drachm contains 15 grs., EACH, of pure Chloral Hydrat., and purified Brom. Pot., and 1-8 gr., EACH, of gen. imp. ext. Cannabis Ind., and Hyoscyam.**

DOSE.— **One-half to one fluid drachm in WATER or SYRUP every hour until sleep is produced.**

BROMIDIA IS THE HYPNOTIC PAR EXCELLENCE.

It produces refreshing sleep, and is exceedingly valuable in sleeplessness, nervousness, neuralgia, headache, convulsions, colics, etc., and will relieve when opiates fail. Unlike preparations of opium it does not lock up the secretions. In the restlessness and delirium of Fevers it is absolutely invaluable.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	¼ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

VAGINAL ANDERSON'S CAPSULES

Filled with Absorbent Cotton. **Ready for Medication.**

The most practical, convenient and cleanly means of introducing medicine into the vagina. Applicable to all diseases of the vagina and uterus. Perfectly soluble and reliable. May be medicated with any remedy indicated. Endorsed by the most eminent gynecologists. Illustrated circulars and testimonials sent on application. Three sizes. Prices reduced to 60 cents per box. Liberal reduction to the trade. Samples of each size sent on receipt of four cents pastage.

CINCINNATI, O.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

Fluid Forms of Hydrastis.

The reputation of this drug as a therapeutic agent was first gained, through its employment in the form of an *infusion*, and in the fifty years following its introduction into medical practice, a continuous effort has been made by manufacturers to perfect a preparation which would represent all the active principles of the drug, without the high price of the salts, either alone or in combination.

The most prejudicial writers on Materia Medica, accord to the late Wm. S. Merrell the largest share of credit in the introduction of Hydrastis preparations, and to the present organization the reputation of being the *largest consumers of the drug in the world.* For more than a half century, Hydrastis has been made a study in our laboratory, and we do not think we exaggerate its importance when we assert that it stands pre-eminent to-day as the most valuable exponent of our vegetable Materia Medica.

The following preparations, *in fluid form*, are receiving our special attention at this time :

Fluid Hydrastis—MERRELL.

Is what its name implies—the active, medicinal principles of the drug in natural combination and in a fluid form. It has a bright, yellow color, perfectly clear, free from sediment, and with an unmistakable odor of the *fresh drug.*

Fluid Hydrastis is a pure, neutral solution of all the alkaloidal constituents of the drug, rejecting the oil, gums, irritating and offensive resins, and inert extractive matters. The success attending its introduction is the best evidence of its therapeutic value.

Unsuccessful imitations and would-be substitutes are met with on every hand. Preparations said to be "just as good" or "about the same thing," but always " a little cheaper," attest the wide spread and growing popularity of Fluid Hydrastis. All such, compared with the latter as to physical appearance or as representatives of the drug, *are condemned ;* dispensed in prescriptions, *they are readily detected ;* tested therapeutically, they are *promptly rejected* as unworthy of confidence.

Fluid Hydrastis is applicable to the treatment of all irritable, inflammatory and ulcerative conditions of the mucous tract.

This statement of a well-known medical writer and journalist has become axiomatic :

"No remedy for physician's use has been received with such universal approval."

Solution Bismuth and Hydrastia—MERRELL.

An invaluable and scientific combination, wherein the beneficial action of the white alkaloid is increased by association with Bismuth. This solution contains 2½ grains of the double Citrate Bismuth and Hydrastia ; twenty-five per cent. of which is Hydrastia Citrate.

The cordial reception accorded this preparation marks it as the most valuable combination in the market in which the white alkaloid alone represents the valuable properties of the drug. Used in diseases of the nasal passages, of the eye, of the throat, of the stomach and intestines, of the reproductive organs and bladder, it is equally beneficial.

Colorless Solution of Hydrastia—MERRELL.

This is a permanent solution of the white alkaloid, without the addition of any other medicinal agent to modify or increase its action. It is offered without special recommendation to meet the views of a limited number of physicians, with whom the color of the Fluid Hydrastis is an objection. This solution contains in one fluid pint, the same proportionate strength of white alkaloid as exists in an average quality of crude root.

See notes above on Solution Bismuth and Hydrastia.

"Merrell's Hydrastis Preparations" are for sale by Wholesale Druggists throughout the United States. Please specify "Wm. S. M. Chem. Co." in ordering or prescribing.

INTERNATIONAL HEALTH EXHIBITION.

LONDON, 1884.

The Jury Have Granted

TO

Apollinaris

THE

HIGHEST AWARD

Over ALL other Mineral Waters, Natural or Artificial.

"APOLLINARIS reigns alone among Natural Dietetic Table Waters. Its numerous competitors appear to have, one after another, fallen away."

BRITISH MEDICAL JOURNAL,
MAY 31, 1884.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommend d by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

THE PROFESSION.

The following is a partial list of Medical Authors who advise the use of pure alcoholic stimulant, and physicians who prescribe

Duffy's Pure Malt Whiskey:

BLANCARD'S PILLS

OF UNCHANGEABLE IODIDE OF IRON.

Blancard's Pills of Iodide of Iron are so scrupulously prepared, and so well made, that none other have acquired a so well deserved favor among physicians and pharmaceutists. Each pill, containing one grain of proto-iodide of iron, is covered with finely pulverized iron, and covered with balsam of tolu. Dose, two to six pills a day. The genuine have a *reactive silver seal* attached to the lower part of the cork, and a green label on the wrapper, bearing the fac-simile of the signature of

Pharmacien, No. 40 Rue Bonaparte, Paris.

Without which none are genuine.

BEWARE OF IMITATIONS.

E. FOUGERA & CO., AGENTS, NEW YORK.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; Dose from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; Dose, from 8 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on unce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

Tne taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.

A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, is shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $2.75. To physicians $3.00.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

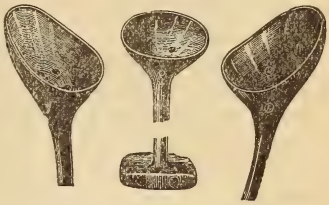
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

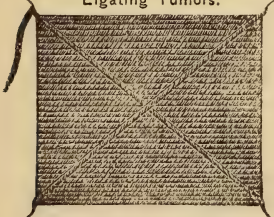
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

HOLLOW SUPPOSITORIES.

WITH CONOIDAL SELF-SEALING STOPPERS,

All made from Pure BUTTER OF CACAO ONLY.

Each box contains A MEDICINE DROPPER and A PAIR OF TONGS.

The object of this invention is to supply Physicians, Druggists, Veterinary Surgeons, and others, with HOLLOW SUPPOSITORIES of various sizes and shapes to meet every probable demand, and into which they can put any kind of MEDICINE or NUTRIMENT, thus producing firm, smooth, EVENLY MEDICATED Suppositories, that are cheaper and more reliable than those made by the old method.

Nos. 0.—1.—2.—3 are provided with conoidal stoppers. The stoppered ends are to be inserted, when the contraction of the sphincter ani will force the suppositories up into the rectum without the use of a suppository syringe or any other appliance whatever.

HALL & RUCKEL, Wholesale Druggists, Proprietors,

218 GREENWICH STREET, NEW YORK.

A sample box of Hollow Suppositories will be mailed free on application, mentioning the PHILA. MED. AND SURG. REPORTER.

Omnico

FORMULA: Boracic Acid, Chlorate of Potassium, Chloride of Sodium, Thymol, Menthol, Gaultheria, and Caryophyllus.

Antiseptic, Disinfectant, Prophylactic, Anti-Inflammatory, Mildly Astringent, Secondary Sedative Action.

An *Alterative* specially adapted to inflamed mucous and cutaneous surfaces.

For all varieties of **Catarrhal** disease, **Pharyngitis, Laryngitis, Diphtheria, Diphtheritic** and **Ulcerous Sore Throat, Stomatitis, Leucorrhœa, Vaginitis, Endometritis, Pruritis, Gonorrhœa, Conjunctivitis, Eczema, Psoriasis, Pityriasis, Genito-Urinary** and **Rectal** disorders.

WELLS, RICHARDSON & CO.'S LACTATED FOOD,

FOR INFANTS AND INVALIDS.

A predigested, non-irritating, easily assimilated food, indicated in all weak and inflamed conditions of the digestive organs, either in infants or adults.

SUGAR OF MILK

Is now recognized as an important element of any artificial food for infants which can be claimed to be similar in composition to mother's milk, which contains it in larger proportion than does cow's or goat's milk.

It has an important influence in overcoming any irritable condition of the stomach and bowels, and thus its presence in an Infant Food is of the greatest value.

Being a pure carbo-hydrate, however, it is not of itself sufficient to constitute a nutritious and healthful food. With it should be combined that best of all foods for the muscular and nervous systems, the Gluten of Wheat, rendered easily soluble by proper treatment.

With these the infant should be given that digestive agent which it most lacks, diastase. This is easily obtained from Malted Barley, and may be so combined with the other constituents that the result will be a food which will nourish every portion of the system, and be digested and assimilated with the greatest ease. This is our claim for Lactated Food. As indicated by its name, it has for its basis Sugar of Milk or Lactose. To this is added the purified Gluten of Wheat and Oats, with Barley Diastase and Malt Extract. The small amount of starchy matter remaining is wholly changed to a soluble form by the action of the diastase.

It has met with remarkable success in the hands of the medical profession in all parts of the country, both as a food for infants, and for adults recovering from acute diseases, or suffering from chronic debility of the digestive organs.

FOR CHOLERA INFANTUM

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1.00, and $2.50. A dollar can will furnish one hundred and fifty meals for an infant.

If any physician that has not yet made a trial of the Lacteal Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

WELLS, RICHARDSON & CO.,
BURLINGTON, VT.

LONG ISLAND COLLEGE HOSPITAL,

BROOKLYN, N. Y.

The Regular Term will Open October 5th, 1886, and continue five months.

The Reading and Recitation Term will Commence March 7th, 1887, and continue three months.

In the Reading and Recitation Term the Recitations are supplemented by Laboratory Work, Lectures, and Clinics.

In the Regular Term the Laboratory Work, Lectures, and Clinics are supplemented by oral and written examinations; and the senior students are admitted, in sections of ten or more, to the wards of the Hospital, where they are thoroughly trained in practical medicine.

The Laboratories, Rectitation and Lecture Rooms, Amphitheatre, Wards of the Hospital, and Dispensary Rooms, are all in the same building, thus affording convenient and ample opportunies for a thorough education in practical medicine and surgery.

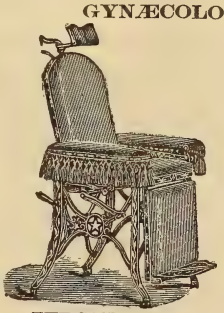
There are over 12,000 patients treated annually in the Hospital, which is under the control of the College authorities, and therefore available for practical teaching.

For circulars, address

J. H. Raymond, M. D., Secretary.

THE CANTON SURGICAL

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

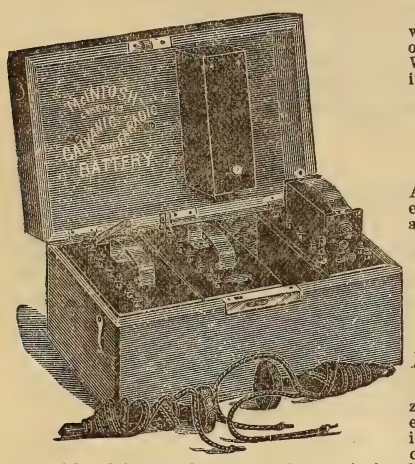
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER

1854

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER

1854

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM,
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

A. E. McDONALD, LL.B., M. D., Professor of Medical Jurisprudence and Psychological Medicine; General Superintendent of the New York City Asylums for the Insane.
HERMAN KNAPP, M. D., Professor of Ophthalmology; Surgeon to the New York Ophthalmic and Aural Institute.
FANEUIL D. WEISSE, M. D., Professor of Practical and Surgical Anatomy; Surgeon to Workhouse Hospital, B. I.
HENRY G. PIFFARD, M. D., Clinical Professor of Dermatology; Consulting Surgeon to Charity Hospital.
F. R. S. DRAKE, M. D., Clinical Professor of Medicine; Physician to Bellevue Hospital.
JOSEPH E. WINTERS, M. D., Clinical Professor of Diseases of Children.
NEWTON M. SHAFFER, M. D., Clinical Professor of Orthopœdic Surgery; Surgeon to New York Orthopœdic Hospital.
PRINCE A. MORROW, M. D., Clinical Professor of Venereal Diseases; Surgeon to Charity Hospital.
WILLIAM C. JARVIS, M. D., Clinical Professor of Laryngology.
LAURENCE JOHNSON, M. D., Professor of Medical Botany; Visiting Physician to Randall's Island Hospital.
S. C. BLAISDELL, M. D., Demonstrator of Anatomy.

THE PRELIMINARY SESSION will begin on Wednesday, September 15, 1886, and end September 29, 1886. It will be conducted on the same plan as the Regular Winter Session.

THE REGULAR WINTER SESSION will begin September 29, 1886, and end about March, 1887. The Plan of Instruction consists of Didactic and Clinical Lectures, recitations, and laboratory work in all subjects in which it is practicable. To put the laboratories on a proper footing, a new building has been erected at an expense of forty thousand dollars.

UNIVERSITY BIOLOGICAL AND PATHOLOGICAL LABORATORY.—The Faculty, aided by generous friends, have enlarged the New Laboratory Building and established a Biological and Pathological Laboratory in connection with its Laboratory of Chemistry and Materia Medica. It is furnished with all the apparatus for the study of Bacteriology, and for special lines of investigation.

Two to five Didactic Lectures, and two or more Clinical Lectures, will be given each day by members of the Faculty. In addition to the ordinary clinics, *special clinical instruction,* WITHOUT ADDITIONAL EXPENSE, will be given to the candidates for graduation during the latter part of the Regular Session. For this purpose the candidates will be divided into sections of twenty-five members each. All who desire to avail themselves of this valuable privilege must give in their names to the Dean during the first week in November. At these special clinics students will have excellent opportunities to make and verify diagnoses, and watch the effects of treatment. They will be held in the wards of the Hospitals and at the Public and College Dispensaries.

Each of the seven Professors of the Regular Faculty, or his assistant, will conduct a recitation on his subject one evening each week. Students are thus enabled to make up for lost lectures and prepare themselves properly for their final examinations without additional expense.

THE SPRING SESSION will begin about the middle of March, and end the last week in May. The daily Clinics and Special Practical Courses will be the same as in the Winter Session, and there will be Lectures on Special Subjects by Members of the Faculty.

It is supplementary to the Regular Winter Session. Nine months of continued instruction are thus secured to all students of the University who desire a thorough course.

FEES:

For Course of Lectures	$140 00
Matriculation	5 00
Demonstrator's Fee, including material for dissection	10 00
Final Examination Fee	30 00

For further particulars and circulars address the Dean,

Prof. CHARLES INSLEE PARDEE, M. D.,

University Medical College, 410 East 26th St., New York City.

STROPHANTHUS,

THE NEW HEART TONIC.

We have at an extravagant cost procured from Central Africa a very limited quantity of Strophanthus. This is the first and only lot that has been offered in the London market.

This new substitute for digitalis was introduced by Dr. Fraser at the last meeting of the British Medical Association, after experimenting with the drug for 15 years. It is the "kombée" arrow poison referred to by Livingstone, and is known as "inée," "onaye," and "onage." It is a woody climber of Equatorial Africa, and probably allied to antiarin, the poisonous principle of the deadly upas tree of Java. The active principle abounds in seeds, imbedded in great profusion in the inner walls of pods about twelve inches long.

Strophanthus is not only more powerful on the heart than digitalis, but is free from all other attendant actions and secondary effects of the latter It seems to be a pure heart tonic. The active principle is freely soluble in water and rectified spirit—a most important point. No cumulative action has been observed even after it has been administered for weeks continuously, and sickness and gastro-intestinal disturbance are not produced so frequently by strophanthus as by digitalis. Scarcely any action is produced by this substance upon blood vessels directly. Dr. Fraser said: "As a result of the action on muscle, the heart is easily and powerfully affected. * * * * By regulating the dose, a very distinct pharmacological influence may be produced upon the heart, while the other muscles remain apparently quite unaffected." "The systole of the heart is increased, and its contractions are slowed by small doses." "The action of the heart is accompanied by a rise in blood pressure, which appears to be directly produced by it." Thus "in disturbances of the circulation, when the blood tension was unduly low, strophanthus was capable of producing a diuretic effect."

"Strophanthus," writes Dr. Fraser, "exerts a much more powerful action upon the heart and a less powerful action upon the blood-vessels, than digitalis. * * * * In difficulties and embarrassments of the circulation depending upon a central cause, it seems preferable to act on the heart alone, rather than also to increase its difficulties by closing the blood, vessels into which it must empty itself." Strophanthus may "be used with advantage in all weak states of this organ whatever the cause of weakness," but in case of degeneration, or sufficient compensatory change, it will probably do little good. Dr. Fraser further stated that under its use he had occasionally seen pyrexia disaapear, and that very frequently the charts of his apyretic cases exhibited a subnormal temperature.

The quantity we hold is so very small that, in order to accommodate as many customers as possible, we only supply one bottle in any sample.

Put up in form of Tincture, Dose 2 to 6 Drops, in half oz. Bottles, at 75c. each.

Miami Medical College,

CINCINNATI, OHIO.

SESSION 1886--87.

The Session of 1886-87 will begin TUESDAY, September 21, 1886, and continue until March 1, 1887.

This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.

J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.

BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.

W. H. TAYLOR, M. D.,
Professor of Obstetrics.

W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.

W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.

N. P. DANDRIDGE, M. D.,
Professor of Practice of Surgery and Clinical Surgery.

T. W. LANGDON, M. D.,
Professor of Anatomy.

JOS. EICHBERG, M. D.,
Professor of Physiology.

W. A. ROTHACKER, M. D.,
Professor of Principles of Surgery and Pathology.

☞For Circulars, address

J. C. MacKENZIE, M. D., Secretary,
or W. H. TAYLOR, M. D., Dean.

The Jefferson Medical College

OF PHILADELPHIA.

THE SIXTY-SECOND SESSION of the Jefferson Medical College will begin on FRIDAY, October 1, 1886, and will continue until the end of March, 1887. Preliminary Lectures will be held from MONDAY, 20th of September.

PROFESSORS.

J. M. DA COSTA, M. D., LL. D.,
Practice of Medicine.

ROBERTS BARTHOLOW, M. D., LL.D.,
Materia Medica, General Therapeutics, and Hygiene.

HENRY C. CHAPMAN, M. D.,
Institutes of Medicine and Medical Jurisprudence.

SAMUEL W. GROSS, M. D.,
Principles of Surgery and Clinical Surgery.

JOHN H. BRINTON, M. D.,
Practice of Surgery and Clinical Surgery.

THEOPHILUS PARVIN, M. D., LL.D.
Obstetrics and Diseases of Women and Children.

J. W. HOLLAND, M. D.,
Medical Chemistry and Toxicology.

W. S. FORBES, M. D.,
General, Descriptive, and Surgical Anatomy.

WILLIAM THOMPSON, M. D.,
Professor of Ophthalmology,

MORRIS LONGSTRETH, M. D.,
Lecturer on Pathological Anatomy.

The regular course of lectures by the Faculty embraces the whole medical curriculum. This course is supplemented by the lectures on special topics, and demonstrations of the Spring and Fall terms, respectively.

The Faculty invite the attention of the medical profession and students to their thorough system of practical Laboratory work. To each department of the regular curriculum there is appended a Laboratory Course, carried on in large and thoroughly equipped apartments in the College, by specially appointed Demonstrators, under the immediate direction of the Professor. In this way each candidate for the degree of M. D. is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Physiology, Histology, and Experimental Physiology, and Minor Surgery, Bandaging, Operations on the Cadaver, etc., and in the Department of Medicine, "clinical conferences," and practical lessons in Physical Diagnosis. There are, we believe, no corresponding practical courses in any other Medical College in this country—not at least to the same extent and with the same variety and constituting a part of the regular curriculum.

This course of Instruction is *free of charge, but obligatory upon* candidates for the Degree, except those who have had such instruction and those who are Graduates of other Colleges of ten years' standing.

THE SPRING COURSE OF LECTURES begins early in April, and ends in June. There is no additional charge for this Course to matriculates of the College, except a registration fee of five dollars; non-matriculates pay forty dollars, *thirty-five dollars of which, however, are credited on the amount of fees paid for the ensuing Winter Course.*

Desirable opportunities are afforded to graduates of Medicine for pursuing special courses, and for instruction in the recognized Specialties.

CLINICAL INSTRUCTION is given *daily* at the HOSPITAL OF THE JEFFERSON MEDICAL COLLEGE throughout the year by Members of the Faculty, and by the Hospital Staff, and at the Pennsylvania and other Hospitals several times a week.

FEES.

Matriculation Fee (paid once)	$ 5 00
Ticket for all Branches	140 00
Practical Anatomy	10 00
Graduation Fee	30 00
Fees for a full Course of Lectures to those who have attended two full courses at other (recognized) Colleges—the matriculation fee, and	70 00
To Graduates of such Colleges, the matriculation fee and	70 00
To Dental Graduates the first course is $60, and the second is	100 00

To Graduates in Pharmacy the general ticket is $100 for each year.

There are no Extra Fees.

The Annual Announcement, giving full particulars, will be sent on application to

Roberts Bartholow, M. D.,

DEAN.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

MEDICAL COLLEGE OF OHIO,
CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.

P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.

SAMUEL NICKLES, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.

JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.

C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.

F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.

JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.

JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.

FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.

J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.

E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.

The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.

Three afternoons of each week are devoted to Hospital Instruction.

The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.

FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & CO.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Diseuse.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

WYETH'S

LIQUID MALT EXTRACT.

Containing all the Nutrient Properties of Malt, with the least possible amount of Alcohol.

THIS IS NOT A BEVERAGE, BUT A MOST AGREEABLE AND VALUABLE NUTRIENT, TONIC AND DIGESTIVE AGENT, CONTAINING A LARGE AMOUNT OF NUTRITIOUS EXTRACTIVE MATTER AND THE SMALLEST PERCENTAGE OF ALCOHOL FOUND IN ANY LIQUID PREPARATION OF MALT. Since the introduction of this preparation to the medical profession, about eighteen months since, it has steadily grown in favor, and those who have given the subject of Malt Extracts the most careful study and investigation, are unanimous in endorsing all the claims we have made for it.

It is especially adapted for administration to nursing mothers and children, to patients suffering from nervous exhaustion, chilliness, impaired digestion, dyspepsia, etc., and particularly to those unable to digest amylaceous food.

The diastase contained in our preparation of malt, renders starchy and farinaceous foods immediately soluble, by converting the starch into malt-sugar and dextrine, in which form they can be readily assimilated by the system, thus *creating* animal heat, and aiding the formation of fat.

To mothers while nursing, it is of inestimable value, as it not only supplies strength to meet the unusual demands upon the system at that time, but improves the quality of the milk, increasing the amount of sugar and phosphates, nourishing the infant and sustaining the mother at the same time.

In cases of consumptive tendencies, and in the latter stages of phthisis, it will be found to improve the appetite, and promote the assimilation of carbonaceous food, supplying the waste of elementary matter, fortifying the system, and enabling it to better resist the undermining effects of the disease. It also acts as a roborant in all cases of debility, and is a most valuable addition to the tonic and restorative treatment required in convalescence.

As it contains less than four per cent. of alcohol, it can be given to invalids, children, etc., without danger of the secondary depressant effect so frequently experienced from the administration of spirituous remedies; the ordinary dose of a wineglassful representing less than forty grains of alcohol, and over one hundred and twenty-five grains of nutritious extractive matter, rich in diastase, preserved by our peculiar process of preparation; while in the malt-liquors it is rendered completely inert by the boiling to which they are subjected during manufacture.

It is packed in cases of two dozen each, and may be had of all the leading druggists throughout the United States.

JOHN WYETH & BROTHER,

Manufacturing Chemists,

PHILADELPHIA.

Smithsonian Institute

FILLED

SOLUBLE ELASTIC CAPSULES

OF

Quinine Sulphate and of Cinchonidia Sulphate.

We take pleasure in being able to offer the profession a device for the exhibition of quinine and cinchonidia, which presents many points of superiority over any which has been heretofore suggested. By means of our Soft Elastic Capsules, the objectionable taste of the drug is, of course, completely concealed; while the ease with which this capsule is swallowed, after it has been lubricated with the saliva, makes it vastly superior to a pill or the hard capsule.

We manufacture two sizes of these Quinine and Cinchonidia-Filled Soft Elastic Capsules, containing, respectively, 1, 2 and 3 grains, and 4 and 5 grains of the salts. While each of these two sizes contains a different quantity, the bulk of the contents does not vary with the quantity of the drug, the capsule being completely filled, in case of the smaller quantity, with sugar of milk. Thus in the first size, the capsule cantaining one grain of the drug contains two grains of sugar of milk, and that containing two grains of the drug being filled out with one grain of sugar of milk.

We have been led to put up quinine and cinchonidia in this form through the great popularity which our Soft Elastic Liquid-Filled Capsules have achieved in the short period since our introduction of them. For those who are familiar with the latter, the Quinine and Cinchonidia-Filled Soft Elastic Capsules will require no commendation.

An additional advantage possessed by these capsules is the fact that the drug entering into each one of them is separately weighed before being encapsuled. We are thus enabled to guarantee the absolute correctness of the amount claimed on the label.

These capsules are put up in boxes containing 1 doz., 2 doz., 3 doz., and 100 in each. Owing to their soft nature, to put them up in bottles, after the manner of pills or hard capsules, would be to expose them to the risk of moulding, and to distort their shape.

Both the manufacture and the packing of these capsules require especial care. We, therefore, in order to guard against the imposition of imitators, have sealed each box put up by us, and disclaim responsibility for any which are taken from a box the seal of which has been broken prior to its coming into the purchaser's possession.

We respectfully ask a trial of these capsules at the hands of the profession, feeling confident of a favorable judgment.

PARKE, DAVIS & CO.,

Manufacturing Chemists,

60 Maiden Lane and 21 Liberty Street. } NEW YORK. DETROIT, MICHIGAN.

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

THE BEST

—ANTI-SEPTIC—

For Internal and External Use.

FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzoboracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

LISTERINE comes nearer the ideal Antiseptic than any preparation now before the Medical World

Send for New Formula Book and General Reports, establishing its value externally in SURGERY, OBSTETRICS, GYNECOLOGY, LEUCORRHŒA, GONORRHŒA, and all MUCOUS MEMBRANE DISEASES; internally in TYPHOID and other FEVERS, ZYMOTIC DISEASES, DIPHTHERIA, SCARLET FEVER, DYSPEPSIA, DYSENTERY, DIARRHŒA, all forms of CHOLERA, etc., and as a general PROPHYLACTIC

THE BEST

—ANTI-LITHIC—

For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of DRS. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, AT ONCE justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of URINARY CALCULUS, GOUT, RHEUMATISM, BRIGHT'S DISEASE, DIABETES, CYSTITIS, HEMATURIA, ALBUMINURIA, and Vesical Irritations generally.

MED. AND SURG. REPORTER, Philadelphia.

GOOD INVESTMENTS
FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

MILK SUGAR.

PEPTOGENIC MILK POWDER IS THE ONLY INFANT FOOD WHICH CONTAINS MILK SUGAR SOLELY FOR A BASIS.

The substitution of farinaceous matter, malt sugar, cane sugar, or any other substance, either wholly or in part, for milk sugar, is an advantage only in this direction—it is profitable to the manufacturer.

It is assumed that the average composition of healthy mothers' milk is the only natural standard upon which to found an artificial infant food.

Milk Sugar is the sugar peculiar to animal milk, and there can be no justifiable reason or defence, upon any rational grounds, for the substitution of other articles for it.

It is sheer sophistry to try to obscure this fact by classifying sugars and starches as "carbohydrates." The very fact that the sugar as secreted in milk differs remarkably in its properties from all other sugars, in spite of its similar ***chemical formula,*** is a sufficient evidence of the "design in nature," and is, in itself, a sufficient ground for the rejection of all empirical and commercial substitutes for it.

FAIRCHILD BROS. & FOSTER,

Makers of Digestive Ferments and Kindred Preparations,

82 and 84 FULTON STREET, NEW YORK.

Infantile Atrophy.

"INFANTILE ATROPHY, or the slow wasting which is a familiar symptom in hand-fed babies, is one of the commonest causes of death in early infancy."

"INFANTILE ATROPHY is the consequence of insufficient nourishment. The child wastes because he is starved. But it is not to actual lack of feeding that the starvation is usually to be ascribed. A baby fed from a breast which secretes milk poor in quality and insufficient for the child's support, will, of course, grow slowly thinner; but an infant supplied largely with farinaceous compounds, from which his feeble digestive organs fail to derive even a minimum of nourishment, will waste with startling rapidity."

"Mellin's Food may be used from the first, and is almost always well digested. Farinaceous matters, unless guarded by malt, as in Mellin's Food, should not be given to a child younger than six months."

From "Disease in Children," by Eustace Smith, M. D., F. R. C. P., London, England.

A sample of Mellin's Food, sufficient for trial, will be sent free to any Physician desiring it.

DOLIBER, GOODALE & CO., BOSTON, MASS.

INTERNATIONAL HEALTH EXHIBITION.

LONDON, 1884.

The Jury Have Granted

TO

Apollinaris

THE

HIGHEST AWARD

Over ALL other Mineral Waters, Natural or Artificial.

"APOLLINARIS reigns alone among Natural Dietetic Table Waters. Its numerous competitors appear to have, one after another, fallen away."

BRITISH MEDICAL JOURNAL,
MAY 31, 1884.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

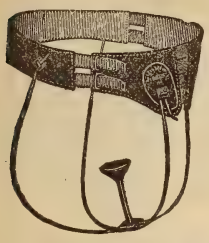
Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

SAVORY & MOORE, 143 New Bond Street, London.
Agents for America, E. FOUGERA & CO., New York.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

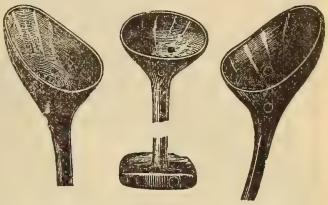
THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.



Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

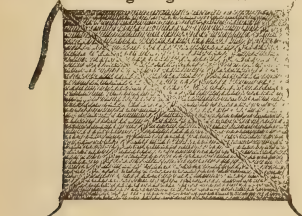
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

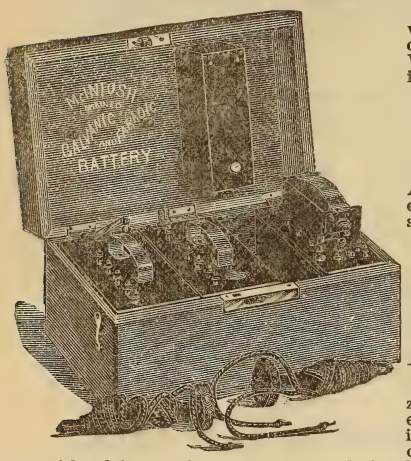
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS NF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

THE PROFESSION.

The following is a partial list of Medical Authors who advise the use of pure alcoholic stimulant, and physicians who prescribe **Duffy's Pure Malt Whiskey:**

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents,** the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

Dusart's Syrup and Wine of Lacto-Phosphate of Lime.

The properties of which are scientifically founded on physiological experiments, and have received the sanction of several years' successful trial by the French and English medical profession, as producing durable reconstituent effects in all cases of Cachexia or Adynamia; when nutrition has been impaired by acute or chronic complaints.

As an article of diet it acts as general excitant of all nutritive functions, ensures digestion, brings back or increases the appetite, enriches the milk of the mother, and generally improves the vital energies. As a medicament it is chiefly used in convalescence, teething, rickets, and imperfect growth, dyspepsia, various nervous diseases, wounds, fractures, and all complaints of the osseous system.

Dusart's Syrup of Lacto-Phosphate of Lime and Iron is a ferruginous medicament specially invaluable for the above cases, when complicated with anæmia.

Dusart's work on the "Physiological and Therapeutic Action of Phosphate of Lime," will be sent free to any physician on application to Messrs. E. FOUGERA & Co.

PARIS: L. DUSART, 8 Rue Vivienne.
NEW YORK: E. FOUGERA & CO., Importing Pharmacists.

PELLETIER'S CAPSULES OF SULPHATE OF QUININE.

These Capsules, Manufactured by Messrs. ARMET DE LISLE & Co., successors to PELLETIER, contain ten centigrammes of Sulphate of Quinine, guaranteed by having the name printed upon each Capsule. They dissolve quickly in cold water, do not become hard like pills, and are taken more easily than wafers.

PELLETIER

They are put up in bottles containing 10, 20, 100, 200, 500, and 1000 Capsules.

PARIS: 8 RUE VIVIENNE. E. FOUGERA & CO., NEW YORK.

CHAPOTEAUT'S PEARLS OF PURE PEPSINE.

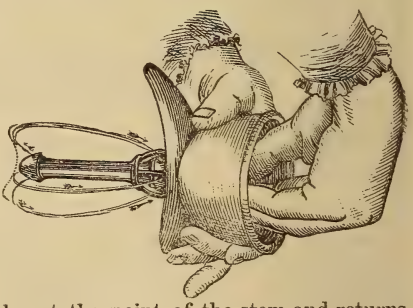
The Pepsine used in the manufacture of these Pearls is made from the Stomachs of Sheep, and digests 90 times its weight of meat; it is put up in soluble Capsules which can be preserved indefinitely. Unlike all other known Pepsine, it contains neither starch nor sugar of milk.

Two Pearls taken after meals are sufficient to insure the digestion of food in fifteen minutes, and remove Headache, Sleepiness, etc., which are the usual accompaniments of indigestion.

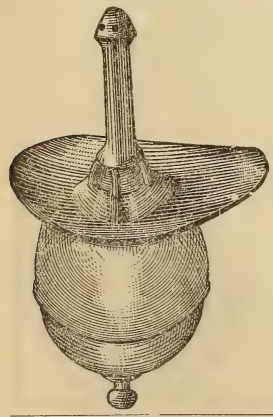
CHAPOTEAUT, Pharmaceutical Chemist, 8 Rue Vivienne, Paris.
E. FOUGERA & CO., 30 N. William Street, New York.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, is shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $2.75. To physicians $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

QUALITY IS OF FIRST IMPORTANCE.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products, **But One Quality, and that The Best.**

Frauds in Belladonna Plasters.

We have in past years shown by the analyses of eminent chemists, that fraudulent plasters were being palmed off upon physicians and their patients by dishonest manufacturers, through ignorant or unscrupulous druggists, and we had hoped that the exposure would lead to a general observance of pharmacopœial standards. But our latest analyses, made from fresh goods bought in open market by the analysts themselves, prove that the fraud continues, and confirm our opinion that honest goods should be so marked that substitution is impossible.

Analyses previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams at the laboratory of the College of Pharmacy, show that our Belladonna plasters contain from fifty to fifteen hundred per cent. more alkaloid than those of other makers. The difficulties in the way of making india-rubber combinations conform to the medicinal standards of the Pharmacopœia, which novices acknowledge when they make a partial confession of the inferiority of their goods, and their inability (?) to incorporate the proper equivalents, were years ago overcome by us, as they might be overcome by every manufacturer whose principles will not permit him to make non-officinal goods; and our plasters may be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analyses alluded to, and physicians will therefore recognize the importance of observing that no Belladonna plasters except those bearing the letters S. & J. in squares on the back, are dispensed to their patients or furnished to themselves for use in their practice.

IS ABSORBENCY A PRE-REQUISITE OF ABSORBENT COTTON?

Recent tests of several foreign and domestic makes of Absorbent Cotton and Lint offered on the market, lead us to urge physicians to assure themselves as to the absorbency of these materials before using them. This is easily done by dropping a bit of the cotton or lint into a glass of water and noting the time required for it to absorb enough of the fluid to sink to the bottom. To make cotton or lint and gauze absorbent to a maximum degree and at the same time entirely neutral, involves an outlay of labor and expense which will be found never to have been incurred in most of the dozen or more brands on the market, but one of which approaches ours in absorbency. We cannot attempt to compete in price with inferior goods, which represent no such outlay as is expended in the preparation of ours. We therefore urge practitioners and dispensers to test Absorbent Cotton and Lint for absorbency and freedom from chemicals before buying or using, and are confident that by so doing they will substantiate the results of our own tests, which prove the superiority of our products.

Extreme absorbency is not alone essential in the mechanical action of the Cotton or Lint in surgical or gynecological cases, but to its proper medication. Comparative tests will show that our Cotton, Lint and Gauze treated with Corrosive Sublimate, Hydronaphthol, Carbolic Acid, Salicylic Acid, Thymol, etc., retain a fuller percentage of the antiseptic than can be held by vehicles of a lower degree of absorbency. The importance of this fact needs no emphasis to surgeons who depend upon these dressings for success in antiseptic treatment.

HYDRONAPHTHOL.

THE NEW ANTISEPTIC, DISINFECTANT AND PRESERVATIVE.

Non-Poisonous, Non-Corrosive, Odorless and Non-Irritating.

SEABURY & JOHNSON are now prepared to supply this important new antiseptic, which has already been brought to the attention of the Medical Profession by the reports of Drs. Geo. R. Fowler, Surgeon to St. Mary's Hospital, Brooklyn (see New York *Medical Journal*, October 14, 1885. *et seq.*), and R. J. Levis, Surgeon to Penna. Hospital and Jefferson Medical College, Philadelphia.

Hydronaphthol is a recently perfected derivative of coal-tar, produced by a distinct process and differing essentially from all other antiseptic products from the same source, although belonging to the phenol series. Hydronaphthol is non-poisonous, non-corrosive, odorless, and in solutions up to more than three times above its antiseptic limit, non-irritant.

As an antiseptic Hydronaphthol is about one-fifth as powerful as the mercuric bi-chloride; twelve times as efficient as carbolic acid; thirty times as potent as salicylic acid; and six hundred times as strong as alcohol.

Hydronaphthol is soluble in the proportion of 1 to 1100 parts of cold water, and is reliably antiseptic in strengths of 1 to 3,000 to 1 to 6,000, as is shown by the careful investigations of Dr. Fowler. Solutions of 1 to 10,000 arrest putrefactive decomposition. It has no odor to disguise that of putrefaction, and is not decomposed or rendered inert by the products of putrefactive decomposition, such as sulphuretted hydrogen, ammonia, etc. Being non-corrosive it will not injure the polished surface and keen edge of cutting instruments, and is, therefore, as well as for its entire safety in use and freedom from odor, preferable to any of the antiseptics now employed in surgery.

Hydronaphthol is a soft crystalline grayish powder, and in this form, or in the form of Hydronaphtholated absorbent gauze, cotton, lint or bandages, can now be procured through the drug trade.

A reprint of Dr. Fowler's interesting and valuable report upon the new antiseptic will be forwarded to Physicians and Surgeons, upon application to

WELLS, RICHARDSON & CO.'S LACTATED FOOD,

FOR INFANTS AND INVALIDS.

A predigested, non-irritating, easily assimilated food, indicated in all weak and inflamed conditions of the digestive organs, either in infants or adults.

SUGAR OF MILK

Is now recognized as an important element of any artificial food for infants which can be claimed to be similar in composition to mother's milk, which contains it in larger proportion than does cow's or goat's milk.

It has an important influence in overcoming any irritable condition of the stomach and bowels, and thus its presence in an Infant Food is of the greatest value.

Being a pure carbo-hydrate, however, it is not of itself sufficient to constitute a nutritious and healthful food. With it should be combined that best of all foods for the muscular and nervous systems, the Gluten of Wheat, rendered easily soluble by proper treatment.

With these the infant should be given that digestive agent which it most lacks, diastase. This is easily obtained from Malted Barley, and may be so combined with the other constituents that the result will be a food which will nourish every portion of the system, and be digested and assimilated with the greatest ease. This is our claim for Lactated Food. As indicated by its name, it has for its basis Sugar of Milk or Lactose. To this is added the purified Gluten of Wheat and Oats, with Barley Diastase and Malt Extract. The small amount of starchy matter remaining is wholly changed to a soluble form by the action of the diastase.

It has met with remarkable success in the hands of the medical profession in all parts of the country, both as a food for infants, and for adults recovering from acute diseases, or suffering from chronic debility of the digestive organs.

FOR CHOLERA INFANTUM

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1.00, and $2.50. A dollar can will furnish one hundred and fifty meals for an infant.

If any physician that has not yet made a trial of the Lacteal Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

WELLS, RICHARDSON & CO.,
BURLINGTON, VT.

LONG ISLAND COLLEGE HOSPITAL,

BROOKLYN, N. Y.

The Regular Term will Open October 5th, 1886, and continue five months.

The Reading and Recitation Term will Commence March 7th, 1887, and continue three months.

In the Reading and Recitation Term the Recitations are supplemented by Laboratory Work, Lectures, and Clinics.

In the Regular Term the Laboratory Work, Lectures, and Clinics are supplemented by oral and written examinations; and the senior students are admitted, in sections of ten or more, to the wards of the Hospital, where they are thoroughly trained in practical medicine.

The Laboratories, Rectitation and Lecture Rooms, Amphitheatre, Wards of the Hospital, and Dispensary Rooms, are all in the same building, thus affording convenient and ample opportunies for a thorough education in practical medicine and surgery.

There are over 12,000 patients treated annually in the Hospital, which is under the control of the College authorities, and therefore available for practical teaching.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

THE CANTON SURGICAL

GYNÆCOLOGICAL CHAIR.

A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

THE CANTON SURGICAL CHAIR CO., CANTON, OHIO.
Please mention this Journal.

A GOOD RECORD

For the year ending April 1. Between one hundred and two hundred surgical operations have been performed at the Free Hospital for Women supported by the Murdock Liquid Food Co., Boston, without the loss of a single patient, and all restored to usefulness.

LIQUID FOOD WAS GIVEN BEFORE AND AFTER THE OPERATIONS.

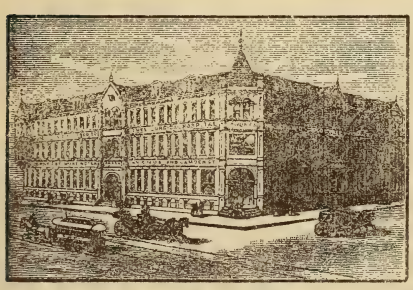
What other hospital that does not use Murdock's Liquid Food can show such a record?

By its use we can build up any patient who is too reduced for an operation, so that not only a safe but successful operation can be made, and in common cases the patient can be made convalescent in three-quarters of the time usually required.

With what we have been and are doing, we shall be able, in our new Free Hospital that we are now building, corner of Huntington avenue and Camden street, to perform in the Surgical half of the Hospital

500

OPERATIONS ANNUALLY.



Until then we shall remain in our old home.

THE SURGICAL STAFF AT MURDOCK'S FREE HOSPITAL FOR WOMEN, AT 30 LEVERETT STREET, ARE IN DAILY ATTENDANCE TO EXAMINE PATIENTS AND ASSIGN BEDS, SATURDAYS EXCEPTED.

Its value in cases where limbs have been broken surprises every physician who has ordered its use, as it restores the broken limbs to health and strength in a few weeks.

BABIES.

Remember, that with feeble infants who do not thrive on their mother's milk or the best prepared foods in the market, WE REQUEST NO CHANGE OF FOOD, but add 5 or more drops four times daily of Murdock' Liquid Food, and you will find that the lost or needed vitality will be restored to them in less than thirty days.

Not a case of Cholera Infantum known where Murdock's Liquid Food has been used, nor a death from Cholera Infantum where it has been prescribed by a physician.

Murdock's Liquid Food will assist all classes of chronic cases. It is the only Raw Food in the world. It is free of insoluble matter, and can always be retained by the stomach, and when given for INJECTIONS it is equally valuable and can always be retained.

Remember, all acknowledge the value of Fruits for a patient.

We use them in Liquid Food:

1st. For their own properties.

2d. They relieve the meats of their heating properties, making it safe and valuable in cases of fever, as relapse never follows when used.

3d. They preserve our meats, enabling us to offer the only Raw Food known, and it will keep in all climates when not exposed to heat, air or sun.

TO SUSTAIN OUR CLAIM

We never wish Liquid Food used until all other treatment and foods fail, then the results are quickly seen, generally in twenty-four hours.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor. All brands are made by the same formula. The latter represents the day of make, and the figure the tank. If richer, it is stronger in smell and flavor, and will bear a greater reduction.

Murdock Liquid Food Co.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY.** In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

The above *fac-simile* of our label enumerates the constituents of what has been termed by us "Liquor Bismuthi et Hydrastiæ" with the several improvements in its composition that have been made from time to time as experience has suggested.

This remarkable alterative and sedative to mucous surfaces has now been in use by the profession for ten years, being *first* prepared by us in 1872, and it has to a large extent revolutionized practice in the treatment of irritable, inflammatory and ulcerative conditions of the Mucous tract, *as:*

OF THE NASAL PASSAGES (locally).
Nasal Catarrh and Ozæna.

OF THE EYE (locally).
Conjunctivitis; Catarrhal, Gonorrhœal, Neonatorum and Purulent Opthalmia; Ulceration of the Cornea.

OF THE THROAT (locally).
Pharyngitis and Laryngitis; Diphtheria.

OF THE STOMACH AND INTESTINES (internally and locally).
Stomatitis; Gastro Intestinal Catarrh; Gastric Ulcer; Dysentery.

OF THE REPRODUCTIVE ORGANS AND BLADDER (locally).
Gonorrhœa; Urethritis; Cystitis; Vaginitis; Metritis; Uterine, Vaginal and Vesical Catarrh; Ulceration of the Os-Uteri.

Having in our possession the indorsement of physicians who have had the most gratifying success with our preparation of "Bismuth and Hydrastia" in the treatment of the above affections, we do not hesitate to emphasize its value to the Oculist, Gynæcologist or general practitioner.

A Descriptive List of our Specialties will be mailed to members of the medical profession upon application, also a sample of the above preparation will be sent to any physician who will pay express charges.

ADDRESS,

Chapman, Green & Co.

Manufacturing Chemists,

CHICAGO, ILL.

SUPPLIED BY THE WHOLESALE DRUG TRADE.

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

SAMPLES FURNISHED UPON APPLICATION.

PETROLEOL

Is put up in 1-lb., 5-lb., 10-lb., 25-lb., 50-lb. and 100-lb. Cans.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestlé's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish: "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient, Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

NOTE.—No milk required in preparing Nestlé's Food, only water used.

Smithsonian Institute

CASCARA CORDIAL.

The most Eligible Preparation of Cascara Sagrada

FOR THE TREATMENT OF

Habitual Constipation, Dyspepsia, Hæmorrhoids and Allied Affections

AND THE MOST CONVENIENT AND GENERALLY ACCEPTABLE

Vehicle for the Administration of Nauseous Medicines.

In Habitual Constipation.—The great desideratum in the treatment of chronic constipation has heretofore been a remedy which possessed not only a temporary specific action on the bowels, but which would be followed by no reaction and no repression of secretion, and which would be administered for a sufficient length of time to permit of restoration of normal function; a remedy which would not only alleviate temporarily the existing mal-condition, but permanently remove the cause upon which it depended for its continuance, and thus effect a radical cure. The extensive trial of Cascara Sagrada by physicians of this country and Europe, has shown it to be the drug that most fully meets all these indications. It has been added to the British Pharmacopœia, and its efficacy is attested by all physicians who have given it a trial. Cascara Cordial is prepared to disguise the inherent bitter principle of the drug, and without detracting from its medicinal value, render it acceptable to the most fastidious palate.

As a Vehicle for Nauseous Medicines, Cascara Cordial has become widely known to the profession. It not only effectually disguises the taste of such inherently bitter medicines as Quinine, but on account of its laxative properties, is a most valuable adjuvant or corrigent to any prescription containing drugs, such as iron, the continued administration of which tends to constipate. It will be seen that Cascara Cordial has a wide range of utility as an agreeable laxative excipient.

To Dispel the Acute Effects of Alcohol and Opium Abuse.—From letters received from physicians, we are led to call the attention of the profession to the use of Cascara Cordial by those addicted to the alcohol and opium habits. The headache and gastric irritation following excessive indulgence in alcohol, is avoided by adding a little Cascara Cordial to the alcoholic stimulant taken, or by taking a full dose of the cordial on retiring, after too free indulgence. The severe constipation also often attending indulgence in opium, may be relieved by the systematic administration of Cascara Cordial.

We can not assume the responsibility for any lack of success physicians may meet with in prescribing the many imitations and spurious varieties of Cascara on the market, and would request those wishing a genuine and reliable preparation, to specify P. D. & Co.'s.

☞ **Samples furnished on application to those physicians who will pay express charges.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

New York: 60 Maiden Lane. 21 Liberty Street. DETROIT, MICH.

BROMIDIA

The Hypnotic.

FORMULA:
Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:
One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:
Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:
Same as Opium or Morphia.

DOSE:
One Fluid Drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:
Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:
One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:
Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

GOOD INVESTMENTS

FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

D. G. BRINTON, M. D., 115 S. Seventh St,, Phila.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅒ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

WESTERN PENNSYLVANIA MEDICAL COLLEGE,

PITTSBURGH, PA.

The Regular Term opens the first week in October, 1886, and closes the last week in March, 1887.

The requirements are fully described in the Announcement, which will be sent to any desiring it.

A Full Corps of Instructors; Special and Unsurpassed Clinical Advantages. Course of Instruction complete in all Departments, and thoroughly Practical.

Fourteen Clinical Lectures each week.

The College Building, now in construction contiguous to the Western Pennsylvania Hospital, will be, when finished, one of the most commodious and complete in the country.

Fee for General Ticket, ... $100.

For Prospectus, or other information, address either

J. B. MURDOCK, Dean,
No. 4232 Fifth Ave., Pittsburgh.

W. J. ASDALE, Sec'y Faculty,
No. 2107 Penn Ave., Pittsburgh.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

HORSFORD'S ACID PHOSPHATE,

(LIQUID,)

Prepared according to the directions of Prof. E. N. Horsford, of Cambridge, Mass.
Universally recommended and prescribed by physicians of all schools.

IN DYSPEPSIA, CONSTIPATION, INDIGESTION, HEADACHE, etc.

The lining membrane of the stomach, when in a normal condition, contains cells filled with the gastric juice, in which phosphoric acid combined with lime, iron, potash, etc., is an important active principle; this is necessary to a perfect digestion. If the stomach is not supplied with the necessary gastric juice to incite or promote digestion, dyspepsia will follow with all its train of incident diseases. The only known acid which can be taken into the stomach to promote digestion, without injury, is phosphoric acid combined with lime, potash, iron, etc., *i. e.*, Horsford's Acid Phosphate, which is hereby offered to the public.

Sick Headache and Nervous Prostration.

Dr. W. P. CLOTHIER, Buffalo, N. Y., says: "I know it to be beneficial in sick headache and nervous prostration."

Beneficial Results.

Dr. E. J. WILLIAMSON, St. Louis, Mo., says: "Marked beneficial results in imperfect digestion and diabetes mellitus."

Promotes Digestion.

Dr. W. W. SCOFIELD, Dalton, Mass., says: "It promotes digestion and overcomes acid stomach."

A Good Nerve Tonic.

Dr. R. S. MCCOMBS, Philadelphia, Pa., says: "I used it in nervous dyspepsia with success. It is a good nerve tonic."

A Wonderful Remedy.

Dr. T. H. ANDREW, late Demonstrator of Anatomy, Jefferson Medical College, Philadelphia, Pa., says: "A wonderful remedy which gave me most gratifying results in the worst forms of dyspepsia."

Obstinate Indigestion.

Dr. F. G. MCGAVOCK, McGavock, Ark., says: "It acts beneficially in obstinate indigestion."

We have received a large number of letters from physicians of the highest standing, in all parts of the country, relating their experience with the Acid Phosphate, and speaking of it in high terms of commendation.

Physicians desiring to test Horsford's Acid Phosphate will be furnished a sample without expense, except express charges. Pamphlet free.

PROF. HORSFORD'S BAKING PREPARATIONS

are made of the Acid Phosphate in powdered form. They restore the phosphates that are taken from the flour in bolting. Descriptive pamphlet sent free.

RUMFORD CHEMICAL WORKS, Providence, R. I.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

THE PROFESSION.

The following is a partial list of Medical Authors who advise the use of pure alcoholic stimulant, and physicians who prescribe **Duffy's Pure Malt Whiskey:**

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH — Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

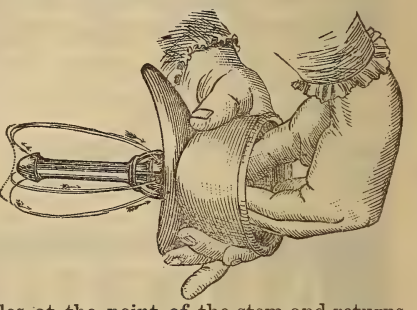
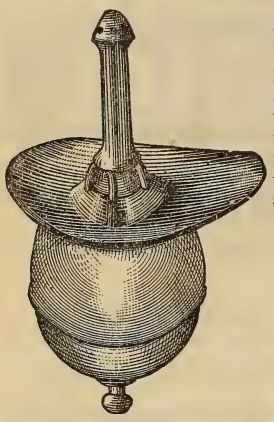
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, is shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA,

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886–87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY.

WM. E. A. AIKEN, M. D., LL. D.,
Emeritus Professor of Chemistry and Pharmacy.
GEORGE W. MILTENBERGER, M. D.,
Professor of Obstetrics.
CHRISTOPHER JOHNSTON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children, and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology, and Clinical Professor of Diseases of Nervous System.
L. McLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy and Clinical Surgery.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics, Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.

For catalogue and further information address, **Dr. J. EDWIN MICHAEL, Dean, 246 Madison Ave.**

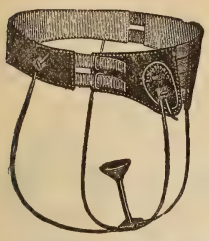
DENTAL DEPARTMENT.

Fifth Annual Announcement. Next regular session begins October 1st, 1886. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY.

FERD. J. S. GORGAS, M. D., D. D. S.,
Professor of Principles of Dental Science, Dental Surgery and Dental Mechanism.
JAMES H. HARRIS, M. D., D. D. S.
Professor of Operative and Clinical Dentistry.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D. D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D. D. S.,
Demonstrator of Operative Dentistry.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For Catalogues and other information apply to Dr. F. J. S. GORGAS, Dean, 259 Eutaw Street, Baltimore.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

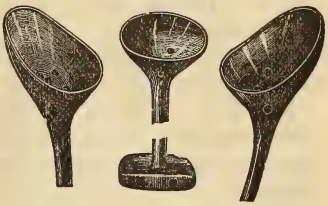
THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.



Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

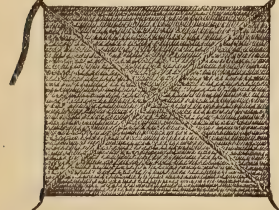
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

HOLLOW SUPPOSITORIES.

WITH CONOIDAL SELF-SEALING STOPPERS,

All made from Pure BUTTER OF CACAO ONLY.

Each box contains A MEDICINE DROPPER and A PAIR OF TONGS.

The object of this invention is to supply Physicians, Druggists, Veterinary Surgeons, and others, with HOLLOW SUPPOSITORIES of various sizes and shapes to meet every probable demand, and into which they can put any kind of MEDICINE or NUTRIMENT, thus producing firm, smooth, EVENLY MEDICATED Suppositories, that are cheaper and more reliable than those made by the old method.

Nos. 0.—1.—2.—3 are provided with conoidal stoppers. The stoppered ends are to be inserted, when the contraction of the sphincter ani will force the suppositories up into the rectum without the use of a suppository syringe or any other appliance whatever.

HALL & RUCKEL, Wholesale Druggists, Proprietors,

218 GREENWICH STREET, NEW YORK.

A sample box of Hollow Suppositories will be mailed free on application, mentioning the PHILA. MED. AND SURG. REPORTER.

Omnico

FORMULA: Boracic Acid, Chlorate of Potassium, Chloride of Sodium, Thymol, Menthol, Gaultheria, and Caryophyllus.

Antiseptic, Disinfectant, Prophylactic, Anti-Inflammatory, Mildly Astringent, Secondary Sedative Action.

An *Alterative* specially adapted to inflamed mucous and cutaneous surfaces.

For all varieties of **Catarrhal** disease, **Pharyngitis, Laryngitis, Diphtheria, Diphtheritic** and **Ulcerous Sore Throat, Stomatitis, Leucorrhœa, Vaginitis, Endometritis, Pruritis, Gonorrhœa, Conjunctivitis, Eczema, Psoriasis, Pityriasis, Genito-Urinary** and **Rectal** disorders.

Used as a douche, inhalant, gargle, injection, spray, or dressing with absorbent cotton.

A thoroughly effective

Antiseptic, Disinfectant and Deodorant,

for **Wounds, Ulcers, Abscesses, Bed Sores, Surgical Cases, Post Partum Injections,** the hands of the **Surgeon, Obstetrician,** and **Gynæcologist,** and **Mouth Wash** for the **Dentist.**

WELLS, RICHARDSON & CO.'S LACTATED FOOD,

FOR INFANTS AND INVALIDS.

A predigested, non-irritating, easily assimilated food, indicated in all weak and inflamed conditions of the digestive organs, either in infants or adults.

SUGAR OF MILK

Is now recognized as an important element of any artificial food for infants which can be claimed to be similar in composition to mother's milk, which contains it in larger proportion than does cow's or goat's milk.

It has an important influence in overcoming any irritable condition of the stomach and bowels, and thus its presence in an Infant Food is of the greatest value.

Being a pure carbo-hydrate, however, it is not of itself sufficient to constitute a nutritious and healthful food. With it should be combined that best of all foods for the muscular and nervous systems, the Gluten of Wheat, rendered easily soluble by proper treatment.

With these the infant should be given that digestive agent which it most lacks, diastase. This is easily obtained from Malted Barley, and may be so combined with the other constituents that the result will be a food which will nourish every portion of the system, and be digested and assimilated with the greatest ease. This is our claim for Lactated Food. As indicated by its name, it has for its basis Sugar of Milk or Lactose. To this is added the purified Gluten of Wheat and Oats, with Barley Diastase and Malt Extract. The small amount of starchy matter remaining is wholly changed to a soluble form by the action of the diastase.

It has met with remarkable success in the hands of the medical profession in all parts of the country, both as a food for infants, and for adults recovering from acute diseases, or suffering from chronic debility of the digestive organs.

FOR CHOLERA INFANTUM

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1.00, and $2.50. A dollar can will furnish one hundred and fifty meals for an infant.

If any physician that has not yet made a trial of the Lacteal Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

WELLS, RICHARDSON & CO.,
BURLINGTON, VT.

LONG ISLAND COLLEGE HOSPITAL,

BROOKLYN, N. Y.

The Regular Term will Open October 5th, 1886, and continue five months.

The Reading and Recitation Term will Commence March 7th, 1887, and continue three months.

In the Reading and Recitation Term the Recitations are supplemented by Laboratory Work, Lectures, and Clinics.

In the Regular Term the Laboratory Work, Lectures, and Clinics are supplemented by oral and written examinations; and the senior students are admitted, in sections of ten or more, to the wards of the Hospital, where they are thoroughly trained in practical medicine.

The Laboratories, Rectitation and Lecture Rooms, Amphitheatre, Wards of the Hospital, and Dispensary Rooms, are all in the same building, thus affording convenient and ample opportunies for a thorough education in practical medicine and surgery.

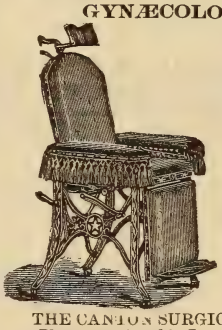
There are over 12,000 patients treated annually in the Hospital, which is under the control of the College authorities, and therefore available for practical teaching.

For circulars, address

J. H. Raymond, M. D., Secretary.

THE CANTON SURGICAL

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

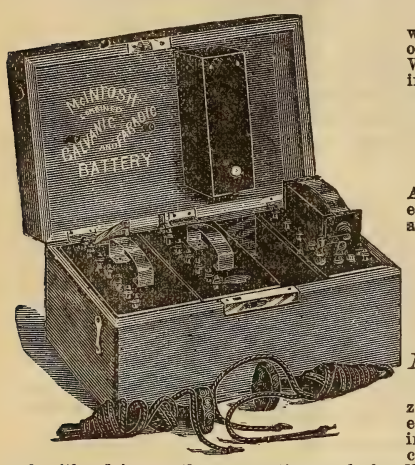
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

STROPHANTHUS,

THE NEW HEART TONIC.

We have at an extravagant cost procured from Central Africa a very limited quantity of Strophanthus. This is the first and only lot that has been offered in the London market.

This new substitute for digitalis was introduced by Dr. Fraser at the last meeting of the British Medical Association, after experimenting with the drug for 15 years. It is the "kombé" arrow poison referred to by Livingstone, and is known as "inée," "onaye," and "onage." It is a woody climber of Equatorial Africa, and probably allied to antiarin, the poisonous principle of the deadly upas tree of Java. The active principle abounds in seeds, imbedded in great profusion in the inner walls of pods about twelve inches long.

Strophanthus is not only more powerful on the heart than digitalis, but is free from all other attendant actions and secondary effects of the latter It seems to be a pure heart tonic. The active principle is freely soluble in water and rectified spirit—a most important point. No cumulative action has been observed even after it has been administered for weeks continuously, and sickness and gastro-intestinal disturbance are not produced so frequently by strophanthus as by digitalis. Scarcely any action is produced by this substance upon blood vessels directly. Dr. Fraser said: "As a result of the action on muscle, the heart is easily and powerfully affected. * * * * By regulating the dose, a very distinct pharmacological influence may be produced upon the heart, while the other muscles remain apparently quite unaffected." "The systole of the heart is increased, and its contractions are slowed by small doses." "The action of the heart is accompanied by a rise in blood pressure, which appears to be directly produced by it." Thus "in disturbances of the circulation, when the blood tension was unduly low, strophanthus was capable of producing a diuretic effect."

"Strophanthus," writes Dr. Fraser, "exerts a much more powerful action upon the heart and a less powerful action upon the blood-vessels, than digitalis. * * * * In difficulties and embarrassments of the circulation depending upon a central cause, it seems preferable to act on the heart alone, rather than also to increase its difficulties by closing the blood, vessels into which it must empty itself." Strophanthus may "be used with advantage in all weak states of this organ whatever the cause of weakness," but in case of degeneration, or sufficient compensatory change, it will probably do little good. Dr. Fraser further stated that under its use he had occasionally seen pyrexia disaapear, and that very frequently the charts of his apyretic cases exhibited a subnormal temperature.

The quantity we hold is so very small that, in order to accommodate as many customers as possible, we only supply one bottle in any sample.

Put up in form of Tincture, Dose 2 to 6 Drops, in half oz. Bottles, at 75c. each.

BURROUGHS, WELLCOME & CO., SNOW HILL BUILDINGS, LONDON, E. C.

SOLE AGENTS FOR AMERICA, FAIRCHILD BROS. & FOSTER.

Miami Medical College,

CINCINNATI, OHIO.

SESSION 1886--87.

The Session of 1886-87 will begin TUESDAY, September 21, 1836, and continue until March 1, 1887.

This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.

J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.

BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.

W. H. TAYLOR, M. D.,
Professor of Obstetrics.

W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.

W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.

N. P. DANDRIDGE, M. D.,
Professor of Practice of Surgery and Clinical Surgery.

T. W. LANGDON, M. D.,
Professor of Anatomy.

JOS. EICHBERG. M. D.,
Professor of Physiology.

W. A. ROTHACKER, M. D.,
Professor of Principles of Surgery and Pathology.

☞For Circulars, address

J. C. MacKENZIE, M. D., Secretary,
or W. H. TAYLOR, M. D., Dean.

The Jefferson Medical College

OF PHILADELPHIA.

THE SIXTY-SECOND SESSION of the Jefferson Medical College will begin on FRIDAY, October 1, 1886, and will continue until the end of March, 1887. Preliminary Lectures will be held from MONDAY, 20th of September.

PROFESSORS.

J. M. DA COSTA, M. D., LL. D.,
Practice of Medicine.

ROBERTS BARTHOLOW, M. D., LL.D.,
Materia Medica, General Therapeutics, and Hygiene.

HENRY C. CHAPMAN, M. D.,
Institutes of Medicine and Medical Jurisprudence.

SAMUEL W. GROSS, M. D.,
Principles of Surgery and Clinical Surgery.

JOHN H. BRINTON, M. D.,
Practice of Surgery and Clinical Surgery.

THEOPHILUS PARVIN, M. D., LL.D.
Obstetrics and Diseases of Women and Children.

J. W. HOLLAND, M. D.,
Medical Chemistry and Toxicology.

W. S. FORBES, M. D.,
General, Descriptive, and Surgical Anatomy.

WILLIAM THOMPSON, M. D.,
Professor of Ophthalmology,

MORRIS LONGSTRETH, M. D.,
Lecturer on Pathological Anatomy.

The regular course of lectures by the Faculty embraces the whole medical curriculum. This course is supplemented by the lectures on special topics, and demonstrations of the Spring and Fall terms, respectively.

The Faculty invite the attention of the medical profession and students to their thorough system of practical Laboratory work. To each department of the regular curriculum there is appended a Laboratory Course, carried on in large and thoroughly equipped apartments in the College, by specially appointed Demonstrators, under the immediate direction of the Professor. In this way each candidate for the degree of M D. is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Physiology, Histology, and Experimental Physiology, and Minor Surgery, Bandaging, Operations on the Cadaver, etc., and in the Department of Medicine, "clinical conferences," and practical lessons in Physical Diagnosis. There are, we believe, no corresponding practical courses in any other Medical College in this country—not at least to the same extent and with the same variety and constituting a part of the regular curriculum.

This course of Instruction is *free of charge, but obligatory upon* candidates for the Degree, except those who have had such instruction and those who are Graduates of other Colleges of ten years' standing.

THE SPRING COURSE OF LECTURES begins early in April, and ends in June. There is no additional charge for this Course to matriculates of the College, except a registration fee of five dollars; non-matriculates pay forty dollars, *thirty-five dollars of which, however, are credited on the amount of fees paid for the ensuing Winter Course.*

Desirable opportunities are afforded to graduates of Medicine for pursuing special courses, and for instruction in the recognized Specialties.

CLINICAL INSTRUCTION is given *daily* at the HOSPITAL OF THE JEFFERSON MEDICAL COLLEGE throughout the year by Members of the Faculty, and by the Hospital Staff, and at the Pennsylvania and other Hospitals several times a week.

FEES.

Matriculation Fee (paid once)	$ 5 00
Ticket for all Branches	140 00
Practical Anatomy	10 00
Graduation Fee	30 00
Fees for a full Course of Lectures to those who have attended two full courses at other (recognized) Colleges—the matriculation fee, and	70 00
To Graduates of such Colleges, the matriculation fee and	70 00
To Dental Graduates the first course is $60, and the second is.	100 00

To Graduates in Pharmacy the general ticket is $100 for each year.

There are no Extra Fees.

The Annual Announcement, giving full particulars, will be sent on application to

Roberts Bartholow, M. D.,

DEAN.

MATHEY-CAYLUS' GLUTEN

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,

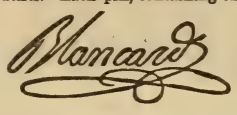
BLANCARD'S PILLS

OF UNCHANGEABLE IODIDE OF IRON.

Blancard's Pills of Iodide of Iron are so scrupulously prepared, and so well made, that none other have acquired a so well deserved favor among physicians and pharmaceutists. Each pill, containing one grain of proto-iodide of iron, is covered with finely pulverized iron, and covered with balsam of tolu. Dose, two to six pills a day. The genuine have a *reactive silver seal* attached to the lower part of the cork, and a green label on the wrapper, bearing the fac-simile of the signature of



Pharmacien, No. 40 Rue Bonaparte, Paris.

Without which none are genuine.

BEWARE OF IMITATIONS.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 8 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on ounce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

COLLEGE OF PHYSICIANS AND SURGEONS,
OF CHICAGO.

The Regular Session of this Institution will commence September 21, 1886, and continue twenty-four weeks. There will also be a Spring Course.

A graded course of instruction covering two or more winter sessions. Excellent clinical advantages.

The College building (directly opposite the Cook County Hospital) is one of the most complete and elaborate edifices devoted to medical teaching in this country.

FEES:

Matriculation	$ 5 00
General Ticket	60 00
Dissecting Ticket (including material)	10 00
Final Examination Fee	30 00

For further information or announcements, address

Dr. D. A. K. STEELE, Secretary, 1801 State Street, Chicago, Ill.

BALTIMORE MEDICAL COLLEGE, BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary, adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean, S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

STAUFFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

CARL L. JENSEN'S
CRYSTAL
PEPSIN TABLETS.
Each tablet weighs 2½ grains, and contains nothing but the pure Pepsin. 75 tablets in the bottle.
DOSE: One after each meal or oftener, until the dyspeptic pain, colic or flatulence is relieved.
PRICE, $1.00.
Manufactured and put up by
CARL L. JENSEN,
PHILADELPHIA, PA.

CARL L. JENSEN'S
"CRYSTAL PEPSIN."

SOLE ORIGINATOR OF PEPSIN IN SCALES.

This Pepsin has obtained for itself a world-wide reputation, being the most scientifically prepared Pepsin known, and of all the digestive ferments it is the most potent, the most reliable; hence this preparation is manufactured as a specialty, as scientific experiments have conclusively proved that it cannot be supplanted by the pancreatic ferments as to digestive power upon nitrogenous food. The imitations which created some demand, owing to their cheapness, are now scorned even by illegitimate druggists, since the fraudulent nature of these imitations became known. The injury these imitations so long caused my preparations is now amply compensated by the present great demand for Jensen's Crystal Pepsin.

Prof. Joseph G. Richardson, of the University of Pennsylvania, Philadelphia, after stating in MEDICAL AND SURGICAL REPORTER that the digestive strength of this Pepsin was found by him to be at least 700 times its own weight of freshly coagulated albumen in three and a half hours, concludes by saying that my method of preparing Pepsin unquestionably places within the reach of physicians a vastly improved means for aiding the stomach digestion of nitrogenous food.

JENSEN'S PEPSIN TABLETS.

For the convenience of many patients for whom this Pepsin is prescribed by itself, this Pepsin is compressed into Tablets of 2½ grains each, and put up in small pocket flasks, each containing 75 Tablets.

CARL L. JENSEN,
Manufacturing Pharmacist,
PHILADELPHIA.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

MEDICAL COLLEGE OF OHIO,

CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.

P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.

SAMUEL NICKLES, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.

JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.

C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.

F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.

JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.

JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.

FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.

J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.

E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.

The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.

Three afternoons of each week are devoted to Hospital Instruction.

The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.

FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.

For Circulars and further information, address

JAS. G. HYNDMAN, M. D., Sec.,
22 WEST NINTH STREET, CINCINNATI, OHIO.

PHYSICIAN'S RESIDENCE FOR SALE.

Half acre of land, improved by two-story frame dwelling, 16 by 30 feet, outbuildings 18 by 30 feet, pump, etc., all nearly new, in small village, but large, rich surrounding country, averaging eight miles to other physicians; fine opening. If I sell, will remove to Baltimore. Price of property, $1,000 cash. Only one other physician. Apply to

DR. W. H. H. HOLBROOK,
June 28, 1886. Wye Mills, Queen Anne County, Md.

WANTED.—REGULAR PHYSICIAN. Practice established fourteen years; town 500, in Pennsylvania; little competition; price $200.

—LANDRETH'S SEEDS ARE THE BEST— NORTH, SOUTH, EAST, OR WEST!

Everything of the best. SEEDS and IMPLEMENTS for Farm, Garden, or Country-Seat. Illustrated and Descriptive Catalogues Free upon application. Over 1500 acres under cultivation growing LANDRETH'S Garden Seeds. Founded 1784.

D. LANDRETH & SONS,
Philadelphia.

VIRUS.

VERY FINE HUMAN CRUSTS OF VACCINE VIRUS can be furnished from this office at

$1 and $2 per Crust.

Address
D. G. BRINTON,
115 South Seventh Street.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestlé's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish: "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient, Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

NOTE.—No milk required in preparing Nestlé's Food, only water used.

Smithsonian Institute

OVAL GELATIN-COATED PILLS

—OF—

Quinine, Iron and Zinc Valerianates.

Quinine Valerianate . . . . . 1 gr.
Iron Valerianate . . . . . 1 gr.
Zinc Valerinate . . . . . 1 gr.

A pill of triple valerianates of Quinine, Iron and Zinc has long been deservedly popular among neurologists and those practitioners called upon to treat nervous debility, hysteria, incipient melancholia, and that condition of depressed vitality so frequently observed by every physician among over-worked and under-fed women.

There seems at the present time, however, to be an intensified interest in this formula, as is evidenced by the number of laudatory reports of its efficacy that have recently appeared in the medical press.

This combination of the valerianates of three such indisputably good tonics is unquestionably of great value and wide utility, and its action in many cases, indeed, seems almost specific. We have pleasure, therefore, in calling the attention of physicians to the fact, that this pill of our manufacture can be obtained of the trade.

Peptonized Extract of Beef:

A CONCENTRATED, PALATABLE, EASILY ASSIMILATED FOOD OF THE HIGHEST NUTRITIVE VALUE,

CONTAINING ALL THE NUTRITIVE CONSTITUENTS OF BEEF.

The superiority of this preparation over other extracts of beef depends upon:

1. The large proportion of albuminoids which it contains.
2. The fact that its albuminoid constituents are chiefly in the form of peptones, insuring absorption and ready assimilation.
3. Its appetizing flavor.
4. Its perfect and ready solubility in water.

The uses of such a preparation are obvious. It is a concentrated, and at the same time an easily assimilated food, useful in all cases of acute disease where sustaining treatment is indicated, and especially valuable in convalescence, and in chronic conditions of inanition or malnutrition, particularly where the functions of the stomach are not well performed.

One part of the Peptonized Extract of Beef may be said to be the equivalent of eight parts of fresh beef. One teaspoonful (about one-half ounce) will make a pint of excellent beef tea.

A like quantity added to a pint of a vegetable soup communicates to it a rich flavor, and converts it into a highly nutritious food.

It may be employed in a still more concentrated form, if desired, but from half an ounce to one ounce of the extract is as much as it is generally advisable to give at one time.

☞ Send for descriptive circulars, which will be mailed free on application.

PARKE, DAVIS & CO.,

Manufacturing Chemists,

NEW YORK: 60 Maiden Lane and 21 Liberty Street. DETROIT, MICHIGAN.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

GREEN SPRING SANITARIUM,

AND

WATER CURE.

For the treatment of all forms of Nervous Diseases, including the Alcohol and Opium habit; also diseases incident to Women, Rheumatism, Skin Diseases and Dyspepsia. Seventy miles west of Cleveland, in a natural grove of ten acres. Sixteen years successful operation. Means and appliances complete. Treatment by baths, electricity and massage, a specialty. One of the largest medicinal springs in America. Elegant apartments. Moderate terms. For particulars address **JOHN S. MARSHALL, M. D., Superintendent, Green Spring, Ohio.**

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

Medical and Surgical Reporter AND Quarterly Compendium,

For One Year, Only $6.00.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by Children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime. and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.*: **"*Ext. carnis, fl. comp. (Colden's.)*"** It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

PECULIARITIES IN THE MANUFACTURE OF JENSEN'S CRYSTAL PEPSIN; NATURE OF THE IMITATIONS, ETC.

THE champion pepsin of the world! The only pepsin found worthy to be imitated! Even the wealthiest manufacturing chemists could not resist the temptation!

One party used glue as a cheapening adulterant for the production of scale pepsin; another party has now succeeded in flooding the market with their imitations of my scale pepsin, owing to its extreme cheapness. This party now declares (not to the profession) that they use sixty pounds of dry egg albumen, peptonized by two hundred hogs' stomachs. A third party wrap their imitations in an exact *fac simile* of my circular, making full use of all my testimonials. The great injury these imitations cause my preparations can easily be understood.

The protection chiefly relied upon is through the profession's vigilance in discriminating between the genuine and the spurious article. When prescribing my pepsin, most physicians now underline my name thus, JENSEN'S Crystal Pepsin, and no misconception can excuse substitutions. The great reputation of this pepsin lies in that it is a peptone pepsin, *i. e.*, the texture of the stomachs in which the ferment is lodged is entirely dissolved, thereby obtaining all the pepsin. When thereto is added my recent improvement in precipitating from this solution all of the earthy and saline matter, leaving only the azotized constituent, containing all of the peptic principle, and, finally, is further concentrated by drying it upon glass plates until brittle scales are formed, the reason for its high digestive power can easily be understood. Why it surpasses also in keeping qualities all of the former pepsins, is owing to its scaly and brittle texture, it being the only organic medicine in the materia medica produced for the market in scales.

It is also perfectly soluble upon the tongue, pleasant to the taste, and practically inodorous.

Although it commands a higher price than any other pepsin the market, it is, nevertheless, the most prescribed. Its purity and solubility, combined with its great digestive power upon albuminoids, have inspired physicians of a suggestive mind to try it also as a solvent for diphtheritic membranes and coagulated blood in the bladder. The success also of these novel uses, has already become generally known to the profession all over the world. Physicians writing for samples will receive prompt returns.

Dr. Hollman (*Nederl. Weekbl.*, 18, p. 272) reports the case of an old man, aged 80 years, suffering from retention of urine, in whom the introduction of a catheter failed to produce the desired result. It was found that the bladder contained coagulated albuminoid masses mixed with blood. A few hours after the injection of about 16 grains of Dr. Jensen's Pepsin dissolved in water, a large amount of a dark, viscid, fetid fluid readily escaped by the catheter.—*London Medical Record.*

Dr. Edwin Rosenthal, acting on the suggestion of Dr. L. Wolff, has used an acidulated concentrated solution of pepsin as an application to the membranes of diphtheritic patients, for which there seemed to be no other help than tracheotomy, and reports that it acted like a charm, dissolving the membranes, admitting a free aeration of the blood, and placing them soon on the road to convalescence. The solution he used was:

R.	Jensen's Pepsin,	ʒj.
	Acidi Hydrochloric., C. P.,	gtt. xx.
	Aquæ q. s. ft.,	fl. ʒj.

M. S.—Apply copiously every hour with a throat-mop.—*From the Medical Bulletin.*

FORMULA FOR WINE OF PEPSIN:

R.	Carl Jensen's Pepsin,	gr. 192.
	Sherry or port wine,	ʒ viss.
	Glycerin puris,	ʒ iss.
	Acid Tartaric,	gr. v.

Sig.—fʒj. after meals. This is three grains of the pepsin in each teaspoonful.

For severe attacks of colic it has afforded present relief, after a few doses have been given in short intervals, when other remedies have failed.

CARL L. JENSEN,
Home Office, 2039 Green Street,
PHILADELPHIA.

INTERNATIONAL HEALTH EXHIBITION.

LONDON, 1884.

The Jury Have Granted

TO

Apollinaris

THE

HIGHEST AWARD

Over ALL other Mineral Waters, Natural or Artificial.

"APOLLINARIS reigns alone among Natural Dietetic Table Waters. Its numerous competitors appear to have, one after another, fallen away."

BRITISH MEDICAL JOURNAL,
MAY 31, 1884.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

SAVORY & MOORE, 143 New Bond Street, London.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

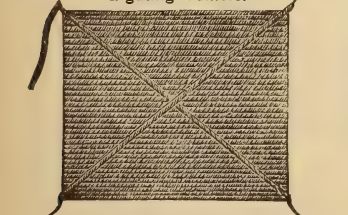
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."
HUNTER McGUIRE, M. D., Richmond, Va.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

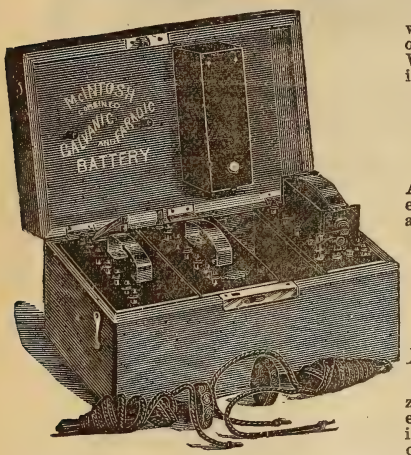
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS NF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_2 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

THE PROFESSION.

The following is a partial list of Medical Authors who advise the use of pure alcoholic stimulant, and physicians who prescribe **Duffy's Pure Malt Whiskey:**

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CHAPOTEAUT'S WINE OF PEPTONE.

he Peptone used in the preparation of this Wine is obtained by the action of Sheep Pepsine on Beef of the best quality. Being pure and neutral it is entirely assimilable, containing neither Glucose, Albumen, nor Chloride of Sodium; for this reason it is the only preparation used in the laboratory of Mr. Pasteur for the culture of microscopic liquids.

Each wineglassful of Chapoteaut's Wine contains the Peptone of ten grammes of Beef, and has, besides, the digestive properties of Pepsine.

It may be used for the following cases: Anæmia, Dyspepsia, Debility, Distaste of Food, Inaction of the Digestive Organs, Convalescence, Alimentation for Wet Nurses, Children and the Aged; Phthisis, Persons Weakened by Fever, Dysentery, and by patients having been operated upon for Cancerous Affections.

DOSE—One or two small wineglassfuls after meals.

Depots: Chapoteaut, 8 Rue Vivienne, Paris---E. Fougera & Co., 30 N. William St., N. Y.

MIDY'S SANTAL.

Midy's Essence of Santal is used with success in place of Copaiba and Cubebs, being harmless even in large doses. No matter what the color or amount of the secretion may be, the discharges are reduced and relief is obtained in forty-eight hours.

No unpleasant effect is caused by its use, such as diarrhœa, eructations, or indigestion, and not giving to the urine any odor.

In cases of Inflammation of the Bladder it acts rapidly, and in two or three days the bloody emission is suppressed; it is used with success in Chronic Catarrh, rendering the urine clear at once.

Depots: Midy, Chemist, 110 Faubourg St. Honore, Paris--E. Fougera & Co., 30 N. William St.

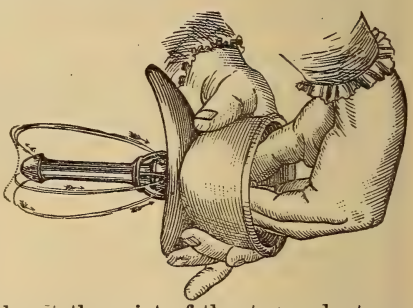
GRIMAULT & CO.'S IODIZED SYRUP OF HORSE RADISH.

he Syrup of Iodized Horse Radish is used in France on a large scale as a substitute for Cod Liver Oil. It is prepared from juices of anti-scorbutic plants. Each tablespoonful contains one and a half grains of Iodine so intimately combined as to be insensible to the action of starch.

Grimault & Co., Pharmacists, 8 Rue Vivienne, Paris--E. Fougera & Co., New York.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, is shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $2 75. To physicians $3.00.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World. Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	**0.39**	**0.543 grains.**
Grosvenor & Richards	**0.17**	**0.264 "**
T. W. Heinemann	**0.15**	**0.230 "**
George E. Mitchell (Novelty Plaster Works)	**0.05**	**0.045 "**
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	**0.06**	**0.062 "**

The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

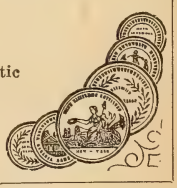
We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually mude to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.

SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.



WELLS, RICHARDSON & CO.'S
LACTATED FOOD,

FOR INFANTS AND INVALIDS.

A predigested, non-irritating, easily assimilated food, indicated in all weak and inflamed conditions of the digestive organs, either in infants or adults.

SUGAR OF MILK

Is now recognized as an important element of any artificial food for infants which can be claimed to be similar in composition to mother's milk, which contains it in larger proportion than does cow's or goat's milk.

It has an important influence in overcoming any irritable condition of the stomach and bowels, and thus its presence in an Infant Food is of the greatest value.

Being a pure carbo-hydrate, however, it is not of itself sufficient to constitute a nutritious and healthful food. With it should be combined that best of all foods for the muscular and nervous systems, the Gluten of Wheat, rendered easily soluble by proper treatment.

With these the infant should be given that digestive agent which it most lacks, diastase. This is easily obtained from Malted Barley, and may be so combined with the other constituents that the result will be a food which will nourish every portion of the system, and be digested and assimilated with the greatest ease. This is our claim for Lactated Food. As indicated by its name, it has for its basis Sugar of Milk or Lactose. To this is added the purified Gluten of Wheat and Oats, with Barley Diastase and Malt Extract. The small amount of starchy matter remaining is wholly changed to a soluble form by the action of the diastase.

It has met with remarkable success in the hands of the medical profession in all parts of the country, both as a food for infants, and for adults recovering from acute diseases, or suffering from chronic debility of the digestive organs.

FOR CHOLERA INFANTUM

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

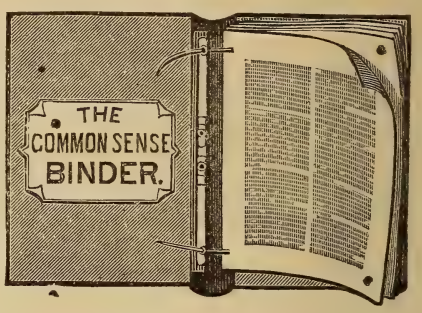
Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1.00, and $2.50. A dollar can will furnish one hundred and fifty meals for an infant.

If any physician that has not yet made a trial of the Lacteal Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

WELLS, RICHARDSON & CO.,
BURLINGTON, VT.

RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

FOR SALE BY

D. G. BRINTON,

115 South Seventh Street, Philadelphia.

Improved Artificial Limbs.

NEW PATENT

UNIVERSAL ANKLE JOINT.

NEW PATENT

ADJUSTABLE KNEE SIDE JOINT.

THESE ARE THE MOST PERFECT AND DURABLE JOINTS IN USE.

Arms with Finger, Wrist, and Elbow Movements. Also, extension apparatuses for shortened limbs. Illustrated catalogue free. Address C. A. FREES,

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules*.

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux*.

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal*.

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia*, etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

Rigollot

E. FOUGERA & CO., New York Depositaries.

WESTERN PENNSYLVANIA MEDICAL COLLEGE,

PITTSBURGH, PA.

The Regular Term opens the first week in October, 1886, and closes the last week in March, 1887.
The requirements are fully described in the Announcement, which will be sent to any desiring it.
A Full Corps of Instructors; Special and Unsurpassed Clinical Advantages. Course of Instruction complete in all Departments, and thoroughly Practical.
Fourteen Clinical Lectures each week.
The College Building, now in construction contiguous to the Western Pennsylvania Hospital, will be, when finished, one of the most commodious and complete in the country.

Fee for General Ticket, ... $100.

MEDICAL COLLEGE OF OHIO,

CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.

P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.

SAMUEL NICKLES, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.

JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.

C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.

F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.

JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.

JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.

FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.

J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.

E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.
The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.
Three afternoons of each week are devoted to Hospital Instruction.
The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.
FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.

Please mention the REPORTER.

A GOOD RECORD

For the year ending April 1. Between one hundred and two hundred surgical operations have been performed at the Free Hospital for Women supported by the Murdock Liquid Food Co., Boston, without the loss of a single patient, and all restored to usefulness.

LIQUID FOOD WAS GIVEN BEFORE AND AFTER THE OPERATIONS.

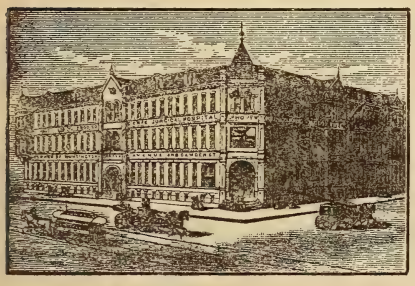
What other hospital that does not use Murdock's Liquid Food can show such a record?

By its use we can build up any patient who is too reduced for an operation, so that not only a safe but successful operation can be made, and in common cases the patient can be made convalescent in three-quarters of the time usually required.

With what we have been and are doing, we shall be able, in our new Free Hospital that we are now building, corner of Huntington avenue and Camden street, to perform in the Surgical half of the Hospital

500

OPERATIONS ANNUALLY.



Until then we shall remain in our old home.

THE SURGICAL STAFF AT MURDOCK'S FREE HOSPITAL FOR WOMEN, AT 30 LEVERETT STREET, ARE IN DAILY ATTENDANCE TO EXAMINE PATIENTS AND ASSIGN BEDS, SATURDAYS EXCEPTED.

Its value in cases where limbs have been broken surprises every physician who has ordered its use, as it restores the broken limbs to health and strength in a few weeks.

BABIES.

Remember, that with feeble infants who do not thrive on their mother's milk or the best prepared foods in the market, WE REQUEST NO CHANGE OF FOOD, but add 5 or more drops four times daily of Murdock' Liquid Food, and you will find that the lost or needed vitality will be restored to them in less than thirty days.

Not a case of Cholera Infantum known where Murdock's Liquid Food has been used, nor a death from Cholera Infantum where it has been prescribed by a physician.

Murdock's Liquid Food will assist all classes of chronic cases. It is the only Raw Food in the world. It is free of insoluble matter, and can always be retained by the stomach, and when given for INJECTIONS it is equally valuable and can always be retained.

Remember, all acknowledge the value of Fruits for a patient.

We use them in Liquid Food:

1st. For their own properties.

2d. They relieve the meats of their heating properties, making it safe and valuable in cases of fever, as relapse never follows when used.

3d. They preserve our meats, enabling us to offer the only Raw Food known, and it will keep in all climates when not exposed to heat, air or sun.

TO SUSTAIN OUR CLAIM

We never wish Liquid Food used until all other treatment and foods fail, then the results are quickly seen, generally in twenty-four hours.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor. All brands are made by the same formula. The latter represents the day of make, and the figure the tank. If richer, it is stronger in smell and flavor, and will bear a greater reduction.

Murdock Liquid Food Co.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

☞ **Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.** ☜

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. **WHITE**

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

COLLEGE OF PHYSICIANS AND SURGEONS,
OF CHICAGO.

The Regular Session of this Institution will commence September 21, 1886, and continue twenty-four weeks. There will also be a Spring Course.

A graded course of instruction covering two or more winter sessions. Excellent clinical advantages.

The College building (directly opposite the Cook County Hospital) is one of the most complete and elaborate edifices devoted to medical teaching in this country.

GOOD INVESTMENTS
FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

MEDICAL AND SURGICAL REPORTER AND QUARTERLY COMPENDIUM

Together for One Year, Only $6.00.

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

SAMPLES FURNISHED UPON APPLICATION.

PETROLEOL

Is put up in 1-lb., 5-lb., 10-lb., 25-lb., 50-lb. and 100-lb. Cans.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The Essential Elements** to the Animal Organization—Potash and Lime;
The **Oxydizing Agents**—Iron and Manganese;
The **Tonics**—Quinine and Strychnine;
And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all Others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Each Bottle of Fellows' Hypophosphites Contains 128 Doses.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars and Samples Sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestlé's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish: "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient, Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

NOTE.—No milk required in preparing Nestlé's Food, only water used.

Institute

COCA CORDIAL!

A Palatable Preparation of Coca Erythroxylon,

Containing, in an agreeable vehicle, the active medicinal principle, free from the bitter astringent constituents of the drug.

The sedative, tonic, and stimulant effects of coca erythroxylon and its preparations, and their wide application in medical practice, are now too well known to the medical profession to need extended comment.

Coca has been extensively used with gratifying success for the relief of morbid conditions depending on nervous exhaustion, in the nervous irritability following excesses of any kind, in neurasthenia, to facilitate digestion in dyspepsia, to relieve the morbid depression of spirits resulting from exhausting mental labor, in nausea and vomiting of reflex origin, and in the treatment of the alcohol and opium habits.

In a great variety of affections it has proved itself to be a drug ranking in therapeutic importance with opium and quinine.

The Coca Cordial presents the drug in a palatable form, commending it especially to the large class of persons of delicate nervous organization, for whom it is most often indicated.

In its preparation the astringent and bitter constituents of Coca, which are not essential to its medicinal action, have been eliminated, while care has been taken to retain unchanged the active principle cocaine. One fluidounce of the cordial represents 60 grains of coca leaves of good quality, the vehicle employed being an agreeable cordial of a rich vinous flavor.

☞ **We shall be pleased to send on application a circular more fully descriptive of Coca Cordial and its application, and we trust physicians will communicate to us the results of their experience in the use of this preparation, so far as it is likely to be of general interest to the profession.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

NEW YORK:
60 Maiden Lane & 21 Liberty St.

DETROIT, MICH.

BROMIDIA

The Hypnotic.

FORMULA:
Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:
One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:
Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:
Same as Opium or Morphia.

DOSE:
One Fluid Drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:
Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:
One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:
Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

GOOD INVESTMENTS

FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a modicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

W. J. ASDALE, Sec'y Faculty,
No. 2107 Penn Ave., Pittsburgh.

J. B. MURDOCH, Dean,
No. 4232 Fifth Ave., Pittsburgh.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

Fluid Forms of Hydrastis.

The reputation of this drug as a therapeutic agent was first gained, through its employment in the form of an *infusion*, and in the fifty years following its introduction into medical practice, a continuous effort has been made by manufacturers to perfect a preparation which would represent all the active principles of the drug, without the high price of the salts, either alone or in combination.

The most prejudicial writers on Materia Medica, accord to the late Wm. S. Merrell the largest share of credit in the introduction of Hydrastis preparations, and to the present organization the reputation of being the *largest consumers of the drug in the world.* For more than a half century, Hydrastis has been made a study in our laboratory, and we do not think we exaggerate its importance when we assert that it stands pre-eminent to-day as the most valuable exponent of our vegetable Materia Medica.

The following preparations, *in fluid form*, are receiving our special attention at this time :

Fluid Hydrastis—MERRELL.

Is what its name implies—the active, medicinal principles of the drug in natural combination and in a fluid form. It has a bright, yellow color, perfectly clear, free from sediment, and with an unmistakable odor of the *fresh drug.*

Fluid Hydrastis is a pure, neutral solution of all the alkaloidal constituents of the drug, rejecting the oil, gums, irritating and offensive resins, and inert extractive matters. The success attending its introduction is the best evidence of its therapeutic value.

Unsuccessful imitations and would-be substitutes are met with on every hand. Preparations said to be "just as good" or "about the same thing," but always " a little cheaper," attest the wide spread and growing popularity of Fluid Hydrastis. All such, compared with the latter as to physical appearance or as representatives of the drug, *are condemned ;* dispensed in prescriptions, *they are readily detected ;* tested therapeutically, they are *promptly rejected* as unworthy of confidence.

Fluid Hydrastis is applicable to the treatment of all irritable, inflammatory and ulcerative conditions of the mucous tract.

This statement of a well-known medical writer and journalist has become axiomatic :

"No remedy for physician's use has been received with such universal approval."

Solution Bismuth and Hydrastia—MERRELL.

An invaluable and scientific combination, wherein the beneficial action of the white alkaloid is increased by association with Bismuth. This solution contains 2½ grains of the double Citrate Bismuth and Hydrastia ; twenty-five per cent. of which is Hydrastia Citrate.

The cordial reception accorded this preparation marks it as the most valuable combination in the market in which the white alkaloid alone represents the valuable properties of the drug. Used in diseases of the nasal passages, of the eye, of the throat, of the stomach and intestines, of the reproductive organs and bladder, it is equally beneficial.

Colorless Solution of Hydrastia—MERRELL.

This is a permanent solution of the white alkaloid, without the addition of any other medicinal agent to modify or increase its action. It is offered without special recommendation to meet the views of a limited number of physicians, with whom the color of the Fluid Hydrastis is an objection. This solution contains in one fluid pint, the same proportionate strength of white alkaloid as exists in an average quality of crude root.

See notes above on Solution Bismuth and Hydrastia.

"Merrell's Hydrastis Preparations" are for sale by Wholesale Druggists throughout the United States. Please specify "Wm. S. M. Chem. Co." in ordering or prescribing.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

THE PROFESSION.

The following is a partial list of Medical Authors who advise the use of pure alcoholic stimulant, and physicians who prescribe **Duffy's Pure Malt Whiskey:**

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

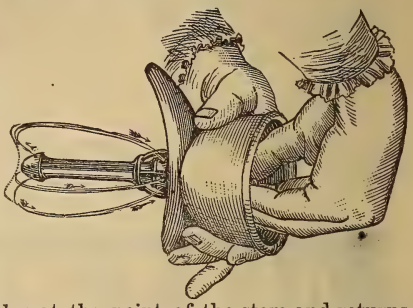
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

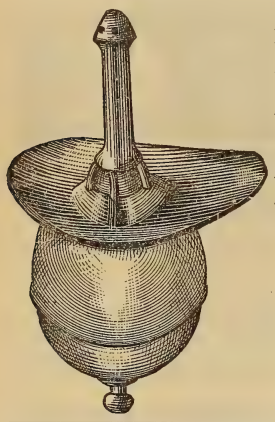
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, is shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $2.75. To physicians $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA,

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886-87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

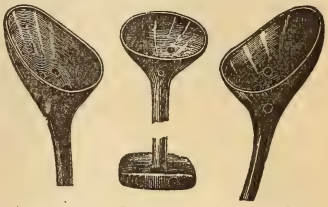
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

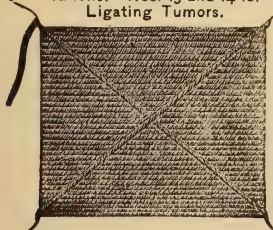
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.

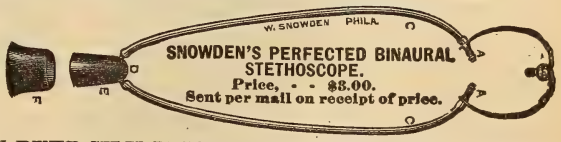


No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.



IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

HOLLOW SUPPOSITORIES.

WITH CONOIDAL SELF-SEALING STOPPERS,

All made from Pure BUTTER OF CACAO ONLY.

Each box contains A MEDICINE DROPPER and A PAIR OF TONGS.

The object of this invention is to supply Physicians, Druggists, Veterinary Surgeons, and others, with HOLLOW SUPPOSITORIES of various sizes and shapes to meet every probable demand, and into which they can put any kind of MEDICINE or NUTRIMENT, thus producing firm, smooth, EVENLY MEDICATED Suppositories, that are cheaper and more reliable than those made by the old method.

Nos. 0.—1.—2.—3 are provided with conoidal stoppers. The stoppered ends are to be inserted, when the contraction of the sphincter ani will force the suppositories up into the rectum without the use of a suppository syringe or any other appliance whatever.

HALL & RUCKEL, Wholesale Druggists, Proprietors,

218 GREENWICH STREET, NEW YORK.

A sample box of Hollow Suppositories will be mailed free on application, mentioning the PHILA. MED. AND SURG. REPORTER.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

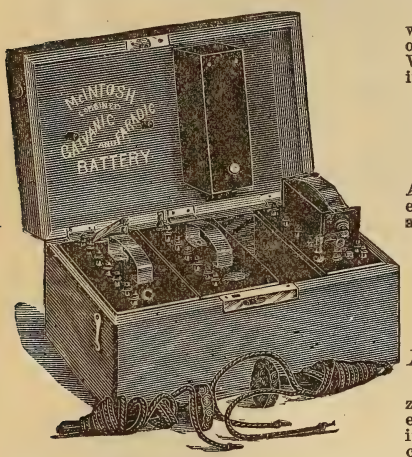
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS NF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

COLLEGE OF PHYSICIANS AND SURGEONS,
OF CHICAGO.

The Regular Session of this Institution will commence September 21, 1886, and continue twenty-four weeks. There will also be a Spring Course.

A graded course of instruction covering two or more winter sessions. Excellent clinical advantages.

The College building (directly opposite the Cook County Hospital) is one of the most complete and elaborate edifices devoted to medical teaching in this country.

FEES:

Matriculation	$ 5 00
General Ticket	60 00
Dissecting Ticket (including material)	10 00
Final Examination Fee	30 00

For further information or announcements, address

Dr. D. A. K. STEELE, Secretary, 1801 State Street, Chicago, Ill.

BALTIMORE MEDICAL COLLEGE, BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary, adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean, S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

MEDICAL AND SURGICAL REPORTER
AND QUARTERLY COMPENDIUM
Together for One Year, Only $6.00.

Miami Medical College,
CINCINNATI, OHIO.

SESSION 1886--87.

The Session of 1886-87 will begin TUESDAY, September 21, 1886, and continue until March 1, 1887.

This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.

J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.

BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.

W. H. TAYLOR, M. D.,
Professor of Obstetrics.

W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.

W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.

N. P. DANDRIDGE, M. D.,
Professor of Practice of Surgery and Clinical Surgery.

T. W. LANGDON, M. D.,
Professor of Anatomy.

JOS. EICHBERG. M. D.,
Professor of Physiology.

W. A. ROTHACKER, M. D.,
Professor of Principles of Surgery and Pathology.

☞For Circulars, address

J. C. MacKENZIE, M. D., Secretary,
or W. H. TAYLOR, M. D., Dean.

The Jefferson Medical College

OF PHILADELPHIA.

THE SIXTY-SECOND SESSION of the Jefferson Medical College will begin on FRIDAY, October 1, 1886, and will continue until the end of March, 1887. Preliminary Lectures will be held from MONDAY, 20th of September.

PROFESSORS.

J. M. DA COSTA, M. D., LL. D.,
Practice of Medicine.

ROBERTS BARTHOLOW, M. D., LL.D.,
Materia Medica, General Therapeutics, and Hygiene.

HENRY C. CHAPMAN, M. D.,
Institutes of Medicine and Medical Jurisprudence.

SAMUEL W. GROSS, M. D.,
Principles of Surgery and Clinical Surgery.

JOHN H. BRINTON, M. D.,
Practice of Surgery and Clinical Surgery.

THEOPHILUS PARVIN, M. D., LL.D.
Obstetrics and Diseases of Women and Children.

J. W. HOLLAND, M. D.,
Medical Chemistry and Toxicology.

W. S. FORBES, M. D.,
General, Descriptive, and Surgical Anatomy.

WILLIAM THOMPSON, M. D.,
Professor of Ophthalmology,

MORRIS LONGSTRETH, M. D.,
Lecturer on Pathological Anatomy.

The regular course of lectures by the Faculty embraces the whole medical curriculum. This course is supplemented by the lectures on special topics, and demonstrations of the Spring and Fall terms, respectively.

☞ The Faculty invite the attention of the medical profession and students to their thorough system of practical Laboratory work. To each department of the regular curriculum there is appended a Laboratory Course, carried on in large and thoroughly equipped apartments in the College, by specially appointed Demonstrators, under the immediate direction of the Professor. In this way each candidate for the degree of M. D. is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Physiology, Histology, and Experimental Physiology, and Minor Surgery, Bandaging, Operations on the Cadaver, etc., and in the Department of Medicine, "clinical conferences," and practical lessons in Physical Diagnosis. There are, we believe, no corresponding practical courses in any other Medical College in this country—not at least to the same extent and with the same variety and constituting a part of the regular curriculum.

☞ This course of Instruction is *free of charge, but obligatory upon* candidates for the Degree, except those who have had such instruction and those who are Graduates of other Colleges of ten years' standing.

THE SPRING COURSE OF LECTURES begins early in April, and ends in June. There is no additional charge for this Course to matriculates of the College, except a registration fee of five dollars; non-matriculates pay forty dollars, *thirty-five dollars of which, however, are credited on the amount of fees paid for the ensuing Winter Course.*

Desirable opportunities are afforded to graduates of Medicine for pursuing special courses, and for instruction in the recognized Specialties.

CLINICAL INSTRUCTION is given *daily* at the HOSPITAL OF THE JEFFERSON MEDICAL COLLEGE throughout the year by Members of the Faculty, and by the Hospital Staff, and at the Pennsylvania and other Hospitals several times a week.

FEES.

Matriculation Fee (paid once)	$ 5 00
Ticket for all Branches	140 00
Practical Anatomy	10 00
Graduation Fee	30 00
Fees for a full Course of Lectures to those who have attended two full courses at other (recognized) Colleges—the matriculation fee, and	70 00
To Graduates of such Colleges, the matriculation fee and	70 00
To Dental Graduates the first course is $60, and the second is	100 00

To Graduates in Pharmacy the general ticket is $100 for each year.

There are no Extra Fees.

The Annual Announcement, giving full particulars, will be sent on application to

Roberts Bartholow, M. D.,

DEAN.

MATHEY-CAYLUS' GLUTEN

SILVER

1854

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER

1854

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM,
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ⅓ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 8 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on unce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

MEDICAL COLLEGE OF OHIO,

**—LANDRETH'S SEEDS ARE THE BEST—
NORTH, SOUTH, EAST, OR WEST!**

Everything of the best. SEEDS and IMPLEMENTS for Farm, Garden, or Country-Seat. Illustrated and Descriptive Catalogues Free upon application. Over 1500 acres under cultivation growing LANDRETH'S Garden Seeds. Founded 1784.

D. LANDRETH & SONS,
Philadelphia.

VIRUS.

VERY FINE HUMAN CRUSTS OF VACCINE VIRUS can be furnished from this office at

$1 and $2 per Crust.

Address
D. G. BRINTON,
115 South Seventh Street.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestle's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish: "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient, Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

☞ NOTE.—No milk required in preparing Nestlé's Food, only water used.

Smithsonian Institute

FILLED
SOLUBLE ELASTIC CAPSULES
OF
Quinine Sulphate and of Cinchonidia Sulphate.

We take pleasure in being able to offer the profession a device for the exhibition of quinine and cinchonidia, which presents many points of superiority over any which has been heretofore suggested. By means of our Soft Elastic Capsules, the objectionable taste of the drug is, of course, completely concealed; while the ease with which this capsule is swallowed, after it has been lubricated with the saliva, makes it vastly superior to a pill or the hard capsule.

We manufacture two sizes of these Quinine and Cinchonidia-Filled Soft Elastic Capsules, containing, respectively, 1, 2 and 3 grains, and 4 and 5 grains of the salts. While each of these two sizes contains a different quantity, the bulk of the contents does not vary with the quantity of the drug, the capsule being completely filled, in case of the smaller quantity, with sugar of milk. Thus in the first size, the capsule cantaining one grain of the drug contains two grains of sugar of milk, and that containing two grains of the drug being filled out with one grain of sugar of milk.

We have been led to put up quinine and cinchonidia in this form through the great popularity which our Soft Elastic Liquid-Filled Capsules have achieved in the short period since our introduction of them. For those who are familiar with the latter, the Quinine and Cinchonidia-Filled Soft Elastic Capsules will re-require no commendation.

An additional advantage possessed by these capsules is the fact that the drug entering into each one of them is separately weighed before being encapsuled. We are thus enabled to guarantee the absolute correctness of the amount claimed on the label.

These capsules are put up in boxes containing 1 doz., 2 doz., 3 doz., and 100 in each. Owing to their soft nature, to put them up in bottles, after the manner of pills or hard capsules, would be to expose them to the risk of moulding, and to distort their shape.

Both the manufacture and the packing of these capsules require especial care. We, therefore, in order to guard against the imposition of imitators, have sealed each box put up by us, and disclaim responsibility for any which are taken from a box the seal of which has been broken prior to its coming into the purchaser's possession.

We respectfully ask a trial of these capsules at the hands of the profession, feeling confident of a favorable judgment.

PARKE, DAVIS & CO.,

Manufacturing Chemists,

60 Maiden Lane and 21 Liberty Street. } NEW YORK. DETROIT, MICHIGAN.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

GREEN SPRING SANITARIUM,

AND

WATER CURE.

For the treatment of all forms of Nervous Diseases, including the Alcohol and Opium habit; also diseases incident to Women, Rheumatism, Skin Diseases and Dyspepsia. Seventy miles west of Cleveland, in a natural grove of ten acres. Sixteen years successful operation. Means and appliances complete. Treatment by baths, electricity and massage, a specialty. One of the largest medicinal springs in America. Elegant apartments. Moderate terms. For particulars address **JOHN S. MARSHALL, M. D., Superintendent, Green Spring, Ohio.**

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

Medical and Surgical Reporter AND Quarterly Compendium,

For One Year, Only $6.00.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent, of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime. and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.*: "***Ext. carnis, fl. comp. (Colden's.)***" It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

PEPTONATE OF IRON

(FAIRCHILD),

In Tablets, Each Containing Three Grains.

The Peptonate of Iron is considered to be the most readily assimilable of all the forms of iron.

It contains iron in a peculiar combination with peptone, which presents obvious advantages over the ordinary chemical preparations of iron.

The tablets have been found to produce the best effects which may be expected from iron, without disturbing the digestion or provoking the untoward symptoms which frequently arise from its use. These tablets have been for some time subjected to clinical tests by many physicians of this city, with such results that we feel satisfied in offering this new preparation in the belief that a more extended use will further confirm its value.

DOSE for an adult, usually one tablet thrice a day, after meals.

These tablets are well borne by children, who may take one or more a day.

FAIRCHILD BROS. & FOSTER,

Makers of Digestive Ferments and Kindred Preparations,

82 and 84 FULTON STREET, NEW YORK.

Infantile Atrophy.

"INFANTILE ATROPHY, or the slow wasting which is a familiar symptom in hand-fed babies, is one of the commonest causes of death in early infancy."

"INFANTILE ATROPHY is the consequence of insufficient nourishment. The child wastes because he is starved. But it is not to actual lack of feeding that the starvation is usually to be ascribed. A baby fed from a breast which secretes milk poor in quality and insufficient for the child's support, will, of course, grow slowly thinner; but an infant supplied largely with farinaceous compounds, from which his feeble digestive organs fail to derive even a minimum of nourishment, will waste with startling rapidity."

"Mellin's Food may be used from the first, and is almost always well digested. Farinaceous matters, unless guarded by malt, as in Mellin's Food, should not be given to a child younger than six months."

From "Disease in Children," by Eustace Smith, M. D., F. R. C. P., London, England.

A sample of Mellin's Food, sufficient for trial, will be sent free to any Physician desiring it.

DOLIBER, GOODALE & CO., BOSTON, MASS.

INTERNATIONAL HEALTH EXHIBITION.

LONDON, 1884.

The Jury Have Granted

TO

Apollinaris

THE

HIGHEST AWARD

Over ALL other Mineral Waters, Natural or Artificial.

"APOLLINARIS reigns alone among Natural Dietetic Table Waters. Its numerous competitors appear to have, one after another, fallen away."

BRITISH MEDICAL JOURNAL,
MAY 31, 1884.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

SAVORY & MOORE, 143 New Bond Street, London.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

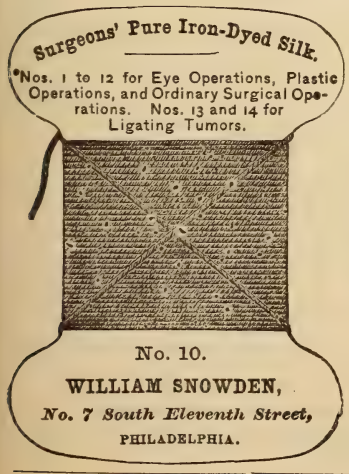
The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.



Surgeons' Pure Iron-Dyed Silk.
Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.
No. 10.
WILLIAM SNOWDEN,
No. 7 South Eleventh Street,
PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_32P.O._4$, Sodium Phosphate $Na_2H.P.O._4$, Ferrous Phosphate $Fe_32P.O._4$, Trihydrogen Phosphate $H_3P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

THE PROFESSION.

The following is a partial list of Medical Authors who advise the use of pure alcoholic stimulant, and physicians who prescribe **Duffy's Pure Malt Whiskey:**

We are the discoverers and only manufacturers in the **World, of an absolutely pure Whiskey.**

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents,** the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

Dusart's Syrup and Wine of Lacto-Phosphate of Lime.

The properties of which are scientifically founded on physiological experiments, and have received the sanction of several years' successful trial by the French and English medical profession, as producing durable reconstituent effects in all cases of Cachexia or Adynamia; when nutrition has been impaired by acute or chronic complaints.

As an article of diet it acts as general excitant of all nutritive functions, ensures digestion, brings back or increases the appetite, enriches the milk of the mother, and generally improves the vital energies. As a medicament it is chiefly used in convalescence, teething, rickets, and imperfect growth, dyspepsia, various nervous diseases, wounds, fractures, and all complaints of the osseous system.

Dusart's Syrup of Lacto-Phosphate of Lime and Iron is a ferruginous medicament specially invaluable for the above cases, when complicated with anæmia.

Dusart's work on the "Physiological and Therapeutic Action of Phosphate of Lime," will be sent free to any physician on application to Messrs. E. FOUGERA & Co.

PARIS: L. DUSART, 8 Rue Vivienne.

NEW YORK: E. FOUGERA & CO., Importing Pharmacists.

PELLETIER'S CAPSULES OF SULPHATE OF QUININE.

These Capsules, Manufactured by Messrs. ARMET DE LISLE & Co., successors to PELLETIER, contain ten centigrammes of Sulphate of Quinine, guaranteed by having the name printed upon each Capsule. They dissolve quickly in cold water, do not become hard like pills, and are taken more easily than wafers.

They are put up in bottles containing 10, 20, 100, 200, 500, and 1000 Capsules.

PARIS: 8 RUE VIVIENNE. E. FOUGERA & CO., NEW YORK.

CHAPOTEAUT'S PEARLS OF PURE PEPSINE.

The Pepsine used in the manufacture of these Pearls is made from the Stomachs of Sheep, and digests 90 times its weight of meat; it is put up in soluble Capsules which can be preserved indefinitely. Unlike all other known Pepsine, it contains neither starch nor sugar of milk.

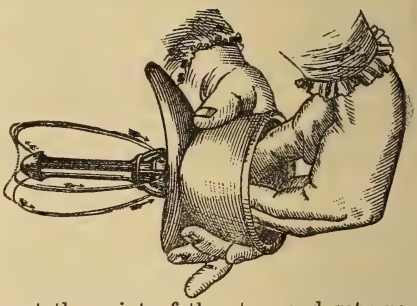
Two Pearls taken after meals are sufficient to insure the digestion of food in fifteen minutes, and remove Headache, Sleepiness, etc., which are the usual accompaniments of indigestion.

CHAPOTEAUT, Pharmaceutical Chemist, 8 Rue Vivienne, Paris.

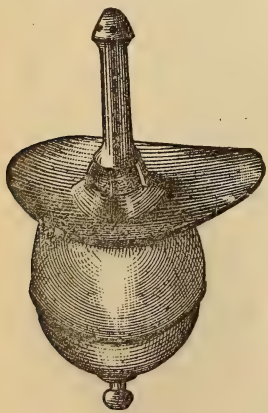
E. FOUGERA & CO., 30 N. William Street, New York.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks i the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	*Per Cent. of Atropine in the Plaster Mass.*	*Quantity of Atropine in One Plaster (Avg.)*
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W, Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

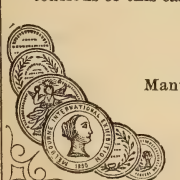
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compt-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

BALTIMORE MEDICAL COLLEGE,
BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,
S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

A GOOD RECORD

For the year ending April 1. Between one hundred and two hundred surgical operations have been performed at the Free Hospital for Women supported by the Murdock Liquid Food Co., Boston, without the loss of a single patient, and all restored to usefulness.

LIQUID FOOD WAS GIVEN BEFORE AND AFTER THE OPERATIONS.

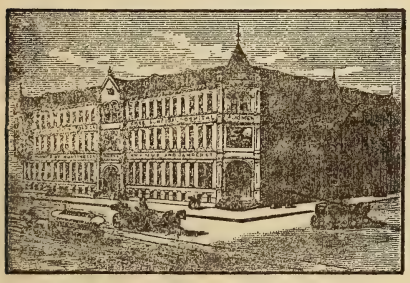
What other hospital that does not use Murdock's Liquid Food can show such a record?

By its use we can build up any patient who is too reduced for an operation, so that not only a safe but successful operation can be made, and in common cases the patient can be made convalescent in three-quarters of the time usually required.

With what we have been and are doing, we shall be able, in our new Free Hospital that we are now building, corner of Huntington avenue and Camden street, to perform in the Surgical half of the Hospital

500

OPERATIONS ANNUALLY.



Until then we shall remain in our old home.

THE SURGICAL STAFF AT MURDOCK'S FREE HOSPITAL FOR WOMEN, AT 30 LEVERETT STREET, ARE IN DAILY ATTENDANCE TO EXAMINE PATIENTS AND ASSIGN BEDS, SATURDAYS EXCEPTED.

Its value in cases where limbs have been broken surprises every physician who has ordered its use, as it restores the broken limbs to health and strength in a few weeks.

BABIES.

Remember, that with feeble infants who do not thrive on their mother's milk or the best prepared foods in the market, WE REQUEST NO CHANGE OF FOOD, but add 5 or more drops four times daily of Murdock' Liquid Food, and you will find that the lost or needed vitality will be restored to them in less than thirty days.

Not a case of Cholera Infantum known where Murdock's Liquid Food has been used, nor a death from Cholera Infantum where it has been prescribed by a physician.

Murdock's Liquid Food will assist all classes of chronic cases. It is the only Raw Food in the world. It is free of insoluble matter, and can always be retained by the stomach, and when given for INJECTIONS it is equally valuable and can always be retained.

Remember, all acknowledge the value of Fruits for a patient.

We use them in Liquid Food:

1st. For their own properties.

2d. They relieve the meats of their heating properties, making it safe and valuable in cases of fever, as relapse never follows when used.

3d. They preserve our meats, enabling us to offer the only Raw Food known, and it will keep in all climates when not exposed to heat, air or sun.

TO SUSTAIN OUR CLAIM

We never wish Liquid Food used until all other treatment and foods fail, then the results are quickly seen, generally in twenty-four hours.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor. All brands are made by the same formula. The latter represents the day of make, and the figure the tank. If richer, it is stronger in smell and flavor, and will bear a greater reduction.

Murdock Liquid Food Co.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

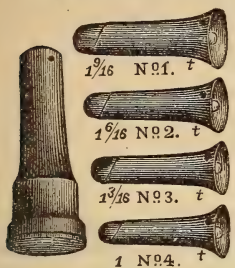
When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

STAUFER'S
HARD RUBBER SPECULUMS GUARANTEED.



Prices, Single, $2.50
Series encased, 12.00

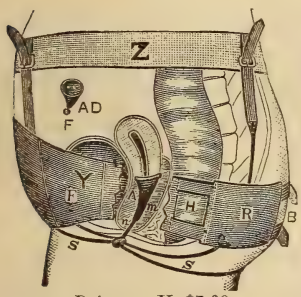
The engraving shows the shape, conductor and case so complete, that scarcely any description is necessary. For compactness there is but one conductor stem, on which each size of bulb screws. Speculums and case are all of the best quality hard rubber, and do not break from ordinary falling. Dental red enamelled inside. The mouth is polished very smooth, and shaped so that the cervix can be brought in entirely by rotation. And when brought in can be rotated to bring into view all the parts. The vaginal portion of the uterus can be seen as clearly as if located externally. When obtained, single, No. 2, is the most useful, since it reveals fully the point of the cervix in almost all multipara, and freely enters, when the position is correct, in many nullipara.

Guarantee.—One or two speculums are guaranteed; thus when returned sound and in the original wooden boxes, within six months of purchase, the money will be refunded without any deduction.

Plates.—The *First* contains 16 engravings and groups of engravings, illustrating the uterine examining instruments. *Second* contains 17 engravings and groups of engravings, illustrating the uterine replacing and supporting instruments.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

STAUFER'S
SPRING STEM UTERINE SUPPORTERS.
GUARANTEED.

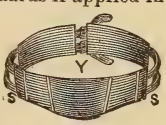


Price, on Y, $7.00
" " Z, 6.00

The engraving shows the Spring Stem Cup, which consists of over a dozen sizes. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Stem Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place, and it is sufficient at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.



Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

The Series.—This series of imstruments has been invented as cases presented themselves, requiring different styles and sizes of instruments, without change of proprietor, until it has reached its present efficiency.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when the Instrnments are obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free, on application.

Miami Medical College,

CINCINNATI, OHIO.

SESSION 1886-87.

The Session of 1886-87 will begin TUESDAY, September 21, 1886, and continue until March 1, 1887.

This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.

J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.

BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.

W. H. TAYLOR, M. D.,
Professor of Obstetrics.

W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.

W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.

N. P. DANDRIDGE, M. D.,
Professor of Practice of Surgery and Clinical Surgery.

T. W. LANGDON, M. D.,
Professor of Anatomy.

JOS. EICHBERG, M. D.,
Professor of Physiology.

W. A. ROTHACKER, M. D.,
Professor of Principles of Surgery and Pathology.

THE CANTON SURGICAL

GYNÆCOLOGICAL CHAIR.

A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

EDWIN J. BARTLETT, M. D., and WILLIAM G. THOMPSON, M. D., Lecturers on Physiology.
STEPHEN SMITH, M. D., Professor of Clinical Surgery; Surgeon to Bellevue Hospital.
A. E. McDONALD, LL.B., M. D., Professor of Medical Jurisprudence and Psychological Medicine; General Superintendent of the New York City Asylums for the Insane.
HERMAN KNAPP, M. D., Professor of Ophthalmology; Surgeon to the New York Ophthalmic and Aural Institute.
FANEUIL D. WEISSE, M. D., Professor of Practical and Surgical Anatomy; Surgeon to Workhouse Hospital, B. I.
HENRY G. PIFFARD, M. D., Clinical Professor of Dermatology; Consulting Surgeon to Charity Hospital.
F. R. S. DRAKE, M. D., Clinical Professor of Medicine; Physician to Bellevue Hospital.
JOSEPH E. WINTERS, M. D., Clinical Professor of Diseases of Children.
NEWTON M. SHAFFER, M. D., Clinical Professor of Orthopœdic Surgery; Surgeon to New York Orthopœdic Hospital.
PRINCE A. MORROW, M. D., Clinical Professor of Venereal Diseases; Surgeon to Charity Hospital.
WILLIAM C. JARVIS, M. D., Clinical Professor of Laryngology.
LAURENCE JOHNSON, M. D., Professor of Medical Botany; Visiting Physician to Randall's Island Hospital.
S. C. BLAISDELL, M. D., Demonstrator of Anatomy.

THE PRELIMINARY SESSION will begin on Wednesday, September 15, 1886, and end September 29, 1886. It will be conducted on the same plan as the Regular Winter Session.

THE REGULAR WINTER SESSION will begin September 29, 1886, and end about March, 1887. The Plan of Instruction consists of Didactic and Clinical Lectures, recitations, and laboratory work in all subjects in which it is practicable. To put the laboratories on a proper footing, a new building has been erected at an expense of forty thousand dollars.

UNIVERSITY BIOLOGICAL AND PATHOLOGICAL LABORATORY.—The Faculty, aided by generous friends, have enlarged the New Laboratory Building and established a Biological and Pathological Laboratory in connection with its Laboratory of Chemistry and Materia Medica. It is furnished with all the apparatus for the study of Bacteriology, and for special lines of investigation.

Two to five Didactic Lectures, and two or more Clinical Lectures, will be given each day by members of the Faculty. In addition to the ordinary clinics, *special clinical instruction*, WITHOUT ADDITIONAL EXPENSE, will be given to the candidates for graduation during the latter part of the Regular Session. For this purpose the candidates will be divided into sections of twenty-five members each. All who desire to avail themselves of this valuable privilege must give in their names to the Dean during the first week in November. At these special clinics students will have excellent opportunities to make and verify diagnoses, and watch the effects of treatment. They will be held in the wards of the Hospitals and at the Public and College Dispensaries.

Each of the seven Professors of the Regular Faculty, or his assistant, will conduct a recitation on his subject one evening each week. Students are thus enabled to make up for lost lectures and prepare themselves properly for their final examinations without additional expense.

THE SPRING SESSION will begin about the middle of March, and end the last week in May. The daily Clinics and Special Practical Courses will be the same as in the Winter Session, and there will be Lectures on Special Subjects by Members of the Faculty.

It is supplementary to the Regular Winter Session. Nine months of continued instruction are thus secured to all students of the University who desire a thorough course.

FEES:

For Course of Lectures	$140 00
Matriculation	5 00
Demonstrator's Fee, including material for dissection	10 00
Final Examination Fee	30 00

For further particulars and circulars address the Dean,

Prof. CHARLES INSLEE PARDEE, M. D.,

University Medical College, 410 East 26th St., New York City.

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

SAMPLES FURNISHED UPON APPLICATION.

PETROLEOL

Is put up in 1-lb., 5-lb., 10-lb., 25-lb., 50-lb. and 100-lb. Cans.

WYETH'S

LIQUID MALT EXTRACT.

Containing all the Nutrient Properties of Malt, with the least possible amount of Alcohol.

THIS IS NOT A BEVERAGE, BUT A MOST AGREEABLE AND VALUABLE NUTRIENT, TONIC AND DIGESTIVE AGENT, CONTAINING A LARGE AMOUNT OF NUTRITIOUS EXTRACTIVE MATTER AND THE SMALLEST PERCENTAGE OF ALCOHOL FOUND IN ANY LIQUID PREPARATION OF MALT. Since the introduction of this preparation to the medical profession, about eighteen months since, it has steadily grown in favor, and those who have given the subject of Malt Extracts the most careful study and investigation, are unanimous in endorsing all the claims we have made for it.

It is especially adapted for administration to nursing mothers and children, to patients suffering from nervous exhaustion, chilliness, impaired digestion, dyspepsia, etc., and particularly to those unable to digest amylaceous food.

The diastase contained in our preparation of malt, renders starchy and farinaceous foods immediately soluble, by converting the starch into malt-sugar and dextrine, in which form they can be readily assimilated by the system, thus *creating* animal heat, and aiding the formation of fat.

To mothers while nursing, it is of inestimable value, as it not only supplies strength to meet the unusual demands upon the system at that time, but improves the quality of the milk, increasing the amount of sugar and phosphates, nourishing the infant and sustaining the mother at the same time.

In cases of consumptive tendencies, and in the latter stages of phthisis, it will be found to improve the appetite, and promote the assimilation of carbonaceous food, supplying the waste of elementary matter, fortifying the system, and enabling it to better resist the undermining effects of the disease. It also acts as a roborant in all cases of debility, and is a most valuable addition to the tonic and restorative treatment required in convalescence.

As it contains less than four per cent. of alcohol, it can be given to invalids, children, etc., without danger of the secondary depressant effect so frequently experienced from the administration of spirituous remedies; the ordinary dose of a wineglassful representing less than forty grains of alcohol, and over one hundred and twenty-five grains of nutritious extractive matter, rich in diastase, preserved by our peculiar process of preparation; while in the malt-liquors it is rendered completely inert by the boiling to which they are subjected during manufacture.

It is packed in cases of two dozen each, and may be had of all the leading druggists throughout the United States.

Manufacturing Chemists,

PHILADELPHIA.

Smithsonian Institute

CASCARA CORDIAL.

The most Eligible Preparation of Cascara Sagrada

FOR THE TREATMENT OF

Habitual Constipation, Dyspepsia, Hæmorrhoids and Allied Affections

AND THE MOST CONVENIENT AND GENERALLY ACCEPTABLE

Vehicle for the Administration of Nauseous Medicines.

In Habitual Constipation.—The great desideratum in the treatment of chronic constipation has heretofore been a remedy which possessed not only a temporary specific action on the bowels, but which would be followed by no reaction and no repression of secretion, and which would be administered for a sufficient length of time to permit of restoration of normal function; a remedy which would not only alleviate temporarily the existing mal-condition, but permanently remove the cause upon which it depended for its continuance, and thus effect a radical cure. The extensive trial of Cascara Sagrada by physicians of this country and Europe, has shown it to be the drug that most fully meets all these indications. It has been added to the British Pharmacopœia, and its efficacy is attested by all physicians who have given it a trial. Cascara Cordial is prepared to disguise the inherent bitter principle of the drug, and without detracting from its medicinal value, render it acceptable to the most fastidious palate.

As a Vehicle for Nauseous Medicines, Cascara Cordial has become widely known to the profession. It not only effectually disguises the taste of such inherently bitter medicines as Quinine, but on account of its laxative properties, is a most valuable adjuvant or corrigent to any prescription containing drugs, such as iron, the continued administration of which tends to constipate. It will be seen that Cascara Cordial has a wide range of utility as an agreeable laxative excipient.

To Dispel the Acute Effects of Alcohol and Opium Abuse.—From letters received from physicians, we are led to call the attention of the profession to the use of Cascara Cordial by those addicted to the alcohol and opium habits. The headache and gastric irritation following excessive indulgence in alcohol, is avoided by adding a little Cascara Cordial to the alcoholic stimulant taken, or by taking a full dose of the cordial on retiring, after too free indulgence. The severe constipation also often attending indulgence in opium, may be relieved by the systematic administration of Cascara Cordial.

We can not assume the responsibility for any lack of success physicians may meet with in prescribing the many imitations and spurious varieties of Cascara on the market, and would request those wishing a genuine and reliable preparation, to specify P. D. & Co.'s.

☞ **Samples furnished on application to those physicians who will pay express charges.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

New York: 60 Maiden Lane. 21 Liberty Street.

DETROIT, MICH.

A NEW EMMENAGOGUE.

The following is an abstract from a letter written by one of the most prominent gynæcologists of the country, to another:

"Thus far no perfect emmenagogue has been discovered, but I regard the manganese as the best I have met with. It should be styled a regulator of menstruation rather than a pure emmenagogue, for it is useful in the absence of the menses, irregularity of their recurrence, and even in excess of flow.

"The preparation which I now employ is McKesson & Robbins' pills of the binoxide of manganese. Of this preparation I give two grains three times a day throughout the month and during the period.

"I also employ manganese in chlorosis and anæmia, and I think that by its use I obtain better results than I have heretofore done by iron." (See *Medical Record* of March 6th, page 274.)

Specify McK. & R.'s Pills Manganese Binoxide.

Important additions to McK. & R.'s list of Gelatine Coated Pills:

McK. & R. *Cascara Sagrada* and *Nux Vomica*: Ext. Cas. Sagr. gr. ii; Ext. Nux Vom. gr. 1-5.

McK. & R. Cascara Sagrada, Nux Vomica and Belladonna: Ext. Cas. Sag. gr. ii; Ext. Nucis Vom. gr. 1-8; Ext. Bellad. gr. 1-16.

McK. & R. Hydrobromide of Hyoscin 1-100 gr.

McK. & R. Binoxide of Manganese 2 grs.

McK. & R. Valerianate of Quinine ½, 1, 2, and 3 grs.

McK. & R. Valerianates Iron, Quinine, and Zinc: Ferri Valer., Quin. Valer., Zinci Valer., āā gr. i.

McK. & R. Oleate of Manganese 20 per cent. May be used to advantage when the pills cannot be administered.

Always specify McK. & R's.

COCAINE.

Although only eighteen months have elapsed since Koller's announcement of his discovery of the anæsthetic properties of this alkaloid, Cocaine already ranks among the most important agents of the practitioner. In general and dental surgery, ophthalmology, laryngology, and general therapeutics, its value is everywhere attested.

We began its manufacture immediately after the announcement of Dr. Koller, and samples of our product were submitted to many noted specialists for their experiments, and the results were highly gratifying. The demand for our manufacture of the salt, solutions, and oleates, has continued to increase, and we desire to express our sincere thanks to the medical, pharmaceutical, and dental professions for their kind encouragement as shown in their recognition of the merits of our preparations. Our appreciation of this will be shown in our constant efforts to supply all their requirements in chemicals and pharmaceuticals, of a quality worthy of their entire confidence.

Special quotations on Terebene and Cocaine for specified quantities. Very respectfully,

McKESSON & ROBBINS.

TEREBENE.

McKESSON & ROBBINS

WERE THE FIRST IN THIS COUNTRY TO MANUFACTURE THIS VALUABLE REMEDY FOR

Winter Cough, Bronchial and Chest Affections, Flatulency, Acidity, and other forms of Dyspepsia.

It may be used as an inhalation, or taken internally in doses of five or six drops on sugar every four hours, gradually increasing the dose to twenty minims.

Terebene was brought to the notice of the medical profession as far back as 1873, by M. Riban, who read a series of papers on this and similar substances before the Pharmaceutical Society of Paris. It has lately been brought into prominence by Dr. Wm. Murrell, of London, who has given it in over 114 cases; he has also notes of its value in 81 out of 94 cases. Dr. Murrell says that much of the Terebene now being sold may be described as inferior, and to this fact he ascribes some irritating effects noted in a few of his cases.

We would therefore caution the physician in prescribing and the druggist in ordering to, in all cases,

SPECIFY McK. & R.

GOOD INVESTMENTS

FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. **It is economical in use and certain in result.**

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

PECULIARITIES IN THE MANUFACTURE OF JENSEN'S CRYSTAL PEPSIN; NATURE OF THE IMITATIONS, ETC.

THE champion pepsin of the world! The only pepsin found worthy to be imitated! Even the wealthiest manufacturing chemists could not resist the temptation!

One party used glue as a cheapening adulterant for the production of scale pepsin; another party has now succeeded in flooding the market with their imitations of my scale pepsin, owing to its extreme cheapness. This party now declares (not to the profession) that they use sixty pounds of dry egg albumen, peptonized by two hundred hogs' stomachs. A third party wrap their imitations in an exact *fac simile* of my circular, making full use of all my testimonials. The great injury these imitations cause my preparations can easily be understood.

The protection chiefly relied upon is through the profession's vigilance in discriminating between the genuine and the spurious article. When prescribing my pepsin, most physicians now underline my name thus, JENSEN'S Crystal Pepsin, and no misconception can excuse substitutions. The great reputation of this pepsin lies in that it is a peptone pepsin, *i. e.*, the texture of the stomachs in which the ferment is lodged is entirely dissolved, thereby obtaining all the pepsin. When thereto is added my recent improvement in precipitating from this solution all of the earthy and saline matter, leaving only the azotized constituent, containing all of the peptic principle, and, finally, is further concentrated by drying it upon glass plates until brittle scales are formed, the reason for its high digestive power can easily be understood. Why it surpasses also in keeping qualities all of the former pepsins, is owing to its scaly and brittle texture, it being the only organic medicine in the materia medica produced for the market in scales.

It is also perfectly soluble upon the tongue, pleasant to the taste, and practically inodorous.

Although it commands a higher price than any other pepsin the market, it is, nevertheless, the most prescribed. Its purity and solubility, combined with its great digestive power upon albuminoids, have inspired physicians of a suggestive mind to try it also as a solvent for diphtheritic membranes and coagulated blood in the bladder. The success also of these novel uses, has already become generally known to the profession all over the world. Physicians writing for samples will receive prompt returns.

Dr. Hollman (*Nederl. Weekbl.*, 18, p. 272) reports the case of an old man, aged 80 years, suffering from retention of urine, in whom the introduction of a catheter failed to produce the desired result. It was found that the bladder contained coagnlated albuminoid masses mixed with blood. A few hours after the injection of about 16 grains of Dr. Jensen's Pepsin dissolved in water, a large amount of a dark, viscid, fetid fluid readily escaped by the catheter.—*London Medical Record.*

Dr. Edwin Rosenthal, acting on the suggestion of Dr. L. Wolff, has used an acidulated concentrated solution of pepsin as an application to the membranes of diphtheritic patients, for which there seemed to be no other help than tracheotomy, and reports that it acted like a charm, dissolving the membranes, admitting a free aeration of the blood, and placing them soon on the road to convalescence. The solution he used was:

℞.	Jensen's Pepsin,	ʒj.
	Acidi Hydrochloric., C. P.,	gtt. xx.
	Aquæ q. s. ft.,	fl. ʒj.

M. S.—Apply copiously every hour with a throat-mop.—*From the Medical Bulletin.*

FORMULA FOR WINE OF PEPSIN:

℞.	Carl Jensen's Pepsin,	gr. 192.
	Sherry or port wine,	℥viss.
	Glycerin puris,	℥iss.
	Acid Tartaric,	gr. v.

Sig.—fʒj. after meals. This is three grains of the pepsin in each teaspoonful.

For severe attacks of colic it has afforded present relief, after a few doses have been given in short intervals, when other remedies have failed.

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure. Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH — Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

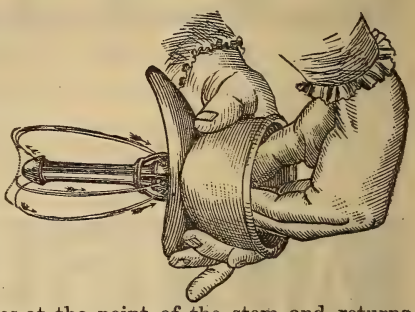
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

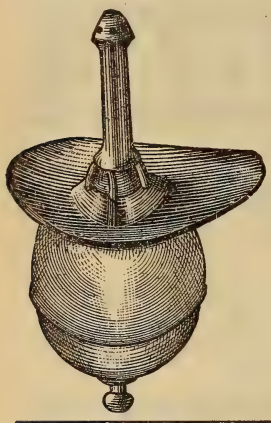
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886-87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

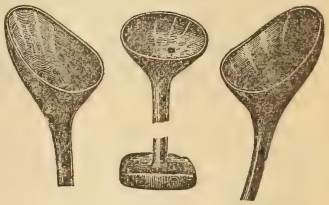
THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.



Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

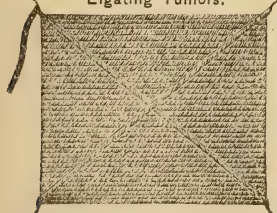
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

HOLLOW SUPPOSITORIES.

WITH CONOIDAL SELF-SEALING STOPPERS,

All made from Pure BUTTER OF CACAO ONLY.

Each box contains A MEDICINE DROPPER and A PAIR OF TONGS.

The object of this invention is to supply Physicians, Druggists, Veterinary Surgeons, and others, with HOLLOW SUPPOSITORIES of various sizes and shapes to meet every probable demand, and into which they can put any kind of MEDICINE or NUTRIMENT, thus producing firm, smooth, EVENLY MEDICATED Suppositories, that are cheaper and more reliable than those made by the old method.

Nos. 0.—1.—2.—3 are provided with conoidal stoppers. The stoppered ends are to be inserted, when the contraction of the sphincter ani will force the suppositories up into the rectum without the use of a suppository syringe or any other appliance whatever.

HALL & RUCKEL, Wholesale Druggists, Proprietors,

218 GREENWICH STREET, NEW YORK.

A sample box of Hollow Suppositories will be mailed free on application, mentioning the PHILA. MED. AND SURG. REPORTER.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

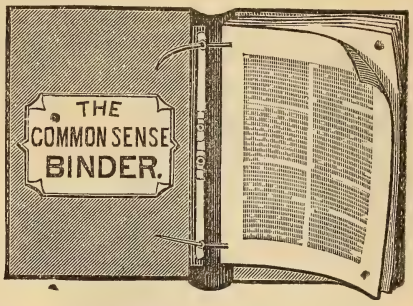
We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

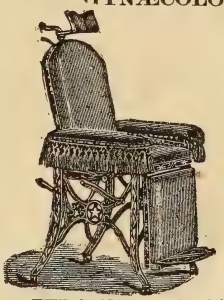
115 South Seventh Street, Philadelphia

THE CANTON SURGICAL

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

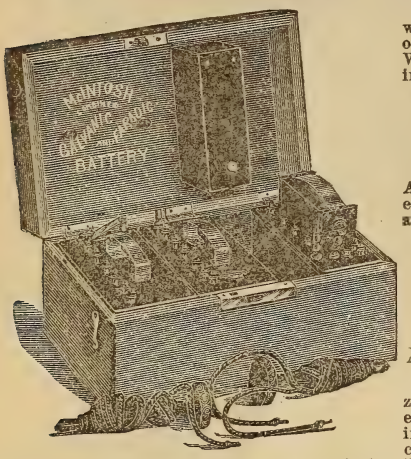
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

Miami Medical College,

CINCINNATI, OHIO.

SESSION 1886-87.

The Session of 1886-87 will begin TUESDAY, September 21, 1886, and continue until March 1, 1887.

This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.

J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.

BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.

W. H. TAYLOR, M. D.,
Professor of Obstetrics.

W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.

W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.

N. P. DANDRIDGE, M. D.,
Professor of Proctice of Surgery and Clinical Surgery.

T. W. LANGDON, M. D.,
Professor of Anatomy.

JOS. EICHBERG, M. D.,
Professor of Physiology.

W. A. ROTHACKER, M. D.,
Professor of Principles of Surgery and Pathology.

☞ For Circulars, address,

J. C. MacKENZIE, M. D., Secretary,
or W. H. TAYLOR, M. D., Dean.

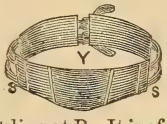
STAUFFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.



Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and staved with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

The Jefferson Medical College

OF PHILADELPHIA.

THE SIXTY-SECOND SESSION of the Jefferson Medical College will begin on FRIDAY, October 1, 1886, and will continue until the end of March, 1887. Preliminary Lectures will be held from MONDAY, 20th of September.

PROFESSORS.

J. M. DA COSTA, M. D., LL. D.,
Practice of Medicine.

ROBERTS BARTHOLOW, M. D., LL.D.,
Materia Medica, General Therapeutics, and Hygiene.

HENRY C. CHAPMAN, M. D.,
Institutes of Medicine and Medical Jurisprudence.

SAMUEL W. GROSS, M. D.,
Principles of Surgery and Clinical Surgery.

JOHN H. BRINTON, M. D.,
Practice of Surgery and Clinical Surgery.

THEOPHILUS PARVIN, M. D., LL.D.
Obstetrics and Diseases of Women and Children.

J. W. HOLLAND, M. D.,
Medical Chemistry and Toxicology.

W. S. FORBES, M. D.,
General, Descriptive, and Surgical Anatomy.

WILLIAM THOMPSON, M. D.,
Professor of Ophthalmology,

MORRIS LONGSTRETH, M. D.,
Lecturer on Pathological Anatomy.

The regular course of lectures by the Faculty embraces the whole medical curriculum. This course is supplemented by the lectures on special topics, and demonstrations of the Spring and Fall terms, respectively.

The Faculty invite the attention of the medical profession and students to their thorough system of practical Laboratory work. To each department of the regular curriculum there is appended a Laboratory Course, carried on in large and thoroughly equipped apartments in the College, by specially appointed Demonstrators, under the immediate direction of the Professor. In this way each candidate for the degree of M. D. is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Physiology, Histology, and Experimental Physiology, and Minor Surgery, Bandaging, Operations on the Cadaver, etc., and in the Department of Medicine, "clinical conferences," and practical lessons in Physical Diagnosis. There are, we believe, no corresponding practical courses in any other Medical College in this country—not at least to the same extent and with the same variety and constituting a part of the regular curriculum.

This course of instruction is *free of charge, but obligatory upon* candidates for the Degree, except those who have had such instruction and those who are Graduates of other Colleges of ten years' standing.

THE SPRING COURSE OF LECTURES begins early in April, and ends in June. There is no additional charge for this Course to matriculates of the College, except a registration fee of five dollars; non-matriculates pay forty dollars, *thirty-five dollars of which, however, are credited on the amount of fees paid for the ensuing Winter Course.*

Desirable opportunities are afforded to graduates of Medicine for pursuing special courses, and for instruction in the recognized Specialties.

CLINICAL INSTRUCTION is given *daily* at the HOSPITAL OF THE JEFFERSON MEDICAL COLLEGE throughout the year by Members of the Faculty, and by the Hospital Staff, and at the Pennsylvania and other Hospitals several times a week.

FEES.

Matriculation Fee (paid once)	$5 00
Ticket for all Branches	140 00
Practical Anatomy	10 00
Graduation Fee	30 00
Fees for a full Course of Lectures to those who have attended two full courses at other (recognized) Colleges—the matriculation fee, and	70 00
To Graduates of such Colleges, the matriculation fee and	70 00
To Dental Graduates the first course is $60, and the second is.	100 00

To Graduates in Pharmacy the general ticket is $100 for each year.

There are no extra Fees.

The Annual Announcement, giving full particulars, will be sent on application to

Roberts Bartholow, M. D.,

DEAN.

MATHEY-CAYLUS' GLUTEN

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM,
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

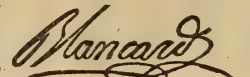
BLANCARD'S PILLS

OF UNCHANGEABLE IODIDE OF IRON.

Blancard's Pills of Iodide of Iron are so scrupulously prepared, and so well made, that none other have acquired a so well deserved favor among physicians and pharmaceutists. Each pill, containing one grain of proto-iodide of iron, is covered with finely pulverized iron, and covered with balsam of tolu. Dose, two to six pills a day. The genuine have a *reactive silver seal* attached to the lower part of the cork, and a green label on the wrapper, bearing the fac-simile of the signature of



Pharmacien, No. 40 Rue Bonaparte, Paris.

Without which none are genuine.

BEWARE OF IMITATIONS.

E. FOUGERA & CO., AGENTS, NEW YORK.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 8 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

The above *fac-simile* of our label enumerates the constituents of what has been termed by us "Liquor Bismuthi et Hydrastiæ" with the several improvements in its composition that have been made from time to time as experience has suggested.

This remarkable alterative and sedative to mucous surfaces has now been in use by the profession for ten years, being *first* prepared by us in 1872, and it has to a large extent revolutionized practice in the treatment of irritable, inflammatory and ulcerative conditions of the Mucous tract, *as:*

OF THE NASAL PASSAGES (locally).
Nasal Catarrh and Ozæna.

OF THE EYE (locally).
Conjunctivitis; Catarrhal, Gonorrhœal, Neonatorum and Purulent Opthalmia; Ulceration of the Cornea.

OF THE THROAT (locally).
Pharyngitis and Laryngitis; Diphtheria.

OF THE STOMACH AND INTESTINES (internally and locally).
Stomatitis; Gastro Intestinal Catarrh; Gastric Ulcer; Dysentery.

OF THE REPRODUCTIVE ORGANS AND BLADDER (locally).
Gonorrhœa; Urethritis; Cystitis; Vaginitis; Metritis; Uterine, Vaginal and Vesical Catarrh; Ulceration of the Os-Uteri.

Having in our possession the indorsement of physicians who have had the most gratifying success with our preparation of "Bismuth and Hydrastia" in the treatment of the above affections, we do not hesitate to emphasize its value to the Oculist, Gynæcologist or general practitioner.

A Descriptive List of our Specialties will be mailed to members of the medical profession upon application, also a sample of the above preparation will be sent to any physician who will pay express charges.

ADDRESS,

Chapman, Green & Co.

Manufacturing Chemists,

CHICAGO, ILL.

SUPPLIED BY THE WHOLESALE DRUG TRADE.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

MEDICAL COLLEGE OF OHIO,
CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.

P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.

SAMUEL NICKLES, M. D,
Professor of Materia Medica and Therapeutics and Clinical Medicine.

JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.

C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.

F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.

JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.

JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.

FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.

J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.

E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.

The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.

Three afternoons of each week are devoted to Hospital Instruction.

The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.

FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.

VERY FINE HUMAN CRUSTS OF VACCINE VIRUS can be furnished from this office at

$1 and $2 per Crust.

Address
D. G. BRINTON,
115 South Seventh Street.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestle's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish: "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient, Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

NOTE.—No milk required in preparing Nestlé's Food, only water used.

Smithsonian Institute

OVAL GELATIN-COATED PILLS

—OF—

Quinine, Iron and Zinc Valerianates.

Quinine Valerianate . . . . . 1 gr.
Iron Valerianate . . . . . 1 gr.
Zinc Valerinate . . . . . 1 gr.

A pill of triple valerianates of Quinine, Iron and Zinc has long been deservedly popular among neurologists and those practitioners called upon to treat nervous debility, hysteria, incipient melancholia, and that condition of depressed vitality so frequently observed by every physician among over-worked and under-fed women.

There seems at the present time, however, to be an intensified interest in this formula, as is evidenced by the number of laudatory reports of its efficacy that have recently appeared in the medical press.

This combination of the valerianates of three such indisputably good tonics is unquestionably of great value and wide utility, and its action in many cases, indeed, seems almost specific. We have pleasure, therefore, in calling the attention of physicians to the fact, that this pill of our manufacture can be obtained of the trade.

Peptonized Extract of Beef:

A CONCENTRATED, PALATABLE, EASILY ASSIMILATED FOOD OF THE HIGHEST NUTRITIVE VALUE,

CONTAINING ALL THE NUTRITIVE CONSTITUENTS OF BEEF.

The superiority of this preparation over other extracts of beef depends upon:

1. **The large proportion of albuminoids which it contains.**
2. **The fact that its albuminoid constituents are chiefly in the form of peptones, insuring absorption and ready assimilation.**
3. **Its appetizing flavor.**
4. **Its perfect and ready solubility in water.**

The uses of such a preparation are obvious. It is a concentrated, and at the same time an easily assimilated food, useful in all cases of acute disease where sustaining treatment is indicated, and especially valuable in convalescence, and in chronic conditions of inanition or malnutrition, particularly where the functions of the stomach are not well performed.

One part of the Peptonized Extract of Beef may be said to be the equivalent of eight parts of fresh beef. One teaspoonful (about one-half ounce) will make a pint of excellent beef tea.

A like quantity added to a pint of a vegetable soup communicates to it a rich flavor, and converts it into a highly nutritious food.

It may be employed in a still more concentrated form, if desired, but from half an ounce to one ounce of the extract is as much as it is generally advisable to give at one time.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	1/10 "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.
Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

GREEN SPRING SANITARIUM,
AND
WATER CURE.

For the treatment of all forms of Nervous Diseases, including the Alcohol and Opium habit; also diseases incident to Women, Rheumatism, Skin Diseases and Dyspepsia. Seventy miles west of Cleveland, in a natural grove of ten acres. Sixteen years successful operation. Means and appliances complete. Treatment by baths, electricity and massage, a specialty. One of the largest medicinal springs in America. Elegant apartments. Moderate terms. For particulars address **JOHN S. MARSHALL, M. D., Superintendent, Green Spring, Ohio.**

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

Medical and Surgical Reporter AND Quarterly Compendium,

For One Year, Only $6.00.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by Children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime. and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* **"*Ext. carnis, fl. comp. (Colden's.)*"** It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

HORSFORD'S ACID PHOSPHATE,

(LIQUID,)

Prepared according to the directions of Prof. E. N. Horsford, of Cambridge, Mass.
Universally recommended and prescribed by physicians of all schools.

IN DYSPEPSIA, CONSTIPATION, INDIGESTION, HEADACHE, etc.

The lining membrane of the stomach, when in a normal condition, contains cells filled with the gastric juice, in which phosphoric acid combined with lime, iron, potash, etc., is an important active principle; this is necessary to a perfect digestion. If the stomach is not supplied with the necessary gastric juice to incite or promote digestion, dyspepsia will follow with all its train of incident diseases. The only known acid which can be taken into the stomach to promote digestion, without injury, is phosphoric acid combined with lime, potash, iron, etc., *i. e.*, Horsford's Acid Phosphate, which is hereby offered to the public.

Sick Headache and Nervous Prostration.

Dr. W. P. CLOTHIER, Buffalo, N. Y., says: "I know it to be beneficial in sick headache and nervous prostration."

Beneficial Results.

Dr. E. J. WILLIAMSON, St. Louis, Mo., says: "Marked beneficial results in imperfect digestion and diabetes mellitus."

Promotes Digestion.

Dr. W. W. SCOFIELD, Dalton, Mass., says: "It promotes digestion and overcomes acid stomach."

A Good Nerve Tonic.

Dr. R. S. MCCOMBS, Philadelphia, Pa., says: "I used it in nervous dyspepsia with success. It is a good nerve tonic."

A Wonderful Remedy.

Dr. T. H. ANDREW, late Demonstrator of Anatomy, Jefferson Medical College, Philadelphia, Pa., says: "A wonderful remedy which gave me most gratifying results in the worst forms of dyspepsia."

Obstinate Indigestion.

Dr. F. G. MCGAVOCK, McGavock, Ark., says: "It acts beneficially in obstinate indigestion."

We have received a large number of letters from physicians of the highest standing, in all parts of the country, relating their experience with the Acid Phosphate, and speaking of it in high terms of commendation.

Physicians desiring to test Horsford's Acid Phosphate will be furnished a sample without expense, except express charges. Pamphlet free.

PROF. HORSFORD'S BAKING PREPARATIONS

are made of the Acid Phosphate in powdered form. They restore the phosphates that are taken from the flour in bolting. Descriptive pamphlet sent free.

RUMFORD CHEMICAL WORKS, Providence, R. I.

☞ **BEWARE OF IMITATIONS AND SUBSTITUTES.**

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

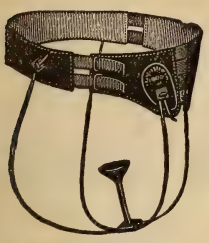
Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

SAVORY & MOORE, 143 New Bond Street, London.
Agents for America, E. FOUGERA & CO., New York.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

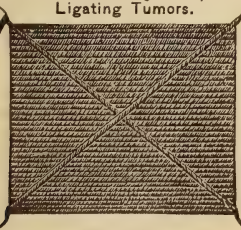
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."
HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

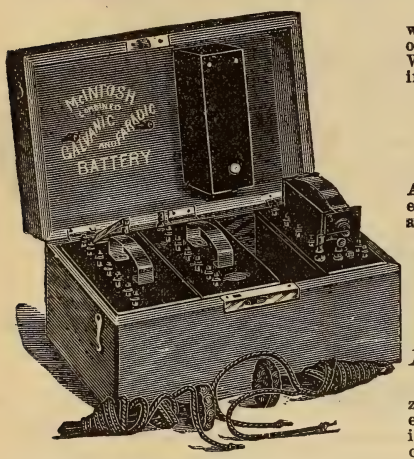
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

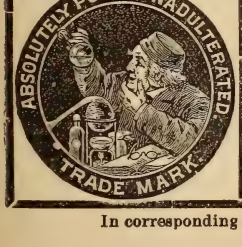
HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours r sp'y,
WM. T. CUTTER,
Conn. State Chemist.



We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents,** the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CHAPOTEAUT'S WINE OF PEPTONE.

The Peptone used in the preparation of this Wine is obtained by the action of Sheep Pepsine on Beef of the best quality. Being pure and neutral it is entirely assimilable, containing neither Glucose, Albumen, nor Chloride of Sodium; for this reason it is the only preparation used in the laboratory of Mr. Pasteur for the culture of microscopic liquids.

Each wineglassful of Chapoteaut's Wine contains the Peptone of ten grammes of Beef, and has, besides, the digestive properties of Pepsine.

It may be used for the following cases: Anæmia, Dyspepsia, Debility, Distaste of Food, Inaction of the Digestive Organs, Convalescence, Alimentation for Wet Nurses, Children and the Aged; Phthisis, Persons Weakened by Fever, Dysentery, and by patients having been operated upon for Cancerous Affections.

DOSE—One or two small wineglassfuls after meals.

Depots: Chapoteaut, 8 Rue Vivienne, Paris---E. Fougera & Co., 30 N. William St., N. Y.

MIDY'S SANTAL.

Midy's Essence of Santal is used with success in place of Copaiba and Cubebs, being harmless even in large doses. No matter what the color or amount of the secretion may be, the discharges are reduced and relief is obtained in forty-eight hours.

No unpleasant effect is caused by its use, such as diarrhœa, eructations, or indigestion, and not giving to the urine any odor.

In cases of Inflammation of the Bladder it acts rapidly, and in two or three days the bloody emission is suppressed; it is used with success in Chronic Catarrh, rendering the urine clear at once.

Depots: Midy, Chemist, 110 Faubourg St. Honore, Paris--E. Fougera & Co., 30 N. William St.

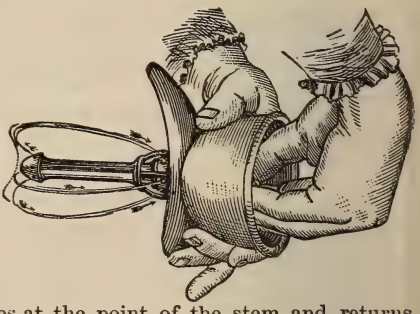
GRIMAULT & CO.'S IODIZED SYRUP OF HORSE RADISH.

The Syrup of Iodized Horse Radish is used in France on a large scale as a substitute for Cod Liver Oil. It is prepared from juices of anti-scorbutic plants. Each tablespoonful contains one and a half grains of Iodine so intimately combined as to be insensible to the action of starch.

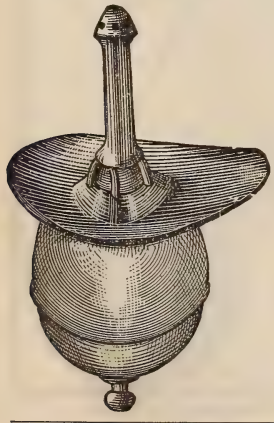
Grimault & Co., Pharmacists, 8 Rue Vivienne, Paris--E. Fougera & Co., New York.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

PHILADELPHIA, PA.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was ur "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.

SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

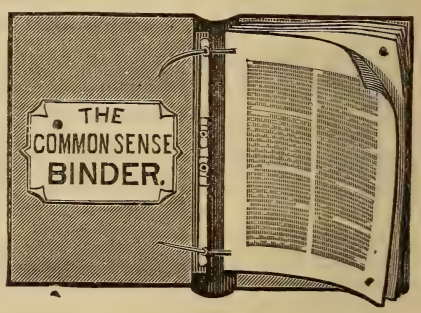
We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrb and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

Rigollot

MEDICAL COLLEGE OF OHIO,
CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.
P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.
SAMUEL NICKLES, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.
JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.
W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.
THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.
C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.
F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.
JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.
JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.
FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.
J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.
E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.
The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.
Three afternoons of each week are devoted to Hospital Instruction.
The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.
FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.

S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

A GOOD RECORD

For the year ending April 1. Between one hundred and two hundred surgical operations have been performed at the Free Hospital for Women supported by the Murdock Liquid Food Co., Boston, without the loss of a single patient, and all restored to usefulness.

LIQUID FOOD WAS GIVEN BEFORE AND AFTER THE OPERATIONS.

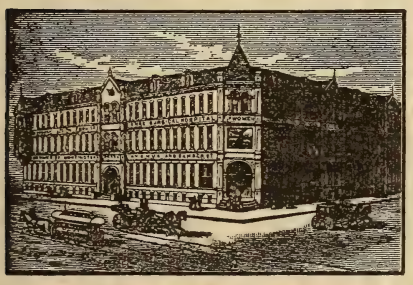
What other hospital that does not use Murdock's Liquid Food can show such a record?

By its use we can build up any patient who is too reduced for an operation, so that not only a safe but successful operation can be made, and in common cases the patient can be made convalescent in three-quarters of the time usually required.

With what we have been and are doing, we shall be able, in our new Free Hospital that we are now building, corner of Huntington avenue and Camden street, to perform in the Surgical half of the Hospital

500

OPERATIONS ANNUALLY.



Until then we shall remain in our old home.

THE SURGICAL STAFF AT MURDOCK'S FREE HOSPITAL FOR WOMEN, AT 30 LEVERETT STREET, ARE IN DAILY ATTENDANCE TO EXAMINE PATIENTS AND ASSIGN BEDS, SATURDAYS EXCEPTED.

Its value in cases where limbs have been broken surprises every physician who has ordered its use, as it restores the broken limbs to health and strength in a few weeks.

BABIES.

Remember, that with feeble infants who do not thrive on their mother's milk or the best prepared foods in the market, WE REQUEST NO CHANGE OF FOOD, but add 5 or more drops four times daily of Murdock' Liquid Food, and you will find that the lost or needed vitality will be restored to them in less than thirty days.

Not a case of Cholera Infantum known where Murdock's Liquid Food has been used, nor a death from Cholera Infantum where it has been prescribed by a physician.

Murdock's Liquid Food will assist all classes of chronic cases. It is the only Raw Food in the world. It is free of insoluble matter, and can always be retained by the stomach, and when given for INJECTIONS it is equally valuable and can always be retained.

Remember, all acknowledge the value of Fruits for a patient.

We use them in Liquid Food:

1st. For their own properties.

2d. They relieve the meats of their heating properties, making it safe and valuable in cases of fever, as relapse never follows when used.

3d. They preserve our meats, enabling us to offer the only Raw Food known, and it will keep in all climates when not exposed to heat, air or sun.

TO SUSTAIN OUR CLAIM

We never wish Liquid Food used until all other treatment and foods fail, then the results are quickly seen, generally in twenty-four hours.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor. All brands are made by the same formula. The latter represents the day of make, and the figure the tank. If richer, it is stronger in smell and flavor, and will bear a greater reduction.

Murdock Liquid Food Co.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

☞ Prepared from Manna, Purified Cathartic Acid, and Fruit Juices. ☜

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

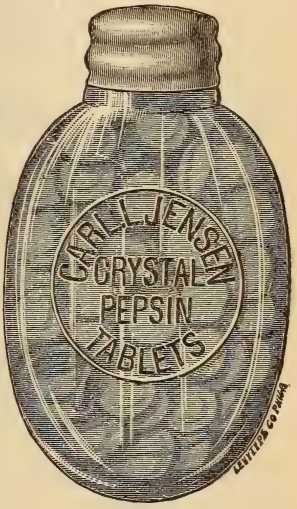
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

CARL L. JENSEN'S
CRYSTAL
PEPSIN TABLETS.
Each tablet weighs 2½ grains, and contains nothing but the pure Pepsin. 75 tablets in the bottle.
DOSE: One after each meal or oftener, until the dyspeptic pain, colic or flatulence is relieved.
PRICE, $1.00.
Manufactured and put up by
CARL L. JENSEN,
PHILADELPHIA, PA.

CARL L. JENSEN'S
"CRYSTAL PEPSIN."

SOLE ORIGINATOR OF PEPSIN IN SCALES.

This Pepsin has obtained for itself a world-wide reputation, being the most scientifically prepared Pepsin known, and of all the digestive ferments it is the most potent, the most reliable; hence this preparation is manufactured as a specialty, as scientific experiments have conclusively proved that it cannot be supplanted by the pancreatic ferments as to digestive power upon nitrogenous food. The imitations which created some demand, owing to their cheapness, are now scorned even by illegitimate druggists, since the fraudulent nature of these imitations became known. The injury these imitations so long caused my preparations is now amply compensated by the present great demand for Jensen's Crystal Pepsin.



Prof. Joseph G. Richardson, of the University of Pennsylvania, Philadelphia, after stating in MEDICAL AND SURGICAL REPORTER that the digestive strength of this Pepsin was found by him to be at least 700 times its own weight of freshly coagulated albumen in three and a half hours, concludes by saying that my method of preparing Pepsin unquestionably places within the reach of physicians a vastly improved means for aiding the stomach digestion of nitrogenous food.

JENSEN'S PEPSIN TABLETS.

For the convenience of many patients for whom this Pepsin is prescribed by itself, this Pepsin is compressed into Tablets of 2½ grains each, and put up in small pocket flasks, each containing 75 Tablets.

CARL L. JENSEN,
Manufacturing Pharmacist,
PHILADELPHIA.

THE CANTON SURGICAL AND GYNÆCOLOGICAL CHAIR.

A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

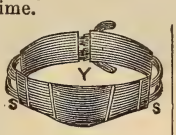
STAUFFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.



Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

GOOD INVESTMENTS
FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

SAMPLES FURNISHED UPON APPLICATION.

PETROLEOL

Is put up in 1-lb., 5-lb., 10-lb., 25-lb., 50-lb. and 100-lb. Cans.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestlé's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient, Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

☞ NOTE.—No milk required in preparing Nestlé's Food, only water used.

Smithsonian Institute

COCA CORDIAL!

A Palatable Preparation of Coca Erythroxylon,

Containing, in an agreeable vehicle, the active medicinal principle, free from the bitter astringent constituents of the drug.

The sedative, tonic, and stimulant effects of coca erythroxylon and its preparations, and their wide application in medical practice, are now too well known to the medical profession to need extended comment.

Coca has been extensively used with gratifying success for the relief of morbid conditions depending on nervous exhaustion, in the nervous irritability following excesses of any kind, in neurasthenia, to facilitate digestion in dyspepsia, to relieve the morbid depression of spirits resulting from exhausting mental labor, in nausea and vomiting of reflex origin, and in the treatment of the alcohol and opium habits.

In a great variety of affections it has proved itself to be a drug ranking in therapeutic importance with opium and quinine.

The Coca Cordial presents the drug in a palatable form, commending it especially to the large class of persons of delicate nervous organization, for whom it is most often indicated.

In its preparation the astringent and bitter constituents of Coca, which are not essential to its medicinal action, have been eliminated, while care has been taken to retain unchanged the active principle cocaine. One fluidounce of the cordial represents 60 grains of coca leaves of good quality, the vehicle employed being an agreeable cordial of a rich vinous flavor.

☞ **We shall be pleased to send on application a circular more fully descriptive of Coca Cordial and its application, and we trust physicians will communicate to us the results of their experience in the use of this preparation, so far as it is likely to be of general interest to the profession.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

NEW YORK:
60 Maiden Lane & 21 Liberty St.

DETROIT, MICH.

THE BEST
—ANTI-SEPTIC—
For Internal and External Use.

FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzoboracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

LISTERINE comes nearer the ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in SURGERY, OBSTETRICS, GYNECOLOGY, LEUCORRHŒA, GONORRHŒA, and all MUCOUS MEMBRANE DISEASES; internally in TYPHOID and other FEVERS, ZYMOTIC DISEASES, DIPHTHERIA, SCARLET FEVER, DYSPEPSIA, DYSENTERY, DIARRHŒA, all forms of CHOLERA, etc., and as a general PROPHYLACTIC

THE BEST
—ANTI-LITHIC—
For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, AT ONCE justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of URINARY CALCULUS, GOUT, RHEUMATISM, BRIGHT'S DISEASE, DIABETES, CYSTITIS, HÆMATURIA, ALBUMINURIA, and Vesical Irritations generally.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	½ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.
Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

WESTERN PENNSYLVANIA MEDICAL COLLEGE,

PITTSBURGH, PA.

Regular Term opens the first week in October, 1886, and closes the last week in March, 1887.

The requirements are fully described in the Announcement, which will be sent to any desiring it.

A Full Corps of Instructors; Special and Unsurpassed Clinical Advantages. Course of Instruction complete in all Departments, and thoroughly Practical.

Fourteen Clinical Lectures each week.

The College Building, now in construction contiguous to the Western Pennsylvania Hospital, will be, when finished, one of the most commodious and complete in the country.

Fee for General Ticket, ... $100,

For Prospectus, or other information, address either

W. J. ASDALE, Sec'y Faculty,

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

ESTABLISHED 1852.

HYDRASTIS

AND ITS PREPARATIONS.

The WM. S. MERRELL CHEMICAL CO. of Cincinnati—"**The largest consumers of Golden Seal root in the world**" (see "**Drugs and Medicines of North America**")—offer to the medical profession, through the drug trade, the following well-known and highly approved preparations of this leading American drug.

FLUID HYDRASTIS.

A neutral solution of all the active medicinal constituents, forming a perfectly clear solution with alcohol, glycerin, syrup, or water. May be properly and profitably substituted for the Fluid Extract of the U. S. P. in the manufacture of syrup, wine or tincture.

COLORLESS HYDRASTIS.

A neutral solution of the White Alkaloid alone—without color or stain.

SULPHATE HYDRASTIA—CRYSTALLIZED.

[**SULPHATE BERBERINA.**]

This is the Sulphate of Yellow Alkaloid, which we present in crystals to guard against the substitution of impure and unskillful preparations in a powdered form.

Subsequent to its introduction by us under its present commercial title, this salt was identified as Berberina by Mahla, Durand and others. To avoid confusion with the Alkaloid Bebeerine and its salts, and to fully establish its identity, we continue the name by which it was originally introduced.

SOLUTION BISMUTH AND HYDRASTIA.

A neutral solution of the double Citrate of Bismuth and Hydrastia (White Alkaloid); each fluid drachm containing 2½ grains of the double salt.

Represented in New York City by

LEHN & FINK, 128 William Street.

Prices Current and Descriptive Circulars cheerfully supplied. Correspondence invited.

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

DUFFY'S PURE MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours respy,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents,** the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH — Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS. — Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS. — Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS. — Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS. — Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

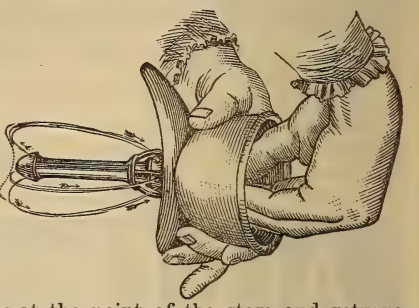
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

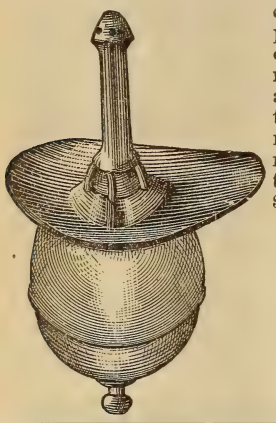
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886-87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY.

WM. E. A. AIKEN, M. D. LL. D.,
Emeritus Professor of Chemistry and Pharmacy.
GEORGE W. MILTENBERGER, M. D.,
Professor of Obstetrics.
CHRISTOPHER JOHNSTON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children, and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.

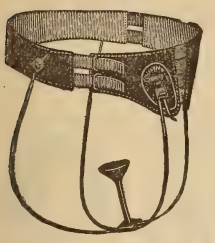
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D. D. S.,
Demonstrator of Operative Dentistry.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For Catalogues and other information apply to Dr. F. J. S. GORGAS, Dean, 259 Eutaw Street, Baltimore.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

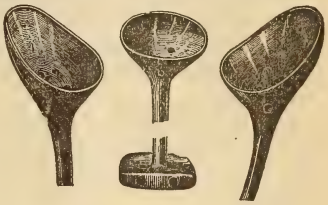
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

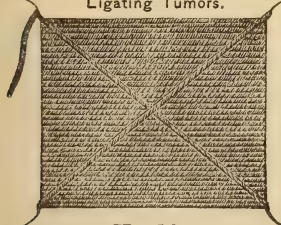
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

HOLLOW SUPPOSITORIES.

WITH CONOIDAL SELF-SEALING STOPPERS,

All made from Pure BUTTER OF CACAO ONLY.

Each box contains A MEDICINE DROPPER and A PAIR OF TONGS.

The object of this invention is to supply Physicians, Druggists, Veterinary Surgeons, and others, with HOLLOW SUPPOSITORIES of various sizes and shapes to meet every probable demand, and into which they can put any kind of MEDICINE or NUTRIMENT, thus producing firm, smooth, EVENLY MEDICATED Suppositories, that are cheaper and more reliable than those made by the old method.

Nos. 0.—1.—2.—3 are provided with conoidal stoppers. The stoppered ends are to be inserted, when the contraction of the sphincter ani will force the suppositories up into the rectum without the use of a suppository syringe or any other appliance whatever.

HALL & RUCKEL, Wholesale Druggists, Proprietors,

218 GREENWICH STREET, NEW YORK.

A sample box of Hollow Suppositories will be mailed free on application, mentioning the PHILA. MED. AND SURG. REPORTER.

Omnico

FORMULA: Boracic Acid, Chlorate of Potassium, Chloride of Sodium, Thymol, Menthol, Gaultheria, and Caryophyllus.

Antiseptic, Disinfectant, Prophylactic, Anti-Inflammatory, Mildly Astringent, Secondary Sedative Action.

An *Alterative* specially adapted to inflamed mucous and cutaneous surfaces.

For all varieties of **Catarrhal** disease, **Pharyngitis, Laryngitis, Diphtheria, Diphtheritic** and **Ulcerous Sore Throat, Stomatitis, Leucorrhœa, Vaginitis, Endometritis, Pruritis, Gonorrhœa, Conjunctivitis, Eczema, Psoriasis, Pityriasis, Genito-Urinary** and **Rectal** disorders.

Used as a douche, inhalant, gargle, injection, spray, or dressing with absorbent cotton.

A thoroughly effective

Antiseptic, Disinfectant and Deodorant,

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

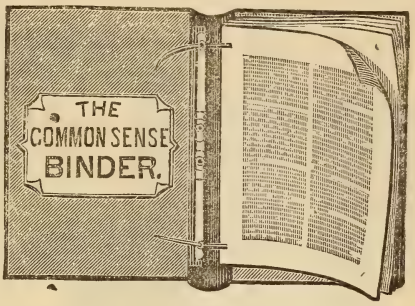
We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

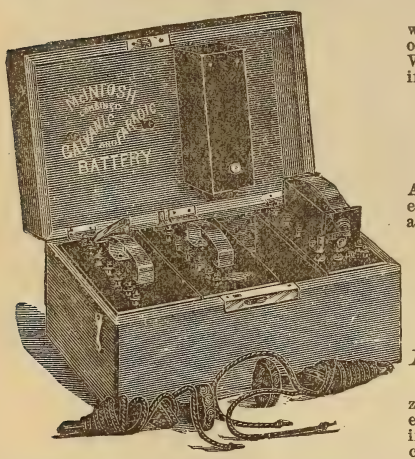
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

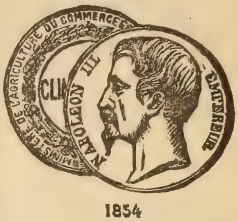
SILVER

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER



Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,

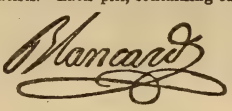
BLANCARD'S PILLS

OF UNCHANGEABLE IODIDE OF IRON.

Blancard's Pills of Iodide of Iron are so scrupulously prepared, and so well made, that none other have acquired a so well deserved favor among physicians and pharmaceutists. Each pill, containing one grain of proto-iodide of iron, is covered with finely pulverized iron, and covered with balsam of tolu. Dose, two to six pills a day. The genuine have a *reactive silver seal* attached to the lower part of the cork, and a green label on the wrapper, bearing the fac-simile of the signature of



Pharmacien, No. 40 Rue Bonaparte, Paris.

Without which none are genuine.

BEWARE OF IMITATIONS.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; Dose from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; Dose, from 3 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on ounce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

MEDICAL COLLEGE OF OHIO,

CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.

P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.

SAMUEL NICKLES, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.

JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.

C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.

F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.

JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.

JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.

FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.

J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.

E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.

The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.

Three afternoons of each week are devoted to Hospital Instruction.

The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.

FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.

BALTIMORE MEDICAL COLLEGE,

BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,
S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

The Jefferson Medical College

OF PHILADELPHIA.

THE SIXTY-SECOND SESSION of the Jefferson Medical College will begin on FRIDAY, October 1, 1886, and will continue until the end of March, 1887. Preliminary Lectures will be held from MONDAY, 20th of September.

PROFESSORS.

J. M. DA COSTA, M. D., LL. D.,
Practice of Medicine.

ROBERTS BARTHOLOW, M. D., LL.D.,
Materia Medica, General Therapeutics, and Hygiene.

HENRY C. CHAPMAN, M. D.,
Institutes of Medicine and Medical Jurisprudence.

SAMUEL W. GROSS, M. D.,
Principles of Surgery and Clinical Surgery.

JOHN H. BRINTON, M. D.,
Practice of Surgery and Clinical Surgery.

THEOPHILUS PARVIN, M. D., LL.D.
Obstetrics and Diseases of Women and Children.

J. W. HOLLAND, M. D.,
Medical Chemistry and Toxicology.

W. S. FORBES, M. D.,
General, Descriptive, and Surgical Anatomy.

WILLIAM THOMPSON, M. D.,
Professor of Ophthalmology,

MORRIS LONGSTRETH, M. D.,
Lecturer on Pathological Anatomy.

The regular course of lectures by the Faculty embraces the whole medical curriculum. This course is supplemented by the lectures on special topics, and demonstrations of the Spring and Fall terms, respectively.

The Faculty invite the attention of the medical profession and students to their thorough system of practical Laboratory work. To each department of the regular curriculum there is appended a Laboratory Course, carried on in large and thoroughly equipped apartments in the College, by specially appointed Demonstrators, under the immediate direction of the Professor. In this way each candidate for the degree of M D. is immediately and personally taught in Obstetrics and Gynæcology, Physical Diagnosis, Laryngology, Ophthalmology, Medical Chemistry, Pharmacy, Materia Medica, and Experimental Therapeutics, Physiology, Histology, and Experimental Physiology, and Minor Surgery, Bandaging, Operations on the Cadaver, etc., and in the Department of Medicine, "clinical conferences," and practical lessons in Physical Diagnosis. There are, we believe, no corresponding practical courses in any other Medical College in this country—not at least to the same extent and with the same variety and constituting a part of the regular curriculum.

This course of instruction is *free of charge, but obligatory upon* candidates for the Degree, except those who have had such instruction and those who are Graduates of other Colleges of ten years' standing.

THE SPRING COURSE OF LECTURES begins early in April, and ends in June. There is no additional charge for this Course to matriculates of the College, except a registration fee of five dollars; non-matriculates pay forty dollars, *thirty-five dollars of which, however, are credited on the amount of fees paid for the ensuing Winter Course.*

Desirable opportunities are afforded to graduates of Medicine for pursuing special courses, and for instruction in the recognized Specialties.

CLINICAL INSTRUCTION is given *daily* at the HOSPITAL OF THE JEFFERSON MEDICAL COLLEGE throughout the year by Members of the Faculty, and by the Hospital Staff, and at the Pennsylvania and other Hospitals several times a week.

FEES.

Matriculation Fee (paid once)	$5 00
Ticket for all Branches	140 00
Practical Anatomy	10 00
Graduation Fee	30 00
Fees for a full Course of Lectures to those who have attended two full courses at other (recognized) Colleges—the matr culation fee, and	70 00
To Graduates of such Colleges, the matriculation fee and	70 00
To Dental Graduates the first course is $60, and the second is	100 00

To Graduates in Pharmacy the general ticket is $100 for each year.

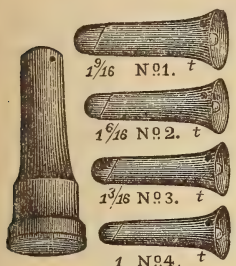
There are no extra Fees.

The Annual Announcement, giving full particulars, will be sent on application to

Roberts Bartholow, M. D.,

DEAN.

STAUFER'S
HARD RUBBER SPECULUMS GUARANTEED.



Prices, Single, $2.50
Series encased, 12.00

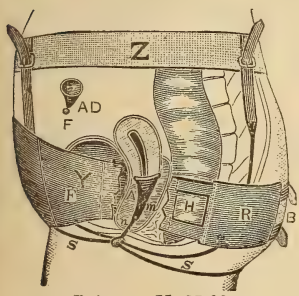
The engraving shows the shape, conductor and case so complete, that scarcely any description is necessary. For compactness there is but one conductor stem, on which each size of bulb screws. Speculums and case are all of the best quality hard rubber, and do not break from ordinary falling. Dental red enamelled inside. The mouth is polished very smooth, and shaped so that the cervix can be brought in entirely by rotation. And when brought in can be rotated to bring into view all the parts. The vaginal portion of the uterus can be seen as clearly as if located externally. When obtained, single, No. 2, is the most useful, since it reveals fully the point of the cervix in almost all multipara, and freely enters, when the position is correct, in many nullipara.

Guarantee.—One or two speculums are guaranteed; thus when returned sound and in the original wooden boxes, within six months of purchase, the money will be refunded without any deduction.

Plates.—The *First* contains 16 engravings and groups of engravings, illustrating the uterine examining instruments. *Second* contains 17 engravings and groups of engravings, illustrating the uterine replacing and supporting instruments.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

STAUFER'S
SPRING STEM UTERINE SUPPORTERS.
GUARANTEED.



Price, on Y, $7.00
" " Z, 6.00

The engraving shows the Spring Stem Cup, which consists of over a dozen sizes. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Stem Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place, and it is sufficient at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

The Series.—This series of imstruments has been invented as cases presented themselves, requiring different styles and sizes of instruments, without change of proprietor, until it has reached its present efficiency.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when the Instrnments are obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free, on application.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

BATTLE & CO.,

Chemists' Corporation, St. Louis, Mo.

BRANCHES: 38 Southampton Row, Holborn, London, W. C.

5, Rue De La Paix, Paris. 9 and 10 Dalhouse Square, Calcutta

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Diseases.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The Essential Elements** to the Animal Organization—Potash and Lime;
The **Oxydizing Agents**—Iron and Manganese;
The **Tonics**—Quinine and Strychnine;
And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all Others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Each Bottle of Fellows' Hypophosphites Contains 128 Doses.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

FOR SALE BY ALL DRUGGISTS.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestlé's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient, Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

NOTE.—No milk required in preparing Nestlé's Food, only water used.

Prof SF Baird C
1445 Mass ave

FILLED
SOLUBLE ELASTIC CAPSULES
OF
Quinine Sulphate and of Cinchonidia Sulphate.

We take pleasure in being able to offer the profession a device for the exhibition of quinine and cinchonidia, which presents many points of superiority over any which has been heretofore suggested. By means of our Soft Elastic Capsules, the objectionable taste of the drug is, of course, completely concealed; while the ease with which this capsule is swallowed, after it has been lubricated with the saliva, makes it vastly superior to a pill or the hard capsule.

We manufacture two sizes of these Quinine and Cinchonidia-Filled Soft Elastic Capsules, containing, respectively, 1, 2 and 3 grains, and 4 and 5 grains of the salts. While each of these two sizes contains a different quantity, the bulk of the contents does not vary with the quantity of the drug, the capsule being completely filled, in case of the smaller quantity, with sugar of milk. Thus in the first size, the capsule cantaining one grain of the drug contains two grains of sugar of milk, and that containing two grains of the drug being filled out with one grain of sugar of milk.

We have been led to put up quinine and cinchonidia in this form through the great popularity which our Soft Elastic Liquid-Filled Capsules have achieved in the short period since our introduction of them. For those who are familiar with the latter, the Quinine and Cinchonidia-Filled Soft Elastic Capsules will require no commendation.

An additional advantage possessed by these capsules is the fact that the drug entering into each one of them is separately weighed before being encapsuled. We are thus enabled to guarantee the absolute correctness of the amount claimed on the label.

These capsules are put up in boxes containing 1 doz., 2 doz., 3 doz., and 100 in each. Owing to their soft nature, to put them up in bottles, after the manner of pills or hard capsules, would be to expose them to the risk of moulding, and to distort their shape.

Both the manufacture and the packing of these capsules require especial care. We, therefore, in order to guard against the imposition of imitators, have sealed each box put up by us, and disclaim responsibility for any which are taken from a box the seal of which has been broken prior to its coming into the purchaser's possession.

We respectfully ask a trial of these capsules at the hands of the profession, feeling confident of a favorable judgment.

PARKE, DAVIS & CO.,

Manufacturing Chemists,

60 Maiden Lane and 21 Liberty Street. } NEW YORK. DETROIT, MICHIGAN.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.
Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

THE BEST
—ANTI-SEPTIC—
For Internal and External Use.

FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

Listerine comes nearer the ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in Surgery, Obstetrics, Gynecology, Leucorrhœa, Gonorrhœa, and all Mucous Membrane Catarrhs; internally in Typhoid and other Fevers, Zymotic Diseases Diphtheria, Scarlet Fever, Dyspepsia, Dysentery, Diarrhœa, all forms of Cholera, etc., and as a general Prophylactic

THE BEST
—ANTI-LITHIC—
For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is invariably of definite and uniform therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Alice, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the disease of the uric acid diathesis, at once justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia, Albuminuria, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by Children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime, and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886-87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY.

WM. E. A. AIKEN, M. D. LL. D.,
Emeritus Professor of Chemistry and Pharmacy.
GEORGE W. MILTENBERGER, M. D.,
Professor of Obstetrics.
CHRISTOPHER JOHNSTON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children, and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology, and Clinical Professor of Diseases of Nervous System.
L. McLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy and Clinical Surgery.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics. Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.

For catalogue and further information address, **Dr. J. EDWIN MICHAEL, Dean, 246 Madison Ave.**

DENTAL DEPARTMENT.

Fifth Annual Announcement. Next regular session begins October 1st, 1886. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY.

FRED. J. S. GORGAS, M. D., D. D. S.,
Professor of Principles of Dental Science, Dental Surgery and Dental Mechanism.
JAMES H. HARRIS, M. D., D. D. S.,
Professor of Operative and Clinical Dentistry.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D. D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D. D. S.,
Demonstrator of Operative Dentistry.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For Catalogues and other information apply to Dr. F. J. S. GORGAS, Dean, 259 Eutaw Street, Baltimore.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* **"*Ext. carnis, fl. comp. (Colden's.)*"** It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

PEPTONATE OF IRON

(FAIRCHILD),

In Tablets, Each Containing Three Grains.

The Peptonate of Iron is considered to be the most readily assimilable of all the forms of iron.

It contains iron in a peculiar combination with peptone, which presents obvious advantages over the ordinary chemical preparations of iron.

The tablets have been found to produce the best effects which may be expected from iron, without disturbing the digestion or provoking the untoward symptoms which frequently arise from its use. These tablets have been for some time subjected to clinical tests by many physicians of this city, with such results that we feel satisfied in offering this new preparation in the belief that a more extended use will further confirm its value.

DOSE for an adult, usually one tablet thrice a day, after meals.

These tablets are well borne by children, who may take one or more a day.

FAIRCHILD BROS. & FOSTER,

Makers of Digestive Ferments and Kindred Preparations,

82 and 84 FULTON STREET, NEW YORK.

Infantile Atrophy.

"INFANTILE ATROPHY, or the slow wasting which is a familiar symptom in hand-fed babies, is one of the commonest causes of death in early infancy."

"INFANTILE ATROPHY is the consequence of insufficient nourishment. The child wastes because he is starved. But it is not to actual lack of feeding that the starvation is usually to be ascribed. A baby fed from a breast which secretes milk poor in quality and insufficient for the child's support, will, of course, grow slowly thinner; but an infant supplied largely with farinaceous compounds, from which his feeble digestive organs fail to derive even a minimum of nourishment, will waste with startling rapidity."

"Mellin's Food may be used from the first, and is almost always well digested. Farinaceous matters, unless guarded by malt, as in Mellin's Food, should not be given to a child younger than six months."

From "Disease in Children," by Eustace Smith, M. D., F. R. C. P., London, England.

A sample of Mellin's Food, sufficient for trial, will be sent free to any Physician desiring it.

DOLIBER, GOODALE & CO., BOSTON, MASS.

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

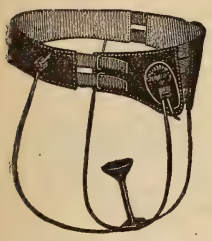
Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

SAVORY & MOORE, 143 New Bond Street, London.
Agents for America, E. FOUGERA & CO., New York.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

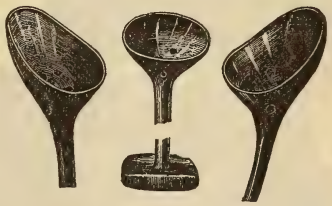
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

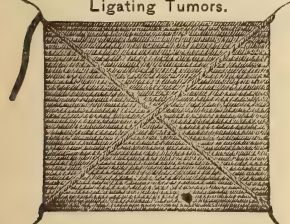
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

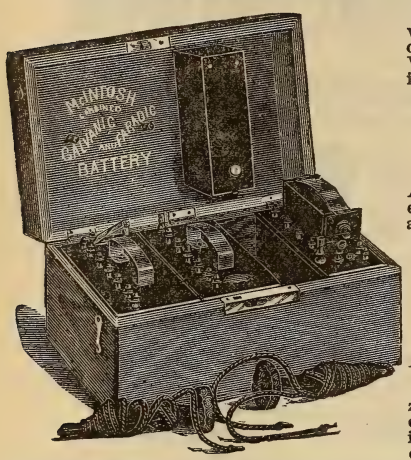
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

In corresponding with Advertisers please mention the MEDICAL AND SURGICAL REPORTER.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents,** the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

Dusart's Syrup and Wine of Lacto-Phosphate of Lime.

The properties of which are scientifically founded on physiological experiments, and have received the sanction of several years' successful trial by the French and English medical profession, as producing durable reconstituent effects in all cases of Cachexia or Adynamia; when nutrition has been impaired by acute or chronic complaints.

As an article of diet it acts as general excitant of all nutritive functions, ensures digestion, brings back or increases the appetite, enriches the milk of the mother, and generally improves the vital energies. As a medicament it is chiefly used in convalescence, teething, rickets, and imperfect growth, dyspepsia, various nervous diseases, wounds, fractures, and all complaints of the osseous system.

Dusart's Syrup of Lacto-Phosphate of Lime and Iron is a ferruginous medicament specially invaluable for the above cases, when complicated with anæmia.

Dusart's work on the "Physiological and Therapeutic Action of Phosphate of Lime," will be sent free to any physician on application to Messrs. E. FOUGERA & Co.

PARIS: L. DUSART, 8 Rue Vivienne.

NEW YORK: E. FOUGERA & CO., Importing Pharmacists.

PELLETIER'S CAPSULES OF SULPHATE OF QUININE.

These Capsules, Manufactured by Messrs. ARMET DE LISLE & Co., successors to PELLETIER, contain ten centigrammes of Sulphate of Quinine, guaranteed by having the name printed upon each Capsule. They dissolve quickly in cold water, do not become hard like pills, and are taken more easily than wafers.

PELLETIER

They are put up in bottles containing 10, 20, 100, 200, 500, and 1000 Capsules.

PARIS: 8 RUE VIVIENNE. E. FOUGERA & CO., NEW YORK.

CHAPOTEAUT'S PEARLS OF PURE PEPSINE.

The Pepsine used in the manufacture of these Pearls is made from the Stomachs of Sheep, and digests 90 times its weight of meat; it is put up in soluble Capsules which can be preserved indefinitely. Unlike all other known Pepsine, it contains neither starch nor sugar of milk.

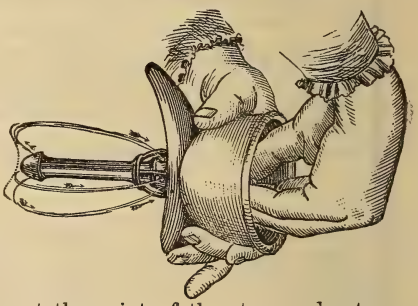
Two Pearls taken after meals are sufficient to insure the digestion of food in fifteen minutes, and remove Headache, Sleepiness, etc., which are the usual accompaniments of indigestion.

CHAPOTEAUT, Pharmaceutical Chemist, 8 Rue Vivienne, Paris.

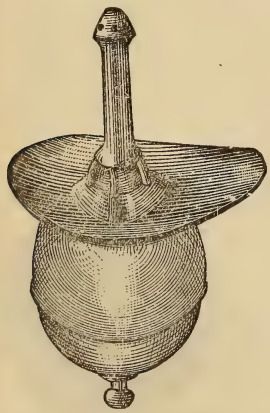
E. FOUGERA & CO., 30 N. William Street, New York.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."

"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.

SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*

Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

TRUSSES

The World's Recognition of Merit.

London—1881—Announcement.

At the late INTERNATIONAL MEDICAL AND SANITARY EXHIBITION, the World's most competent Judges recognized their *unequalled excellence* by granting the

ONLY "AWARD OF MERIT" FOR TRUSSES

"TO I. B. SEELEY, PHILADELPHIA, U. S. A."

(Over Sixty-Eight Competitors,)—confirming their high favor with America's most distinguished Surgeons.

EXHIBITION JUDGES FROM THE ROYAL COLLEGE OF SURGEONS:—

SEELEY'S HARD-RUBBER TRUSSES.

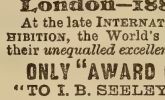

Fig. 1.

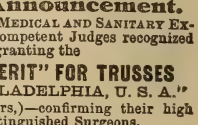

Fig 5.

Fine Steel Springs, neatly covered with highly-polished Hard Rubber. Made in every desirable pattern, with Pads anatomically constructed. Light, cool, cleanly, durable; unequalled in quality, finish, and practical construction. Unaffected by time, use or climate; used in bathing. **Always Reliable. Prices reduced** to meet the popular demands. Sold by all leading Druggists and Dealers at the usual price of common Trusses.

For information regarding Difficult or Complicated Cases, address I. B. SEELEY & CO., Philada., Pa.

1347 Chestnut St., Philada., U.S.A. } ESTABLISHMENTS { 74 Fleet St., London, Eng.

Under Patronage of the World's most Eminent Surgeons.

The Correct and Skilful Mechanical Treatment of **HERNIA OR RUPTURE A SPECIALTY.** See GROSS'S Revised Edition and AGNEW'S Late Surgery.

REFERENCES:—*Profs. S. D. Gross, D. Hayes Agnew, Willard Parker, W. H. Pancoast, Dr. Thomas G. Morton, and others.*

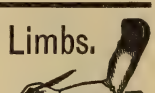
CAUTION NOTICE.—To guard against the various imitations offered under our trade-mark, "HARD RUBBER TRUSS," granted under Act of Congress, March 3, 1881, and made only to sell on the reputation acquired by our goods during the past 25 years, purchasers should see that each truss is stamped, spring and strap, "I. B. SEELEY, WARRANTED."

IMPORTANT TO PHYSICIANS.

To those not having GROSS'S REVISED or AGNEW'S LATE SURGERY, in which are shown many of our trusses, we will mail, upon application, our 78 page Catalogue, descriptive of Trusses, Hernia, and its Mechanical Treatment.

Improved Artificial Limbs.

NEW PATENT



UNIVERSAL ANKLE JOINT.

NEW PATENT

ADJUSTABLE KNEE SIDE JOINT.

THESE ARE THE MOST PERFECT AND DURABLE JOINTS IN USE.

Arms with Finger, Wrist, and Elbow Movements. Also, extension apparatuses for shortened limbs. Illustrated catalogue free. Address C. A. FREES,
766 Broadway, New York.

FOR SALE,

In a manufacturing town of 1500 inhabitants in Central Pennsylvania, a practice worth $2500 per year, established 13 years. The country is thickly settled by a good class of people; good schools and churches. The roads are good. Opposition light. Will sell, either with or without real estate, at following prices:

Real estate.....$2250
Practice, with office furniture, etc..... 500

This is a rare opportunity for a physician to secure a good location. Good reason for selling. MEDICUS.

WANTED.—REGULAR PHYSICIAN. Practice established fourteen years; town 500, in Pennsylvania; little competition; price $200. Address PRACTICE,
MED. AND SURG. REPORTER, Philadelphia.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules*.

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrb and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

BALTIMORE MEDICAL COLLEGE,
BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,
S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

MEDICAL COLLEGE OF OHIO,
CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.

P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.

SAMUEL NICKLES, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.

JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.

C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.

F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.

JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.

JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.

FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.

J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.

E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.
The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.
Three afternoons of each week are devoted to Hospital Instruction.
The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.
FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.
For Circulars and further information, address

The 121st Annual Winter Session will commence Friday, October 1, 1886, and continue 7 months.
The Preliminary Course will begin Wednesday, Sept. 15th.
Graded Curriculum.—Three Winter Sessions required. Voluntary fourth year.
Practical Instruction in all departments.
For particulars see catalogue, for which address
JAMES TYSON, M. D., Sec'y.

A GOOD RECORD

For the year ending April 1. Between one hundred and two hundred surgical operations have been performed at the Free Hospital for Women supported by the Murdock Liquid Food Co., Boston, without the loss of a single patient, and all restored to usefulness.

LIQUID FOOD WAS GIVEN BEFORE AND AFTER THE OPERATIONS.

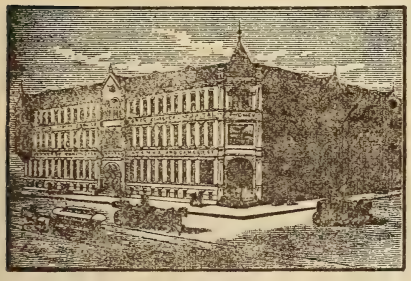
What other hospital that does not use Murdock's Liquid Food can show such a record?

By its use we can build up any patient who is too reduced for an operation, so that not only a safe but successful operation can be made, and in common cases the patient can be made convalescent in three-quarters of the time usually required.

With what we have been and are doing, we shall be able, in our new Free Hospital that we are now building, corner of Huntington avenue and Camden street, to perform in the Surgical half of the Hospital

500

OPERATIONS ANNUALLY.



Until then we shall remain in our old home.

THE SURGICAL STAFF AT MURDOCK'S FREE HOSPITAL FOR WOMEN, AT 30 LEVERETT STREET, ARE IN DAILY ATTENDANCE TO EXAMINE PATIENTS AND ASSIGN BEDS, SATURDAYS EXCEPTED.

Its value in cases where limbs have been broken surprises every physician who has ordered its use, as it restores the broken limbs to health and strength in a few weeks.

BABIES.

Remember, that with feeble infants who do not thrive on their mother's milk or the best prepared foods in the market, WE REQUEST NO CHANGE OF FOOD, but add 5 or more drops four times daily of Murdock' Liquid Food, and you will find that the lost or needed vitality will be restored to them in less than thirty days.

Not a case of Cholera Infantum known where Murdock's Liquid Food has been used, nor a death from Cholera Infantum where it has been prescribed by a physician.

Murdock's Liquid Food will assist all classes of chronic cases. It is the only Raw Food in the world. It is free of insoluble matter, and can always be retained by the stomach, and when given for INJECTIONS it is equally valuable and can always be retained.

Remember, all acknowledge the value of Fruits for a patient.

We use them in Liquid Food:

1st. For their own properties.

2d. They relieve the meats of their heating properties, making it safe and valuable in cases of fever, as relapse never follows when used.

3d. They preserve our meats, enabling us to offer the only Raw Food known, and it will keep in all climates when not exposed to heat, air or sun.

TO SUSTAIN OUR CLAIM

We never wish Liquid Food used until all other treatment and foods fail, then the results are quickly seen, generally in twenty-four hours.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor. All brands are made by the same formula. The latter represents the day of make, and the figure the tank. If richer, it is stronger in smell and flavor, and will bear a greater reduction.

Murdock Liquid Food Co.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH — Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS. — Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS. — Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS. — Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS. — Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

REV. HENRY M. McCRACKEN, D. D., Vice-Chancellor.
CHARLES INSLEE PARDEE, M. D., Dean of the Faculty; Professor of Otology.
J. W. S. ARNOLD, M. D., Professor Emeritus of Physiology and Histology.
ALFRED L. LOOMIS, M. D., LL.D., Professor of Pathology and Practice of Medicine; Physician to Bellevue Hospital.
WILLIAM H. THOMSON, M. D., LL.D., Professor of Materia Medica and Therapeutics; Diseases of the Nervous System; Physician to Bellevue Hospital.
J. WILLISTON WRIGHT, M. D., Professor of Surgery; Surgeon to Bellevue Hospital.
WM. MECKLENBURG POLK, M. D., Professor of Obstetrics and Diseases of Women and Children; Physician to Bellevue Hospital, and to Emergency Lying-in Hospital.
LEWIS A. STIMSON, M. D., Professor of Anatomy; Professor of Clinical Surgery; surgeon to Bellevue and Presbyterian Hospitals.
RUDOLPH A. WITTHAUS, M. D., Professor of Chemistry and Physics.
EDWIN J. BARTLETT, M. D., and WILLIAM G. THOMPSON, M. D., Lecturers on Physiology.
STEPHEN SMITH, M. D., Professor of Clinical Surgery; Surgeon to Bellevue Hospital.
A. E. McDONALD, LL.B., M. D., Professor of Medical Jurisprudence and Psychological Medicine; General Superintendent of the New York City Asylums for the Insane.
HERMAN KNAPP, M. D., Professor of Ophthalmology; Surgeon to the New York Ophthalmic and Aural Institute.
FANEUIL D. WEISSE, M. D., Professor of Practical and Surgical Anatomy; Surgeon to Workhouse Hospital, B. I.
HENRY G. PIFFARD, M. D., Clinical Professor of Dermatology; Consulting Surgeon to Charity Hospital.
F. R. S. DRAKE, M. D., Clinical Professor of Medicine; Physician to Bellevue Hospital.
JOSEPH E. WINTERS, M. D., Clinical Professor of Diseases of Children.
NEWTON M. SHAFFER, M. D., Clinical Professor of Orthopœdic Surgery; Surgeon to New York Orthopœdic Hospital.
PRINCE A. MORROW, M. D., Clinical Professor of Venereal Diseases; Surgeon to Charity Hospital.
WILLIAM C. JARVIS, M. D., Clinical Professor of Laryngology.
LAURENCE JOHNSON, M. D., Professor of Medical Botany; Visiting Physician to Randall's Island Hospital.
S. C. BLAISDELL, M. D., Demonstrator of Anatomy.

THE PRELIMINARY SESSION will begin on Wednesday, September 15, 1886, and end September 29, 1886. It will be conducted on the same plan as the Regular Winter Session.

THE REGULAR WINTER SESSION will begin September 29, 1886, and end about March, 1887. The Plan of Instruction consists of Didactic and Clinical Lectures, recitations, and laboratory work in all subjects in which it is practicable. To put the laboratories on a proper footing, a new building has been erected at an expense of forty thousand dollars.

UNIVERSITY BIOLOGICAL AND PATHOLOGICAL LABORATORY.—The Faculty, aided by generous friends, have enlarged the New Laboratory Building and established a Biological and Pathological Laboratory in connection with its Laboratory of Chemistry and Materia Medica. It is furnished with all the apparatus for the study of Bacteriology, and for special lines of investigation.

Two to five Didactic Lectures, and two or more Clinical Lectures, will be given each day by members of the Faculty. In addition to the ordinary clinics, *special clinical instruction*, WITHOUT ADDITIONAL EXPENSE, will be given to the candidates for graduation during the latter part of the Regular Session. For this purpose the candidates will be divided into sections of twenty-five members each. All who desire to avail themselves of this valuable privilege must give in their names to the Dean during the first week in November. At these special clinics students will have excellent opportunities to make and verify diagnoses, and watch the effects of treatment. They will be held in the wards of the Hospitals and at the Public and College Dispensaries.

Each of the seven Professors of the Regular Faculty, or his assistant, will conduct a recitation on his subject one evening each week. Students are thus enabled to make up for lost lectures and prepare themselves properly for their final examinations without additional expense.

THE SPRING SESSION will begin about the middle of March, and end the last week in May. The daily Clinics and Special Practical Courses will be the same as in the Winter Session, and there will be Lectures on Special Subjects by Members of the Faculty.

It is supplementary to the Regular Winter Session. Nine months of continued instruction are thus secured to all students of the University who desire a thorough course.

FEES:

For Course of Lectures	$140 00
Matriculation	5 00
Demonstrator's Fee, including material for dissection	10 00
Final Examination Fee	30 00

For further particulars and circulars address the Dean,

Prof. CHARLES INSLEE PARDEE, M. D.,

University Medical College, 410 East 26th St., New York City.

Miami Medical College,

CINCINNATI, OHIO.

SESSION 1886-87.

The Session of 1886-87 will begin TUESDAY, September 21, 1886, and continue until March 1, 1887.
This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.
J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.
BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.
W. H. TAYLOR, M. D.,
Professor of Obstetrics.
W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.
W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.
N. P. DANDRIDGE, M. D.,
Professor of Proctice of Surgery and Clinical Surgery.
T. W. LANGDON, M. D.,
Professor of Anatomy.
JOS. EICHBERG, M. D.,
Professor of Physiology.
W. A. ROTHACKER, M. D.,
Professor of Principles of Surgery and Pathology.

☞ For Circulars, address,

J. C. MacKENZIE, M. D., Secretary,
or W. H. TAYLOR, M. D., Dean.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.
School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.
Directions to parents of Deaf Children free on application to **MARY S. GARRETT, Principal.**

THE CANTON SURGICAL
AND
GYNÆCOLOGICAL CHAIR.

A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.
As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.
Send for descriptive catalogue.
THE CANTON SURGICAL CHAIR CO., CANTON, OHIO.

—LANDRETH'S SEEDS ARE THE BEST—NORTH, SOUTH, EAST, OR WEST!

Everything of the best. SEEDS and IMPLEMENTS for Farm, Garden, or Country-Seat. Illustrated and Descriptive Catalogues Free upon application. Over 1500 acres under cultivation growing LANDRETH'S Garden Seeds. Founded 1784.

D. LANDRETH & SONS,
Philadelphia.

VIRUS.

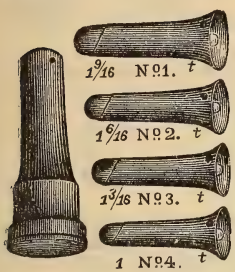
VERY FINE HUMAN CRUSTS OF VACCINE VIRUS can be furnished from this office at

$1 and $2 per Crust.

Address

D. G. BRINTON,
115 South Seventh Street.

STAUFER'S
HARD RUBBER SPECULUMS GUARANTEED.



Prices, Single, $2.50
Series encased, 12.00

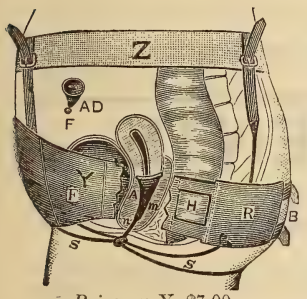
The engraving shows the shape, conductor and case so complete, that scarcely any description is necessary. For compactness there is but one conductor stem, on which each size of bulb screws. Speculums and case are all of the best quality hard rubber, and do not break from ordinary falling. Dental red enamelled inside. The mouth is polished very smooth, and shaped so that the cervix can be brought in entirely by rotation. And when brought in can be rotated to bring into view all the parts. The vaginal portion of the uterus can be seen as clearly as if located externally. When obtained, single, No. 2, is the most useful, since it reveals fully the point of the cervix in almost all multipara, and freely enters, when the position is correct, in many nullipara.

Guarantee.—One or two speculums are guaranteed; thus when returned sound and in the original wooden boxes, within six months of purchase, the money will be refunded without any deduction.

Plates.—The *First* contains 16 engravings and groups of engravings, illustrating the uterine examining instruments. *Second* contains 17 engravings and groups of engravings, illustrating the uterine replacing and supporting instruments.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

STAUFER'S
SPRING STEM UTERINE SUPPORTERS.
GUARANTEED.

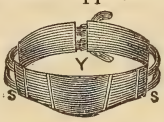


Price, on Y, $7.00
" " Z, 6.00

The engraving shows the Spring Stem Cup, which consists of over a dozen sizes. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Stem Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place, and it is sufficient at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.



Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

The Series.—This series of imstruments has been invented as cases presented themselves, requiring different styles and sizes of instruments, without change of proprietor, until it has reached its present efficiency.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when the Instrnments are obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free, on application.

COLLEGE OF PHYSICIANS AND SURGEONS,

OF CHICAGO.

The Regular Session of this Institution will commence September 21, 1886, and continue twenty-four weeks. There will also be a Spring Course.

A graded course of instruction covering two or more winter sessions. Excellent clinical advantages.

The College building (directly opposite the Cook County Hospital) is one of the most complete and elaborate edifices devoted to medical teaching in this country.

FEES:

Matriculation	$5 00
General Ticket	60 00

GOOD INVESTMENTS

FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE, and prefer it to simil r preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exh larating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

SAMPLES FURNISHED UPON APPLICATION.

PETROLEOL

Is put up in 1-lb., 5-lb., 10-lb., 25-lb., 50-lb. and 100-lb. Cans.

WYETH'S

LIQUID MALT EXTRACT.

Containing all the Nutrient Properties of Malt, with the least possible amount of Alcohol.

THIS IS NOT A BEVERAGE, BUT A MOST AGREEABLE AND VALUABLE NUTRIENT, TONIC AND DIGESTIVE AGENT, CONTAINING A LARGE AMOUNT OF NUTRITIOUS EXTRACTIVE MATTER AND THE SMALLEST PERCENTAGE OF ALCOHOL FOUND IN ANY LIQUID PREPARATION OF MALT. Since the introduction of this preparation to the medical profession, about eighteen months since, it has steadily grown in favor, and those who have given the subject of Malt Extracts the most careful study and investigation, are unanimous in endorsing all the claims we have made for it.

It is especially adapted for administration to nursing mothers and children, to patients suffering from nervous exhaustion, chilliness, impaired digestion, dyspepsia, etc., and particularly to those unable to digest amylaceous food.

The diastase contained in our preparation of malt, renders starchy and farinaceous foods immediately soluble, by converting the starch into malt-sugar and dextrine, in which form they can be readily assimilated by the system, thus *creating* animal heat, and aiding the formation of fat.

To mothers while nursing, it is of inestimable value, as it not only supplies strength to meet the unusual demands upon the system at that time, but improves the quality of the milk, increasing the amount of sugar and phosphates, nourishing the infant and sustaining the mother at the same time.

In cases of consumptive tendencies, and in the latter stages of phthisis, it will be found to improve the appetite, and promote the assimilation of carbonaceous food, supplying the waste of elementary matter, fortifying the system, and enabling it to better resist the undermining effects of the disease. It also acts as a roborant in all cases of debility, and is a most valuable addition to the tonic and restorative treatment required in convalescence.

As it contains less than four per cent of alcohol, it can be given to invalids, children, etc., without danger of the secondary depressant effect so frequently experienced from the administration of spirituous remedies; the ordinary dose of a wineglassful representing less than forty grains of alcohol, and over one hundred and twenty-five grains of nutritious extractive matter, rich in diastase, preserved by our peculiar process of preparation; while in the malt-liquors it is rendered completely inert by the boiling to which th y are subjected during manufacture.

It is packed in cases of two dozen each, and may be had of all the leading druggists throughout the United States.

JOHN WYETH & BROTHER,

Manufacturing Chemists,

PHILADELPHIA.

Smithsonian
Institute

CASCARA CORDIAL.

The most Eligible Preparation of Cascara Sagrada

FOR THE TREATMENT OF

Habitual Constipation, Dyspepsia, Hæmorrhoids and Allied Affections

AND THE MOST CONVENIENT AND GENERALLY ACCEPTABLE

Vehicle for the Administration of Nauseous Medicines.

In Habitual Constipation.—The great desideratum in the treatment of chronic constipation has heretofore been a remedy which possessed not only a temporary specific action on the bowels, but which would be followed by no reaction and no repression of secretion, and which would be administered for a sufficient length of time to permit of restoration of normal function; a remedy which would not only alleviate temporarily the existing mal-condition, but permanently remove the cause upon which it depended for its continuance, and thus effect a radical cure. The extensive trial of Cascara Sagrada by physicians of this country and Europe, has shown it to be the drug that most fully meets all these indications. It has been added to the British Pharmacopœia, and its efficacy is attested by all physicians who have given it a trial. Cascara Cordial is prepared to disguise the inherent bitter principle of the drug, and without detracting from its medicinal value, render it acceptable to the most fastidious palate.

As a Vehicle for Nauseous Medicines, Cascara Cordial has become widely known to the profession. It not only effectually disguises the taste of such inherently bitter medicines as Quinine, but on account of its laxative properties, is a most valuable adjuvant or corrigent to any prescription containing drugs, such as iron, the continued administration of which tends to constipate. It will be seen that Cascara Cordial has a wide range of utility as an agreeable laxative excipient.

To Dispel the Acute Effects of Alcohol and Opium Abuse.—From letters received from physicians, we are led to call the attention of the profession to the use of Cascara Cordial by those addicted to the alcohol and opium habits. The headache and gastric irritation following excessive indulgence in alcohol, is avoided by adding a little Cascara Cordial to the alcoholic stimulant taken, or by taking a full dose of the cordial on retiring, after too free indulgence. The severe constipation also often attending indulgence in opium, may be relieved by the systematic administration of Cascara Cordial.

We can not assume the responsibility for any lack of success physicians may meet with in prescribing the many imitations and spurious varieties of Cascara on the market, and would request those wishing a genuine and reliable preparation, to specify P. D. & Co.'s.

☞ **Samples furnished on application to those physicians who will pay express charges.**

A NEW EMMENAGOGUE.

The following is an abstract from a letter written by one of the most prominent gynæcologists of the country, to another:

"Thus far no perfect emmenagogue has been discovered, but I regard the manganese as the best I have met with. It should be styled a regulator of menstruation rather than a pure emmenagogue, for it is useful in the absence of the menses, irregularity of their recurrence, and even in excess of flow.

"The preparation which I now employ is McKesson & Robbins' pills of the binoxide of manganese. Of this preparation I give two grains three times a day throughout the month and during the period.

"I also employ manganese in chlorosis and anæmia, and I think that by its use I obtain better results than I have heretofore done by iron." (See *Medical Record* of March 6th, page 274.)

Specify McK. & R.'s Pills Manganese Binoxide.

Important additions to McK. & R.'s list of Gelatine Coated Pills:

McK. & R. *Cascara Sagrada* and *Nux Vomica*: Ext. Cas. Sagr. gr. ii; Ext. Nux Vom. gr. 1-5.

McK. & R. Cascara Sagrada, Nux Vomica and Belladonna: Ext. Cas. Sag. gr. ii; Ext. Nucis Vom. gr. 1-8; Ext. Bellad. gr. 1-16.

McK. & R. Hydrobromide of Hyoscin 1-100 gr.

McK. & R. Binoxide of Manganese 2 grs.

McK. & R. Valerianate of Quinine ½, 1, 2, and 3 grs.

McK. & R. Valerianates Iron, Quinine, and Zinc: Ferri Valer., Quin. Valer., Zinci Valer., āā gr. i.

McK. & R. Oleate of Manganese 20 per cent. May be used to advantage when the pills cannot be administered.

Always specify McK. & R's.

COCAINE.

Although only eighteen months have elapsed since Koller's announcement of his discovery of the anæsthetic properties of this alkaloid, Cocaine already ranks among the most important agents of the practitioner. In general and dental surgery, ophthalmology, laryngology and general therapeutics, its value is everywhere attested.

We began its manufacture immediately after the announcement of Dr. Koller, and samples of our product were submitted to many noted specialists for their experiments, and the results were highly gratifying. The demand for our manufacture of the salt, solutions, and oleates, has continued to increase, and we desire to express our sincere thanks to the medical, pharmaceutical, and dental professions for their kind encouragement as shown in their recognition of the merits of our preparations. Our appreciation of this will be shown in our constant efforts to supply all their requirements in chemicals and pharmaceuticals, of a quality worthy of their entire confidence.

Special quotations on Terebene and Cocaine for specified quantities. Very respectfully,

McKESSON & ROBBINS.

TEREBENE.

McKESSON & ROBBINS

WERE THE FIRST IN THIS COUNTRY TO MANUFACTURE THIS VALUABLE REMEDY FOR

Winter Cough, Bronchial and Chest Affections, Flatulency, Acidity, and other forms of Dyspepsia.

It may be used as an inhalation, or taken internally in doses of five or six drops on sugar every four hours, gradually increasing the dose to twenty minims.

Terebene was brought to the notice of the medical profession as far back as 1873, by M. Riban, who read a series of papers on this and similar substances before the Pharmaceutical Society of Paris. It has lately been brought into prominence by Dr. Wm. Murrell, of London, who has given it in over 114 cases; he has also notes of its value in 81 out of 94 cases. Dr. Murrell says that much of the Terebene now being sold may be described as inferior, and to this fact he ascribes some irritating effects noted in a few of his cases.

We would therefore caution the physician in prescribing and the druggist in ordering to, in all cases,

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	¼ Grain.
Distilled Water	35 "	Boric Acid	½ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

Carl L. Jensen

Sole Originator of

Pepsin in Scales

OR

"Crystal" Pepsin

2039 Green St.
Philadelphia

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully,

CARL L. JENSEN.

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain qnantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

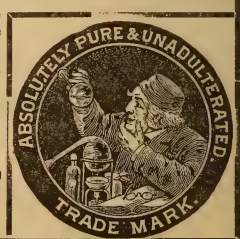
GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents,** the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.



CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

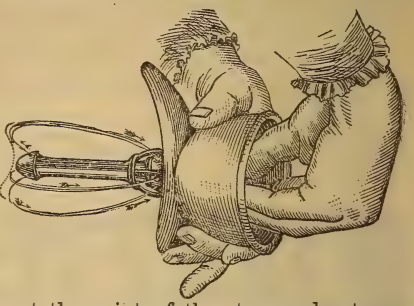
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

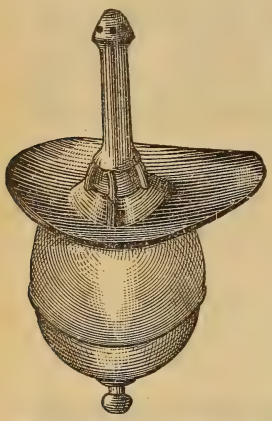
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

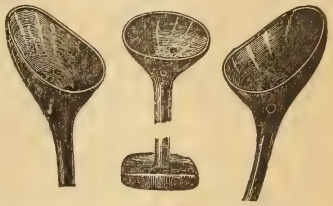
THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.



Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

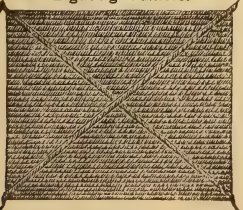
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.

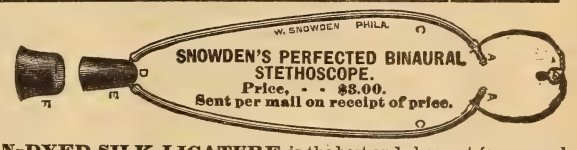


No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.



IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

HOLLOW SUPPOSITORIES.

WITH CONOIDAL SELF-SEALING STOPPERS,

All made from Pure BUTTER OF CACAO ONLY.

Each box contains A MEDICINE DROPPER and A PAIR OF TONGS.

The object of this invention is to supply Physicians, Druggists, Veterinary Surgeons, and others, with HOLLOW SUPPOSITORIES of various sizes and shapes to meet every probable demand, and into which they can put any kind of MEDICINE or NUTRIMENT, thus producing firm, smooth, EVENLY MEDICATED Suppositories, that are cheaper and more reliable than those made by the old method.

Nos. 0.—1.—2.—3 are provided with conoidal stoppers. The stoppered ends are to be inserted, when the contraction of the sphincter ani will force the suppositories up into the rectum without the use of a suppository syringe or any other appliance whatever.

HALL & RUCKEL, Wholesale Druggists, Proprietors,

218 GREENWICH STREET, NEW YORK.

A sample box of Hollow Suppositories will be mailed free on application, mentioning the PHILA. MED. AND SURG. REPORTER.

Omnico

FORMULA: Boracic Acid, Chlorate of Potassium, Chloride of Sodium, Thymol, Menthol, Gaultheria, and Caryophyllus.

Antiseptic, Disinfectant, Prophylactic, Anti-Inflammatory, Mildly Astringent, Secondary Sedative Action.

An *Alterative* specially adapted to inflamed mucous and cutaneous surfaces.

For all varieties of **Catarrhal** disease, **Pharyngitis, Laryngitis, Diphtheria, Diphtheritic** and **Ulcerous Sore Throat, Stomatitis, Leucorrhœa, Vaginitis, Endometritis, Pruritis, Gonorrhœa, Conjunctivitis, Eczema, Psoriasis, Pityriasis, Genito-Urinary** and **Rectal** disorders.

Used as a douche, inhalant, gargle, injection, spray, or dressing with absorbent cotton.

A thoroughly effective

Antiseptic, Disinfectant and Deodorant,

for **Wounds, Ulcers, Abscesses, Bed Sores, Surgical Cases, Post Partum Injections,** the hands of the **Surgeon, Obstetrician,** and **Gynæcologist,** and **Mouth Wash** for the **Dentist.**

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

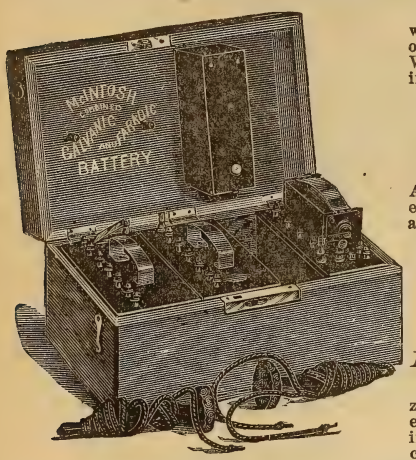
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER

1854

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER

1854

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM,
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 3 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

BALTIMORE MEDICAL COLLEGE,

BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,

S. E. Cor. Eutaw and Hoffman Sts., Baltimore Maryland.

MEDICAL COLLEGE OF OHIO,

CINCINNATI, OHIO.

The Sixty-eighth Annual Session will begin September First, 1886, and continue until March First, 1887.

FACULTY:

W. W. SEELY, A. M., M. D.,
Professor of Diseases of the Eye and Ear, Clinical Ophthalmology and Otology.

P. S. CONNER, M. D., LL. D.,
Professor of Anatomy and Clinical Surgery.

SAMUEL NICKLES, M. D.,
Professor of Materia Medica and Therapeutics and Clinical Medicine.

JAMES T. WHITTAKER, A. M., M. D.,
Professor of the Theory and Practice of Medicine and Clinical Medicine.

W. W. DAWSON, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

THAD. A. REAMY, A. M., M. D.,
Professor of Obstetrics, Clinical Midwifery and Clinical Gynæcology.

C. D. PALMER, M. D.,
Professor of Medical and Surgical Diseases of Women and Clinical Gynæcology.

F. FORCHHEIMER, M. D.,
Professor of Physiology and Clinical Diseases of Children.

JOS. RANSOHOFF, M. D., F. R. C. S.,
Professor of Descriptive Anatomy and Clinical Surgery.

JAMES G. HYNDMAN, M. D.,
Professor of Medical Chemistry and Clinical Laryngology.

FREDERIC KEBLER, A. M., M. D.,
Lecturer on Pathology and Hygiene, and Demonstrator of Histology.

J. L. CILLEY, A. M., M. D.,
Lecturer on Osteology and Demonstrator of Anatomy.

E. W. WALKER, M. D.,
Lecturer on Morbid Anatomy and Demonstrator of Pathology.

Daily Dispensary Clinics are held in all departments throughout the session.

The Dissecting Rooms, Chemical, Histological, and Pathological Laboratories are fitted with every convenience. They are open every night, and are supplied with an abundance of material.

Three afternoons of each week are devoted to Hospital Instruction.

The Laboratory Work, Lectures, and Clinics are supplemented by daily oral examinations, conducted by the assistants to the respective Chairs.

FEES: Matriculation Ticket, $5; General Lecture Ticket, $75; Hospital Ticket, $5; Graduation Fee, $25.

For Circulars and further information, address

22 WEST NINTH STREET, CINCINNATI, OHIO.

—LANDRETH'S SEEDS ARE THE BEST—NORTH, SOUTH, EAST, OR WEST!

Everything of the best. SEEDS and IMPLEMENTS for Farm, Garden, or Country-Seat. Illustrated and Descriptive Catalogues Free upon application. Over 1500 acres under cultivation growing LANDRETH'S Garden Seeds. Founded 1784.

D. LANDRETH & SONS,
Philadelphia.

A Rare Chance for the Right Man.

On application made soon, a physician, "who knows *Malaria* when he meets it," can be well-introduced to a splendid opening, at small cost, in a rich Pennsylvania valley, by an old physician, who will retire from practice

Address, DR. SHELLEY,
OFFICE MED. & SURG. REPORTER.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE, and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

Miami Medical College,

CINCINNATI, OHIO.

SESSION 1886-87.

The Session of 1886-87 will begin TUESDAY, September 21, 1886, and continue until March 1, 1887.
This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.
J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.
BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.
W. H. TAYLOR, M. D.,
Professor of Obstetrics.
W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.
W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.
N. P. DANDRIDGE, M. D.,
Professor of Proctice of Surgery and Clinical Surgery.
T. W. LANGDON, M. D.,
Professor of Anatomy.

or W. H. TAYLOR, M. D., Dean.

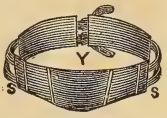
STAUFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.



Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and staved with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

BATTLE & CO.,

Chemists' Corporation, St. Louis, Mo.

BRANCHES: 38 Southampton Row, Holborn, London, W. C.

5, Rue De La Paix, Paris. 9 and 10 Dalhouse Square, Calcutta

The above *fac-simile* of our label enumerates the constituents of what has been termed by us "Liquor Bismuthi et Hydrastiæ" with the several improvements in its composition that have been made from time to time as experience has suggested.

This remarkable alterative and sedative to mucous surfaces has now been in use by the profession for ten years, being *first* prepared by us in 1872, and it has to a large extent revolutionized practice in the treatment of irritable, inflammatory and ulcerative conditions of the Mucous tract, *as:*

OF THE NASAL PASSAGES (locally).
Nasal Catarrh and Ozæna.

OF THE EYE (locally).
Conjunctivitis; Catarrhal, Gonorrhœal, Neonatorum and Purulent Opthalmia; Ulceration of the Cornea.

OF THE THROAT (locally).
Pharyngitis and Laryngitis; Diphtheria.

OF THE STOMACH AND INTESTINES (internally and locally).
Stomatitis; Gastro Intestinal Catarrh; Gastric Ulcer; Dysentery.

OF THE REPRODUCTIVE ORGANS AND BLADDER (locally).
Gonorrhœa; Urethritis; Cystitis; Vaginitis; Metritis; Uterine, Vaginal and Vesical Catarrh; Ulceration of the Os-Uteri.

Having in our possession the indorsement of physicians who have had the most gratifying success with our preparation of "Bismuth and Hydrastia" in the treatment of the above affections, we do not hesitate to emphasize its value to the Oculist, Gynæcologist or general practitioner.

A Descriptive List of our Specialties will be mailed to members of the medical profession upon application, also a sample of the above preparation will be sent to any physician who will pay express charges.

ADDRESS,

Chapman, Green & Co.

Manufacturing Chemists,

CHICAGO, ILL.

SUPPLIED BY THE WHOLESALE DRUG TRADE.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestle's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

NOTE.—No milk required in preparing Nestlé's Food, only water used.

OVAL GELATIN-COATED PILLS

—OF—

Quinine, Iron and Zinc Valerianates.

Quinine Valerianate . . . . . 1 gr.
Iron Valerianate . . . . . 1 gr.
Zinc Valerinate . . . . . 1 gr.

A pill of triple valerianates of Quinine, Iron and Zinc has long been deservedly popular among neurologists and those practitioners called upon to treat nervous debility, hysteria, incipient melancholia, and that condition of depressed vitality so frequently observed by every physician among over-worked and under-fed women.

There seems at the present time, however, to be an intensified interest in this formula, as is evidenced by the number of laudatory reports of its efficacy that have recently appeared in the medical press.

This combination of the valerianates of three such indisputably good tonics is unquestionably of great value and wide utility, and its action in many cases, indeed, seems almost specific. We have pleasure, therefore, in calling the attention of physicians to the fact, that this pill of our manufacture can be obtained of the trade.

Peptonized Extract of Beef:

A CONCENTRATED, PALATABLE, EASILY ASSIMILATED FOOD OF THE HIGHEST NUTRITIVE VALUE,

CONTAINING ALL THE NUTRITIVE CONSTITUENTS OF BEEF.

The superiority of this preparation over other extracts of beef depends upon:

1. The large proportion of albuminoids which it contains.
2. The fact that its albuminoid constituents are chiefly in the form of peptones, insuring absorption and ready assimilation.
3. Its appetizing flavor.
4. Its perfect and ready solubility in water.

The uses of such a preparation are obvious. It is a concentrated, and at the same time an easily assimilated food, useful in all cases of acute disease where sustaining treatment is indicated, and especially valuable in convalescence, and in chronic conditions of inanition or malnutrition, particularly where the functions of the stomach are not well performed.

One part of the Peptonized Extract of Beef may be said to be the equivalent of eight parts of fresh beef. One teaspoonful (about one-half ounce) will make a pint of excellent beef tea.

A like quantity added to a pint of a vegetable soup communicates to it a rich flavor, and converts it into a highly nutritious food.

It may be employed in a still more concentrated form, if desired, but from half an ounce to one ounce of the extract is as much as it is generally advisable to give at one time.

☞ **Send for descriptive circulars, which will be mailed free on application.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

NEW YORK: {60 Maiden Lane and 21 Liberty Street.} DETROIT, MICHIGAN.

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅒ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. **It is economical in use and certain in result.**

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

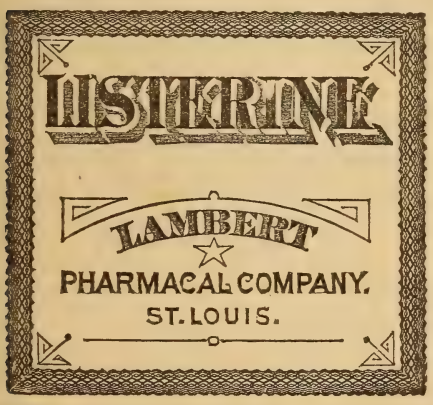
Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

THE BEST

—ANTI-SEPTIC—

For Internal and External Use.



FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzoboracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

LISTERINE comes nearer the ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in SURGERY, OBSTETRICS, GYNECOLOGY, LEUCORRHŒA, GONORRHŒA, and all MUCOUS MEMBRANE CATARRHS; internally in TYPHOID and other FEVERS, ZYMOTIC DISEASES, DIPHTHERIA, SCARLET FEVER, DYSPEPSIA, DYSENTERY, DIARRHŒA, all forms of CHOLERA, etc., and as a general PROPHYLACTIC.

THE BEST

—ANTI-LITHIC—

For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Ailes, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, AT ONCE justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of URINARY CALCULUS, GOUT, RHEUMATISM, BRIGHT'S DISEASE, DIABETES, CYSTITIS, HÆMATURIA, ALBUMINURIA, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent, of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime. and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* ***"Ext. carnis, fl. comp. (Colden's.)"*** It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

HORSFORD'S ACID PHOSPHATE,

(LIQUID,)

Prepared according to the directions of Prof. E. N. Horsford, of Cambridge, Mass.
Universally recommended and prescribed by physicians of all schools.

IN DYSPEPSIA, CONSTIPATION, INDIGESTION, HEADACHE, etc.

The lining membrane of the stomach, when in a normal condition, contains cells filled with the gastric juice, in which phosphoric acid combined with lime, iron, potash, etc., is an important active principle; this is necessary to a perfect digestion. If the stomach is not supplied with the necessary gastric juice to incite or promote digestion, dyspepsia will follow with all its train of incident diseases. The only known acid which can be taken into the stomach to promote digestion, without injury, is phosphoric acid combined with lime, potash, iron, etc., *i. e.*, Horsford's Acid Phosphate, which is hereby offered to the public.

Sick Headache and Nervous Prostration.

Dr. W. P. Clothier, Buffalo, N. Y., says: "I know it to be beneficial in sick headache and nervous prostration."

Beneficial Results.

Dr. E. J. Williamson, St. Louis, Mo., says: "Marked beneficial results in imperfect digestion and diabetes mellitus."

Promotes Digestion.

Dr. W. W. Scofield, Dalton, Mass., says: "It promotes digestion and overcomes acid stomach."

A Good Nerve Tonic.

Dr. R. S. McCombs, Philadelphia, Pa., says: "I used it in nervous dyspepsia with success. It is a good nerve tonic."

A Wonderful Remedy.

Dr. T. H. Andrew, late Demonstrator of Anatomy, Jefferson Medical College, Philadelphia, Pa., says: "A wonderful remedy which gave me most gratifying results in the worst forms of dyspepsia."

Obstinate Indigestion.

Dr. F. G. McGavock, McGavock, Ark., says: "It acts beneficially in obstinate indigestion."

We have received a large number of letters from physicians of the highest standing, in all parts of the country, relating their experience with the Acid Phosphate, and speaking of it in high terms of commendation.

Physicians desiring to test Horsford's Acid Phosphate will be furnished a sample without expense, except express charges. Pamphlet free.

PROF. HORSFORD'S BAKING PREPARATIONS

are made of the Acid Phosphate in powdered form. They restore the phosphates that are taken from the flour in bolting. Descriptive pamphlet sent free.

RUMFORD CHEMICAL WORKS, Providence, R. I.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER,

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

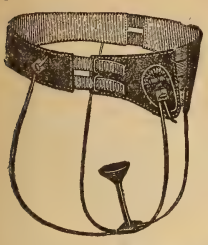
Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

SAVORY & MOORE, 143 New Bond Street, London.
Agents for America, E. FOUGERA & CO., New York.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

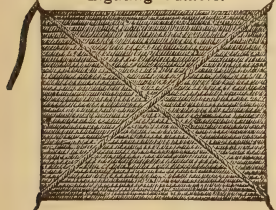
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

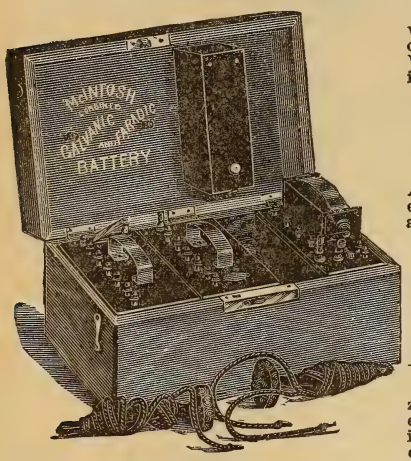
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS NF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_2 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

In corresponding with Advertisers please mention the MEDICAL AND SURGICAL REPORTER.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CHAPOTEAUT'S WINE OF PEPTONE.

The Peptone used in the preparation of this Wine is obtained by the action of Sheep Pepsine on Beef of the best quality. Being pure and neutral it is entirely assimilable, containing neither Glucose, Albumen, nor Chloride of Sodium; for this reason it is the only preparation used in the laboratory of Mr. Pasteur for the culture of microscopic liquids.

Each wineglassful of Chapoteaut's Wine contains the Peptone of ten grammes of Beef, and has, besides, the digestive properties of Pepsine.

It may be used for the following cases: Anæmia, Dyspepsia, Debility, Distaste of Food, Inaction of the Digestive Organs, Convalescence, Alimentation for Wet Nurses, Children and the Aged; Phthisis, Persons Weakened by Fever, Dysentery, and by patients having been operated upon for Cancerous Affections.

DOSE—One or two small wineglassfuls after meals.

Depots: Chapoteaut, 8 Rue Vivienne, Paris---E. Fougera & Co., 30 N. William St., N. Y.

MIDY'S SANTAL.

Midy's Essence of Santal is used with success in place of Copaiba and Cubebs, being harmless even in large doses. No matter what the color or amount of the secretion may be, the discharges are reduced and relief is obtained in forty-eight hours.

No unpleasant effect is caused by its use, such as diarrhœa, eructations, or indigestion, and not giving to the urine any odor.

In cases of Inflammation of the Bladder it acts rapidly, and in two or three days the bloody emission is suppressed; it is used with success in Chronic Catarrh, rendering the urine clear at once.

Depots: Midy, Chemist, 110 Faubourg St. Honore, Paris--E. Fougera & Co., 30 N. William St.

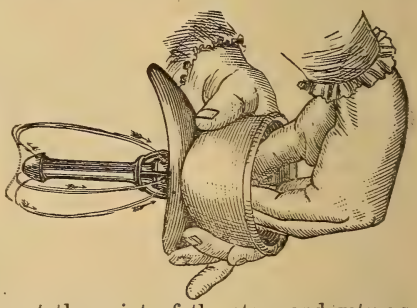
GRIMAULT & CO.'S IODIZED SYRUP OF HORSE RADISH.

The Syrup of Iodized Horse Radish is used in France on a large scale as a substitute for Cod Liver Oil. It is prepared from juices of anti-scorbutic plants. Each tablespoonful contains one and a half grains of Iodine so intimately combined as to be insensible to the action of starch.

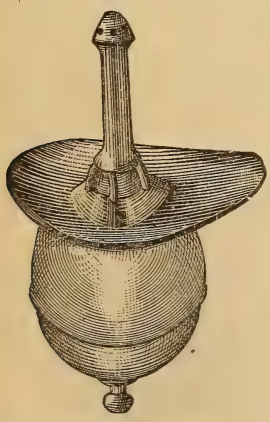
Grimault & Co., Pharmacists, 8 Rue Vivienne, Paris--E. Fougera & Co., New York.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World. Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	0.39	0.543 grains.
Grosvenor & Richards	0.17	0.264 "
T. W. Heinemann	0.15	0.230 "
George E. Mitchell (Novelty Plaster Works)	0.05	0.045 "
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	0.06	0.062 "

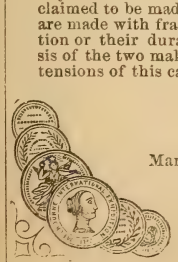
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

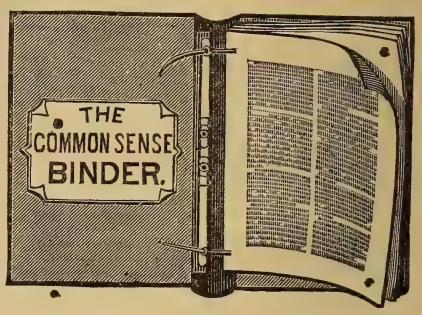
We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrb and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

A GOOD RECORD

For the year ending April 1. Between one hundred and two hundred surgical operations have been performed at the Free Hospital for Women supported by the Murdock Liquid Food Co., Boston, without the loss of a single patient, and all restored to usefulness.

LIQUID FOOD WAS GIVEN BEFORE AND AFTER THE OPERATIONS.

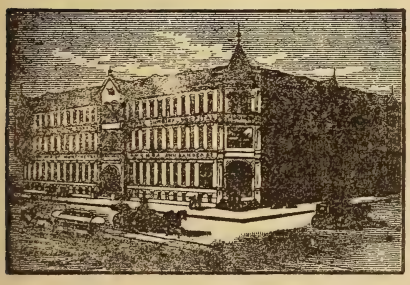
What other hospital that does not use Murdock's Liquid Food can show such a record?

By its use we can build up any patient who is too reduced for an operation, so that not only a safe but successful operation can be made, and in common cases the patient can be made convalescent in three-quarters of the time usually required.

With what we have been and are doing, we shall be able, in our new Free Hospital that we are now building, corner of Huntington avenue and Camden street, to perform in the Surgical half of the Hospital

500

OPERATIONS ANNUALLY.



Until then we shall remain in our old home.

THE SURGICAL STAFF AT MURDOCK'S FREE HOSPITAL FOR WOMEN, AT 30 LEVERETT STREET, ARE IN DAILY ATTENDANCE TO EXAMINE PATIENTS AND ASSIGN BEDS, SATURDAYS EXCEPTED.

Its value in cases where limbs have been broken surprises every physician who has ordered its use, as it restores the broken limbs to health and strength in a few weeks.

BABIES.

Remember, that with feeble infants who do not thrive on their mother's milk or the best prepared foods in the market, WE REQUEST NO CHANGE OF FOOD, but add 5 or more drops four times daily of Murdock' Liquid Food, and you will find that the lost or needed vitality will be restored to them in less than thirty days.

Not a case of Cholera Infantum known where Murdock's Liquid Food has been used, nor a death from Cholera Infantum where it has been prescribed by a physician.

Murdock's Liquid Food will assist all classes of chronic cases. It is the only Raw Food in the world. It is free of insoluble matter, and can always be retained by the stomach, and when given for INJECTIONS it is equally valuable and can always be retained.

Remember, all acknowledge the value of Fruits for a patient.

We use them in Liquid Food:

1st. For their own properties.

2d. They relieve the meats of their heating properties, making it safe and valuable in cases of fever, as relapse never follows when used.

3d. They preserve our meats, enabling us to offer the only Raw Food known, and it will keep in all climates when not exposed to heat, air or sun.

TO SUSTAIN OUR CLAIM

We never wish Liquid Food used until all other treatment and foods fail, then the results are quickly seen, generally in twenty-four hours.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor. All brands are made by the same formula. The latter represents the day of make, and the figure the tank. If richer, it is stronger in smell and flavor, and will bear a greater reduction.

Murdock Liquid Food Co.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY.** In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

GOOD INVESTMENTS
FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

STAUFFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and staved with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

Miami Medical College,

CINCINNATI, OHIO.

SESSION 1886-87.

The Session of 1886-87 will begin TUESDAY, September 21, 1886, and continue until March 1, 1887.
This Session comprises a series of Didactic Lectures on all the topics essential to a complete medical education, extensive clinical courses, and ample opportunities for practical work in the Laboratories for Anatomy, Chemistry, Microscopy, etc.

FACULTY.

E. WILLIAMS, M. D.,
Professor of Ophthalmology and Otology.
J. C. MacKENZIE, M. D.,
Professor of Principles and Practice of Medicine.
BYRON STANTON, M. D.,
Professor of Diseases of Women and Children.
W. H. TAYLOR, M. D.,
Professor of Obstetrics.
W. B. DAVIS, M. D.,
Professor of Therapeutics and Materia Medica.
W. L. DUDLEY, M. D.,
Professor of Chemistry and Toxicology.
N. P. DANDRIDGE, M. D.,
Professor of Proctice of Surgery and Clinical Surgery.
T. W. LANGDON, M. D.,
Professor of Anatomy.
JOS. EICHBERG, M. D.,
Professor of Physiology.
W. A. ROTHACKER, M. D.,
Professor of Principles of Surgery and Pathology.

☞ For Circulars, address,

J. C. MacKENZIE, M. D., Secretary,
or W. H. TAYLOR, M. D., Dean.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.
School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.
Directions to parents of Deaf Children free on application to **MARY S. GARRETT, Principal.**

THE CANTON SURGICAL AND GYNÆCOLOGICAL CHAIR.

A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.
As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.
Send for descriptive catalogue.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

SAMPLES FURNISHED UPON APPLICATION.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

THE SUMMER CAMPAIGN.

The most effective weapon the Medical Profession can use in contending with Cholera Infantum, Dysentery and Summer Complaint, is

Nestlé's Milk Food.

It is most suitable, safe and nourishing diet when the above-named ailments threaten infant life. Out of a mass of valuable letters, we quote one sentence from an eminent physician whose name we may not publish "There is ***No excuse for losing children with Cholera Infantum*** where means exist to procure Nestlé's Food."

We quote again from Ziemssen's Cyclopedia, in Vol. 7, a portion of the well-known article on the treatment of Cholera Infantum, in which these words can be read by any M. D.: "Where the mother's milk is insufficient Nestlé's Milk Food ***is alone to be recommended.***"

The above quotations are about as strong and emphatic as the English language will permit, and we add thereto that if the Medical Profession will put delicate children under their care on this food as a diet during hot weather, they will win the fight with Summer Complaints.

A sample sufficient to prepare three feeding bottles, also pamphlet by Professor Lebert, giving full information as to constitutents, sent on application to

THOS. LEEMING & CO., Sole Agents, New York.

NOTE.—No milk required in preparing Nestlé's Food, only water used.

COCA

CORDIAL.

—A—

PALATABLE PREPARATION

—OF—

Coca Erythroxylon,

CONTAINING

In an agreeable vehicle the active medicinal principle, free from the bitter astringent constituents of the drug.

THE SEDATIVE, tonic, and stimulant effects of Coca Erythroxolon and its preparations, and their wide application in medical practice, are now too well known to the medical profession to need extended comment.

Coca has been extensively used with gratifying success for the relief of morbid conditions depending on nervous exhaustion, in the nervous irritability following excesses of any kind, in neurasthenia, to facilitate digestion in dyspepsia, to relieve the morbid depresion of spirits resulting from exhausting mental labor, in nausea and vomiting of reflex origin, and in the treatment of the alcohol and opium habits.

In a great variety of affections it has proved itself to be a drug ranking in therapeutic importance with opium and quinine.

The Coca Cordial presents the drug in a palatable form, commending it especially to the large class of persons of delicate nervous organization, for whom it is most often indicated.

In its preparation the astringent and bitter constituents of Coca, which are not essential to its medicinal action, have been eliminated, while care has been taken to retain unchanged the active principle cocaine. One fluid-ounce of the cordial represents 60 grains of coca leaves of good quality, the vehicle employed being an agreeable cordial of a rich vinous flavor.

☞ We shall be pleased to send on application a circular more fully descriptive of Coca Cordial and its application, and we trust physicians will communicate to us the results of their experience in the use of this preparation, so far as it is likely to be of general interest to the profession.

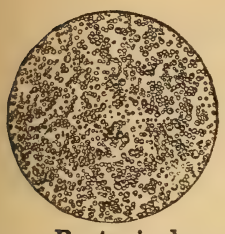
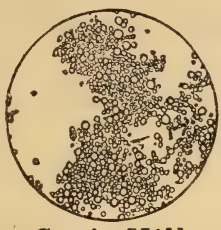
DETROIT, MICH.

Peptonized Cod Liver Oil and Milk.

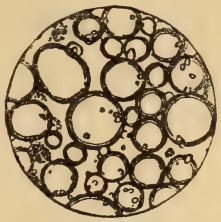
The finest division of oil globules reached in any emulsion or preparation of Cod Liver Oil.



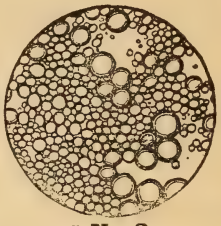
Peptonized Cod Liver Oil and Milk
200 Diameters.



Cow's Milk.
200 Diameters.



*** No. 1.**
200 Diameters.



*** No. 2.**
200 Diameters.

All preparations of Cod Liver Oil but the plain, in the market, are Emulsions in some form, regardless of the names given them. *Their value and easy digestibility over the plain Oil must consist in the division of the oil globules.* Any physician who has a microscope of any power can compare COD LIVER OIL AND MILK with the various preparations of Cod Liver Oil, and he will find that the oil globules of COD LIVER OIL AND MILK are from 10 to 100 times finer than any preparation of Cod Liver Oil in the market, and 25 per cent. finer than in nature's Emulsion, milk. This should be the guide in the use of Cod Liver Oil with every practitioner.

Messrs. REED & CARNRICK, New York City.—Dear Sirs: I have examined your PEPTONIZED COD LIVER OIL AND MILK microscopically, with the following results:

This preparation shows extremely minute oil globules suspended in a clear solution. The mean diameter of these globules is rather less than 0.003 m.m. (about $\frac{1}{10000}$ inch), and the largest are not over 0.006 m.m. (about $\frac{1}{4000}$ inch). For comparison, it may be stated that their average diameter is from one-third to one-half that of the red blood corpuscles. *These photomicrographs show their size as compared to Milk, and Emulsions of Cod Liver Oil in the market. They have all been photographed under exactly the same conditions. In some of the specimens the globules when spread out in a very thin layer, gather in clusters, giving an uneven field, but not affecting their size.*

Very truly yours,
JAMES R. DUGGAN, M. D., PH.D.
Feb. 26, 1885. Fellow in the Johns Hopkins University, Sec'y Baltimore Micros'l Society.

ANALYSIS OF PEPTONIZED COD LIVER OIL AND MILK, by Prof. ATTFIELD, PH.D., F.C.S., Etc., author of a Manual of General and Pharmaceutical Chemistry.

I have analyzed PEPTONIZED COD LIVER OIL AND MILK, and find that it is exactly what the maker states it to be. The sample submitted to me has all the properties of a specimen prepared by myself, except that their machinery has produced a more perfect emulsion than my hand labor can effect. Indeed, I find by aid of the microscope, that as regards perfection of emulsion—that is, admixture of a fatty with a non-fatty fluid—the oil in PEPTONIZED COD LIVER OIL AND MILK is in a finer state of division than the butter is in ordinary milk.

(Signed) JOHN ATTFIELD.

Peptonized Cod Liver Oil and Milk is also combined with Hypophosphites of Lime and Soda.

* Of the preparations of Oil on the market, No. 1 contained the largest, and No. 2 the smallest oil globules next to Peptonized Cod Liver Oil and Milk, in comparison with all the other preparations of Cod Liver Oil in the market.

Samples sent on application, by

REED & CARNRICK,
6 Harrison St., New York.

CARNRICK'S

SOLUBLE FOOD!

Malt Sugar vs. Dextrine.

The introduction of **Soluble Food** during the past summer has convinced us that it will agree with 399 out of 400 children, whereas foods composed of Malt Sugar cause fermentation in the stomach and disagree with a very large percentage. Believing that one of the principal reasons for this great difference was that in **Soluble Food** the starch of the wheat is in the form of dextrine and dextrose, we wrote Prof. DUGGAN (the best authority on fermentation in this country), and received the following:

JOHNS HOPKINS UNIVERSITY, BALTIMORE, MD.

MESSRS. REED & CARNRICK, New York. *Dear Sirs:*—In reply to your inquiry as to whether Dextrine or Malt Sugar is best suited for digestion by children, I must say I think Dextrine is undoubtedly preferable. The two following reasons will, I think, convince any one that this conclusion is well founded—In the first place, Dextrine will not undergo alcoholic or acid fermentation, as will Malt Sugar and other forms of sugar. It is well known that children are apt to have acidity of the stomach after eating "sweet things;" this is of course due to the fermentation of the sugar in the stomach. In addition to this, Pavy has recently shown (*London Lancet*, 1885,) that carbohydrates are converted in the alimentary canal into Dextrine or a similar substance that has no reducing action on Fehling's solution. From this it would appear thhat Dextrine is, of all the carbohydrates, themost nearly ready for absorption by the system. The success that has recently attended the use of Dextrine in dyspepsia gives strength to this view. Very respectfully, J. R. DUGGAN, M. D., Ph. D.

The milk used in SOLUBLE FOOD is so treated that no poisonous ferments, such as Tyrotoxicon, can be germinated. The milk is received directly from the cow, placed in a refrigerator, and rapidly reduced to 40° F. It is then immediately drawn into a vacuum pan and partially digested with pancreatine, thus rendering the casein as soluble as the casein of human milk, after which all the water is eliminated but about 4 per cent.

SOLUBLE FOOD contains 50 per cent. of the finest quality of wheat. The flour is first baked into crackers, then powdered and kept at a temperature of 350° F. for eight hours. This process converts the starch into Dextrine and renders the gluten easy of digestion, which is the only form in which the cereals should be given to children.

Dextrine not only cannot ferment, but further has the property of stimulating the digegestion.

Foods containing *malt sugar* should not be used for children, for they are apt to produce fermentation as cane sugar.

The starch in any article of food must be converted into malt sugar before alcoholic or acetic fermentation can take place, and consequently foods taken in the form of malt sugar are very apt to ferment before normal assimilation can take place. This is undoubtedly the reason that preparations composed of malt sugar disagree with such a large percentage of children, while Soluble Food agrees with children almost universally. It contains from 50 to 100 % more nitrogenous and bone-forming matter, than any other Infants' Food in the market, and is consequently less expensive to use.

DUFFY'S PURE MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

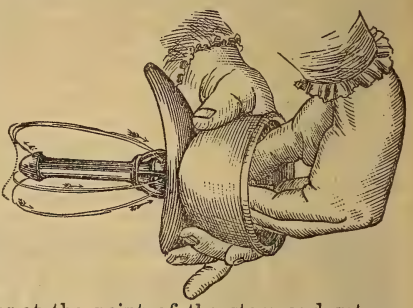
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

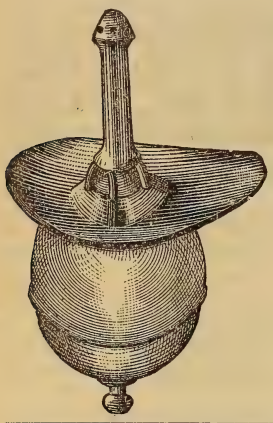
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886-87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY.

WM. E. A. AIKEN, M. D. LL. D.,
Emeritus Professor of Chemistry and Pharmacy.
GEORGE W. MILTENBERGER, M. D.,
Professor of Obstetrics.
CHRISTOPHER JOHNSTON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children, and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology, and Clinical Professor of Diseases of Nervous System.
L. McLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy and Clinical Surgery.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics. Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.

For catalogue and further information address, **Dr. J. EDWIN MICHAEL, Dean, 1246 Madison Ave.**

DENTAL DEPARTMENT.

Fifth Annual Announcement. Next regular session begins October 1st, 1886. New and excellen Infirmary and Laboratory, with abundance of clinical material.

FACULTY.

FRED. J. S. GORGAS, M. D., D. D. S.,
Professor of Principles of Dental Science, Dental Surgery and Dental Mechanism.
JAMES H. HARRIS, M. D., D. D. S.,
Professor of Operative and Clinical Dentistry.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D. D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D. D. S.,
Demonstrator of Operative Dentistry.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For Catalogues and other information apply to Dr. F. J. S. GORGAS, Dean, 259 Eutaw Street, Baltimore.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

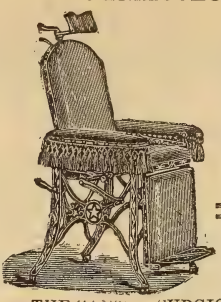
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

BALTIMORE MEDICAL COLLEGE,

BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,

S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

UNIVERSITY OF PENNSYLVANIA.

MEDICAL DEPARTMENT—PHILADELPHIA.

PROFESSORS: Joseph Leidy, R. A. F. Penrose, D. Hayes Agnew, William Pepper, William Goodell, James Tyson, H. C. Wood, Theo. G. Wormley, John Ashhurst, jr., William Osler, Edw. T. Reichart, Wm. F. Norris, Geo. Strawbridge, Louis A. Duhring, Louis Starr, Edw. T. Bruen.

The 121st Annual Winter Session will commence Friday October 1, 1886, and continue 7 months.

The Preliminary Course will begin Wednesday, Sept. 15th.

Graded Curriculum.—Three Winter Sessions required. Voluntary fourth year.

Practical Instruction in all departments.

For particulars see catalogue, for which address

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

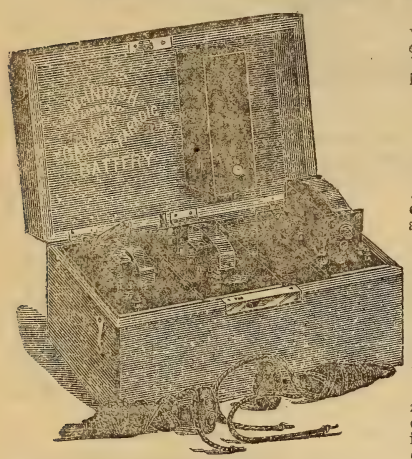
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_2 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomach.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM.
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH.
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 3 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on ounce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Carl L. Jensen

Sole Originator of

Pepsin Scales

OR

"Crystal" Pepsin

2039 Green St.
Philadelphia

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

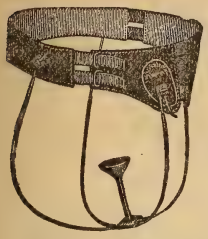
The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully,

CARL L. JENSEN.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

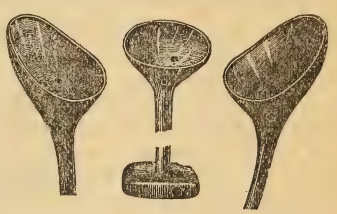
THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.



Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

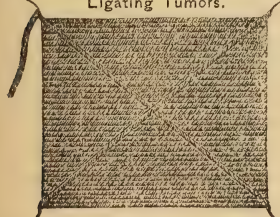
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

DR BUCKLAND'S SCOTCH OATS ESSENCE

NATURE'S NERVE TONIC AND BRAIN FOOD.

Yielding the most remarkable results in both Functional and Organic Diseases of the Brain and Nerves, especially

NEURALGIA,	OPIUM and MORPHINE HABITS,	SPERMATORRHŒA,
INSOMNIA,	INFANTILE PARALYSIS,	TIC DOLOUREUX,
SCIATICA,	NERVOUS DYSPEPSIA,	MELANCHOLIA,
MANIA,	NEURASTHENIA,	IMPOTENCY.

FORMULA.—Avena or Avenesca, the active principle of the Oat (Avena Sativa) obtained by crushing the grain (dried in vacuo), with pure alcohol, skimming off the fatty scum obtained by ether washing, evaporating to dryness, and then dissolving the amorphous powder (Avena) with boiling alcohol and flavoring. The dried grain is then treated by maceration and percolation from 96 to 144 hours. The final solution is of a 3½ per cent. strength.

☞Most remarkable cures of the OPIUM HABIT.
☞The most active tonic to both male and female SEXUAL ORGANS known.
☞Almost Specific in IMPOTENCY and SPERMATORRHŒA.
☞As a Brain and Nerve Tonic and Restorer of Wasted Energy it is unparalleled.

Put up in 3 oz. bottles. Price, $1.00. For sale in all drug stores.

COSMOLINE

Unguentum Petrolei

Prepared by E.F.Houghton & Co. Philadelphia U.S.A.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The Essential Elements** to the Animal Organization—Potash and Lime;
The **Oxydizing Agents**—Iron and Manganese;
The **Tonics**—Quinine and Strychnine;
And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all Others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Each Bottle of Fellows' Hypophosphites Contains 128 Doses.

Prepared by JAMES I. FELLOWS, Chemist,

Over-Dosed Physicians.

From all quarters physicians express their disgust at the over-dose of Baby Food advertising they have had the past year.

Doctor: Will you please note, that for three years there has *never* been an advertisement of Nestle's food in a daily paper in the United States. In *no* Medical journal has there appeared a hired analysis statement, deprecating, by assertion or insinuation, any other food. By its *own inherent merit* Nestle's food has commended itself to the confidence of the Medical profession, so that to-day it is regarded by the profession as the best substitute for mother's milk.

It does not agree with *every* child, but it *does* agree with a larger percentage of infants than any other infant's food.

Should this notice meet the eye of any Doctor who has not used Nestle's Milk Food, a sample and pamphlet by Prof. Lebert will be sent on application to

THOS. LEEMING & CO., NEW YORK.

CASCARA CORDIAL.

IN HABITUAL CONSTIPATION.

The great desideratum in the treatment of chronic constipation has heretofore been a remedy which possessed not only a temporary specific action on the bowels, but which would be followed by no reaction and no repression of secretion, and which could be administered for a sufficient length of time to permit of restoration of normal function; a remedy which would not only alleviate temporarily the existing mal-condition, but permanently remove the cause upon which it depended for its continuance, and thus effect a radical cure. The extensive trial of Cascara Sagrada by physicians of this country and Europe has shown it to be the drug that most fully meets all these indications. It has been added to the British Pharmacopœia, and its efficacy is attested by all physicians who have given it a trial. Cascara Cordial is prepared to disguise the inherent bitter principle of the drug, and without detracting from its medicinal value, render it acceptable to the most fastidious palate.

AS A VEHICLE FOR NAUSEOUS MEDICINES.

Cascara Cordial has become widely known to the profession. It not only effectually disguises the taste of such inherently bitter medicines as Quinine, but on account of its laxative properties, is a most valuable adjuvant or corrigent to any prescription containing drugs, such as iron, the continued administration of which tends to constipate. It will be seen that Cascara Cordial has a wide range of utility as an agreeable laxative excipient.

TO DISPEL THE ACUTE EFFECTS OF ALCOHOL AND OPIUM ABUSE.

From letters received from physicians, we are led to call the attention of the profession to the use of Cascara Cordial by those addicted to the alcohol and opium habits. The headache and gastric irritation following excessive indulgence in alcohol is avoided by adding a little Cascara Cordial to the alcoholic stimulant taken, or by taking a full dose of the cordial on retiring, after too free indulgence. The severe constipation also often attending indulgence in opium may be relieved by the systematic administration of Cascara Cordial.

We can not assume the responsibility for lack of success physicians may meet with in prescribing the many imitations and spurious varieties of Cascara on the market, and would request those wishing a genuine and reliable preparation to specify P. D. & Co's.

☞ **Samples furnished on application, to those physicians who will pay express charges.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

60 Maiden Lane, } New York.
21 Liberty Street. }

DETROIT, MICH.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	½ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	½₀ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

Listerine comes nearer the ideal Antiseptic than any preparation now before the Medical World

Send for New Formula Book and General Reports, establishing its value externally in Surgery, Obstetrics, Gynecology, Leucorrhœa, Gonorrhœa, and all Mucous Membrane Catarrhs; internally in Typhoid and other Fevers, Zymotic Diseases, Diphtheria, Scarlet Fever, Dyspepsia, Dysentery, Diarrhœa all forms of Cholera, etc., and as a general Prophylactic

THE BEST

—ANTI-LITHIC—

For the Uric Acid Diathesis.

LITHIATED HYDRANGEA

LAMBERT

PHARMACAL COMPANY.

ST. LOUIS.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is invariably of definite and uniform therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, at once justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Antilithic Agent yet known in the treatment of Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hematuria, Albuminuria, and Vesical Irritations generally

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* **"*Ext. carnis, fl. comp. (Colden's.)*"** It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

ESTABLISHED 1852.

HYDRASTIS

AND ITS PREPARATIONS.

The WM. S. MERRELL CHEMICAL CO. of Cincinnati—"The largest consumers of Golden Seal Root in the world" (see "Drugs and Medicines of North America")—offer to the medical profession, through the drug trade, the following well-known and highly approved preparations of this leading American drug.

FLUID HYDRASTIS.

A neutral solution of all the active medicinal constituents, forming a perfectly clear solution with alcohol, glycerin, syrup, or water. May be properly and profitably substituted for the Fluid Extract of the U. S. P. in the manufacture of syrup, wine or tincture.

COLORLESS HYDRASTIS.

A neutral solution of the White Alkaloid alone—without color or stain.

SULPHATE HYDRASTIA—CRYSTALLIZED.

[SULPHATE BERBERINA.]

This is the Sulphate of Yellow Alkaloid, which we present in crystals to guard against the substitution of impure and unskillful preparations in a powdered form.

Subsequent to its introduction by us under its present commercial title, this salt was identified as Berberina by Mahla, Durand and others. To avoid confusion with the Alkaloid Bebeerine and its salts, and to fully establish its identity, we continue the name by which it was originally introduced.

SOLUTION BISMUTH AND HYDRASTIA.

A neutral solution of the double Citrate of Bismuth and Hydrastia (White Alkaloid); each fluid drachm containing 2½ grains of the double salt.

Represented in New York City by

LEHN & FINK, 128 William Street.

Prices Current and Descriptive Circulars cheerfully supplied. Correspondence invited.

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichs all. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

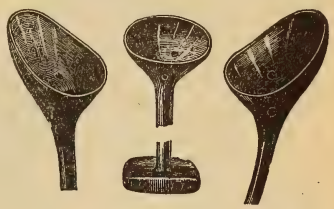
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

LEVIS'S METALLIC SPLINTS.

FLEXIBLE, PERFORATED, NICKEL-PLATED, Conformable to every size and condition of Limbs. **VERY LIGHT, INDESTRUCTIBLE,** and **INEXPENSIVE.** The complete set consists of **21 pieces** in a neat, compact case. Full descriptive circulars sent on application. ☞ **PRICE, $15.00 Per Set.** ☜

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

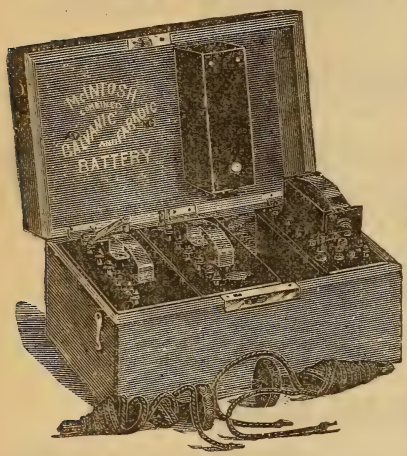
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

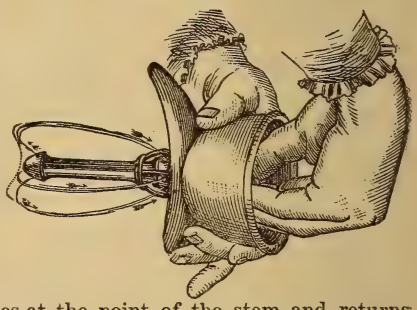
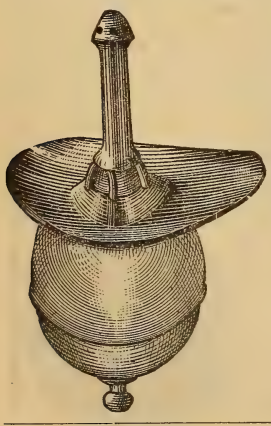
"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World. Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

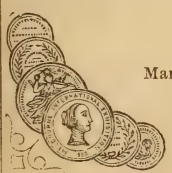
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was ur "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

AND

GYNÆCOLOGICAL CHAIR.

A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

THE CANTON SURGICAL CHAIR CO., CANTON, OHIO.

Please mention this Journal.

BALTIMORE MEDICAL COLLEGE,

BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,

S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

UNIVERSITY OF PENNSYLVANIA.

MEDICAL DEPARTMENT—PHILADELPHIA.

PROFESSORS: Joseph Leidy, R. A. F. Penrose, D. Hayes Agnew, William Pepper, William Goodell, James Tyson, H. C. Wood, Theo. G. Wormley, John Ashhurst, jr., William Osler, Edw. T. Reichart, Wm. F. Norris, Geo. Strawbridge, Louis A. Duhring, Louis Starr, Edw. T. Bruen.

The 121st Annual Winter Session will commence Friday October 1, 1886, and continue 7 months.

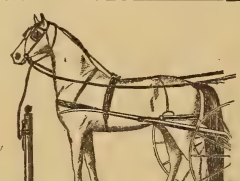
The Preliminary Course will begin Wednesday, Sept. 15th.

Graded Curriculum.—Three Winter Sessions required. Voluntary fourth year.

Practical Instruction in all departments.

For particulars see catalogue, for which address

JAMES TYSON, M. D., Sec'y.



PHYSICIANS who own good horses should use **The Security Hitching Strap** (for hitching upon the street). It is secure, convenient, neat and durable. Holds by the bit and by the neck. No strain on the bridle. S. Birdsall, M. D., Member Med. Soc. State of Pa., Patentee.

If your harness dealer does not keep it, send to **KING & CO.,** Wholesale Harness Manufacturers, Owego, N. Y.

Price, $1.00 by express; $1.25 by mail.

If not satisfactory, money will be refunded.

HARNESS. Hand Made. Best Oak Leather, $8.50, $10, $12, $13.50, $15. Double Sets, $20, $25, $30. Shipped subject to approval. 40-PAGE CATALOGUE free. *Order one.* **KING & CO.,** Wholesale Manufacturers, **Owego, N. Y.**

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compt-Globules*.

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux*.

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal*.

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia*, etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

Rigollot

THE PHYSICIAN'S

DAILY POCKET RECORD AND VISITING LIST.

By S. W. BUTLER, M. D. TWENTY-FIRST YEAR.

A New Revised Edition for 1886, with Metric Posological Table, &c., strongly bound in Dark Morocco, with Pocket for Blanks, ond a Patent Steel Spring.

THIS VISITING LIST has been a favorite for many years. It is "perpetual" in arrangement, and may be used continuously one full year from the date of the first entry. Besides the Posological Table, it contains Tables of Doses for Hypodermic Injections, Inhalation, Suppositories, &c.; Directions for the treatment of Poisoning, Drowning, and other emergencies; Simple Directions for Testing the Urine; Obstetric Record, Cash Record, &c.

☞This RECORD has met with the Highest Praise from those who have made use of it.

PRICES.

Editions for Thirty Patients Daily, Patent Clasp, ... $1.50

Editions for Sixty Patients Daily, Patent Clasp, ... $2.00

☞ **The Name of the Purchaser will be Stamped in Gilt Letters, on the Back, for Ten Cents Extra.**

A reduction of 50 cents on these prices will be made to subscribers to THE MEDICAL AND SURGICAL REPORTER and QUARTERLY COMPENDIUM when taken together.

PUBLISHED BY

D. G. BRINTON, M. D.,

115 South Seventh Street, Philadelphia.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE, CEREBRAL CONGESTION, HEADACHE, LOSS OF APPETITE, INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.

School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.

Directions to Parents of Deaf Children for their Treatment from Infancy in order that they may learn Speech and Lip Reading, furnished free on application to **MARY S. GARRETT, Principal.**

And all parents of pupils.

THE VALUE OF MURDOCK'S LIQUID FOOD IS RECOGNIZED IN ALL COUNTRIES, AND IS ENDORSED BY ALL NATIONAL MEDICAL SOCIETIES THAT HAVE INVESTIGATED ITS VALUE.

There never was an essay read before any Medical Society on Raw Food Extracts, except on Murdock's Liquid Food, and counterfeit manufacturers of Extracts have published many of our essays to show the value of their counterfeits.

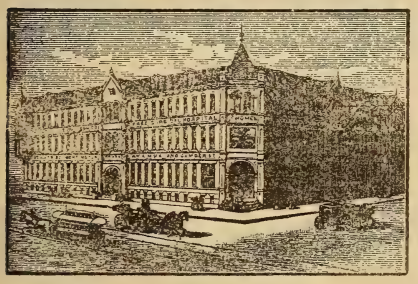
Send for Essay and DISCUSSION before the British Medical Association at Brighton, England, 1886 (Essay), by the Vice-President of the American Medical Association, and others, on the value of MURDOCK'S LIQUID FOOD over all Foods and Extracts known, it being the ONLY Raw Condensed Food free from insoluble matter.

Also essay read before the American Medical Association at Richmond, Va., and Washington, D. C.

Its value was recognized by the profession from results obtained in the Free Hospitals that have been established and supported by our Mr. A. L. Murdock during the last four years.

They now equal

140 FREE BEDS,



And contain 38,000 feet of floor.

Our Liquid Food can be retained by the weakest stomach. Four tablespoonfuls daily will make eight per cent. new blood weekly. When used for infants, never change their food, but add five or more drops of Liquid Food at each feeding, and their lost or needed vitality will be restored in less than thirty days.

Send for the Report of the Chairman of the Section of Obstetrics of the American Institute of Homœopathy, read at Saratoga at the annual meeting of 1886.

Circulars were sent by him to all the Physicians in the United States, asking what their experience was with Murdock's Liquid Food in its use for infants under, as well as over, one year old.

Then what results, with all the different Milk preparations, Grain Foods, Peptonoid Foods, and Beef Extracts, compared with MURDOCK'S LIQUID FOOD.

The returns show that it is the Standard Food and Extract, as the percentage of lives restored was the largest when used.

We extract from the report. After calling attention to the fact that one-quarter of the homœopathic profession are accustomed frequently to prescribe this food for children less than a year old, as well as over, he remarks:

"It is singularly adapted to scrofulous, syphilitic, and tubercular constitutions, its life-restoring power manifesting itself in each with a relative clearness and power corresponding to the order of enumeration. For fair-haired children who are inclined to grow fleshy it is more symptomatically recommended, while Duncan's *acid* babies find it particularly useful. Accordingly, it is chiefly employed for marasmus and anæmic conditions resulting either from non-assimilation of food, or from smple summer complaints. Should a child vomit all milk food and suffer synchronously with diarrhœa or dysentery, the demand for this food is emphatic and unmistakable; also in general irritability of the stomach, particularly if there be sour-smelling diarrhœa, the food passing through undigested. For the prematurely born it stands pre-eminent. For those 'weak and debilitated from any cause, Murdock's Food is probably the best in the world.' Should any indication of cerebral hyperæmia appear, the quantity of food must be diminished; so, too, if after its protracted use vomiting and diarrhœa ensue, the child has been overfed. Should the taste or odor of any given bottle chance to be disagreeable, add water until they disappear, and let the purchaser congratulate himself upon getting more nutriment than he paid for. When given in combination with milk in cases of indigestion, the quantity of milk should be diminished until all curds disappear from the stool, the quantity of Food, of course, being proportionately increased."

The Surgical Staff at MURDOCK'S FREE HOSPITAL FOR WOMEN are in daily attendance, except Saturdays, to examine patients and assign beds.

EVERY BED FREE.

Our Free Surgical Hospital for Women, located on Huntington avenue, above West Chester park, contains fifty (50) beds, in charge of a staff of five surgeons, members of the Massachusetts Medical Society.

Our Free Surgical Hospital for Women, located on Gainsborough street, corner of Huntington avenue, contains 50 beds, in charge of a staff of five surgeons, members of the Massachusetts Homœopathic Medical Society.

Our Free Home for Homeless Boys contains 40 beds, and is located at 11 to 21 Causeway street. Many of these boys suffer from Scrofula, Eczema, and other skin diseases, which yield quickly by the use of our Liquid Food.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor.

All brands are made by the same formula. The letter represents the day of make, and the figure the tank.

If richer, it is stronger in smell and flavor, and will bear a greater reduction. It cannot be reduced so low but it will be superior to all other preparations in treating chronic cases.

If you cannot obtain Murdock's Liquid Food from your druggist, we deliver, free of express, 12 oz. for $1. Any physician that has not used our Liquid Food, we will deliver free to the Boston express 12 oz.

MURDOCK'S LIQUID FOOD CO.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH — Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY.** In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

New, Beautiful and Valuable Books.

A TEXT-BOOK OF

OPERATIVE SURGERY AND SURGICAL ANATOMY,

By ARTHUR TREHERN NORTON, F. R. C. S., Etc.

BASED ON THE ORIGINAL WORK OF

PROFS. CLAUDE BERNARD and CH. HUETTE.

SECOND EDITION. Illustrated by 88 full-page plates, drawn from nature, engraved on steel, BEAUTIFULLY COLORED, and many wood cuts. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed post-paid and registered), $12.50.

A TEXT-BOOK OF

NAKED-EYE ANATOMY,

BEING AN ACCOMPANYING TEXT TO MASSE'S PLATES.

By JAMES CANTLIE, A. M., M. D., etc.

THIRD EDITION. Illustrated with 113 full page plates, engraved on steel and BEAUTIFULLY COLORED after nature. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed postpaid and registered), $12.50.

The above works are presented in the highest style of the publishing art, and are not less useful than they are beautiful. Mr. Norton explains all the leading and approved operations of surgery with constant reference to the faithfully colored plates, and his instructions are second only to operations on the cadaver.

The "Naked-eye Anatomy" of Dr. Cantlie, with its numerous tinted engravings, illustrates both the position and contrasting hues of the various organs and tissues. The physician who has not frequent opportunities to practice on the dead subject, will find this volume the best substitute he can obtain for practical dissection.

THE SCIENCE AND PRACTICE OF

SURGERY.

By FREDERICK JAMES GANT, F. R. C. S., etc., etc.

THIRD EDITION. Revised and enlarged throughout. With ONE THOUSAND AND NINETY engravings on wood. In two volumes. Vol. I, pp. xxviii, 1087. Vol. II, pp. xxxv, 1183; large octavo; bound in half Russia, marbled sides and edges. London and Philadelphia, 1886. Price (express prepaid), $12.00.

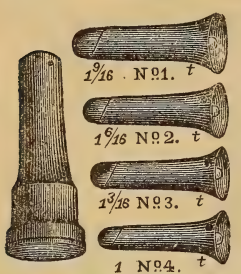
This monumental work is here offered in the finest London edition, on English paper, and bound in the most handsome and durable style. As a treatise on Surgery it stands at the head of the list of those produced by the best school of English Surgeons, clear, complete and practical.

Remit prices with orders to

D. G. BRINTON, M. D., Publisher,

115 South Seventh St., Philadelphia.

STAUFER'S
HARD RUBBER SPECULUMS GUARANTEED.



Prices, Single, $2.50
Series encased, 12.00

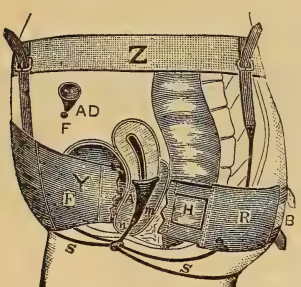
The engraving shows the shape, conductor and case so complete, that scarcely any description is necessary. For compactness there is but one conductor stem, on which each size of bulb screws. Speculums and case are all of the best quality hard rubber, and do not break from ordinary falling. Dental red enamelled inside. The mouth is polished very smooth, and shaped so that the cervix can be brought in entirely by rotation. And when brought in can be rotated to bring into view all the parts. The vaginal portion of the uterus can be seen as clearly as if located externally. When obtained, single, No. 2, is the most useful, since it reveals fully the point of the cervix in almost all multipara, and freely enters, when the position is correct, in many nullipara.

Guarantee.—One or two speculums are guaranteed; thus when returned sound and in the original wooden boxes, within six months of purchase, the money will be refunded without any deduction.

Plates.—The *First* contains 16 engravings and groups of engravings, illustrating the uterine examining instruments. *Second* contains 17 engravings and groups of engravings, illustrating the uterine replacing and supporting instruments.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

STAUFER'S
SPRING STEM UTERINE SUPPORTERS.
GUARANTEED.



Price, on Y, $7.00
" " Z, 6.00

The engraving shows the Spring Stem Cup, which consists of over a dozen sizes. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Stem Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place, and it is sufficient at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

The Series.—This series of imstruments has been invented as cases presented themselves, requiring different styles and sizes of instruments, without change of proprietor, until it has reached its present efficiency.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when the Instrnments are obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free, on application.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

Registered COSMOLINE Trade Mark.

Unguentum Petrolei

Prepared by E.F.Houghton & Co. Philadelphia, U.S.A.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & Co.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & Co.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

"Alone TO BE Recommended."

WHERE MOTHER'S MILK IS INSUFFICIENT,

Nestle's Milk Food is Alone to be Recommended.

"This food is *especially commendable* because the physiological relations of the infantile digestive organs, particularly the lack of notable salivary and pancreatic secretions, are taken into account in its fabrication—the starch contained in it having been transformed into dextrin."--*Prof. Wm. O. Leube, Ziemssen's Clyclopedia, Vol. VII*

We also refer the profession to other eminent writers in the same standard medical work, viz: Prof. Juergensen on Catarrhal Pneumonia, Vol. V. Prof. Senator on the Treatment of Rachitis, Vol. XVI. Prof. Birch-Hirschfeld on Scrofulosis and Affections of the Lymphatic Glands in General, Vol. XVI.

In addition to the above mentioned special features of *Nestlé's Milk Food*, it has a world-wide reputation as a food for infants, producing pure blood, firm flesh, hard muscle and tough bone. It will agree with a larger number of children regardless of age, than *any other substitute* for the mother's milk, and we believe that the general use of this food during the past summer has accomplished more for the diminution of infant mortality from Cholera Infantum than any other means known.

Sample sufficient for trial, and pamphlet by Prof. Lebert, sent on appliaton to

THOMAS LEEMING & CO., 18 College Place, New York City, N. Y.

Smithsonian Institute

Concentrated Palatable Nutrients.

PEPTONIZED EXTRACT OF BEEF.

Contains all the nutritive constituents of beef.

The superiority of this preparation over other extracts of beef depends upon:

1. **The large proportion of albuminoids which it contains.**
2. **The fact that its albuminoid constituents are chiefly in the form of peptones, insuring rapid absorption and ready assimilation.**
3. **Its appetizing flavor.**
4. **Its perfect and ready solubility in water.**

The uses of such a preparation are obvious. It is a concentrated, and at the same time an easily assimilated food, useful in all cases of acute disease where sustaining treatment is indicated, and especially valuable in convalescence, and in chronic conditions of inanition or malnutrition, particularly where the functions of the stomach are not well performed.

One part of the Peptonized Extract of Beef may be said to be the equivalent of eight parts of fresh beef. One teaspoonful (about one-half ounce) will make a pint of excellent beef tea.

A like quantity added to a pint of vegetable soup communicates to it a rich flavor, and converts it into a highly nutritious food.

It may be employed in a still more concentrated form, if desired, but from half an ounce to one ounce of the extract is as much as it is generally advisable to give at one time.

POWDER OF BEEF.

A concentrated food of the highest nutritive value.

It represents in an exceedingly concentrated form the total nutritive value of the beef.

It is tasteless, and can be taken for a longer time than the various extracts of beef, beef juices, etc., without exciting nausea.

It is not only more readily digested and assimilated, but also incomparably easier of administration than other concentrated aliments, and may be added to water, milk, or wine, or beaten up with the yolk of an egg.

Drs. Debove and Dujardin-Beaumetz, of Paris, France, Dr. Lauder Brunton, of London, England, Dr. Henry B. Millard, of New York City, and many others, have given Powder of Beef a most thorough trial, and report that it is a most valuable adjuvant in the treatment of dyspepsia, indigestion, gastritis, ulcer of the stomach, tuberculosis, and in all chronic wasting diseases accompanied by enfeeblement of the digestive and assimilative functions.

PURE POWDERED BONE.

For the treatment of such affections as nervous exhaustion, rickets, and all diseases depending upon a lack of the proper supply of the inorganic elements of the tissues, it is believed that Pure Powdered Bone will be found invaluable.

It has the exact chemical composition required for a true nerve and bone food.

Its mechanical construction is such as to aid digestion to the greatest possible degree.

It is tasteless and odorless.

It is miscible with all ordinary foods in the proportions required, without detection.

It is inexpensive, and therefor adapted for general use.

DETROIT, MICH.

A NEW EMMENAGOGUE.

The following is an abstract from a letter written by one of the most prominent gynæcologists of the country, to another:

"Thus far no perfect emmenagogue has been discovered, but I regard the manganese as the best I have met with. It should be styled a regulator of menstruation rather than a pure emmenagogue, for it is useful in the absence of the menses, irregularity of their recurrence, and even in excess of flow.

"The preparation which I now employ is McKesson & Robbins' pills of the binoxide of manganese. Of this preparation I give two grains three times a day throughout the month and during the period.

"I also employ manganese in chlorosis and anæmia, and I think that by its use I obtain better results than I have heretofore done by iron." (See *Medical Record* of March 6th, page 274.)

Specify McK. & R.'s Pills Manganese Binoxide.

Important additions to McK. & R.'s list of Gelatine Coated Pills:

McK. & R. *Cascara Sagrada* and *Nux Vomica*: Ext. Cas. Sagr. gr. ii; Ext. Nux Vom. gr. 1-5.

McK. & R. Cascara Sagrada, Nux Vomica and Belladonna: Ext. Cas. Sag. gr. ii; Ext. Nucis Vom. gr. 1-8; Ext. Bellad. gr. 1-16.

McK. & R. Hydrobromide of Hyoscin 1-100 gr.

McK. & R. Binoxide of Manganese 2 grs.

McK. & R. Valerianate of Quinine ½, 1, 2, and 3 grs.

McK. & R. Valerianates Iron, Quinine, and Zinc: Ferri Valer., Quin. Valer., Zinci Valer., āā gr. i.

McK. & R. Oleate of Manganese 20 per cent. May be used to advantage when the pills cannot be administered.

Always specify McK. & R's.

COCAINE.

Although only eighteen months have elapsed since Koller's announcement of his discovery of the anæsthetic properties of this alkaloid, Cocaine already ranks among the most important agents of the practitioner. In general and dental surgery, ophthalmology, laryngology and general therapeutics, its value is everywhere attested.

We began its manufacture immediately after the announcement of Dr. Koller, and samples of our product were submitted to many noted specialists for their experiments, and the results were highly gratifying. The demand for our manufacture of the salt, solutions, and oleates, has continued to increase, and we desire to express our sincere thanks to the medical, pharmaceutical, and dental professions for their kind encouragement as shown in their recognition of the merits of our preparations. Our appreciation of this will be shown in our constant efforts to supply all their requirements in chemicals and pharmaceuticals, of a quality worthy of their entire confidence.

Special quotations on Terebene and Cocaine for specified quantities. Very respectfully,

McKESSON & ROBBINS.

TEREBENE.

McKESSON & ROBBINS

WERE THE FIRST IN THIS COUNTRY TO MANUFACTURE THIS VALUABLE REMEDY FOR

Winter Cough, Bronchial and Chest Affections, Flatulency, Acidity, and other forms of Dyspepsia.

It may be used as an inhalation, or taken internally in doses of five or six drops on sugar every four hours, gradually increasing the dose to twenty minims.

Terebene was brought to the notice of the medical profession as far back as 1873, by M. Riban, who read a series of papers on this and similar substances before the Pharmaceutical Society of Paris. It has lately been brought into prominence by Dr. Wm. Murrell, of London, who has given it in over 114 cases; he has also notes of its value in 81 out of 94 cases. Dr. Murrell says that much of the Terebene now being sold may be described as inferior, and to this fact he ascribes some irritating effects noted in a few of his cases.

We would therefore caution the physician in prescribing and the druggist in ordering to, in all cases,

SPECIFY McK. & R.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. THE PACKER MFG. CO., 100 Fulton St., New York.

THE PHYSICIAN'S

DAILY POCKET RECORD AND VISITING LIST.

By S. W. BUTLER, M. D. TWENTY-FIRST YEAR.

A New Revised Edition for 1887, with Metric Posological Table, &c., strongly bound in Dark Morocco, with Pocket for Blanks, and a Patent Steel Spring.

THIS VISITING LIST has been a favorite for many years. It is "perpetual" in arrangement, and may be used continuously one full year from the date of the first entry. Besides the Posological Table, it contains Tables of Doses for Hypodermic Injections, Inhalation, Suppositories, &c.; Directions for the treatment of Poisoning, Drowning, and other emergencies; Simple Directions for Testing the Urine; Obstetric Record, Cash Record, &c.

☞This RECORD has met with the Highest Praise from those who have made use of it.

PRICES.

Editions for Thirty Patients Daily, Patent Clasp, ... *$1.50*

Editions for Sixty Patients Daily, Patent Clasp, ... *$2.00*

☞ **The Name of the Purchaser will be Stamped in Gilt Letters, on the Back, for Ten Cents Extra.**

A reduction of 50 cents on these prices will be made to subscribers to THE MEDICAL AND SURGICAL REPORTER and QUARTERLY COMPENDIUM when taken together.

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

RECTAL ALIMENTATION.

Peptonized Milk the Ideal Substance for Nutritive Enemas.

It would be difficult to conceive of a substance more perfectly adapted for feeding per rectum than thoroughly peptonized milk. It is perfectly absorbable, non-irritant, and may be continuously used for long periods without local disturbance and with entirely adequate nutrition; patients even sometimes increasing in weight.

The artificial digestion of the milk may be carried to the point of complete conversion of the caseine into peptone, or the process may be left to proceed in the alkaline secretion of the rectum. Peptonized Milk *Gruel*—of arrow-root and milk—may be used if preferred, the PEPTONIZING TUBES digesting both starch and milk.

PEPTONIZING TUBES

are sold in boxes at retail for 50 cents, one dozen tubes in a box, each tube peptonizing a pint of milk.

FAIRCHILD BROS. & FOSTER,

82 and 84 FULTON STREET, NEW YORK.

Infantile Atrophy.

"INFANTILE ATROPHY, or the slow wasting which is a familiar symptom in hand-fed babies, is one of the commonest causes of death in early infancy."

"INFANTILE ATROPHY is the consequence of insufficient nourishment. The child wastes because he is starved. But it is not to actual lack of feeding that the starvation is usually to be ascribed. A baby fed from a breast which secretes milk poor in quality and insufficient for the child's support, will, of course, grow slowly thinner; but an infant supplied largely with farinaceous compounds, from which his feeble digestive organs fail to derive even a minimum of nourishment, will waste with startling rapidity."

"Mellin's Food may be used from the first, and is almost always well digested. Farinaceous matters, unless guarded by malt, as in Mellin's Food, should not be given to a child younger than six months."

From "Disease in Children," by Eustace Smith, M. D., F. R. C. P., London, England.

A sample of Mellin's Food, sufficient for trial, will be sent free to any Physician desiring it.

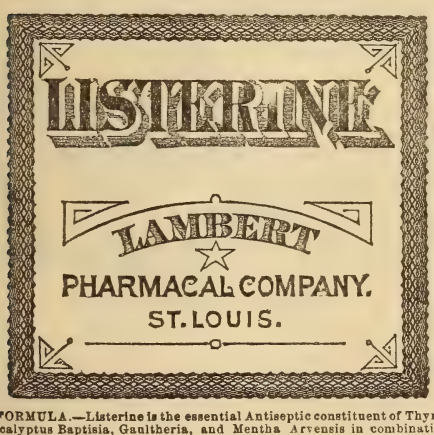
THE BEST
—ANTI-SEPTIC—
For Internal and External Use.



FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

Listerine comes nearer the ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in Surgery, Obstetrics, Gynecology, Leucorrhœa, Gonorrhœa, and all Mucous Membrane Catarrhs; internally in Typhoid and other Fevers, Zymotic Diseases, Diphtheria, Scarlet Fever, Dyspepsia, Dysentery, Diarrhœa, all forms of Cholera, etc., and as a general Prophylactic

THE BEST
—ANTI-LITHIC—
For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is invariably of definite and uniform therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, at once justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Antilithic Agent yet known in the treatment of Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hematuria, Albuminuria, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime. and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

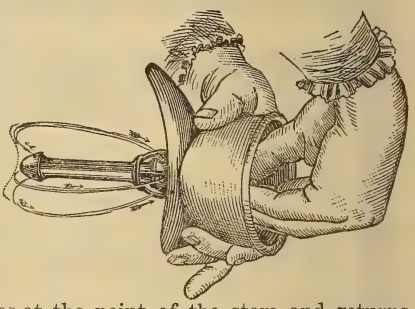
To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

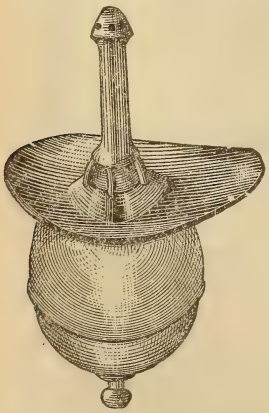
SCOTT & BOWNE, Mfg. Chemists, 132 & 134 S. 5th Ave., N. Y.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.

A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.





CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement — an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* "***Ext. carnis, fl. comp. (Colden's.)***" It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

Carl L. Jensen

Sole Originator of

Pepsin in Scales

OR

"Crystal" Pepsin

2039 Green St.
Philadelphia

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully **CARL L. JENSEN.**

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

DR BUCKLAND'S SCOTCH OATS ESSENCE

NATURE'S NERVE TONIC AND BRAIN FOOD.

Yielding the most remarkable results in both Functional and Organic Diseases of the Brain and Nerves, especially

NEURALGIA,	OPIUM and MORPHINE HABITS,	SPERMATORRHŒA,
INSOMNIA,	INFANTILE PARALYSIS,	TIC DOLOUREUX,
SCIATICA,	NERVOUS DYSPEPSIA,	MELANCHOLIA,
MANIA,	NEURASTHENIA,	IMPOTENCY.

FORMULA.—Avena or Avenesca, the active principle of the Oat (Avena Sativa) obtained by crushing the grain (dried in vac[illegible]) with pure alcohol, skimming off the fatty scum obtained by ether washing, evaporating to dryness, and then dis[illegible] amorphous powder (Avena) with boiling alcohol and flavoring. The dried grain is then treated by maceration and percolation from 96 to 144 hours. The final solution is of a 3⅛ per cent. strength.

☞Most remarkable cures of the OPIUM HABIT.
☞The most active tonic to both male and female SEXUAL ORGANS known.
☞Almost Specific in IMPOTENCY and SPERMATORRHŒA.
☞As a Brain and Nerve Tonic and Restorer of Wasted Energy it is unparalleled.

Put up in 6 oz. bottles. Price, $1.00. For sale in all drug stores.

SCOTCH OATS ESSENCE COMPANY, 174 Fulton Street, New York.

GREEN SPRING SANITARIUM, AND WATER CURE.

For the treatment of all forms of Nervous Diseases, including the Alcohol and Opium habit; also diseases incident to Women, Rheumatism, Skin Diseases and Dyspepsia. Seventy miles west of Cleveland, in a natural grove of ten acres. Sixteen years successful operation. Means and appliances complete. Treatment by baths, electricity and massage, a specialty. One of the largest medicinal springs in America. Elegant apartments. Moderate terms. For particulars address **JOHN S. MARSHALL, M. D., Superintendent, Green Spring, Ohio.**

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

MEDICAL ELECTRICITY.

HORSFORD'S ACID PHOSPHATE,

VS.

DILUTE PHOSPHORIC ACID.

The attention of the profession is respectfully invited to some points of difference between Horsford's Acid Phosphate and the dilute phosphoric acid of the pharmacopœia. Horsford's Acid Phosphate **is a solution of the phosphates of lime, magnesia, potash and iron, in such form as to be readily assimilated by the system,** and containing no pyro- or meta-phosphate of any base whatever. It is not made by compounding phosphoric acid, lime, potash, etc., in the laboratory, but is obtained in the form in which it exists in the animal system. Dilute phosphoric acid is simply phosphoric acid and water, without any base. Experience has shown that while in certain cases dilute phosphoric acid interfered with digestion, Horsford's Acid Phosphate not only caused no trouble with the digestive organs, but promoted in a marked degree their healthful action. Practice has shown in a great variety of cases that it is **a phosphate with an excess of phosphoric acid** that will better meet the requirements of the system than either phosphoric acid or a simple phosphate. "Phosphorus," as such, is not found in the human body, but phosphoric acid in combination with lime, iron and other bases, *i. e.* the phosphates, is found in the bones, blood, brain and muscle. It is the phosphates, and not the simple phosphoric acid, that are found in the urine after severe mental and physical exertions, or during wasting diseases.

We have received a very large number of letters from physicians of the highest standing, in all parts of the country, relating their experience with the Acid Phosphate, and speaking of it in high terms of commendation.

Physicians who have not used Horsford's Acid Phosphate, and who wish to test it, will be furnished a sample on application, without expense, except express charges.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ **Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.**

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

☞ **Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.** ☜

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY.** In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. **WHITE**

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.

A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

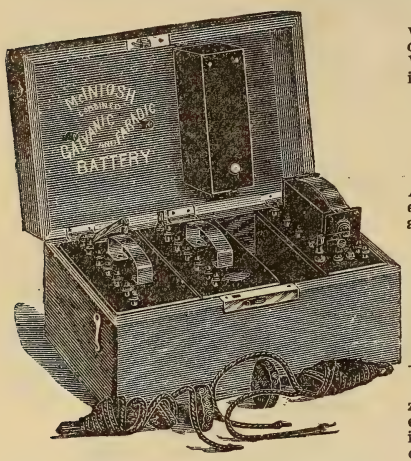
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

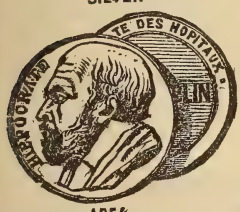
DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessert-spoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER



1854

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER

1854

Adapted and recommended for the cure of recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,

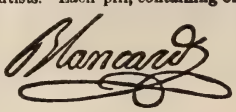
BLANCARD'S PILLS

OF UNCHANGEABLE IODIDE OF IRON.

Blancard's Pills of Iodide of Iron are so scrupulously prepared, and so well made, that none other have acquired a so well deserved favor among physicians and pharmaceutists. Each pill, containing one grain of proto-iodide of iron, is covered with finely pulverized iron, and covered with balsam of tolu. Dose, two to six pills a day. The genuine have a *reactive silver seal* attached to the lower part of the cork, and a green label on the wrapper, bearing the fac-simile of the signature of



Pharmacien, No. 40 Rue Bonaparte, Paris.

Without which none are genuine.

BEWARE OF IMITATIONS.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 3 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on unce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

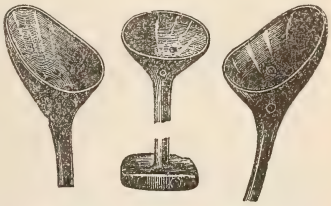
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

LEVIS'S METALLIC SPLINTS.

FLEXIBLE, PERFORATED, NICKEL-PLATED, Conformable to every size and condition of Limbs. VERY LIGHT, INDESTRUCTIBLE, and INEXPENSIVE. The complete set consists of **21 pieces** in a neat, compact case. Full descriptive circulars sent on application. **PRICE, $15.00 Per Set.**

New, Beautiful and Valuable Books.

A TEXT-BOOK OF

OPERATIVE SURGERY AND SURGICAL ANATOMY,

By ARTHUR TREHERN NORTON, F. R. C. S., Etc.

BASED ON THE ORIGINAL WORK OF

PROFS. CLAUDE BERNARD and CH. HUETTE.

SECOND EDITION. Illustrated by 88 full-page plates, drawn from nature, engraved on steel, BEAUTIFULLY COLORED, and many wood cuts. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed post-paid and registered), $12.50.

A TEXT-BOOK OF

NAKED-EYE ANATOMY,

BEING AN ACCOMPANYING TEXT TO MASSE'S PLATES.

By JAMES CANTLIE, A. M., M. D., etc.

THIRD EDITION. Illustrated with 113 full page plates, engraved on steel and BEAUTIFULLY COLORED after nature. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed postpaid and registered), $12.50.

The above works are presented in the highest style of the publishing art, and are not less useful than they are beautiful. Mr. Norton explains all the leading and approved operations of surgery with constant reference to the faithfully colored plates, and his instructions are second only to operations on the cadaver.

The "Naked-eye Anatomy" of Dr. Cantlie, with its numerous tinted engravings, illustrates both the position and contrasting hues of the various organs and tissues. The physician who has not frequent opportunities to practice on the dead subject, will find this volume the best substitute he can obtain for practical dissection.

THE SCIENCE AND PRACTICE OF

SURGERY.

By FREDERICK JAMES GANT, F. R. C. S., etc., etc.

THIRD EDITION. Revised and enlarged throughout. With ONE THOUSAND AND NINETY engravings on wood. In two volumes. Vol. I, pp. xxviii, 1087. Vol. II, pp. xxxv, 1183; large octavo; bound in half Russia, marbled sides and edges. London and Philadelphia, 1886. Price (express prepaid), $12.00.

This monumental work is here offered in the finest London edition, on English paper, and bound in the most handsome and durable style. As a treatise on Surgery it stands at the head of the list of those produced by the best school of English Surgeons, clear, complete and practical.

Remit prices with orders to

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

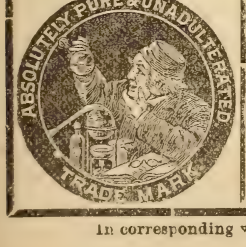
HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

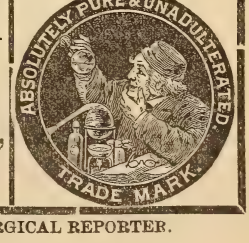
Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.



We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.



BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

Since the introduction—1870—of the substance known as **COSMOLINE** (Unguentum Petrolei) to the College of Pharmacy in Philadelphia, by the late Professor Parrish, who was one of the very first to recognize its merits, it has become very widely known and variously used by the Physicians, Surgeons, and Pharmacists of all schools throughout this country and abroad. Pure Petroleum will not oxidize, but the processes resorted to by many, in order to obtain special products from petroleum, introduce properties that will oxidize in ordinary temperatures, and develop other objections with age. Such products may be used in the arts, but they were decided years ago to be exceedingly irritating and otherwise interfering as surgical dressings or bases for ointments. The Manufacturers of **COSMOLINE** (Unguentum Petrolei) took advantage of the possibility of producing an article which would not only not become rancid, but also one which would be absolutely free from those properties which affected the ordinary residuums and products of the petroleum still. Notwithstanding numerous other petroleum preparations of variable merit and ostensibly for the same purpose, have since been offered, **COSMOLINE** (Unguentum Petrolei) has continued to increase steadily in professional favor. **COSMOLINE** (Unguentum Petrolei) was not recommended to the profession at large until the leading Physicians and Pharmacists of Philadelphia were thoroughly satisfied of its fitness and absolute purity, and since then it has not been changed to meet every speculative fancy, or to compete in price with those preparations of petroleum having some outward resemblance to Cosmoline, but found either deficient in action or positively irritating, owing to chemical agencies used to cheapen the cost of manufacture. It was apparent from its first introduction, that **COSMOLINE** (Unguentum Petrolei) was adapted to a very wide range of uses in Surgery and Pharmacy; and when it was found that its uniformity could invariably be depended upon, it is not surprising that it obtained supremacy over those products which have been varying as commercial experiments, and lacking in all the essential and absolutely pure characteristics needed for a general surgical dressing and base for ointments.

Yours very respectfully,

E. F. HOUGHTON & CO.,

No. 211 South Front St.,

PHILADELPHIA.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The Essential Elements** to the Animal Organization—Potash and Lime;
The **Oxydizing Agents**—Iron and Manganese;
The **Tonics**—Quinine and Strychnine;
And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all Others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Each Bottle of Fellows' Hypophosphites Contains 128 Doses.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars and Samples Sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

"Alone TO BE Recommended."

WHERE MOTHER'S MILK IS INSUFFICIENT,

Nestle's Milk Food is Alone to be Recommended.

"This food is *especially commendable* because the physiological relations of the infantile digestive organs, particularly the lack of notable salivary and pancreatic secretions, are taken into account in its fabrication—the starch contained in it having been transformed into dextrin."--*Prof. Wm. O. Leube, Ziemssen's Clyclopedia, Vol. VII*

We also refer the profession to other eminent writers in the same standard medical work, viz: Prof. Juergensen on Catarrhal Pneumonia, Vol. V. Prof. Senator on the Treatment of Rachitis, Vol. XVI. Prof. Birch-Hirschfeld on Scrofulosis and Affections of the Lymphatic Glands in General, Vol. XVI.

In addition to the above mentioned special features of *Nestlé's Milk Food*, it has a world-wide reputation as a food for infants, producing pure blood, firm flesh, hard muscle and tough bone. It will agree with a larger number of children regardless of age, than *any other substitute* for the mother's milk, and we believe that the general use of this food during the past summer has accomplished more for the diminution of infant mortality from Cholera Infantum than any other means known.

Sample sufficient for trial, and pamphlet by Prof. Lebert, sent on appliaton to

THOMAS LEEMING & CO., 18 College Place, New York City, N. Y.

Smithsonian Institute

Concentrated Palatable Nutrients.

PEPTONIZED EXTRACT OF BEEF.

Contains all the nutritive constituents of beef.

The superiority of this preparation over other extracts of beef depends upon:

1. **The large proportion of albuminoids which it contains.**
2. **The fact that its albuminoid constituents are chiefly in the form of peptones, insuring rapid absorption and ready assimilation.**
3. **Its appetizing flavor.**
4. **Its perfect and ready solubility in water.**

The uses of such a preparation are obvious. It is a concentrated, and at the same time an easily assimilated food, useful in all cases of acute disease where sustaining treatment is indicated, and especially valuable in convalescence, and in chronic conditions of inanition or malnutrition, particularly where the functions of the stomach are not well performed.

One part of the Peptonized Extract of Beef may be said to be the equivalent of eight parts of fresh beef. One teaspoonful (about one-half ounce) will make a pint of excellent beef tea.

A like quantity added to a pint of vegetable soup communicates to it a rich flavor, and converts it into a highly nutritious food.

It may be employed in a still more concentrated form, if desired, but from half an ounce to one ounce of the extract is as much as it is generally advisable to give at one time.

POWDER OF BEEF.

A concentrated food of the highest nutritive value.

It represents in an exceedingly concentrated form the total nutritive value of the beef.

It is tasteless, and can be taken for a longer time than the various extracts of beef, beef juices, etc., without exciting nausea.

It is not only more readily digested and assimilated, but also incomparably easier of administration than other concentrated aliments, and may be added to water, milk, or wine, or beaten up with the yolk of an egg.

Drs. Debove and Dujardin-Beaumetz, of Paris, France, Dr. Lauder Brunton, of London, England, Dr. Henry B. Millard, of New York City, and many others, have given Powder of Beef a most thorough trial, and report that it is a most valuable adjuvant in the treatment of dyspepsia, indigestion, gastritis, ulcer of the stomach, tuberculosis, and in all chronic wasting diseases accompanied by enfeeblement of the digestive and assimilative functions.

PURE POWDERED BONE.

For the treatment of such affections as nervous exhaustion, rickets, and all diseases depending upon a lack of the proper supply of the inorganic elements of the tissues, it is believed that Pure Powdered Bone will be found invaluable.

It has the exact chemical composition required for a true nerve and bone food.

Its mechanical construction is such as to aid digestion to the greatest possible degree.

It is tasteless and odorless.

It is miscible with all ordinary foods in the proportions required, without detection.

It is inexpensive, and therefor adapted for general use.

☞ **Send for descriptive circulars, which will be mailed free on application.**

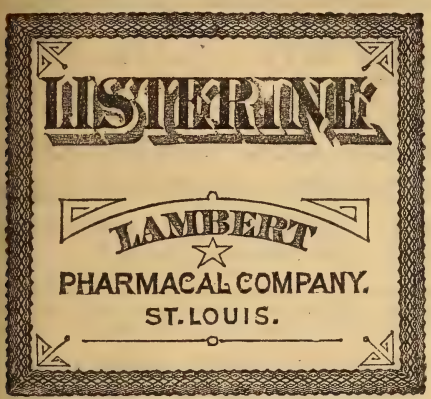
PARKE, DAVIS & CO.,

Manufacturing Chemists,

New York: 60 Maiden Lane, 21 Liberty Street.

DETROIT, MICH.

THE BEST
—ANTI-SEPTIC—
For Internal and External Use.



FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

Listerine comes nearer the Ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in Surgery, Obstetrics, Gynecology, Leucorrhœa, Gonorrhœa, and all Mucous Membrane Catarrhs; internally in Typhoid and other Fevers, Zymotic Diseases, Diphtheria, Scarlet Fever, Dyspepsia, Dysentery, Diarrhœa, all forms of Cholera, etc., and as a general Prophylactic

THE BEST
—ANTI-LITHIC—
For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is invariably of definite and uniform therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, at once justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia, Albuminuria, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE
(HYDRATED OIL,)
For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a modicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

SCOTT'S EMULSION

OF **PURE COD LIVER OIL** WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime, and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

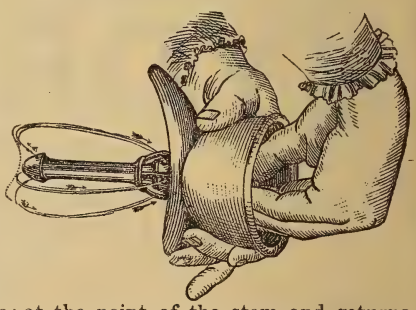
Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

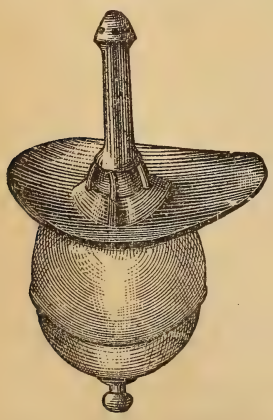
SCOTT & BOWNE, Mfg. Chemists, 132 & 134 S. 5th Ave., N. Y.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.*: ***"Ext. carnis, fl. comp. (Colden's.)"*** It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at 25 cents a cake, or 3 cakes for 60 cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded in **all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

ESTABLISHED 1852.

HYDRASTIS

AND ITS PREPARATIONS.

The WM. S. MERRELL CHEMICAL CO. of Cincinnati—"The largest consumers of Golden Seal Root in the world" (see "Drugs and Medicines of North America")—offer to the medical profession, through the drug trade, the following well-known and highly approved preparations of this leading American drug.

FLUID HYDRASTIS.

A neutral solution of all the active medicinal constituents, forming a perfectly clear solution with alcohol, glycerin, syrup, or water. May be properly and profitably substituted for the Fluid Extract of the U. S. P. in the manufacture of syrup, wine or tincture.

COLORLESS HYDRASTIS.

A neutral solution of the White Alkaloid alone—without color or stain.

SULPHATE HYDRASTIA—CRYSTALLIZED.

[SULPHATE BERBERINA.]

This is the Sulphate of Yellow Alkaloid, which we present in crystals to guard against the substitution of impure and unskillful preparations in a powdered form.

Subsequent to its introduction by us under its present commercial title, this salt was identified as Berberina by Mahla, Durand and others. To avoid confusion with the Alkaloid Bebeerine and its salts, and to fully establish its identity, we continue the name by which it was originally introduced.

SOLUTION BISMUTH AND HYDRASTIA

A neutral solution of the double Citrate of Bismuth and Hydrastia (White Alkaloid); each fluid drachm containing 2½ grains of the double salt.

Represented in New York City by

LEHN & FINK, 128 William Street.

Prices Current and Descriptive Circulars cheerfully supplied. Correspondence invited.

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichs all. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

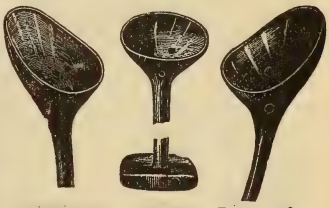
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

LEVIS'S METALLIC SPLINTS.

FLEXIBLE, PERFORATED, NICKEL-PLATED, Conformable to every size and condition of Limbs. **VERY LIGHT, INDESTRUCTIBLE,** and **INEXPENSIVE.** The complete set consists of **21 pieces** in a neat, compact case. Full descriptive circulars sent on application. ☞ **PRICE, $15.00 Per Set.** ☜

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

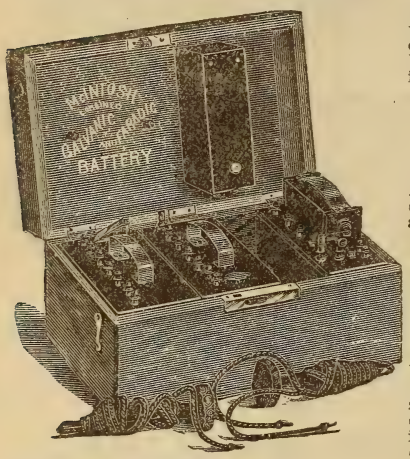
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

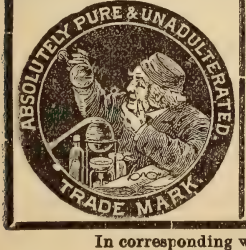
HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.



We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents,** the same neatly packed in a wooden case without mark. Address

GREEN SPRING SANITARIUM,
AND
WATER CURE.

For the treatment of all forms of Nervous Diseases, including the Alcohol and Opium habit; also diseases incident to Women, Rheumatism, Skin Diseases and Dyspepsia. Seventy miles west of Cleveland, in a natural grove of ten acres. Sixteen years successful operation. Means and appliances complete. Treatment by baths, electricity and massage, a specialty. One of the largest medicinal springs in America. Elegant apartments. Moderate terms. For particulars address **JOHN S. MARSHALL, M. D., Superintendent, Green Spring, Ohio.**

After Forty years' experience in the preparation of more than One Hundred Thousand applications for patents in the United States and Foreign countries, the publishers of the Scientific American continue to act as solicitors for patents, caveats, trade-marks, copyrights, etc., for the United States, and to obtain patents in Canada, England, France, Germany, and all other countries. Their experience is unequaled and their facilities are unsurpassed.

Drawings and specifications prepared and filed in the Patent Office on short notice. Terms very reasonable. No charge for examination of models or drawings. Advice by mail free.

Patents obtained through Munn & Co. are noticed in the **SCIENTIFIC AMERICAN**, which has the largest circulation and is the most influential newspaper of its kind published in the world. The advantages of such a notice every patentee understands.

This large and splendidly illustrated newspaper is published **WEEKLY** at $3.00 a year, and is admitted to be the best paper devoted to science, mechanics, inventions, engineering works, and other departments of industrial progress, published in any country. It contains the names of all patentees and title of every invention patented each week. Try it four months for one dollar. Sold by all newsdealers.

If you have an invention to patent write to Munn & Co., publishers of Scientific American, 361 Broadway, New York.

Handbook about patents mailed free.

FOR THE INSANE.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

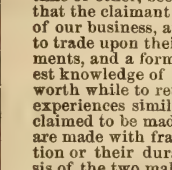
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

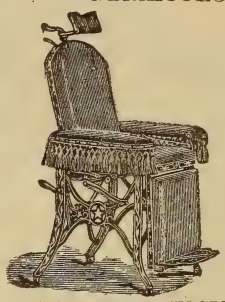
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Drayees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia*, etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

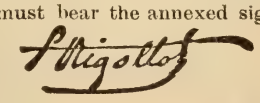
E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.



E. FOUGERA & CO., New York Depositaries.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE, CEREBRAL CONGESTION, HEADACHE, LOSS OF APPETITE, INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.

School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.

Directions to Parents of Deaf Children for their Treatment from Infancy in order that they may learn Speech and Lip Reading, furnished free on application to **MARY S. GARRETT, Principal.**

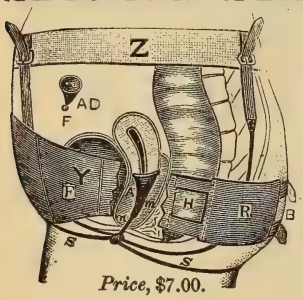
STAUFFER'S
SPRING STEM UTERINE SUPPORTERS.



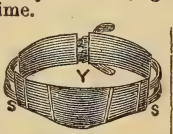
Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.



Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

THE VALUE OF MURDOCK'S LIQUID FOOD IS RECOGNIZED IN ALL COUNTRIES, AND IS ENDORSED BY ALL NATIONAL MEDICAL SOCIETIES THAT HAVE INVESTIGATED ITS VALUE.

There never was an essay read before any Medical Society on Raw Food Extracts, except on Murdock's Liquid Food, and counterfeit manufacturers of Extracts have published many of our essays to show the value of their counterfeits.

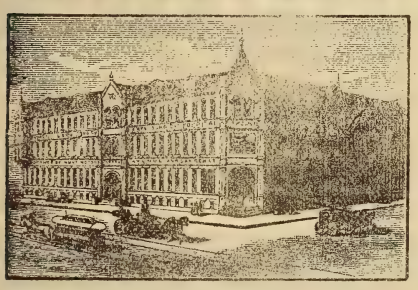
Send for Essay and DISCUSSION before the British Medical Association at Brighton, England, 1886 (Essay), by the Vice-President of the American Medical Association, and others, on the value of MURDOCK'S LIQUID FOOD over all Foods and Extracts known, it being the ONLY Raw Condensed Food free from insoluble matter.

Also essay read before the American Medical Association at Richmond, Va., and Washington, D. C.

Its value was recognized by the profession from results obtained in the Free Hospitals that have been established and supported by our Mr. A. L. Murdock during the last four years.

They now equal

140 FREE BEDS,



And contain 38,000 feet of floor.

Our Liquid Food can be retained by the weakest stomach. Four tablespoonfuls daily will make eight per cent. new blood weekly. When used for infants, never change their food, but add five or more drops of Liquid Food at each feeding, and their lost or needed vitality will be restored in less than thirty days.

Send for the Report of the Chairman of the Section of Obstetrics of the American Institute of Homœopathy, read at Saratoga at the annual meeting of 1886.

Circulars were sent by him to all the Physicians in the United States, asking what their experience was with Murdock's Liquid Food in its use for infants under, as well as over, one year old.

Then what results, with all the different Milk preparations, Grain Foods, Peptonoid Foods, and Beef Extracts, compared with MURDOCK'S LIQUID FOOD.

The returns show that it is the Standard Food and Extract, as the percentage of lives restored was the largest when used.

We extract from the report. After calling attention to the fact that one-quarter of the homœopathic profession are accustomed frequently to prescribe this food for children less than a year old, as well as over, he remarks:

"It is singularly adapted to scrofulous, syphilitic, and tubercula constitutions, its life-restoring power manifesting itself in each with a relative clearness and power corresponding to the order of enumeration. For fair-haired children who are inclined to grow fleshy it is more symptomatically recommended, while Duncan's *acid* babies find it particularly useful. Accordingly, it is chiefly employed for marasmus and anæmic conditions resulting either from non-assimilation of food, or from simple summer complaints. Should a child vomit all milk food and suffer synchronously with diarrhœa or dysentery, the demand for this food is emphatic and unmistakable; also in general irritability of the stomach, particularly if there be sour-smelling diarrhœa, the food passing through undigested. For the prematurely born it stands pre-eminent. For those 'weak and debilitated from any cause. Murdock's Food is probably the best in the world.' Should any indication of cerebral hyperæmia appear, the quantity of food must be diminished; so, too, if after its protracted use vomiting and diarrhœa ensue, the child has been overfed. Should the taste or odor of any given bottle chance to be disagreeable, add water until they disappear, and let the purchaser congratulate himself upon getting more nutriment than he paid for. When given in combination with milk in cases of indigestion, the quantity of milk should be diminished until all curds disappear from the stool, the quantity of Food, of course, being proportionately increased."

The Surgical Staff at MURDOCK'S FREE HOSPITAL FOR WOMEN are in daily attendance, except Saturdays, to examine patients and assign beds.

EVERY BED FREE.

Our Free Surgical Hospital for Women, located on Huntington avenue, above West Chester park, contains fifty (50) beds, in charge of a staff of five surgeons, members of the Massachusetts Medical Society.

Our Free Surgical Hospital for Women, located on Gainsborough street, corner of Huntington avenue, contains 50 beds, in charge of a staff of five surgeons, members of the Massachusetts Homœopathic Medical Society.

Our Free Home for Homeless Boys contains 40 beds, and is located at 11 to 21 Causeway street. Many of these boys suffer from Scrofula, Eczema, and other skin diseases, which yield quickly by the use of our Liquid Food.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor.

All brands are made by the same formula. The letter represents the day of make, and the figure the tank.

If richer, it is stronger in smell and flavor, and will bear a greater reduction. It cannot be reduced so low but it will be superior to all other preparations in treating chronic cases.

If you cannot obtain Murdock's Liquid Food from your druggist, we deliver, free of express, 12 oz. for $1. Any physician that has not used our Liquid Food, we will deliver free to the Boston express 12 oz.

MURDOCK'S LIQUID FOOD CO.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation.

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

Carl L. Jensen

Sole Originator of

Pepsin in Scales

OR

"Crystal" Pepsin

2039 Green St.
Philadelphia

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully

CARL L. JENSEN.

LITTELL'S LIVING AGE.

IN 1887 THE LIVING AGE enters upon its forty-fourth year. It has met with the constant commendation of the leading men and journals of the country, and with uninterrupted success.

A WEEKLY MAGAZINE, it gives fifty-two numbers of sixty-four pages each, or more than Three and a Quarter Thousand double-column octavo pages of reading-matter yearly. It presents in an inexpensive form, considering its great amount of matter, with freshness, owing to its weekly issue, and with a completeness nowhere else attempted,

The best Essays, Reviews, Criticisms, Serial and Short Stories, Sketches of Travel and Discovery, Poetry, Scientific, Biographical, Historical, and Political Information, from the entire body of Foreign Periodical Literature, and from the pens of

The Foremost Living Writers.

The ablest and most cultivated intellects, in every department of Literature, Science, Politics, and Art, find expression in the Periodical Literature of Europe, and especially of Great Britain.

The Living Age, forming four large volumes a year, furnishes from the great and generally inaccessible mass of this literature, the only compilation that, while within the reach of all, is satisfactory in the COMPLETENESS with which it embraces whatever is of immediate interest, or of solid, permanent value.

It is therefore indispensable to every one who wishes to keep pace with the events or intellectual progress of the time, or to cultivate in himself or his family general intelligence and literary taste.

OPINIONS.

"The best of all the serial publications. . It presents all that is best, most interesting, and profitable to be found in the current literature of the day. The reader is kept abreast with the best thought of the age, political, scientific, and literary, while there is just fiction enough interspersed between the more solid papers to be restful and entertaining. To our mind, THE LIVING AGE has no equal, and we cannot see where it could be improved."— *Christian at Work, New York.*

"The aim of the conductors is to give the best and freshest thought of the time; and in this they are succeeding now, as for so many years, to the great satisfaction and profit of a multitude of at once exacting and satisfied readers."— *New-York Evangelist.*

"It contains nearly all the good literature of the time. . There is nothing noteworthy in science, art, literature, biography, philosophy, or religion, that cannot be found in it. . It is a library in itself."— *The Churchman, New York.*

"To have THE LIVING AGE is to hold the keys of the entire world of thought, of scientific investigation, psychological research, critical note, of poetry and romance. . It has never been so bright, so comprehensive, so diversified in interest, as it is to-day."— *Boston Evening Traveller.*

"Every volume attests anew the care and discrimination and catholic taste of its conductors. . Nearly the whole world of authors and writers appear in it in their best moods. . Art, science, and literature find fresh and eloquent expression in its pages, from the pens of the best writers of the day; and the reader is kept well abreast of the current thought of the age."— *Boston Journal.*

"It may be truthfully and cordially said that it never offers a dry or valueless page."— *New-York Tribune.*

"It is edited with great skill and care, and its weekly appearance gives it certain advantages over its monthly rivals."— *Albany Argus.*

"It is one of the publications that intelligent people regard as practically indispensable. From its pages one learns what the world is thinking about. . It is an education in itself, as well as an entertainment."— *Hartford Courant.*

"The American reader who wishes to keep the run of English periodical literature can do so in no other way so thoroughly and cheaply as by taking THE LIVING AGE."— *Springfield Republican.*

"Terribly should we miss its familiar russet garb, its exterior by no means revealing its true inwardness of poetry, history, philosophy, and romance. It is without a peer, with hardly a second."— *Lowell Courier.*

"Through its pages alone, it is possible to be as well informed in current literature as by the perusal of a long list of monthlies."— *Philadelphia Inquirer.*

"A grand repository of the literature of the age. . It has become indispensable."— *New-York Observer.*

"The subscription price is slight in comparison with the mass of the best current literature which it brings with it in its weekly visits. . In fact, a reader needs no more than this one publication to keep him well abreast of English periodical literature."— *Sunday-School Times, Philadelphia.*

"Foremost of the eclectic periodicals."— *New-York World.*

"It is a necessity for those who, with no great amount of time available for literary reading, wish to keep fully abreast with the literature of the day."— *The Interior, Chicago.*

"It furnishes a complete compilation of an indispensable literature."— *Chicago Evening Journal.*

"It enables its readers to keep fully abreast of the best thought and literature of civilization."— *Christian Advocate, Pittsburg.*

"It saves not only time, but money."— *Pacific Churchman, San Francisco.*

"It is absolutely without a rival. . Coming once a week, it gives, while yet fresh, the productions of the foremost writers of the day. . Essay and review, biography, travel, science, fiction, poetry, the best of each and all is here placed within reach. To neglect such an opportunity of keeping pace with the thought of our day, and of laying by a rich store of the best literature, would, it seems to us, be a grave mistake."— *Montreal Gazette.*

"It keeps well up its reputation for being the best periodical in the world."— *Morning Star, Wilmington, N.C.*

PUBLISHED WEEKLY at $8.00 a year, *free of postage.*

☞ **TO NEW SUBSCRIBERS for the year 1887,** remitting before Jan. 1, the weekly numbers of 1886 issued after the receipt of their subscriptions, will be sent *gratis.*

CLUB PRICES FOR THE BEST HOME AND FOREIGN LITERATURE.

["Possessed of LITTELL'S LIVING AGE, and of one or other of our vivacious American monthlies, a subscriber will find himself *in command of the whole situation.*"— *Philadelphia Evening Bulletin.*]

For $10.50, THE LIVING AGE and any one of the *four-dollar* monthly magazines (or *Harper's Weekly* or *Bazar*) will be sent for a year, with postage prepaid on both; or, for $9.50, THE LIVING AGE and the *St. Nicholas*, postpaid.

ADDRESS **LITTELL & CO., 31 Bedford St., Boston.**

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

COSMOLINE

Unguentum Petrolei

Prepared by E.F.Houghton & Co. Philadelphia, U.S.A.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & Co.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & Co.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

CASCARA CORDIAL.

The most Eligible Preparation of Cascara Sagrada

FOR THE TREATMENT OF

Habitual Constipation, Dyspepsia, Hæmorrhoids and Allied Affections

AND THE MOST CONVENIENT AND GENERALLY ACCEPTABLE

Vehicle for the Administration of Nauseous Medicines.

In Habitual Constipation.—The great desideratum in the treatment of chronic constipation has heretofore been a remedy which possessed not only a temporary specific action on the bowels, but which would be followed by no reaction and no repression of secretion, and which would be administered for a sufficient length of time to permit of restoration of normal function; a remedy which would not only alleviate temporarily the existing mal-condition, but permanently remove the cause upon which it depended for its continuance, and thus effect a radical cure. The extensive trial of Cascara Sagrada by physicians of this country and Europe, has shown it to be the drug that most fully meets all these indications. It has been added to the British Pharmacopœia, and its efficacy is attested by all physicians who have given it a trial. Cascara Cordial is prepared to disguise the inherent bitter principle of the drug, and without detracting from its medicinal value, render it acceptable to the most fastidious palate.

As a Vehicle for Nauseous Medicines, Cascara Cordial has become widely known to the profession. It not only effectually disguises the taste of such inherently bitter medicines as Quinine, but on account of its laxative properties, is a most valuable adjuvant or corrigent to any prescription containing drugs, such as iron, the continued administration of which tends to constipate. It will be seen that Cascara Cordial has a wide range of utility as an agreeable laxative excipient.

To Dispel the Acute Effects of Alcohol and Opium Abuse.—From letters received from physicians, we are led to call the attention of the profession to the use of Cascara Cordial by those addicted to the alcohol and opium habits. The headache and gastric irritation following excessive indulgence in alcohol, is avoided by adding a little Cascara Cordial to the alcoholic stimulant taken, or by taking a full dose of the cordial on retiring, after too free indulgence. The severe constipation also often attending indulgence in opium, may be relieved by the systematic administration of Cascara Cordial.

We can not assume the responsibility for any lack of success physicians may meet with in prescribing the many imitations and spurious varieties of Cascara on the market, and would request those wishing a genuine and reliable preparation, to specify P. D. & Co.'s

Manufacturing Chemists,

New York: 60 Maiden Lane. 21 Liberty Street. DETROIT, MICH.

A NEW EMMENAGOGUE.

The following is an abstract from a letter written by one of the most prominent gynæcologists of the country, to another:

"Thus far no perfect emmenagogue has been discovered, but I regard the manganese as the best I have met with. It should be styled a regulator of menstruation rather than a pure emmenagogue, for it is useful in the absence of the menses, irregularity of their recurrence, and even in excess of flow.

"The preparation which I now employ is McKesson & Robbins' pills of the binoxide of manganese. Of this preparation I give two grains three times a day throughout the month and during the period.

"I also employ manganese in chlorosis and anæmia, and I think that by its use I obtain better results than I have heretofore done by iron." (See *Medical Record* of March 6th, page 274.)

Specify McK. & R.'s Pills Manganese Binoxide.

Important additions to McK. & R.'s list of Gelatine Coated Pills:

McK. & R. *Cascara Sagrada* and *Nux Vomica*: Ext. Cas. Sagr. gr. ii; Ext. Nux Vom. gr. 1-5.

McK. & R. Cascara Sagrada, Nux Vomica and Belladonna: Ext. Cas. Sag. gr. ii; Ext. Nucis Vom. gr. 1-8; Ext. Bellad. gr. 1-16.

McK. & R. Hydrobromide of Hyoscin 1-100 gr.

McK. & R. Binoxide of Manganese 2 grs.

McK. & R. Valerianate of Quinine ½, 1, 2, and 3 grs.

McK. & R. Valerianates Iron, Quinine, and Zinc: Ferri Valer., Quin. Valer., Zinci Valer., āā gr. i.

McK. & R. Oleate of Manganese 20 per cent. May be used to advantage when the pills cannot be administered.

Always specify McK. & R's.

COCAINE.

Although only eighteen months have elapsed since Koller's announcement of his discovery of the anæsthetic properties of this alkaloid, Cocaine already ranks among the most important agents of the practitioner. In general and dental surgery, ophthalmology, laryngology and general therapeutics, its value is everywhere attested.

We began its manufacture immediately after the announcement of Dr. Koller, and samples of our product were submitted to many noted specialists for their experiments, and the results were highly gratifying. The demand for our manufacture of the salt, solutions, and oleates, has continued to increase, and we desire to express our sincere thanks to the medical, pharmaceutical, and dental professions for their kind encouragement as shown in their recognition of the merits of our preparations. Our appreciation of this will be shown in our constant efforts to supply all their requirements in chemicals and pharmaceuticals, of a quality worthy of their entire confidence.

Special quotations on Terebene and Cocaine for specified quantities. Very respectfully,

McKESSON & ROBBINS.

TEREBENE.

McKESSON & ROBBINS

WERE THE FIRST IN THIS COUNTRY TO MANUFACTURE THIS VALUABLE REMEDY FOR

Winter Cough, Bronchial and Chest Affections, Flatulency, Acidity, and other forms of Dyspepsia.

It may be used as an inhalation, or taken internally in doses of five or six drops on sugar every four hours, gradually increasing the dose to twenty minims.

Terebene was brought to the notice of the medical profession as far back as 1873, by M. Riban, who read a series of papers on this and similar substances before the Pharmaceutical Society of Paris. It has lately been brought into prominence by Dr. Wm. Murrell, of London, who has given it in over 114 cases; he has also notes of its value in 81 out of 94 cases. Dr. Murrell says that much of the Terebene now being sold may be described as inferior, and to this fact he ascribes some irritating effects noted in a few of his cases.

We would therefore caution the physician in prescribing and the druggist in ordering to, in all cases,

DR BUCKLAND'S SCOTCH OATS ESSENCE

NATURE'S NERVE TONIC AND BRAIN FOOD.

Yielding the most remarkable results in both Functional and Organic Diseases of the Brain and Nerves, especially

NEURALGIA,	OPIUM and MORPHINE HABITS,	SPERMATORRHŒA,
INSOMNIA,	INFANTILE PARALYSIS,	TIC DOLOUREUX,
SCIATICA,	NERVOUS DYSPEPSIA,	MELANCHOLIA,
MANIA,	NEURASTHENIA,	IMPOTENCY.

FORMULA.—Avena or Avenesca, the active principle of the Oat (Avena Sativa) obtained by crushing the grain (dried in vacuo), with pure alcohol, skimming off the fatty scum obtained by ether washing, evaporating to dryness, and then dissolving the amorphous powder (Avena) with boiling alcohol and flavoring. The dried grain is then treated by maceration and percolation from 96 to 144 hours. The final solution is of a 3½ per cent. strength.

☞Most remarkable cures of the OPIUM HABIT.
☞The most active tonic to both male and female SEXUAL ORGANS known.
☞Almost Specific in IMPOTENCY and SPERMATORRHŒA.
☞As a Brain and Nerve Tonic and Restorer of Wasted Energy it is unparalleled.

Put up in 3 oz. bottles. Price, $1.00. For sale in all drug stores.

SCOTCH OATS ESSENCE COMPANY, 174 Fulton Street, New York.

QUEEN & CO.

OCULISTS and Opticians who intrust their orders to us avoid the annoying delays occasioned by inaccuracies both in foci of lenses and dimensions of frames. Our system of filling mail orders insures great promptness in delivery, while our work is acknowledged the best.

Catalogues, prescription blanks, telegraphic code, etc., etc., furnished upon application.

924 Chestnut St., Philadelphia, Pa.

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE
(HYDRATED OIL,)
For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	1/8 Grain.
Distilled Water	35 "	Boric Acid	1/4 "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	1/16 "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

RECTAL ALIMENTATION.

Peptonized Milk the Ideal Substance for Nutritive Enemas.

It would be difficult to conceive of a substance more perfectly adapted for feeding per rectum than thoroughly peptonized milk. It is perfectly absorbable, non-irritant, and may be continuously used for long periods without local disturbance and with entirely adequate nutrition; patients even sometimes increasing in weight.

The artificial digestion of the milk may be carried to the point of complete conversion of the caseine into peptone, or the process may be left to proceed in the alkaline secretion of the rectum. Peptonized Milk *Gruel*—of arrow-root and milk—may be used if preferred, the PEPTONIZING TUBES digesting both starch and milk.

PEPTONIZING TUBES

are sold in boxes at retail for 50 cents, one dozen tubes in a box, each tube peptonizing a pint of milk.

FAIRCHILD BROS. & FOSTER,

82 and 84 FULTON STREET, NEW YORK.

Infantile Atrophy.

"INFANTILE ATROPHY, or the slow wasting which is a familiar symptom in hand-fed babies, is one of the commonest causes of death in early infancy."

"INFANTILE ATROPHY is the consequence of insufficient nourishment. The child wastes because he is starved. But it is not to actual lack of feeding that the starvation is usually to be ascribed. A baby fed from a breast which secretes milk poor in quality and insufficient for the child's support, will, of course, grow slowly thinner; but an infant supplied largely with farinaceous compounds, from which his feeble digestive organs fail to derive even a minimum of nourishment, will waste with startling rapidity."

"Mellin's Food may be used from the first, and is almost always well digested. Farinaceous matters, unless guarded by malt, as in Mellin's Food, should not be given to a child younger than six months."

From "Disease in Children," by Eustace Smith, M. D., F. R. C. P., London, England.

A sample of Mellin's Food, sufficient for trial, will be sent free to any Physician desiring it.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation, IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

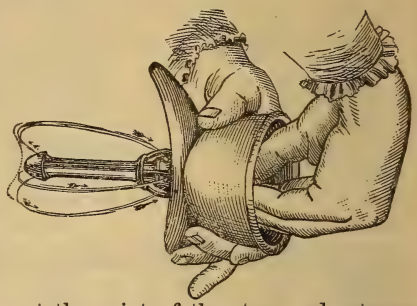
As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

WELLS, RICHARDSON & CO.,

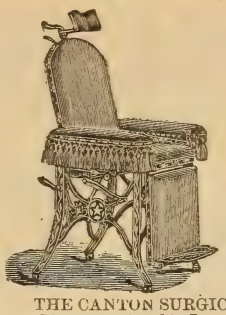
THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS NF

PHILOSOPHICAL ELECTRICAL APPARATUS.

Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

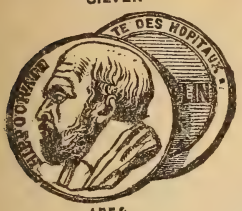
DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessert-spoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER



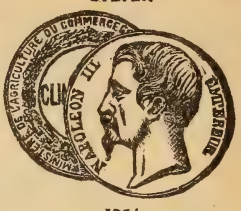
1854

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER



1854

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed. and whose is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 3 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

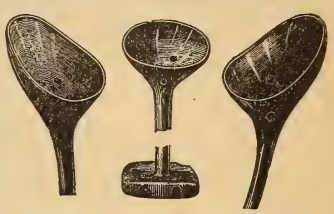
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

LEVIS'S METALLIC SPLINTS.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

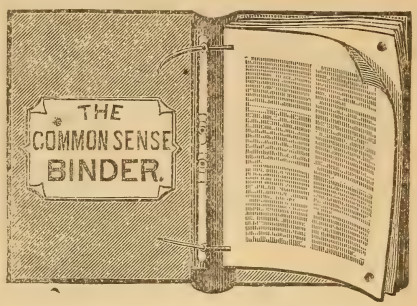
RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

D. G. BRINTON, 115 South Seventh St.

STAUFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and staved with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

LITTELL'S LIVING AGE.

IN 1887 THE LIVING AGE enters upon its forty-fourth year. It has met with the constant commendation of the leading men and journals of the country, and with uninterrupted success.

A WEEKLY MAGAZINE, it gives fifty-two numbers of sixty-four pages each, or more than **Three and a Quarter Thousand** double-column octavo pages of reading-matter yearly. It presents in an inexpensive form, considering its great amount of matter, with freshness, owing to its weekly issue, and with a completeness nowhere else attempted,

The best Essays, Reviews, Criticisms, Serial and Short Stories, Sketches of Travel and Discovery, Poetry, Scientific, Biographical, Historical, and Political Information, from the entire body of Foreign Periodical Literature, and from the pens of

The Foremost Living Writers.

The ablest and most cultivated intellects, in every department of Literature, Science, Politics, and Art, find expression in the Periodical Literature of Europe, and especially of Great Britain.

The Living Age, forming four large volumes a year, furnishes from the great and generally inaccessible mass of this literature, the only compilation that, while within the reach of all, is satisfactory in the COMPLETENESS with which it embraces whatever is of immediate interest, or of solid, permanent value.

It is therefore indispensable to every one who wishes to keep pace with the events or intellectual progress of the time, or to cultivate in himself or his family general intelligence and literary taste.

OPINIONS.

"The best of all the serial publications. . It presents all that is best, most interesting, and profitable to be found in the current literature of the day. The reader is kept abreast with the best thought of the age, political, scientific, and literary, while there is just fiction enough interspersed between the more solid papers to be restful and entertaining. To our mind, THE LIVING AGE has no equal, and we cannot see where it could be improved."—*Christian at Work, New York.*

"The aim of the conductors is to give the best and freshest thought of the time; and in this they are succeeding now, as for so many years, to the great satisfaction and profit of a multitude of at once exacting and satisfied readers."—*New-York Evangelist.*

"It contains nearly all the good literature of the time. . There is nothing noteworthy in science, art, literature, biography, philosophy, or religion, that cannot be found in it. . It is a library in itself."—*The Churchman, New York.*

"To have THE LIVING AGE is to hold the keys of the entire world of thought, of scientific investigation, psychological research, critical note, of poetry and romance. . It has never been so bright, so comprehensive, so diversified in interest, as it is to-day."—*Boston Evening Traveller.*

"Every volume attests anew the care and discrimination and catholic taste of its conductors. . Nearly the whole world of authors and writers appear in it in their best moods. . Art, science, and literature find fresh and eloquent expression in its pages, from the pens of the best writers of the day; and the reader is kept well abreast of the current thought of the age."—*Boston Journal.*

"It may be truthfully and cordially said that it never offers a dry or valueless page."—*New-York Tribune.*

"It is edited with great skill and care, and its weekly appearance gives it certain advantages over its monthly rivals."—*Albany Argus.*

"It is one of the publications that intelligent people regard as practically indispensable. From its pages one learns what the world is thinking about. . It is an education in itself, as well as an entertainment."—*Hartford Courant.*

"The American reader who wishes to keep the run of English periodical literature can do so in no other way so thoroughly and cheaply as by taking THE LIVING AGE."—*Springfield Republican.*

"Terribly should we miss its familiar russet garb, its exterior by no means revealing its true inwardness of poetry, history, philosophy, and romance. It is without a peer, with hardly a second."—*Lowell Courier.*

"Through its pages alone, it is possible to be as well informed in current literature as by the perusal of a long list of monthlies."—*Philadelphia Inquirer.*

"A grand repository of the literature of the age. . It has become indispensable."—*New-York Observer.*

"The subscription price is slight in comparison with the mass of the best current literature which it brings with it in its weekly visits. . In fact, a reader needs no more than this one publication to keep him well abreast of English periodical literature."—*Sunday-School Times, Philadelphia.*

"Foremost of the eclectic periodicals."—*New-York World.*

"It is a necessity for those who, with no great amount of time available for literary reading, wish to keep fully abreast with the literature of the day."—*The Interior, Chicago.*

"It furnishes a complete compilation of an indispensable literature."—*Chicago Evening Journal.*

"It enables its readers to keep fully abreast of the best thought and literature of civilization."—*Christian Advocate, Pittsburg.*

"It saves not only time, but money."—*Pacific Churchman, San Francisco.*

"It is absolutely without a rival. . Coming once a week, it gives, while yet fresh, the productions of the foremost writers of the day. . Essay and review, biography, travel, science, fiction, poetry, the best of each and all is here placed within reach. To neglect such an opportunity of keeping pace with the thought of our day, and of laying by a rich store of the best literature, would, it seems to us, be a grave mistake."—*Montreal Gazette.*

"It keeps well up its reputation for being the best periodical in the world."—*Morning Star, Wilmington, N.C.*

PUBLISHED WEEKLY at $8.00 a year, *free of postage.*

☞ **TO NEW SUBSCRIBERS for the year 1887,** remitting before Jan. 1, the weekly numbers of 1886 issued after the receipt of their subscriptions, will be sent *gratis.*

CLUB PRICES FOR THE BEST HOME AND FOREIGN LITERATURE.

["Possessed of LITTELL'S LIVING AGE, and of one or other of our vivacious American monthlies, a subscriber will find himself *in command of the whole situation.*"—*Philadelphia Evening Bulletin.*]

For $10.50, THE LIVING AGE and any one of the *four-dollar* monthly magazines (or *Harper's Weekly* or *Bazar*) will be sent for a year, with postage prepaid on both; or, for $9.50, THE LIVING AGE and the *St. Nicholas*, postpaid.

ADDRESS **LITTELL & CO., 31 Bedford St., Boston.**

Registered Trade Mark.

COSMOLINE

Unguentum Petrolei

Prepared by E.F.Houghton & Co. Philadelphia, U.S.A.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & Co.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & Co.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

COCA CORDIAL!

A Palatable Preparation of Coca Erythroxylon,

Containing, in an agreeable vehicle, the active medicinal principle, free from the bitter astringent constituents of the drug.

The sedative, tonic, and stimulant effects of coca erythroxylon and its preparations, and their wide application in medical practice, are now too well known to the medical profession to need extended comment.

Coca has been extensively used with gratifying success for the relief of morbid conditions depending on nervous exhaustion, in the nervous irritability following excesses of any kind, in neurasthenia, to facilitate digestion in dyspepsia, to relieve the morbid depression of spirits resulting from exhausting mental labor, in nausea and vomiting of reflex origin, and in the treatment of the alcohol and opium habits.

In a great variety of affections it has proved itself to be a drug ranking in therapeutic importance with opium and quinine.

The Coca Cordial presents the drug in a palatable form, commending it especially to the large class of persons of delicate nervous organization, for whom it is most often indicated.

In its preparation the astringent and bitter constituents of Coca, which are not essential to its medicinal action, have been eliminated, while care has been taken to retain unchanged the active principle cocaine. One fluidounce of the cordial represents 60 grains of coca leaves of good quality, the vehicle employed being an agreeable cordial of a rich vinous flavor.

☞ **We shall be pleased to send on application a circular more fully descriptive of Coca Cordial and its application, and we trust physicians will communicate to us the results of their experience in the use of this preparation, so far as it is likely to be of general interest to the profession.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

NEW YORK:
60 Maiden Lane & 21 Liberty St.

DETROIT, MICH.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

THE BEST

—ANTI-SEPTIC—

For Internal and External Use.

FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzoboracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

LISTERINE comes nearer the ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in SURGERY, OBSTETRICS, GYNECOLOGY, LEUCORRHŒA, GONORRHŒA, and all MUCOUS MEMBRANE CATARRHS; internally in TYPHOID and other FEVERS, ZYMOTIC DISEASES, DIPHTHERIA, SCARLET FEVER, DYSPEPSIA, DYSENTERY, DIARRHŒA, all forms of CHOLERA, etc., and as a general PROPHYLACTIC

THE BEST

—ANTI-LITHIC—

For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, AT ONCE justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Antilithic Agent yet known in the treatment of URINARY CALCULUS, GOUT, RHEUMATISM, BRIGHT'S DISEASE, DIABETES, CYSTITIS, HEMATURIA, ALBUMINURIA, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by Children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime, and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

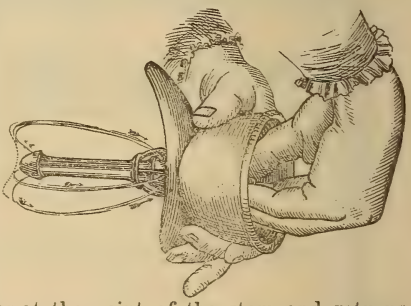
Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

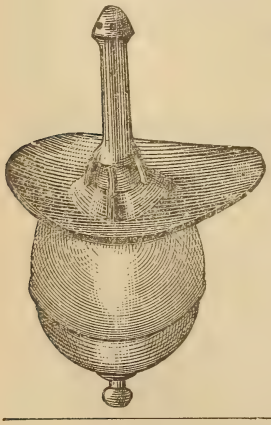
SCOTT & BOWNE, Mfg. Chemists, 132 & 134 S. 5th Ave., N. Y.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* "***Ext. carnis, fl. comp. (Colden's.)***" It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

Philadelphia.

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully **CARL L. JENSEN.**

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichs all. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

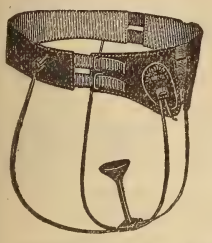
Agents for America, E. FOUGERA & CO., New York.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

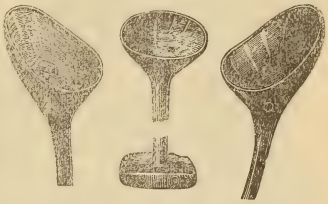
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

LEVIS'S METALLIC SPLINTS.

FLEXIBLE, PERFORATED, NICKEL-PLATED, Conformable to every size and condition of Limbs. VERY LIGHT, INDESTRUCTIBLE, and INEXPENSIVE. The complete set consists of 21 pieces in a neat, compact case. Full descriptive circulars sent on application. PRICE, $15.00 Per Set.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

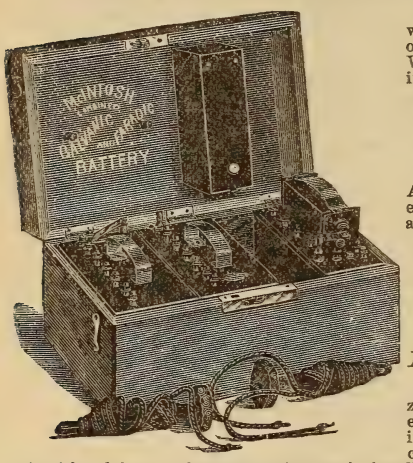
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

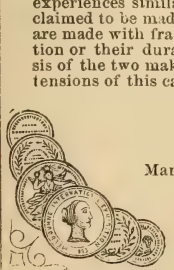
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.

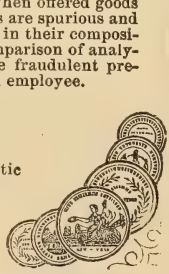


SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.



NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

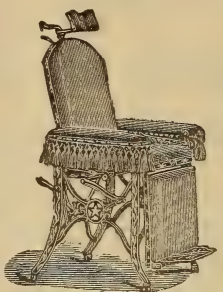
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

DR. RABUTEAU'S

Laureate of the Institute of France

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Drageés, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

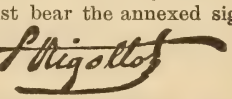
E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.



E. FOUGERA & CO., New York Depositaries.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.

School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.

Directions to Parents of Deaf Children for their Treatment from Infancy in order that they may learn Speech and Lip Reading, furnished free on application to **MARY S. GARRETT, Principal.**

THE VALUE OF MURDOCK'S LIQUID FOOD IS RECOGNIZED IN ALL COUNTRIES, AND IS ENDORSED BY ALL NATIONAL MEDICAL SOCIETIES THAT HAVE INVESTIGATED ITS VALUE.

There never was an essay read before any Medical Society on Raw Food Extracts, except on Murdock's Liquid Food, and counterfeit manufacturers of Extracts have published many of our essays to show the value of their counterfeits.

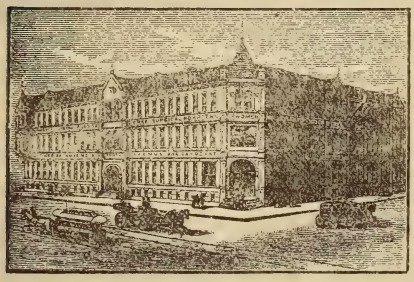
Send for Essay and DISCUSSION before the British Medical Association at Brighton, England, 1886 (Essay), by the Vice-President of the American Medical Association, and others, on the value of MURDOCK'S LIQUID FOOD over all Foods and Extracts known, it being the ONLY Raw Condensed Food free from insoluble matter.

Also essay read before the American Medical Association at Richmond, Va., and Washington, D. C.

Its value was recognized by the profession from results obtained in the Free Hospitals that have been established and supported by our Mr. A. L. Murdock during the last four years.

They now equal

140 FREE BEDS,



And contain 38,000 feet of floor.

Our Liquid Food can be retained by the weakest stomach. Four tablespoonfuls daily will make eight per cent. new blood weekly. When used for infants, never change their food, but add five or more drops of Liquid Food at each feeding, and their lost or needed vitality will be restored in less than thirty days.

Send for the Report of the Chairman of the Section of Obstetrics of the American Institute of Homœopathy, read at Saratoga at the annual meeting of 1886.

Circulars were sent by him to all the Physicians in the United States, asking what their experience was with Murdock's Liquid Food in its use for infants under, as well as over, one year old.

Then what results, with all the different Milk preparations, Grain Foods, Peptonoid Foods, and Beef Extracts, compared with MURDOCK'S LIQUID FOOD.

The returns show that it is the Standard Food and Extract, as the percentage of lives restored was the largest when used.

We extract from the report. After calling attention to the fact that one-quarter of the homœopathic profession are accustomed frequently to prescribe this food for children less than a year old, as well as over, he remarks:

"It is singularly adapted to scrofulous, syphilitic, and tubercular constitutions, its life-restoring power manifesting itself in each with a relative clearness and power corresponding to the order of enumeration. For fair-haired children who are inclined to grow fleshy it is more symptomatically recommended, while Duncan's *acid* babies find it particularly useful. Accordingly, it is chiefly employed for marasmus and anæmic conditions resulting either from non-assimilation of food, or from smple summer complaints. Should a child vomit all milk food and suffer synchronously with diarrhœa or dysentery, the demand for this food is emphatic and unmistakable; also in general irritability of the stomach, particularly if there be sour-smelling diarrhœa, the food passing through undigested. For the prematurely born it stands pre-eminent. For those 'weak and debilitated from any cause, Murdock's Food is probably the best in the world.' Should any indication of cerebral hyperæmia appear, the quantity of food must be diminished; so, too, if after its protracted use vomiting and diarrhœa ensue, the child has been overfed. Should the taste or odor of any given bottle chance to be disagreeable, add water until they disappear, and let the purchaser congratulate himself upon getting more nutriment than he paid for. When given in combination with milk in cases of indigestion, the quantity of milk should be diminished until all curds disappear from the stool, the quantity of Food, of course, being proportionately increased."

The Surgical Staff at MURDOCK'S FREE HOSPITAL FOR WOMEN are in daily attendance, except Saturdays, to examine patients and assign beds.

EVERY BED FREE.

Our Free Surgical Hospital for Women, located on Huntington avenue, above West Chester park, contains fifty (50) beds, in charge of a staff of five surgeons, members of the Massachusetts Medical Society.

Our Free Surgical Hospital for Women, located on Gainsborough street, corner of Huntington avenue, contains 50 beds, in charge of a staff of five surgeons. members of the Massachusetts Homœopathic Medical Society.

Our Free Home for Homeless Boys contains 40 beds, and is located at 11 to 21 Causeway street. Many of these boys suffer from Scrofula, Eczema, and other skin diseases, which yield quickly by the use of our Liquid Food.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor.

All brands are made by the same formula. The letter represents the day of make, and the figure the tank.

If richer, it is stronger in smell and flavor, and will bear a greater reduction. It cannot be reduced so low but it will be superior to all other preparations in treating chronic cases.

If you cannot obtain Murdock's Liquid Food from your druggist, we deliver, free of express, 12 oz. for $1. Any physician that has not used our Liquid Food, we will deliver free to the Boston express 12 oz.

MURDOCK'S LIQUID FOOD CO.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation, IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

☞ Prepared from Manna, Purified Cathartic Acid, and Fruit Juices. ☜

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY,

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

SAMPLES FURNISHED UPON APPLICATION.

PETROLEOL

Is put up in 1-lb., 5-lb., 10-lb., 25-lb., 50-lb. and 100-lb. Cans.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than ANY medicine hitherto used: and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

STAUFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

Prof SF Baird
1445 Mass ave C

New Medicaments for Bronchitis and other Respiratory Affections.

CHEKEN.
(Myrtus Chekan.)

THIS PLANT, indigenous to Chili, was introduced to the profession by Dr. Murrell, the famous English therapeutist and collaborator of Ringer. Dr. Murrell found Cheken to be of great value in chronic cough, especially in the "winter cough" of elderly people.

An extensive trial of this remedy has not only confirmed Dr. Murrell's observations, but has widened the range of the therapeutic application of Cheken so that at the present time it is looked upon, on account of its alterative and demulcent properties, as an indispensable addition to "cough mixtures," particularly in those intractable cases of long standing which have assumed a subacute or chronic course. The dose of the fluid extract which we manufacture is from 1 to 2 fluidrachms.

TEREBENE.

TO DR. MURRELL the profession is indebted for the introduction of another remedy which seems to be almost a specific in winter cough or chronic bronchitis, than which there are few more annoying maladies. Terebene facilitates expectoration, relieves the cough and shortness of breath, and also the acidity and flatulency which so often accompany bronchitis. Dr. Murrell, in *British Med. Journal*, Dec. 12th, 1885, states that he has employed Terebene in 114 cases of winter cough, with the most gratifying results.

We furnish *Terebene Pure; Terebene Inhalant* after Murrell's formula, and *Soluble Elastic Capsules Terebene*, each containing 10 minims.

YERBA SANTA.
(Eriodictyon Californicum.)

YERBA SANTA is a demulcent expectorant in harassing cough. Both in hospital and private practice this remedy has been subjected to a thorough trial, and the reports of its use are unanimous in according it a high place among remedial agents in the treatment of the distressing cough accompanying inflammatory affections of the respiratory mucous membrane. Its action has been likened to the combined action of ipecac and balsam of Peru, but it possesses, in addition, through its resinous principles, an action which is wanting in these valuable drugs in irritative bronchitis.

LIPPIA MEXICANA.

IN ITS native habitat this remedy was long known to possess medicinal virtue in the treatment of coughs. Its popular use led to a scientific investigation of its claims which has resulted in its general introduction to the medical profession, and a clinical test of its merits by physicians has confirmed the popular opinion of its value. Alone or in combination with other remedies, such as Yerba Santa, Cheken, etc., it has been found most serviceable in controlling cough.

Working Bulletins and Circulars fully descriptive of above remedies, together with reprints of Dr. Murrell's articles on winter cough, will be mailed on application.

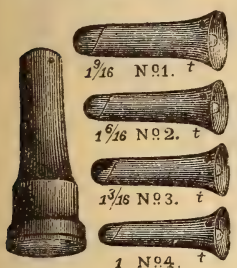
PARKE, DAVIS & CO.,

Manufacturing Chemists,

New York: 60 Maiden Lane, 21 Liberty Street.

DETROIT, MICH.

STAUFER'S
HARD RUBBER SPECULUMS GUARANTEED.



Prices, Single, $2.50
Series encased, 12.00

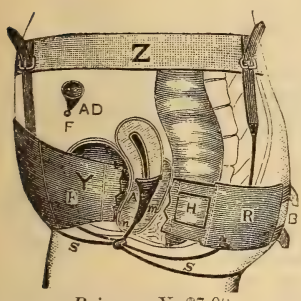
The engraving shows the shape, conductor and case so complete, that scarcely any description is necessary. For compactness there is but one conductor stem, on which each size of bulb screws. Speculums and case are all of the best quality hard rubber, and do not break from ordinary falling. Dental red enamelled inside. The mouth is polished very smooth, and shaped so that the cervix can be brought in entirely by rotation. And when brought in can be rotated to bring into view all the parts. The vaginal portion of the uterus can be seen as clearly as if located externally. When obtained, single, No. 2, is the most useful, since it reveals fully the point of the cervix in almost all multipara, and freely enters, when the position is correct, in many nullipara.

Guarantee.—One or two speculums are guaranteed; thus when returned sound and in the original wooden boxes, within six months of purchase, the money will be refunded without any deduction.

Plates.—The *First* contains 16 engravings and groups of engravings, illustrating the uterine examining instruments. *Second* contains 17 engravings and groups of engravings, il ustrating the uterine replacing and supporting instruments.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

STAUFER'S
SPRING STEM UTERINE SUPPORTERS.
GUARANTEED.



Price, on Y, $7.00
" " Z, 6.00

The engraving shows the Spring Stem Cup, which consists of over a dozen sizes. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Stem Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from abov , or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place, and it is sufficient at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. 30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	½ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	¼ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

HORSFORD'S ACID PHOSPHATE,

(Liquid.)

Prepared according to the directions of Prof. E. N. HORSFORD, of Cambridge, Mass.

FORMULA: Its analysis shows that each fluid drachm contains 5 1-2 grains free Phosphoric Acid (P_2O_5), **and nearly 4 grains Phosphate of Lime, Magnesia, Iron, and Potash.**

Among the numerous forms of Phosphorus in combination, Horsford's Acid Phosphate seems best adapted as a medicinal remedy, and it has been in use by the medical fraternity of the United States and elsewhere for several years, with the most satisfactory results, in

Dyspepsia, Indigestion,

Mental and Physical Exhaustion,

Insomnia, Nervousness,

Diminished Vitality, etc.

Especially serviceable as a menstruum for the administration of such alkaloids as strychnia, morphia, quinia, and other organic bases which are usually exhibited in acid combination.

It Makes a Refreshing and Nutritious Drink in Fevers,

and with water and sugar a delicious beverage.

We have received a very large number of letters from physicians of the highest standing, in all parts of the country, relating their experience with the Acid Phosphate, and speaking of it in high terms of commendation.

Physicians who have not used Horsford's Acid Phosphate, and who wish to test it, will be furnished a sample on application, without expense except express charges.

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	½ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a modicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

THE BEST

—ANTI-SEPTIC—

For Internal and External Use.

FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzoboracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

Listerine comes nearer the ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in Surgery, Obstetrics, Gynecology, Leucorrhœa, Gonorrhœa, and all Mucous Membrane Ovarrhœa; internally in Typhoid and other Fevers, Zymotic Diseases. Diphtheria, Scarlet Fever, Dyspepsia, Dysentery, Diarrhœa, all forms of Cholera, etc., and as a general Prophylactic

THE BEST

—ANTI-LITHIC—

For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is invariably of definite and uniform therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, at once justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia, Albuminuria, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime, and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

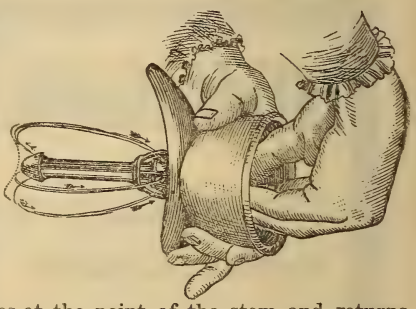
Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

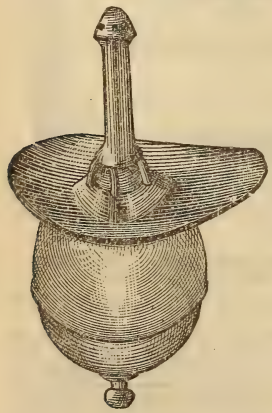
SCOTT & BOWNE, Mfg. Chemists, 132 & 134 S. 5th Ave., N. Y

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* "***Ext. carnis, fl. comp. (Colden's.)***" It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent **free upon application in person or by letter** (enclosing card) to any physician in regular standing in the United States. **C. N. Crittenton, 115 Fulton Street, New York.** Please mention "THE MEDICAL AND SURGICAL REPORTER."

ESTABLISHED 1852.

HYDRASTIS

AND ITS PREPARATIONS.

The WM. S. MERRELL CHEMICAL CO. of Cincinnati—"The largest consumers of Golden Seal Root in the world" (see "Drugs and Medicines of North America")—offer to the medical profession, through the drug trade, the following well-known and highly approved preparations of this leading American drug.

FLUID HYDRASTIS.

A neutral solution of all the active medicinal constituents, forming a perfectly clear solution with alcohol, glycerin, syrup, or water. May be properly and profitably substituted for the Fluid Extract of the U. S. P. in the manufacture of syrup, wine or tincture.

COLORLESS HYDRASTIS.

A neutral solution of the White Alkaloid alone—without color or stain.

SULPHATE HYDRASTIA—CRYSTALLIZED.

[SULPHATE BERBERINA.]

This is the Sulphate of Yellow Alkaloid, which we present in crystals to guard against the substitution of impure and unskillful preparations in a powdered form.

Subsequent to its introduction by us under its present commercial title, this salt was identified as Berberina by Mahla, Durand and others. To avoid confusion with the Alkaloid Bebeerine and its salts, and to fully establish its identity, we continue the name by which it was originally introduced.

SOLUTION BISMUTH AND HYDRASTIA

A neutral solution of the double Citrate of Bismuth and Hydrastia (White Alkaloid); each fluid drachm containing 2½ grains of the double salt.

Represented in New York City by

LEHN & FINK, 128 William Street.

Prices Current and Descriptive Circulars cheerfully supplied. Correspondence invited.

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichs all. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

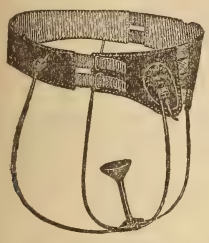
Agents for America, E. FOUGERA & CO., New York.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

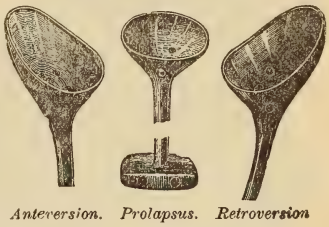
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

LEVIS'S METALLIC SPLINTS.

FLEXIBLE, PERFORATED, NICKEL-PLATED, Conformable to every size and condition of Limbs. VERY LIGHT, INDESTRUCTIBLE, and INEXPENSIVE. The complete set consists of **21 pieces** in a neat, compact case. Full descriptive circulars sent on application. ☞ **PRICE, $15.00 Per Set.** ☜

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

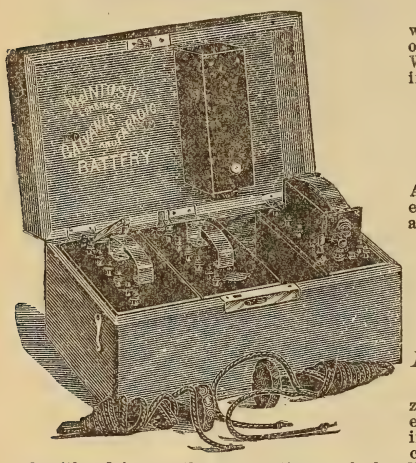
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_2 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."

"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

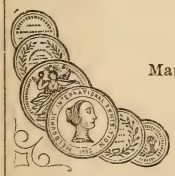
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the official formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was ur "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*

Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

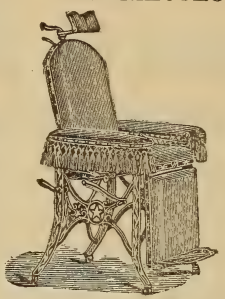
AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

THE CANTON SURGICAL CHAIR CO., CANTON, OHIO.

UNIVERSITY OF PENNSYLVANIA.

MEDICAL DEPARTMENT—PHILADELPHIA.

PROFESSORS: Joseph Leidy, R. A. F. Penrose, D. Hayes Agnew, William Pepper, William Goodell, James Tyson, H. C. Wood, Theo. G. Wormley, John Ashhurst, jr., William Osler, Edw. T. Reichart, Wm. F. Norris, Geo. Strawbridge, Louis A. Duhring, Louis Starr, Edw. T. Bruen.

The 121st Annual Winter Session will commence Friday October 1, 1886, and continue 7 months.

The Preliminary Course will begin Wednesday, Sept. 15th.

Graded Curriculum.—Three Winter Sessions required. Voluntary fourth year.

Practical Instruction in all departments.

For particulars see catalogue, for which address

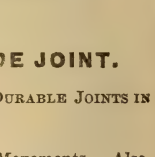
JAMES TYSON, M. D., Sec'y.

PHYSICIANS and all who own horses too valuable to leave on the street without hitching, should use Dr. S. BIRDSALL'S Patent "SECURITY HITCHING STRAP," manufactured exclusively by KING & Co., wholesale harness manufacturers, Owego, N. Y. It supplies a long felt want. Secure, convenient, durable, and neat in appearance. Far superior to any other strap or rope hitching device. Russet and black leather. State which you prefer. Price, $1.00 by express, $1.25 by mail. Stamps received. Satisfaction guaranteed. Send to KING & CO.

HARNESS. Hand Made. Best Oak Leather, $8.50, $10, $12, $13.50, $15. Double Sets, $20, $25, $30. Shipped subject to approval. 40-PAGE CATALOGUE free. *Order one.* **KING & CO.,** Wholesale Manufacturers, **Owego, N. Y.**

Improved Artificial Limbs.

NEW PATENT



UNIVERSAL ANKLE JOINT.

NEW PATENT

ADJUSTABLE KNEE SIDE JOINT.

THESE ARE THE MOST PERFECT AND DURABLE JOINTS IN USE.

Arms with Finger, Wrist, and Elbow Movements. Also, extension apparatuses for shortened limbs. Illustrated catalogue free. Address C. A. FREES,

766 Broadway, New York.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compt-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

J. Rigollot

A NEW FEATURE IN BARRY'S CLINICAL THERMOMETER.
AN INDELIBLE BLACK THAT WON'T RUB OUT.

PRICE, IN POCKET CASE, $1.50.

They are well seasoned before finished, and are positively correct instruments. They will rest on their flat back, and breakage from rolling is lessened. They are sufficiently magnifying to be easily seen by any practitioner. They are endorsed by the medical profession and press everywhere. **Beware of imitations. Please see that his name and date of patent be on each thermometer. JOHN BARRY, Patentee and Maker, 62 Fulton street, New York.** For sale by all responsible houses, or by the maker. Please mention the M. & S. REPORTER.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.

School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.

Directions to Parents of Deaf Children for their Treatment from Infancy in order that they may learn Speech and Lip Reading, furnished free on application to **MARY S. GARRETT, Principal.**

THE VALUE OF MURDOCK'S LIQUID FOOD IS RECOGNIZED IN ALL COUNTRIES, AND IS ENDORSED BY ALL NATIONAL MEDICAL SOCIETIES THAT HAVE INVESTIGATED ITS VALUE.

There never was an essay read before any Medical Society on Raw Food Extracts, except on Murdock's Liquid Food, and counterfeit manufacturers of Extracts have published many of our essays to show the value of their counterfeits.

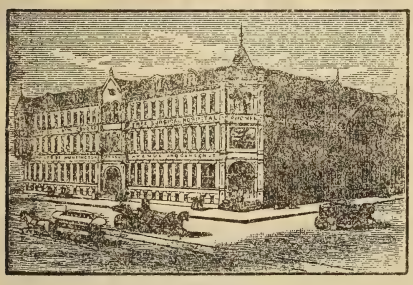
Send for Essay and DISCUSSION before the British Medical Association at Brighton, England, 1886 (Essay), by the Vice-President of the American Medical Association, and others, on the value of MURDOCK'S LIQUID FOOD over all Foods and Extracts known, it being the ONLY Raw Condensed Food free from insoluble matter.

Also essay read before the American Medical Association at Richmond, Va., and Washington, D. C.

Its value was recognized by the profession from results obtained in the Free Hospitals that have been established and supported by our Mr. A. L. Murdock during the last four years.

They now equal

140 FREE BEDS,



And contain 38,000 feet of floor.

Our Liquid Food can be retained by the weakest stomach. Four tablespoonfuls daily will make eight per cent. new blood weekly. When used for infants, never change their food, but add five or more drops of Liquid Food at each feeding, and their lost or needed vitality will be restored in less than thirty days.

Send for the Report of the Chairman of the Section of Obstetrics of the American Institute of Homœopathy, read at Saratoga at the annual meeting of 1886.

Circulars were sent by him to all the Physicians in the United States, asking what their experience was with Murdock's Liquid Food in its use for infants under, as well as over, one year old.

Then what results, with all the different Milk preparations, Grain Foods, Peptonoid Foods, and Beef Extracts, compared with MURDOCK'S LIQUID FOOD.

The returns show that it is the Standard Food and Extract, as the percentage of lives restored was the largest when used.

We extract from the report. After calling attention to the fact that one-quarter of the homœopathic profession are accustomed frequently to prescribe this food for children less than a year old, as well as over, he remarks:

"It is singularly adapted to scrofulous, syphilitic, and tubercula constitutions, its life-restoring power manifesting itself in each with a relative clearness and power corresponding to the order of enumeration. For fair-haired children who are inclined to grow fleshy it is more symptomatically recommended, while Duncan's *acid* babies find it particularly useful. Accordingly, it is chiefly employed for marasmus and anæmic conditions resulting either from non-assimilation of food, or from simple summer complaints. Should a child vomit all milk food and suffer synchronously with diarrhœa or dysentery, the demand for this food is emphatic and unmistakable; also in general irritability of the stomach, particularly if there be sour-smelling diarrhœa, the food passing through undigested. For the prematurely born it stands pre-eminent. For those 'weak and debilitated from any cause, Murdock's Food is probably the best in the world.' Should any indication of cerebral hyperæmia appear, the quantity of food must be diminished; so, too, if after its protracted use vomiting and diarrhœa ensue, the child has been overfed. Should the taste or odor of any given bottle chance to be disagreeable, add water until they disappear, and let the purchaser congratulate himself upon getting more nutriment than he paid for. When given in combination with milk in cases of indigestion, the quantity of milk should be diminished until all curds disappear from the stool, the quantity of Food, of course, being proportionately increased."

The Surgical Staff at MURDOCK'S FREE HOSPITAL FOR WOMEN are in daily attendance, except Saturdays, to examine patients and assign beds.

EVERY BED FREE.

Our Free Surgical Hospital for Women, located on Huntington avenue, above West Chester park, contains fifty (50) beds, in charge of a staff of five surgeons, members of the Massachusetts Medical Society.

Our Free Surgical Hospital for Women, located on Gainsborough street, corner of Huntington avenue, contains 50 beds, in charge of a staff of five surgeons, members of the Massachusetts Homœopathic Medical Society.

Our Free Home for Homeless Boys contains 40 beds, and is located at 11 to 21 Causeway street. Many of these boys suffer from Scrofula, Eczema, and other skin diseases, which yield quickly by the use of our Liquid Food.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor.

All brands are made by the same formula. The letter represents the day of make, and the figure the tank.

If richer, it is stronger in smell and flavor, and will bear a greater reduction. It cannot be reduced so low but it will be superior to all other preparations in treating chronic cases.

If you cannot obtain Murdock's Liquid Food from your druggist we deliver, free of express, 12 oz. for $1. Any physician that has not used our Liquid Food, we will deliver free to the Boston express 12 oz.

MURDOCK'S LIQUID FOOD CO.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & Co.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & Co.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

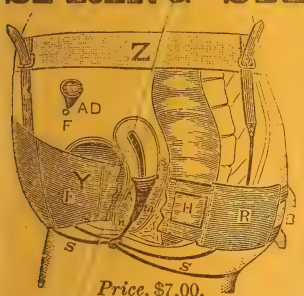
"Dr. McArthur is not only a good chemist and physiologist; he is, above all a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

STAUFFER'S
SPRING STEM UTERINE SUPPORTERS.

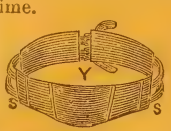


Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.



Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

Smithsonian Institute

CASCARA CORDIAL.

The most Eligible Preparation of Cascara Sagrada

FOR THE TREATMENT OF

Habitual Constipation, Dyspepsia, Hæmorrhoids and Allied Affections

AND THE MOST CONVENIENT AND GENERALLY ACCEPTABLE

Vehicle for the Administration of Nauseous Medicines.

In Habitual Constipation.—The great desideratum in the treatment of chronic constipation has heretofore been a remedy which possessed not only a temporary specific action on the bowels, but which would be followed by no reaction and no repression of secretion, and which would be administered for a sufficient length of time to permit of restoration of normal function; a remedy which would not only alleviate temporarily the existing mal-condition, but permanently remove the cause upon which it depended for its continuance, and thus effect a radical cure. The extensive trial of Cascara Sagrada by physicians of this country and Europe, has shown it to be the drug that most fully meets all these indications. It has been added to the British Pharmacopœia, and its efficacy is attested by all physicians who have given it a trial. Cascara Cordial is prepared to disguise the inherent bitter principle of the drug, and without detracting from its medicinal value, render it acceptable to the most fastidious palate.

As a Vehicle for Nauseous Medicines, Cascara Cordial has become widely known to the profession. It not only effectually disguises the taste of such inherently bitter medicines as Quinine, but on account of its laxative properties, is a most valuable adjuvant or corrigent to any prescription containing drugs, such as iron, the continued administration of which tends to constipate. It will be seen that Cascara Cordial has a wide range of utility as an agreeable laxative excipient.

To Dispel the Acute Effects of Alcohol and Opium Abuse.—From letters received from physicians, we are led to call the attention of the profession to the use of Cascara Cordial by those addicted to the alcohol and opium habits. The headache and gastric irritation following excessive indulgence in alcohol, is avoided by adding a little Cascara Cordial to the alcoholic stimulant taken, or by taking a full dose of the cordial on retiring, after too free indulgence. The severe constipation also often attending indulgence in opium, may be relieved by the systematic administration of Cascara Cordial.

We can not assume the responsibility for any lack of success physicians may meet with in prescribing the many imitations and spurious varieties of Cascara on the market, and would request those wishing a genuine and reliable preparation, to specify P. D. & Co.'s

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes. DR. M. E. ARENDT,

Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,

Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,

President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY.** In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

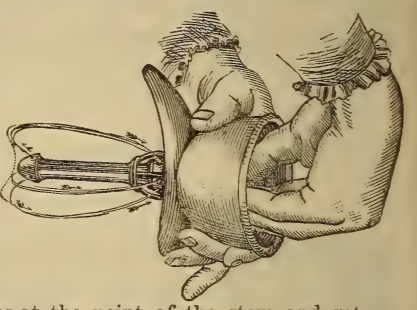
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

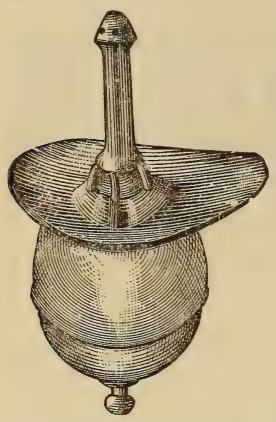
Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886-87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

Professor of Materia Medica and Therapeutics.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D. D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D. D. S.,
Demonstrator of Operative Dentistry.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

For Catalogues and other information apply to Dr. F. J. S. GORGAS, Dean, 259 Eutaw Street, Baltimore.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

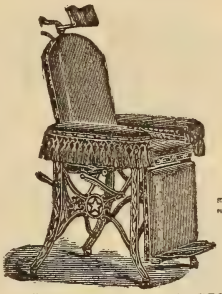
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

BALTIMORE MEDICAL COLLEGE,

BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,

S. E. Cor. Eutaw and Hoffman Sts., Baltimore, Maryland.

UNIVERSITY OF PENNSYLVANIA.

MEDICAL DEPARTMENT—PHILADELPHIA.

PROFESSORS: Joseph Leidy, R. A. F. Penrose, D. Hayes Agnew, William Pepper, William Goodell, James Tyson, H. C. Wood, Theo. G. Wormley, John Ashhurst, jr., William Osler, Edw. T. Reichart, Wm. F. Norris, Geo. Strawbridge, Louis A. Duhring, Louis Starr, Edw. T. Bruen.

The 121st Annual Winter Session will commence Friday October 1, 1886, and continue 7 months.

The Preliminary Course will begin Wednesday, Sept. 15th.

Graded Curriculum.—Three Winter Sessions required. Voluntary fourth year.

Practical Instruction in all departments.

For particulars see catalogue, for which address

JAMES TYSON, M. D., Sec'y.

PHYSICIANS who own good horses should use **The Security Hitching Strap** (for hitching upon the street). It is secure, convenient, neat and durable. Holds by the bit and by the neck. No strain on the bridle. S. Birdsall, M. D., Member Med. Soc. State of Pa., Patentee.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

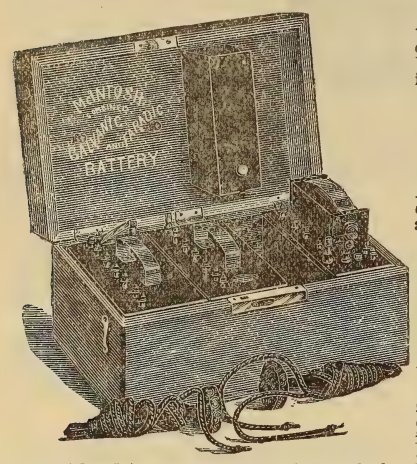
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_2 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER

1854

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER

1854

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM,
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 8 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on unce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

A NEW FEATURE IN BARRY'S CLINICAL THERMOMETER.
AN INDELIBLE BLACK THAT WON'T RUB OUT.

PRICE, IN POCKET CASE, $1.50.

They are well seasoned before finished, and are positively correct instruments. They will rest on their flat back, and breakage from rolling is lessened. They are sufficiently magnifying to be easily seen by any practitioner. They are endorsed by the medical profession and press everywhere. **Beware of imitations. TRUSSES

The World's Recognition of Merit.
London—1881—Announcement.

At the late INTERNATIONAL MEDICAL AND SANITARY EXHIBITION, the World's most competent Judges recognized their *unequalled excellence* by granting the

ONLY "AWARD OF MERIT" FOR TRUSSES
"TO I. B. SEELEY, PHILADELPHIA, U. S. A."
(Over Sixty-Eight Competitors,)—confirming their high favor with America's most distinguished Surgeons.

EXHIBITION JUDGES FROM THE ROYAL COLLEGE OF SURGEONS:—
Thomas Bryant, F. R. C. S., Christopher Heath, F. R. C. S., Thomas Smith, F. R. C. S., John Wood, F. R. S., F. R. C. S.

SEELEY'S HARD-RUBBER TRUSSES.

Fig. 1.

Fig 5.

Fine Steel Springs, neatly covered with highly-polished Hard Rubber. Made in every desirable pattern, with Pads anatomically constructed. Light, cool, cleanly, durable; unequalled in quality, finish, and practical construction. Unaffected by time, use or climate; used in bathing. **Always Reliable. Prices reduced** to meet the popular demands. Sold by all leading Druggists and Dealers at the usual price of common Trusses.

For information regarding Difficult or Complicated Cases, address **I. B. SEELEY & CO., Philada., Pa.**
1347 Chestnut St., Philada., U.S.A. } ESTABLISHMENTS { 74 Fleet St., London, Eng.
Under Patronage of the World's most Eminent Surgeons.

The Correct and Skilful Mechanical Treatment of **HERNIA OR RUPTURE A SPECIALTY.** See GROSS'S Revised Edition and AGNEW'S Late Surgery. REFERENCES:—*Profs. S. D. Gross, D. Hayes Agnew, Willard Parker, W. H. Pancoast, Dr. Thomas G. Morton, and others.*

CAUTION NOTICE.—To guard against the various imitations offered under our trade-mark, "HARD RUBBER TRUSS," granted under Act of Congress, March 3, 1881, and made only to sell on the reputation acquired by our goods during the past 25 years, purchasers should see that each truss is stamped, spring and strap, "I. B. SEELEY, WARRANTED."

IMPORTANT TO PHYSICIANS.
To those not having GROSS'S REVISED or AGNEW'S LATE SURGERY, in which are shown many of our trusses, we will mail, upon application, our 78 page Catalogue, descriptive of Trusses, Hernia, and its Mechanical Treatment.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

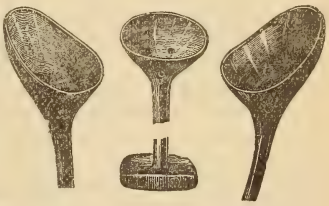
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

New, Beautiful and Valuable Books.

A TEXT-BOOK OF

OPERATIVE SURGERY AND SURGICAL ANATOMY,

By ARTHUR TREHERN NORTON, F. R. C. S., Etc.

BASED ON THE ORIGINAL WORK OF

PROFS. CLAUDE BERNARD and CH. HUETTE.

SECOND EDITION. Illustrated by 88 full-page plates, drawn from nature, engraved on steel, BEAUTIFULLY COLORED, and many wood cuts. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed post-paid and registered), $12.50.

A TEXT-BOOK OF

NAKED-EYE ANATOMY,

BEING AN ACCOMPANYING TEXT TO MASSE'S PLATES.

By JAMES CANTLIE, A. M., M. D., etc.

THIRD EDITION. Illustrated with 113 full page plates, engraved on steel and BEAUTIFULLY COLORED after nature. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed postpaid and registered), $12.50.

The above works are presented in the highest style of the publishing art, and are not less useful than they are beautiful. Mr. Norton explains all the leading and approved operations of surgery with constant reference to the faithfully colored plates, and his instructions are second only to operations on the cadaver.

The "Naked-eye Anatomy" of Dr. Cantlie, with its numerous tinted engravings, illustrates both the position and contrasting hues of the various organs and tissues. The physician who has not frequent opportunities to practice on the dead subject, will find this volume the best substitute he can obtain for practical dissection.

THE SCIENCE AND PRACTICE OF

SURGERY.

By FREDERICK JAMES GANT, F. R. C. S., etc., etc.

THIRD EDITION. Revised and enlarged throughout. With ONE THOUSAND AND NINETY engravings on wood. In two volumes. Vol. I, pp. xxviii, 1087. Vol. II, pp. xxxv, 1183; large octavo; bound in half Russia, marbled sides and edges. London and Philadelphia, 1886. Price (express prepaid), $12.00.

This monumental work is here offered in the finest London edition, on English paper, and bound in the most handsome and durable style. As a treatise on Surgery it stands at the head of the list of those produced by the best school of English Surgeons, clear, complete and practical.

Remit prices with orders to

D. G. BRINTON, M. D., Publisher,

115 South Seventh St., Philadelphia.

Since the introduction—1870—of the substance known as **COSMOLINE** (Unguentum Petrolei) to the College of Pharmacy in Philadelphia, by the late Professor Parrish, who was one of the very first to recognize its merits, it has become very widely known and variously used by the Physicians, Surgeons, and Pharmacists of all schools throughout this country and abroad. Pure Petroleum will not oxidize, but the processes resorted to by many, in order to obtain special products from petroleum, introduce properties that will oxidize in ordinary temperatures, and develop other objections with age. Such products may be used in the arts, but they were decided years ago to be exceedingly irritating and otherwise interfering as surgical dressings or bases for ointments. The Manufacturers of **COSMOLINE** (Unguentum Petrolei) took advantage of the possibility of producing an article which would not only not become rancid, but also one which would be absolutely free from those properties which affected the ordinary residuums and products of the petroleum still. Notwithstanding numerous other petroleum preparations of variable merit and ostensibly for the same purpose, have since been offered, **COSMOLINE** (Unguentum Petrolei) has continued to increase steadily in professional favor. **COSMOLINE** (Unguentum Petrolei) was not recommended to the profession at large until the leading Physicians and Pharmacists of Philadelphia were thoroughly satisfied of its fitness and absolute purity, and since then it has not been changed to meet every speculative fancy, or to compete in price with those preparations of petroleum having some outward resemblance to Cosmoline, but found either deficient in action or positively irritating, owing to chemical agencies used to cheapen the cost of manufacture. It was apparent from its first introduction, that **COSMOLINE** (Unguentum Petrolei) was adapted to a very wide range of uses in Surgery and Pharmacy; and when it was found that its uniformity could invariably be depended upon, it is not surprising that it obtained supremacy over those products which have been varying as commercial experiments, and lacking in all the essential and absolutely pure characteristics needed for a general surgical dressing and base for ointments.

Yours very respectfully,

E. F. HOUGHTON & CO.,

No. 211 South Front St.,

PHILADELPHIA.

SOLUBLE COMPRESSED HYPODERMIC TABLETS.

ALL OF OUR HYPODERMIC TABLETS COMPRESSED WITHOUT FOREIGN ADMIXTURE, EXCEPT WHEN THE BULK OF THE MEDICAMENT IS LESS THAN 1-12 OF A GRAIN.

RECENT IMPROVEMENTS IN OUR HYPODERMIC COMPRESSING MACHINES, ENABLE US NOW TO MANUFACTURE THESE TABLETS ENTIRELY FREE FROM ANY FOREIGN MATERIAL, THUS INSURING IMMEDIATE SOLUTION AND FREEDOM FROM ALL POSSIBILITY OF LOCAL IRRITATION. WE FORMERLY USED SULPHATE OF SODA, A NEUTRAL SALT, BUT WE LEARN THAT OTHER MANUFACTURERS USE SUGAR, A MOST OBJECTIONABLE AND IRRITATING AGENT, WHEN INJECTED SUBCUTANEOUSLY.

The Model Vaccine Propagating Establishment of the United States.

BOVINE VIRUS.

We take pleasure in advising Physicians and Druggists, that we have recently organized a VACCINE PROPAGATING ESTABLISHMENT in Chester County, on a very extensive scale, and are now prepared to furnish bovine virus of the highest quality, from Lymph obtained for us by Dr. Chas. E. Sajous, of this city, from the Belgian Government Bureau of Vaccination, and School of Veterinary Medicine, having assured ourselves after an extended inquiry, that the best virus was cultivated in Belgium.

An exhaustive pamphlet on Bovine Virus, its production and preservation, with a comparison of the respective merits of Bovine and Humanized Lymph, containing, also, a description of our Vaccine Farm, will be sent by mail to those who desire it.

Our points will remain active for three weeks, if kept in a cool dry place, after which time they should not be used. We will guarantee 90 per cent. of satisfactory results in primary cases, and will replace with other virus all vaccine points to the above amount which fail in primary vaccinations, when used within the time mentioned above, but not if used after that lapse of time.

Price, per Tube (ten points), - - - - *$1.00*

WILL BE SENT BY MAIL ON RECEIPT OF THE ABOVE AMOUNT.

JOHN WYETH & BROTHER,

PHILADELPHIA.

COCA CORDIAL!

A Palatable Preparation of Coca Erythroxylon,

Containing, in an agreeable vehicle, the active medicinal principle, free from the bitter astringent constituents of the drug.

The sedative, tonic, and stimulant effects of coca erythroxylon and its preparations, and their wide application in medical practice, are now too well known to the medical profession to need extended comment.

Coca has been extensively used with gratifying success for the relief of morbid conditions depending on nervous exhaustion, in the nervous irritability following excesses of any kind, in neurasthenia, to facilitate digestion in dyspepsia, to relieve the morbid depression of spirits resulting from exhausting mental labor, in nausea and vomiting of reflex origin, and in the treatment of the alcohol and opium habits.

In a great variety of affections it has proved itself to be a drug ranking in therapeutic importance with opium and quinine.

The Coca Cordial presents the drug in a palatable form, commending it especially to the large class of persons of delicate nervous organization, for whom it is most often indicated.

In its preparation the astringent and bitter constituents of Coca, which are not essential to its medicinal action, have been eliminated, while care has been taken to retain unchanged the active principle cocaine. One fluidounce of the cordial represents 60 grains of coca leaves of good quality, the vehicle employed being an agreeable cordial of a rich vinous flavor.

☞ **We shall be pleased to send on application a circular more fully descriptive of Coca Cordial and its application, and we trust physicians will communicate to us the results of their experience in the use of this preparation, so far as it is likely to be of general interest to the profession.**

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichs all. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

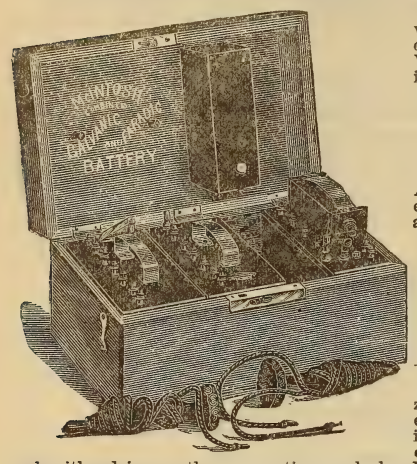
PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

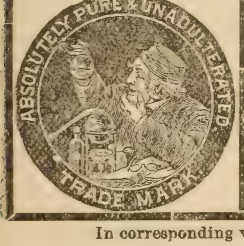
HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

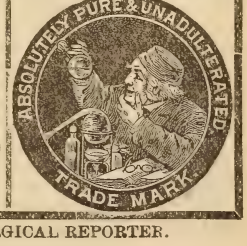
Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.



We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.



ESTABLISHED 1846

MUNN & Co. PATENTS

NEW YORK

After Forty years' experience in the preparation of more than One Hundred Thousand applications for patents in the United States and Foreign countries, the publishers of the Scientific American continue to act as solicitors for patents, caveats, trade-marks, copyrights, etc., for the United States, and to obtain patents in Canada, England, France, Germany, and all other countries. Their experience is unequaled and their facilities are unsurpassed.

Drawings and specifications prepared and filed in the Patent Office on short notice. Terms very reasonable. No charge for examination of models or drawings. Advice by mail free.

Patents obtained through Munn & Co. are noticed in the **SCIENTIFIC AMERICAN**, which has the largest circulation and is the most influential newspaper of its kind published in the world. The advantages of such a notice every patentee understands.

This large and splendidly illustrated newspaper is published **WEEKLY** at $3.00 a year, and is admitted to be the best paper devoted to science, mechanics, inventions, engineering works, and other departments of industrial progress, published in any country. It contains the names of all patentees and title of every invention patented each week. Try it four months for one dollar. Sold by all newsdealers.

If you have an invention to patent write to Munn & Co., publishers of Scientific American, 361 Broadway, New York.

Handbook about patents mailed free.

Improved Artificial Limbs.

NEW PATENT

UNIVERSAL ANKLE JOINT.

NEW PATENT

ADJUSTABLE KNEE SIDE JOINT.

THESE ARE THE MOST PERFECT AND DURABLE JOINTS IN USE.

Arms with Finger, Wrist, and Elbow Movements. Also, extension apparatuses for shortened limbs. Illustrated catalogue free. Address C. A. FREES,
766 Broadway, New York.

—LANDRETH'S SEEDS ARE THE BEST—
NORTH, SOUTH, EAST, OR WEST!

Everything of the best. SEEDS and IMPLEMENTS for Farm, Garden, or Country-Seat. Illustrated and Descriptive Catalogues Free upon application. Over 1500 acres under cultivation growing LANDRETH'S Garden Seeds. Founded 1784.

EDITION FOR 60 PATIENTS DAILY, - - 2 00.

STAUFER'S

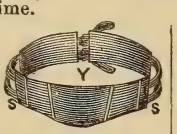
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.



Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and staved with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY
International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World. Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

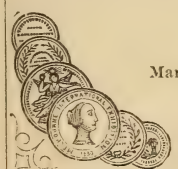
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

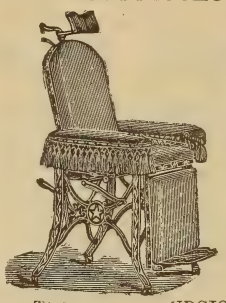
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compt-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

E. FOUGERA & Co., Agents for the United States.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

Rigollot

E. FOUGERA & CO., New York Depositaries.

THE PHYSICIAN'S

DAILY POCKET RECORD AND VISITING LIST.

By S. W. BUTLER, M. D. TWENTY-FIRST YEAR.

A New Revised Edition for 1887, with Metric Posological Table, &c., strongly bound in Dark Morocco, with Pocket for Blanks, and a Patent Steel Spring.

THIS VISITING LIST has been a favorite for many years. It is "perpetual" in arrangement, and may be used continuously one full year from the date of the first entry. Besides the Posological Table, it contains Tables of Doses for Hypodermic Injections, Inhalation, Suppositories, &c.; Directions for the treatment of Poisoning, Drowning, and other emergencies; Simple Directions for Testing the Urine; Obstetric Record, Cash Record, &c.

☞This RECORD has met with the Highest Praise from those who have made use of it.

PRICES.

Editions for Thirty Patients Daily, Patent Clasp, ... *$1.50*

Editions for Sixty Patients Daily, Patent Clasp, ... *$2.00*

☞ **The Name of the Purchaser will be Stamped in Gilt Letters, on the Back, for Ten Cents Extra.**

A reduction of 50 cents on these prices will be made to subscribers to THE MEDICAL AND SURGICAL REPORTER and QUARTERLY COMPENDIUM when taken together.

PUBLISHED BY

D. G. BRINTON, M. D.,

115 South Seventh Street, Philadelphia.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE, CEREBRAL CONGESTION, HEADACHE, LOSS OF APPETITE, INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.

School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.

Directions to Parents of Deaf Children for their Treatment from Infancy in order that they may learn Speech and Lip Reading, furnished free on application to **MARY S. GARRETT, Principal.**

And all parents of pupils.

THE VALUE OF MURDOCK'S LIQUID FOOD IS RECOGNIZED IN ALL COUNTRIES, AND IS ENDORSED BY ALL NATIONAL MEDICAL SOCIETIES THAT HAVE INVESTIGATED ITS VALUE.

There never was an essay read before any Medical Society on Raw Food Extracts, except on Murdock's Liquid Food, and counterfeit manufacturers of Extracts have published many of our essays to show the value of their counterfeits.

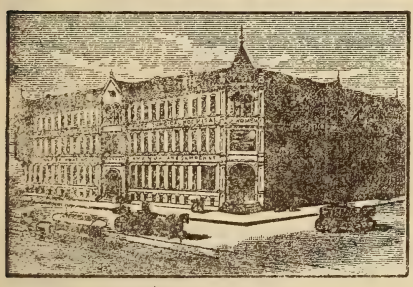
Send for Essay and DISCUSSION before the British Medical Association at Brighton, England, 1886 (Essay), by the Vice-President of the American Medical Association, and others, on the value of MURDOCK'S LIQUID FOOD over all Foods and Extracts known, it being the ONLY Raw Condensed Food free from insoluble matter.

Also essay read before the American Medical Association at Richmond, Va., and Washington, D. C.

Its value was recognized by the profession from results obtained in the Free Hospitals that have been established and supported by our Mr. A. L. Murdock during the last four years.

They now equal

140 FREE BEDS,



And contain 38,000 feet of floor.

Our Liquid Food can be retained by the weakest stomach. Four tablespoonfuls daily will make eight per cent. new blood weekly. When used for infants, never change their food, but add five or more drops of Liquid Food at each feeding, and their lost or needed vitality will be restored in less than thirty days.

Send for the Report of the Chairman of the Section of Obstetrics of the American Institute of Homœopathy, read at Saratoga at the annual meeting of 1886.

Circulars were sent by him to all the Physicians in the United States, asking what their exper ence was with Murdock's Liquid Food in its use for infants under, as well as over, one year old.

Then what results, with all the different Milk preparations, Grain Foods, Peptonoid Foods, and Beef Extracts, compared with MURDOCK'S LIQUID FOOD.

The returns show that it is the Standard Food and Extract, as the percentage of lives restored was the largest when used.

We extract from the report. After calling attention to the fact that one-quarter of the homœopathic profession are accustomed frequently to prescribe this food for children less than a year old, as well as over, he remarks:

"It is singularly adapted to scrofulous, syphilitic, and tubercula constitutions, its life-restoring power manifesting itself in each with a relative clearness and power corresponding to the order of enumeration. For fair-haired children who are inclined to grow fleshy it is more symptomatically recommended, while Duncan's *acid* babies find it particularly useful. Accordingly, it is chiefly employed for marasmus and anæmic conditions resulting either from non-assimilation of food, or from smple summer complaints. Should a child vomit all milk food and suffer synchronously with diarrhœa or dysentery, the demand for this food is emphatic and unmistakable; also in general irritability of the stomach, particularly if there be sour-smelling diarrhœa, the food passing through undigested. For the prematurely born it stands pre-eminent. For those 'weak and debilitated from any cause, Murdock's Food is probably the best in the worl'.' Should any indication of cerebral hyperæmia appear, the quantity of food must be diminished; so, too, if after its protracted use vomiting and diarrhœa ensue, the child has been overfed.' Should the taste or odor of any given bottle chance to be disagreeable, add water until they disappear, and let the purchaser congratulate himself upon getting more nutriment than he paid for. When given in combination with milk in cases of indigestion, the quantity of milk should be diminished until all curds disappear from the stool, the quantity of Food, of course, being proportionately increased."

The Surgical Staff at MURDOCK'S FREE HOSPITAL FOR WOMEN are in daily attendance, except Saturdays, to examine patients and assign beds.

EVERY BED FREE.

Our Free Surgical Hospital for Women, located on Huntington avenue, above West Chester park, contains fifty (50) beds, in charge of a staff of five surgeons, members of the Massachusetts Medical Society.

Our Free Surgical Hospital for Women, located on Gainsborough street, corner of Huntington avenue, contains 50 beds, in charge of a staff of five surgeons, members of the Massachusetts Homœopathic Medical Society.

Our Free Home for Homeless Boys contains 40 beds, and is located at 11 to 21 Causeway street. Many of these boys suffer from Scrofula, Eczema, and other skin diseases, which yield quickly by the use of our Liquid Food.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor.

All brands are made by the same formula. The letter represents the day of make, and the figure the tank.

If richer, it is stronger in smell and flavor, and will bear a greater reduction. It cannot be reduced so low but it will be superior to all other preparations in treating chronic cases.

If you cannot obtain Murdock's Liquid Food from your druggist, we deliver, free of express, 12 oz. for $1. Any physician that has not used our Liquid Food, we will deliver free to the Boston express 12 oz.

MURDOCK'S LIQUID FOOD CO.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

New, Beautiful and Valuable Books.

A TEXT-BOOK OF

OPERATIVE SURGERY AND SURGICAL ANATOMY,

By ARTHUR TREHERN NORTON, F. R. C. S., Etc.

BASED ON THE ORIGINAL WORK OF

PROFS. CLAUDE BERNARD and CH. HUETTE.

SECOND EDITION. Illustrated by 88 full-page plates, drawn from nature, engraved on steel, BEAUTIFULLY COLORED, and many wood cuts. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed post-paid and registered), $12.50.

A TEXT-BOOK OF

NAKED-EYE ANATOMY,

BEING AN ACCOMPANYING TEXT TO MASSE'S PLATES.

By JAMES CANTLIE, A. M., M. D., etc.

THIRD EDITION. Illustrated with 113 full page plates, engraved on steel and BEAUTIFULLY COLORED after nature. London and Philadelphia, 1886. Bound in half Russia, marbled sides and edges. Price (mailed postpaid and registered), $12.50.

The above works are presented in the highest style of the publishing art, and are not less useful than they are beautiful. Mr. Norton explains all the leading and approved operations of surgery with constant reference to the faithfully colored plates, and his instructions are second only to operations on the cadaver.

The "Naked-eye Anatomy" of Dr. Cantlie, with its numerous tinted engravings, illustrates both the position and contrasting hues of the various organs and tissues. The physician who has not frequent opportunities to practice on the dead subject, will find this volume the best substitute he can obtain for practical dissection.

THE SCIENCE AND PRACTICE OF

SURGERY.

By FREDERICK JAMES GANT, F. R. C. S., etc., etc.

THIRD EDITION. Revised and enlarged throughout. With ONE THOUSAND AND NINETY engravings on wood. In two volumes. Vol. I, pp. xxviii, 1087. Vol. II, pp. xxxv, 1183; large octavo; bound in half Russia, marbled sides and edges. London and Philadelphia, 1886. Price (express prepaid), $12.00.

This monumental work is here offered in the finest London edition, on English paper, and bound in the most handsome and durable style. As a treatise on Surgery it stands at the head of the list of those produced by the best school of English Surgeons, clear, complete and practical.

Remit prices with orders to

D. G. BRINTON, M. D., Publisher,

115 South Seventh St., Philadelphia.

The above *fac-simile* of our label enumerates the constituents of what has been termed by us "Liquor Bismuthi et Hydrastiæ" with the several improvements in its composition that have been made from time to time as experience has suggested.

This remarkable alterative and sedative to mucous surfaces has now been in use by the profession for ten years, being *first* prepared by us in 1872, and it has to a large extent revolutionized practice in the treatment of irritable, inflammatory and ulcerative conditions of the Mucous tract, *as:*

OF THE NASAL PASSAGES (locally).
Nasal Catarrh and Ozæna.

OF THE EYE (locally).
Conjunctivitis; Catarrhal, Gonorrhœal, Neonatorum and Purulent Opthalmia; Ulceration of the Cornea.

OF THE THROAT (locally).
Pharyngitis and Laryngitis; Diphtheria.

OF THE STOMACH AND INTESTINES (internally and locally).
Stomatitis; Gastro Intestinal Catarrh; Gastric Ulcer; Dysentery.

OF THE REPRODUCTIVE ORGANS AND BLADDER (locally).
Gonorrhœa; Urethritis; Cystitis; Vaginitis; Metritis; Uterine, Vaginal and Vesical Catarrh; Ulceration of the Os-Uteri.

Having in our possession the indorsement of physicians who have had the most gratifying success with our preparation of "Bismuth and Hydrastia" in the treatment of the above affections, we do not hesitate to emphasize its value to the Oculist, Gynæcologist or general practitioner.

A Descriptive List of our Specialties will be mailed to members of the medical profession upon application, also a sample of the above preparation will be sent to any physician who will pay express charges.

ADDRESS,

Chapman, Green & Co.

Manufacturing Chemists,

CHICAGO, ILL.

SUPPLIED BY THE WHOLESALE DRUG TRADE.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

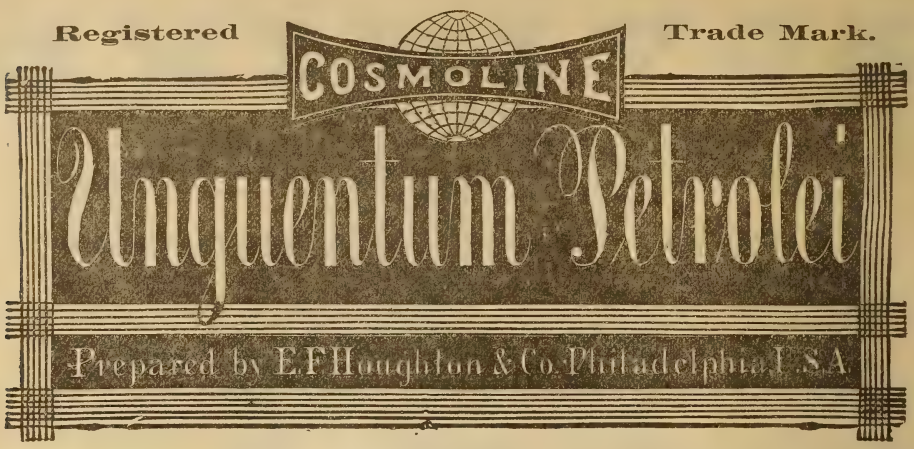
DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.



Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & Co.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & Co.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & Co.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

"Alone TO BE Recommended."

WHERE MOTHER'S MILK IS INSUFFICIENT,

Nestle's Milk Food is Alone to be Recommended.

"This food is *especially commendable* because the physiological relations of the infantile digestive organs, particularly the lack of notable salivary and pancreatic secretions, are taken into account in its fabrication—the starch contained in it having been transformed into dextrin."--*Prof. Wm. O. Leube, Ziemssen's Clyclopedia, Vol. VII.*

We also refer the profession to other eminent writers in the same standard medical work, viz: Prof. Juergensen on Catarrhal Pneumonia, Vol. V. Prof. Senator on the Treatment of Rachitis, Vol. XVI. Prof. Birch-Hirschfeld on Scrofulosis and Affections of the Lymphatic Glands in General, Vol. XVI.

In addition to the above mentioned special features of *Nestlé's Milk Food*, it has a world-wide reputation as a food for infants, producing pure blood, firm flesh, hard muscle and tough bone. It will agree with a larger number of children regardless of age, than *any other substitute* for the mother's milk, and we believe that the general use of this food during the past summer has accomplished more for the diminution of infant mortality from Cholera Infantum than any other means known.

Sample sufficient for trial, and pamphlet by Prof. Lebert, sent on appliaton to

THOMAS LEEMING & CO., 18 College Place, New York City, N. Y.

Smithsonian Institute

New Medicaments for Bronchitis and other Respiratory Affections.

CHEKEN.
(Myrtus Chekan.)

THIS PLANT, indigenous to Chili, was introduced to the profession by Dr. Murrell, the famous English therapeutist and collaborator of Ringer. Dr. Murrell found Cheken to be of great value in chronic cough, especially in the "winter cough" of elderly people.

An extensive trial of this remedy has not only confirmed Dr. Murrell's observations, but has widened the range of the therapeutic application of Cheken so that at the present time it is looked upon, on account of its alterative and demulcent properties, as an indispensable addition to "cough mixtures," particularly in those intractable cases of long standing which have assumed a subacute or chronic course. The dose of the fluid extract which we manufacture is from 1 to 2 fluidrachms.

TEREBENE.

TO DR. MURRELL the profession is indebted for the introduction of another remedy which seems to be almost a specific in winter cough or chronic bronchitis, than which there are few more annoying maladies. Terebene facilitates expectoration, relieves the cough and shortness of breath, and also the acidity and flatulency which so often accompany bronchitis. Dr. Murrell, in *British Med. Journal*, Dec. 12th, 1885, states that he has employed Terebene in 114 cases of winter cough, with the most gratifying results.

We furnish *Terebene Pure; Terebene Inhalant* after Murrell's formula, and *Soluble Elastic Capsules Terebene*, each containing 10 minims.

YERBA SANTA.
(Eriodictyon Californicum.)

YERBA SANTA is a demulcent expectorant in harassing cough. Both in hospital and private practice this remedy has been subjected to a thorough trial, and the reports of its use are unanimous in according it a high place among remedial agents in the treatment of the distressing cough accompanying inflammatory affections of the respiratory mucous membrane. Its action has been likened to the combined action of ipecac and balsam of Peru, but it possesses, in addition, through its resinous principles, an action which is wanting in these valuable drugs in irritative bronchitis.

LIPPIA MEXICANA.

IN ITS native habitat this remedy was long known to possess medicinal virtue in the treatment of coughs. Its popular use led to a scientific investigation of its claims which has resulted in its general introduction to the medical profession, and a clinical test of its merits by physicians has confirmed the popular opinion of its value. Alone or in combination with other remedies, such as Yerba Santa, Cheken, etc., it has been found most serviceable in controlling cough.

Working Bulletins and Circulars fully descriptive of above remedies, together with reprints of Dr. Murrell's articles on winter cough, will be mailed on application.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.

A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

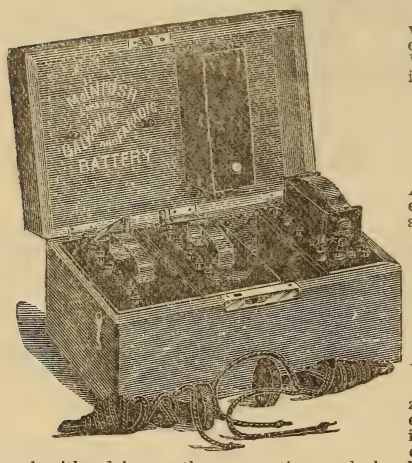
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

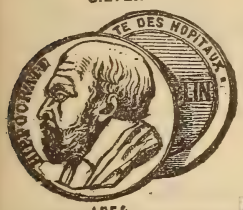
DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessert-spoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER



1854

CAPSULES

OF

PURE COPAIBA

AND OTHER MEDICINES.

SILVER

1854

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and what is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM.
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 8 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

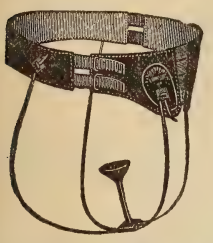
BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on unce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.



PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

LEVIS'S METALLIC SPLINTS.

FLEXIBLE, PERFORATED, NICKEL-PLATED, Conformable to every size and condition of Limbs. **VERY LIGHT, INDESTRUCTIBLE,** and **INEXPENSIVE.** The complete set consists of **21 pieces** in a neat, compact case. Full descriptive circulars sent on application. **PRICE, $15.00 Per Set.**

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

BATTLE & CO.,

Chemists' Corporation, St. Louis, Mo.

BRANCHES: 76 New Bond Street. London, W.

5, Rue De La Paix, Paris. 9 and 10 Dalhousie Square, Calcutta.

Since the introduction—1870—of the substance known as **COSMOLINE** (Unguentum Petrolei) to the College of Pharmacy in Philadelphia, by the late Professor Parrish, who was one of the very first to recognize its merits, it has become very widely known and variously used by the Physicians, Surgeons, and Pharmacists of all schools throughout this country and abroad. Pure Petroleum will not oxidize, but the processes resorted to by many, in order to obtain special products from petroleum, introduce properties that will oxidize in ordinary temperatures, and develop other objections with age. Such products may be used in the arts, but they were decided years ago to be exceedingly irritating and otherwise interfering as surgical dressings or bases for ointments. The Manufacturers of **COSMOLINE** (Unguentum Petrolei) took advantage of the possibility of producing an article which would not only not become rancid, but also one which would be absolutely free from those properties which affected the ordinary residuums and products of the petroleum still. Notwithstanding numerous other petroleum preparations of variable merit and ostensibly for the same purpose, have since been offered, **COSMOLINE** (Unguentum Petrolei) has continued to increase steadily in professional favor. **COSMOLINE** (Unguentum Petrolei) was not recommended to the profession at large until the leading Physicians and Pharmacists of Philadelphia were thoroughly satisfied of its fitness and absolute purity, and since then it has not been changed to meet every speculative fancy, or to compete in price with those preparations of petroleum having some outward resemblance to Cosmoline, but found either deficient in action or positively irritating, owing to chemical agencies used to cheapen the cost of manufacture. It was apparent from its first introduction, that **COSMOLINE** (Unguentum Petrolei) was adapted to a very wide range of uses in Surgery and Pharmacy; and when it was found that its uniformity could invariably be depended upon, it is not surprising that it obtained supremacy over those products which have been varying as commercial experiments, and lacking in all the essential and absolutely pure characteristics needed for a general surgical dressing and base for ointments.

Yours very respectfully,

E. F. HOUGHTON & CO.,

No. 211 South Front St.,

PHILADELPHIA.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The Essential Elements** to the Animal Organization—Potash and Lime;
The **Oxydizing Agents**—Iron and Manganese;
The **Tonics**—Quinine and Strychnine;
And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all Others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Each Bottle of Fellows' Hypophosphites Contains 128 Doses.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars and Samples Sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

THE PHYSICIAN'S

DAILY POCKET RECORD AND VISITING LIST.

By S. W. BUTLER, M. D. TWENTY-FIRST YEAR.

A New Revised Edition for 1887, with Metric Posological Table, &c., strongly bound in Dark Morocco, with Pocket for Blanks, and a Patent Steel Spring.

THIS VISITING LIST has been a favorite for many years. It is "perpetual" in arrangement, and may be used continuously one full year from the date of the first entry. Besides the Posological Table, it contains Tables of Doses for Hypodermic Injections, Inhalation, Suppositories, &c.; Directions for the treatment of Poisoning, Drowning, and other emergencies; Simple Directions for Testing the Urine; Obstetric Record, Cash Record, &c.

☞This RECORD has met with the Highest Praise from those who have made use of it.

PRICES.

Editions for Thirty Patients Daily, Patent Clasp, ... *$1.50*

Editions for Sixty Patients Daily, Patent Clasp, ... *$2.00*

☞ **The Name of the Purchaser will be Stamped in Gilt Letters, on the Back, for Ten Cents Extra.**

A reduction of 50 cents on these prices will be made to subscribers to THE MEDICAL AND SURGICAL REPORTER and QUARTERLY COMPENDIUM when taken together.

Concentrated Palatable Nutrients.

PEPTONIZED EXTRACT OF BEEF.

Contains all the nutritive constituents of beef.

The superiority of this preparation over other extracts of beef depends upon:

1. The large proportion of albuminoids which it contains.

2. The fact that its albuminoid constituents are chiefly in the form of peptones, insuring rapid absorption and ready assimilation.

3. Its appetizing flavor.

4. Its perfect and ready solubility in water.

The uses of such a preparation are obvious. It is a concentrated, and at the same time an easily assimilated food, useful in all cases of acute disease where sustaining treatment is indicated, and especially valuable in convalescence, and in chronic conditions of inanition or malnutrition, particularly where the functions of the stomach are not well performed.

One part of the Peptonized Extract of Beef may be said to be the equivalent of eight parts of fresh beef. One teaspoonful (about one-half ounce) will make a pint of excellent beef tea.

A like quantity added to a pint of vegetable soup communicates to it a rich flavor, and converts it into a highly nutritious food.

It may be employed in a still more concentrated form, if desired, but from half an ounce to one ounce of the extract is as much as it is generally advisable to give at one time.

POWDER OF BEEF.

A concentrated food of the highest nutritive value.

It represents in an exceedingly concentrated form the total nutritive value of the beef.

It is tasteless, and can be taken for a longer time than the various extracts of beef, beef juices, etc., without exciting nausea.

It is not only more readily digested and assimilated, but also incomparably easier of administration than other concentrated aliments, and may be added to water, milk, or wine, or beaten up with the yolk of an egg.

Drs. Debove and Dujardin-Beaumetz, of Paris, France, Dr. Lauder Brunton, of London, England, Dr. Henry B. Millard, of New York City, and many others, have given Powder of Beef a most thorough trial, and report that it is a most valuable adjuvant in the treatment of dyspepsia, indigestion, gastritis, ulcer of the stomach, tuberculosis, and in all chronic wasting diseases accompanied by enfeeblement of the digestive and assimilative functions.

PURE POWDERED BONE.

For the treatment of such affections as nervous exhaustion, rickets, and all diseases depending upon a lack of the proper supply of the inorganic elements of the tissues, it is believed that Pure Powdered Bone will be found invaluable.

It has the exact chemical composition required for a true nerve and bone food.

Its mechanical construction is such as to aid digestion to the greatest possible degree.

It is tasteless and odorless.

It is miscible with all ordinary foods in the proportions required, without detection.

It is inexpensive, and therefor adapted for general use.

☞ Send for descriptive circulars, which will be mailed free on application.

PARKE, DAVIS & CO.,

DETROIT, MICH.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

Carl L. Jensen

Sole Originator of

Pepsin in Scales

OR

"Crystal" Pepsin

2039 Green St.
Philadelphia

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully,

CARL L. JENSEN.

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	½ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

WESTERN PENNSYLVANIA MEDICAL COLLEGE,

PITTSBURGH, PA.

Regular Term opens the first week in October, 1886, and closes the last week in March, 1887.

The requirements are fully described in the Announcement, which will be sent to any desiring it.

A Full Corps of Instructors; Special and Unsurpassed Clinical Advantages. Course of Instruction complete in all Departments, and thoroughly Practical.

Fourteen Clinical Lectures each week.

The College Building, now in construction contiguous to the Western Pennsylvania Hospital, will be, when finished, one of the most commodious and complete in the country.

Fee for General Ticket, ... $100,

For Prospectus, or other information, address either

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

ESTABLISHED 1852.

HYDRASTIS

AND ITS PREPARATIONS.

The WM. S. MERRELL CHEMICAL CO. of Cincinnati—"The largest consumers of Golden Seal Root in the world" (see "Drugs and Medicines of North America")—offer to the medical profession, through the drug trade, the following well-known and highly approved preparations of this leading American drug.

FLUID HYDRASTIS.

A neutral solution of all the active medicinal constituents, forming a perfectly clear solution with alcohol, glycerin, syrup, or water. May be properly and profitably substituted for the Fluid Extract of the U. S. P. in the manufacture of syrup, wine or tincture.

COLORLESS HYDRASTIS.

A neutral solution of the White Alkaloid alone—without color or stain.

SULPHATE HYDRASTIA—CRYSTALLIZED.

[SULPHATE BERBERINA.]

This is the Sulphate of Yellow Alkaloid, which we present in crystals to guard against the substitution of impure and unskillful preparations in a powdered form.

Subsequent to its introduction by us under its present commercial title, this salt was identified as Berberina by Mahla, Durand and others. To avoid confusion with the Alkaloid Bebeerine and its salts, and to fully establish its identity, we continue the name by which it was originally introduced.

SOLUTION BISMUTH AND HYDRASTIA.

A neutral solution of the double Citrate of Bismuth and Hydrastia (White Alkaloid); each fluid drachm containing 2½ grains of the double salt.

Represented in New York City by

DUFFY'S PURE MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK A NON-ALCOHOLIC LIQUID. WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

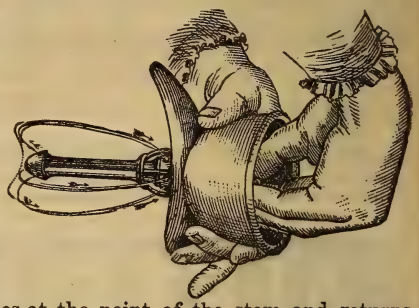
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

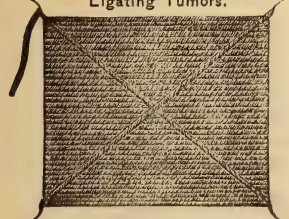
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

HOLLOW SUPPOSITORIES.

WITH CONOIDAL SELF-SEALING STOPPERS,

All made from Pure BUTTER OF CACAO ONLY.

Each box contains A MEDICINE DROPPER and A PAIR OF TONGS.

The object of this invention is to supply Physicians, Druggists, Veterinary Surgeons, and others, with HOLLOW SUPPOSITORIES of various sizes and shapes to meet every probable demand, and into which they can put any kind of MEDICINE or NUTRIMENT, thus producing firm, smooth, EVENLY MEDICATED Suppositories, that are cheaper and more reliable than those made by the old method.

Nos. 0.—1.—2.—3 are provided with conoidal stoppers. The stoppered ends are to be inserted, when the contraction of the sphincter ani will force the suppositories up into the rectum without the use of a suppository syringe or any other appliance whatever.

HALL & RUCKEL, Wholesale Druggists, Proprietors,

218 GREENWICH STREET, NEW YORK.

A sample box of Hollow Suppositories will be mailed free on application, mentioning the PHILA. MED. AND SURG. REPORTER.

Omnico

FORMULA: Boracic Acid, Chlorate of Potassium, Chloride of Sodium, Thymol, Menthol, Gaultheria, and Caryophyllus.

Antiseptic, Disinfectant, Prophylactic, Anti-Inflammatory, Mildly Astringent, Secondary Sedative Action.

An *Alterative* specially adapted to inflamed mucous and cutaneous surfaces.

For all varieties of **Catarrhal** disease, **Pharyngitis, Laryngitis, Diphtheria, Diphtheritic** and **Ulcerous Sore Throat, Stomatitis, Leucorrhœa, Vaginitis, Endometritis, Pruritis, Gonorrhœa, Conjunctivitis, Eczema, Psoriasis, Pityriasis, Genito-Urinary** and **Rectal** disorders.

Used as a douche, inhalant, gargle, injection, spray, or dressing with absorbent cotton.

A thoroughly effective

Antiseptic Disinfectant and Deodorant,

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

FOR SALE,

In a manufacturing town of 1500 inhabitants in Central Pennsylvania, a practice worth $2500 per year, established 13 years. The country is thickly settled by a good class of people; good schools and churches. The roads are good. Opposition light. Will sell, either with or without real estate, at following prices:

Real estate.....$2250

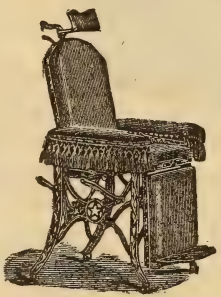
Practice, with office furniture, etc..... 500

This is a rare opportunity for a physician to secure a good location. Good reason for selling. MEDICUS.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

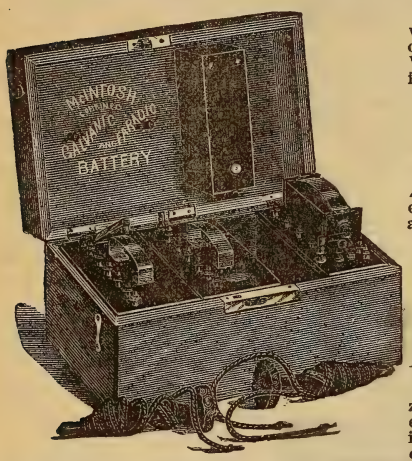
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

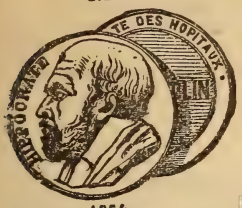
DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER



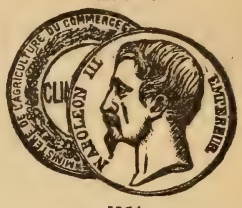
CAPSULES

OF

PURE COPAIBA

AND OTHER MEDICINES.

SILVER



Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed, and which is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM,
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tæniſuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the **treatment of** Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; **Dose from 1 to 6 teaspoonsfuls per day.**

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; **Dose, from 8 to 10 drops.**

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

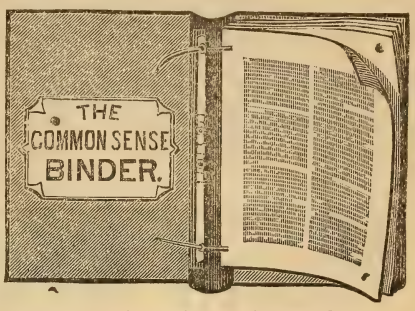
RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

FOR SALE BY

D. G. BRINTON,
115 South Seventh Street, Philadelphia

STAUFFER'S
SPRING STEM UTERINE SUPPORTERS.

Price, $7.00.

The engraving shows the Spring Stem Cup, which consists of over a dozen styles. The series contains Spring Stem Balls, Spring Stem Levers, for Anteversions and Retroversions. also Spring Cup with posterior projections, all of assorted sizes.

Explanation.—The stem is screwed on cup A, and when unscrewed, the spring is put in tube *m*, or taken out when it needs cleaning. Thus the coil spring lays between the cup and base *n*. When there is pressure from above, or below, or both, the spring is compressed and again stretches out at the first opportunity. The movement of the base stem *n*, is governed by a slot and pin through tube *m*.

A D.—Represents the cup transformed into a self-sustaining cup, virtually an instrument of double capacity. In most cases after the uterus is held in "health line" for a time by external support, contraction of the walls of the vagina takes place at night or until forced down next day by bodily exertion, against which the stem and bandage guards if applied in time.

Belt Y.—The manner in which belt Y, sets on the abdomen is shown in above engraving. The widest or lifting part is in front. Over each hip as seen at H, are two elastics, and on large belts three. It closes on the back by buckling at B. It is of fine sateen outside, fine lining inside, and a slight stiffening between, and stayed with soft whalebones. Accurate hip measure is to be taken over a thin undergarment; since it needs to fit with a space of one or two inches apart on the back, for the buckle straps to draw. The perineal attachments are short and buckle at F and R.

Belt Z.—This is an elastic waist strap and carries any supporter of this series. Yet the common difficulty presents itself, where long and slender attachments are used, that they do not govern the internal part so efficiently as on the low grasping abdominal supporter Y.

Catalogue.—The catalogue comprises over 150 sizes and styles of uterine examining and supporting instruments, of which the hard rubber parts are exchanged and interchanged at cost, without limit of time. It also contains full directions and explanations for the use of this series of hard rubber gynecological instruments; together with common information collected through many years to simplify this line of treatment.

Guarantee.—The money lost by purchasing uterine supporters, unscientifically constructed, of irritating material, or limited in deficiency of sizes, and in consequence loss of families in practice, has set a large portion of the medical profession against the mechanical support of the uterus. By these conditions the risk of the first purchase by a physician of a stem and bandage supporter of this series is obviated. After the first purchase the instruments are supposed to be known, yet the guarantee is extended by special contract in doubtful cases.

Refunding.—On return of the hard rubber part or parts within six months of purchase, Five Dollars of the purchase money will be refunded. The belt remains with the patient as an abdominal supporter and only risk.

The above Guarantee and Refunding is secured when obtained through this Office. Any other Instrument of STAUFFER'S SERIES is also obtained through this Office at Catalogue Prices, and Catalogue free.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE, and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & CO.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The Essential Elements** to the Animal Organization—Potash and Lime;
The **Oxydizing Agents**—Iron and Manganese;
The **Tonics**—Quinine and Strychnine;
And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all Others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Each Bottle of Fellows' Hypophosphites Contains 128 Doses.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars and Samples Sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

"Alone TO BE Recommended."

WHERE MOTHER'S MILK IS INSUFFICIENT,

Nestle's Milk Food is Alone to be Recommended.

This food is *especially commendable* because the physiological relations of the infantile digestive organs, particularly the lack of notable salivary and pancreatic secretions, are taken into account in its fabrication—the starch contained in it having been transformed into dextrin.—*Prof. Wm. O. Leube, Ziemssen's Clyclopedia, Vol. III.*

We also refer the profession to other eminent writers in the same standard medical work, viz: Prof. Juergensen on Catarrhal Pneumonia, Vol. V. Prof. Senator on the Treatment of Rachitis, Vol. XVI. Prof. Birch-Hirschfeld on Scrofulosis and Affections of the Lymphatic Glands in General, Vol. XVI.

In addition to the above mentioned special features of *Nestlé's Milk Food*, it has a world-wide reputation as a food for infants, producing pure blood, firm flesh, hard muscle and tough bone. It will agree with a larger number of children regardless of age, than *any other substitute* for the mother's milk, and we believe that the general use of this food during the past summer has accomplished more for the diminution of infant mortality from Cholera Infantum than any other means known.

Sample sufficient for trial, and pamphlet by Prof. Lebert, sent on appliaton to

THOMAS LEEMING & CO., 18 College Place, New York City, N. Y.

Prof SF Baird C
1445 Mass ave

New Medicaments for Bronchitis and other Respiratory Affections.

CHEKEN.
(Myrtus Chekan.)

THIS PLANT, indigenous to Chili, was introduced to the profession by Dr. Murrell, the famous English therapeutist and collaborator of Ringer. Dr. Murrell found Cheken to be of great value in chronic cough, especially in the "winter cough" of elderly people.

An extensive trial of this remedy has not only confirmed Dr. Murrell's observations, but has widened the range of the therapeutic application of Cheken so that at the present time it is looked upon, on account of its alterative and demulcent properties, as an indispensable addition to "cough mixtures," particularly in those intractable cases of long standing which have assumed a subacute or chronic course. The dose of the fluid extract which we manufacture is from 1 to 2 fluidrachms.

TEREBENE.

TO DR. MURRELL the profession is indebted for the introduction of another remedy which seems to be almost a specific in winter cough or chronic bronchitis, than which there are few more annoying maladies. Terebene facilitates expectoration, relieves the cough and shortness of breath, and also the acidity and flatulency which so often accompany bronchitis. Dr. Murrell employs Terebene in Semple's Atomizing Inhaler, which he regards "*as one of the best forms of spray apparatus ever invented.* In *British Med. Journal*, Dec. 12th, 1885, he states that he has employed Terebene in 114 cases of winter cough, with the most gratifying results.

We furnish *Terebene Pure; Terebene Inhalant* after Murrell's formula; *Semple's Inhaler*, for which the inhalant is adapted, and *Soluble Elastic Capsules Terebene*, each containing 10 minims.

YERBA SANTA.
(Eriodictyon Californicum.)

YERBA SANTA is a demulcent expectorant in harassing cough. Both in hospital and private practice this remedy has been subjected to a thorough trial, and the reports of its use are unanimous in according it a high place among remedial agents in the treatment of the distressing cough accompanying inflammatory affections of the respiratory mucous membrane. Its action has been likened to the combined action of ipecac and balsam of Peru, but it possesses, in addition, through its resinous principles, an action which is wanting in these valuable drugs in irritative bronchitis.

LIPPIA MEXICANA.

IN ITS native habitat this remedy was long known to possess medicinal virtue in the treatment of coughs. Its popular use led to a scientific investigation of its claims which has resulted in its general introduction to the medical profession, and a clinical test of its merits by physicians has confirmed the popular opinion of its value. Alone or in combination with other remedies, such as Yerba Santa, Cheken, etc., it has been found most serviceable in controlling cough.

Working Bulletins and Circulars fully descriptive of above remedies, and of Semple's Inhaler, together with reprints of Dr. Murrell's articles on winter cough, will be mailed on application.

PARKE, DAVIS & CO.,

Manufacturing Chemists,

New York: { 60 Maiden Lane, 21 Liberty Street.

DETROIT, MICH.

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

[Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

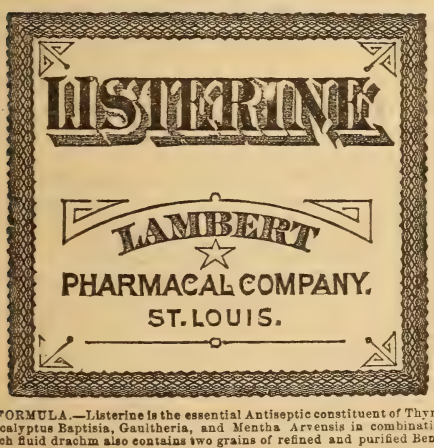
Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

THE BEST
—ANTI-SEPTIC—
For Internal and External Use.



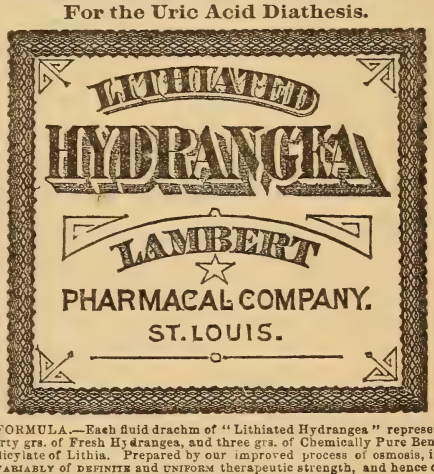
FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

LISTERINE comes nearer the ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in SURGERY, OBSTETRICS, GYNECOLOGY, LEUCORRHŒA, GONORRHŒA, and all MUCOUS MEMBRANE CATARRHS; internally in TYPHOID and other FEVERS, ZYMOTIC DISEASES, DIPHTHERIA, SCARLET FEVER, DYSPEPSIA, DYSENTERY, DIARRHŒA, all forms of CHOLERA, etc., and as a general PROPHYLACTIC

THE BEST
—ANTI-LITHIC—
For the Uric Acid Diathesis.



FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, AT ONCE justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of URINARY CALCULUS, GOUT, RHEUMATISM, BRIGHT'S DISEASE, DIABETES, CYSTITIS, HÆMATURIA, ALBUMINURIA, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by Children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime, and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S. & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

SCOTT & BOWNE, Mfg. Chemists, 132 & 134 S. 5th Ave., N. Y.

Dusart's Syrup and Wine of Lacto-Phosphate of Lime.

The properties of which are scientifically founded on physiological experiments, and have received the sanction of several years' successful trial by the French and English medical profession, as producing durable reconstituent effects in all cases of Cachexia or Adynamia; when nutrition has been impaired by acute or chronic complaints.

As an article of diet it acts as general excitant of all nutritive functions, ensures digestion, brings back or increases the appetite, enriches the milk of the mother, and generally improves the vital energies. As a medicament it is chiefly used in convalescence, teething, rickets, and imperfect growth, dyspepsia, various nervous diseases, wounds, fractures, and all complaints of the osseous system.

Dusart's Syrup of Lacto-Phosphate of Lime and Iron is a ferruginous medicament specially invaluable for the above cases, when complicated with anæmia.

Dusart's work on the "Physiological and Therapeutic Action of Phosphate of Lime," will be sent free to any physician on application to Messrs. E. FOUGERA & Co.

PARIS: L. DUSART, 8 Rue Vivienne.
NEW YORK: E. FOUGERA & CO., Importing Pharmacists.

PELLETIER'S CAPSULES OF SULPHATE OF QUININE.

These Capsules, Manufactured by Messrs. ARMET DE LISLE & Co., successors to PELLETIER, contain ten centigrammes of Sulphate of Quinine, guaranteed by having the name printed upon each Capsule. They dissolve quickly in cold water, do not become hard like pills, and are taken more easily than wafers.

PELLETIER

They are put up in bottles containing 10, 20, 100, 200, 500, and 1000 Capsules.

PARIS: 8 RUE VIVIENNE. E. FOUGERA & CO., NEW YORK.

CHAPOTEAUT'S PEARLS OF PURE PEPSINE.

The Pepsine used in the manufacture of these Pearls is made from the Stomachs of Sheep, and digests 90 times its weight of meat; it is put up in soluble Capsules which can be preserved indefinitely. Unlike all other known Pepsine, it contains neither starch nor sugar of milk.

Two Pearls taken after meals are sufficient to insure the digestion of food in fifteen minutes, and remove Headache, Sleepiness, etc., which are the usual accompaniments of indigestion.

CHAPOTEAUT, Pharmaceutical Chemist, 8 Rue Vivienne, Paris.
E. FOUGERA & CO., 30 N. William Street, New York.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.

Differs Essentially from all other Beef Tonics.

COLDEN'S **Liquid Beef Tonic** is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.*: "***Ext. carnis, fl. comp. (Colden's.)***" It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded in **all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

RECTAL ALIMENTATION.

Peptonized Milk the Ideal Substance for Nutritive Enemas.

It would be difficult to conceive of a substance more perfectly adapted for feeding per rectum than thoroughly peptonized milk. It is perfectly absorbable, non-irritant, and may be continuously used for long periods without local disturbance and with entirely adequate nutrition; patients even sometimes increasing in weight.

The artificial digestion of the milk may be carried to the point of complete conversion of the caseine into peptone, or the process may be left to proceed in the alkaline secretion of the rectum. Peptonized Milk *Gruel*—of arrow-root and milk—may be used if preferred, the PEPTONIZING TUBES digesting both starch and milk.

PEPTONIZING TUBES

are sold in boxes at retail for 50 cents, one dozen tubes in a box, each tube peptonizing a pint of milk.

FAIRCHILD BROS. & FOSTER,

82 and 84 FULTON STREET, NEW YORK.

Infantile Atrophy.

"INFANTILE ATROPHY, or the slow wasting which is a familiar symptom in hand-fed babies, is one of the commonest causes of death in early infancy."

"INFANTILE ATROPHY is the consequence of insufficient nourishment. The child wastes because he is starved. But it is not to actual lack of feeding that the starvation is usually to be ascribed. A baby fed from a breast which secretes milk poor in quality and insufficient for the child's support, will, of course, grow slowly thinner; but an infant supplied largely with farinaceous compounds, from which his feeble digestive organs fail to derive even a minimum of nourishment, will waste with startling rapidity."

"Mellin's Food may be used from the first, and is almost always well digested. Farinaceous matters, unless guarded by malt, as in Mellin's Food, should not be given to a child younger than six months."

From "Disease in Children," by Eustace Smith, M. D., F. R. C. P., London, England.

A sample of Mellin's Food, sufficient for trial, will be sent free to any Physician desiring it.

DOLIBER, GOODALE & CO., BOSTON, MASS.

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength *and* efficacy *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

SAVORY & MOORE, 143 New Bond Street, London.

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

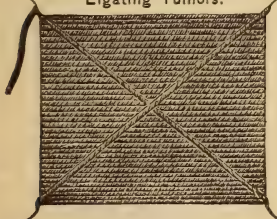
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

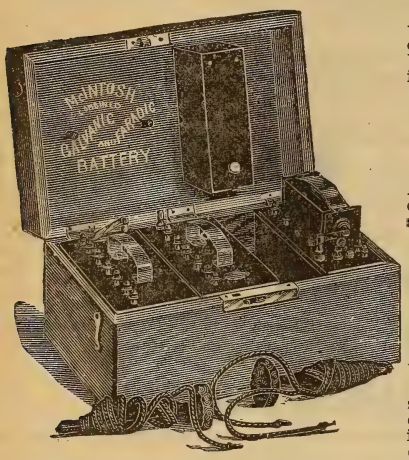
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS OF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN. Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.* Yours respectfully,

HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

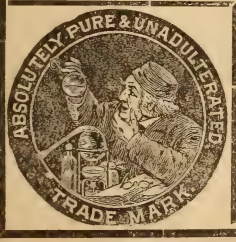
HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.



We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

DENTAL DEPARTMENT.

Fifth Annual Announcement. Next regular session begins October 1st, 1886. New and excellen Infirmary and Laboratory, with abundance of clinical material.

FACULTY.

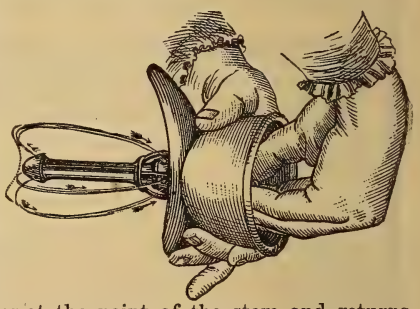
FRED. J. S. GORGAS, M. D., D. D. S.,
Professor of Principles of Dental Science, Dental Surgery and Dental Mechanism.
JAMES H. HARRIS, M. D., D. D. S.,
Professor of Operative and Clinical Dentistry.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy.

I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D. D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D. D. S.,
Demonstrator of Operative Dentistry.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

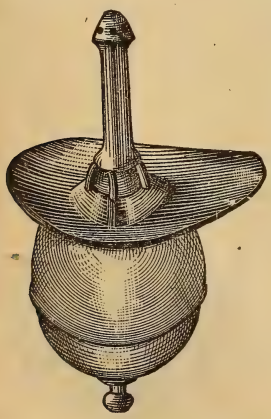
For Catalogues and other information apply to Dr. F. J. S. GORGAS, Dean, 259 Eutaw Street, Baltimore.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.

HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks i the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	*Per Cent. of Atropine in the Plaster Mass.*	*Quantity of Atropine in One Plaster (Avg.)*
Seabury & Johnson	*0.39*	*0.543 grains.*
Grosvenor & Richards	*0.17*	*0.264 "*
T. W. Heinemann	*0.15*	*0.230 "*
George E. Mitchell (Novelty Plaster Works)	*0.05*	*0.045 "*
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	*0.06*	*0.062 "*

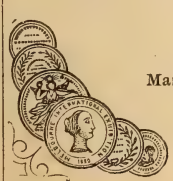
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class. Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." 'J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

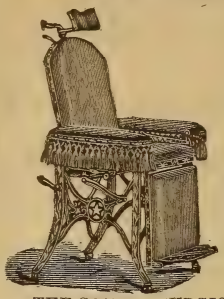
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

Please mention this Journal.

BALTIMORE MEDICAL COLLEGE,

BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,

S. E. Cor. Eutaw and Hoffman Sts., Baltimore Maryland.

UNIVERSITY OF PENNSYLVANIA.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compt-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

E. FOUGERA & CO., New York Depositaries.

Carl L. Jensen

Sole Originator of

Pepsin in Scales

OR

"Crystal" Pepsin

2039 Green St.
Philadelphia

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully,

CARL L. JENSEN.

In corresponding with Advertisers, please mention THE MEDICAL AND SURGICAL REPORTER.

THE VALUE OF MURDOCK'S LIQUID FOOD IS RECOGNIZED IN ALL COUNTRIES, AND IS ENDORSED BY ALL NATIONAL MEDICAL SOCIETIES THAT HAVE INVESTIGATED ITS VALUE.

There never was an essay read before any Medical Society on Raw Food Extracts, except on Murdock's Liquid Food, and counterfeit manufacturers of Extracts have published many of our essays to show the value of their counterfeits.

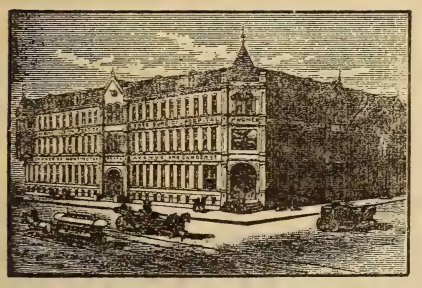
Send for Essay and DISCUSSION before the British Medical Association at Brighton, England, 1886 (Essay), by the Vice-President of the American Medical Association, and others, on the value of MURDOCK'S LIQUID FOOD over all Foods and Extracts known, it being the ONLY Raw Condensed Food free from insoluble matter.

Also essay read before the American Medical Association at Richmond, Va., and Washington, D. C.

Its value was recognized by the profession from results obtained in the Free Hospitals that have been established and supported by our Mr. A. L. Murdock during the last four years.

They now equal

140 FREE BEDS,



And contain 38,000 feet of floor.

Our Liquid Food can be retained by the weakest stomach. Four tablespoonfuls daily will make eight per cent. new blood weekly. When used for infants, never change their food, but add five or more drops of Liquid Food at each feeding, and their lost or needed vitality will be restored in less than thirty days.

Send for the Report of the Chairman of the Section of Obstetrics of the American Institute of Homœopathy, read at Saratoga at the annual meeting of 1886.

Circulars were sent by him to all the Physicians in the United States, asking what their experience was with Murdock's Liquid Food in its use for infants under, as well as over, one year old.

Then what results, with all the different Milk preparations, Grain Foods, Peptonoid Foods, and Beef Extracts, compared with MURDOCK'S LIQUID FOOD.

The returns show that it is the Standard Food and Extract, as the percentage of lives restored was the largest when used.

We extract from the report. After calling attention to the fact that one-quarter of the homœopathic profession are accustomed frequently to prescribe this food for children less than a year old, as well as over, he remarks:

"It is singularly adapted to scrofulous, syphilitic, and tubercula constitutions, its life-restoring power manifesting itself in each with a relative clearness and power corresponding to the order of enumeration. For fair-haired children who are inclined to grow fleshy it is more symptomatically recommended, while Duncan's *acid* babies find it particularly useful. Accordingly, it is chiefly employed for marasmus and anæmic conditions resulting either from non-assimilation of food, or from simple summer complaints. Should a child vomit all milk food and suffer synchronously with diarrhœa or dysentery, the demand for this food is emphatic and unmistakable; also in general irritability of the stomach, particularly if there be sour-smelling diarrhœa, the food passing through undigested. For the prematurely born it stands pre-eminent. For those 'weak and debilitated from any cause. Murdock's Food is probably the best in the world.' Should any indication of cerebral hyperæmia appear, the quantity of food must be diminished; so, too, if after its protracted use vomiting and diarrhœa ensue, the child has been overfed. Should the taste or odor of any given bottle chance to be disagreeable, add water until they disappear, and let the purchaser congratulate himself upon getting more nutriment than he paid for. When given in combination with milk in cases of indigestion, the quantity of milk should be diminished until all curds disappear from the stool, the quantity of Food, of course, being proportionately increased."

The Surgical Staff at MURDOCK'S FREE HOSPITAL FOR WOMEN are in daily attendance, except Saturdays, to examine patients and assign beds.

EVERY BED FREE.

Our Free Surgical Hospital for Women, located on Huntington avenue, above West Chester park, contains fifty (50) beds, in charge of a staff of five surgeons, members of the Massachusetts Medical Society.

Our Free Surgical Hospital for Women, located on Gainsborough street, corner of Huntington avenue, contains 50 beds, in charge of a staff of five surgeons, members of the Massachusetts Homœopathic Medical Society.

Our Free Home for Homeless Boys contains 40 beds, and is located at 11 to 21 Causeway street. Many of these boys suffer from Scrofula, Eczema, and other skin diseases, which yield quickly by the use of our Liquid Food.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor.

All brands are made by the same formula. The letter represents the day of make, and the figure the tank.

If richer, it is stronger in smell and flavor, and will bear a greater reduction. It cannot be reduced so low but it will be superior to all other preparations in treating chronic cases.

If you cannot obtain Murdock's Liquid Food from your druggist, we deliver, free of express, 12 oz. for $1. Any physician that has not used our Liquid Food, we will deliver free to the Boston express 12 oz.

MURDOCK'S LIQUID FOOD CO.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞ **Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.**

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY.** In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS
DARK A NON-ALCOHOLIC LIQUID. **WHITE**

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE, and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn rancid. It contains no foreign ingredient.

Compressed Tablets of Pure Crystals

—OF—

PERMANGANATE OF POTASH,

1-2, 1, 2, and 5, Grs. Each; Free from any Addition or Excipient.

AUGUST, 1886.

We desire to again call the attention of the medical profession to the therapeutic uses of Potassium Permanganate in the form of Compressed Tablets.

Prior to bringing them to the attention of medical men in the United States, we manufactured them for some of the leading practitioners in Great Britain.

The uniformly good results obtained, and the increased demand, induce us to introduce them to the physicians here.

We are satisfied our mode of preparing the Permanganate Tablets will be found to be the only form in which they can be administered without danger of inducing the distress invariably following the use of the pills as ordinarily prepared.

Drs. Ringer and Murrell [of London] and Bartholow [of Philadelphia] prescribe our Tablets after meals, to be followed by a tumbler of water.

Since we issued the article written by Dr. Roberts Bartholow, for the *Medical News*, Nov., 1884, these Tablets have been very extensively prescribed, and have fully confirmed all the claims made for them at that time.

NOTE.

T. GAILLARD THOMAS, M. D.,

CLINICAL PROFESSOR OF DISEASES OF WOMEN IN THE COLLEGE OF PHYSICIANS AND SURGEONS, NEW YORK,

In a recent address delivered at the Annual meeting of the New York State Medical Association Nov. 19, 1884, says:

"Permanganate of Potash, of Potash, introduced by Sydney Ringer, of London, as an excitant of the menstrual flow, is, I think, the best emmenagogue which has yet been discovered."

MANUFACTURED BY

JOHN WYETH & BROTHER,

CHEMISTS, PHILADELPHIA.

Prof SF Baird C
1445 Mass ave

Concentrated Palatable Nutrients.

PEPTONIZED EXTRACT OF BEEF.

Contains all the nutritive constituents of beef.

The superiority of this preparation over other extracts of beef depends upon:

1. The large proportion of albuminoids which it contains.

2. The fact that its albuminoid constituents are chiefly in the form of peptones, insuring rapid absorption and ready assimilation.

3. Its appetizing flavor.

4. Its perfect and ready solubility in water.

The uses of such a preparation are obvious. It is a concentrated, and at the same time an easily assimilated food, useful in all cases of acute disease where sustaining treatment is indicated, and especially valuable in convalescence, and in chronic conditions of inanition or malnutrition, particularly where the functions of the stomach are not well performed.

One part of the Peptonized Extract of Beef may be said to be the equivalent of eight parts of fresh beef. One teaspoonful (about one-half ounce) will make a pint of excellent beef tea.

A like quantity added to a pint of vegetable soup communicates to it a rich flavor, and converts it into a highly nutritious food.

It may be employed in a still more concentrated form, if desired, but from half an ounce to one ounce of the extract is as much as it is generally advisable to give at one time.

POWDER OF BEEF.

A concentrated food of the highest nutritive value.

It represents in an exceedingly concentrated form the total nutritive value of the beef.

It is tasteless, and can be taken for a longer time than the various extracts of beef, beef juices, etc., without exciting nausea.

It is not only more readily digested and assimilated, but also incomparably easier of administration than other concentrated aliments, and may be added to water, milk, or wine, or beaten up with the yolk of an egg.

Drs. Debove and Dujardin-Beaumetz, of Paris, France, Dr. Lauder Brunton, of London, England, Dr. Henry B. Millard, of New York City, and many others, have given Powder of Beef a most thorough trial, and report that it is a most valuable adjuvant in the treatment of dyspepsia, indigestion, gastritis, ulcer of the stomach, tuberculosis, and in all chronic wasting diseases accompanied by enfeeblement of the digestive and assimilative functions.

PURE POWDERED BONE.

For the treatment of such affections as nervous exhaustion, rickets, and all diseases depending upon a lack of the proper supply of the inorganic elements of the tissues, it is believed that Pure Powdered Bone will be found invaluable.

It has the exact chemical composition required for a true nerve and bone food.

Its mechanical construction is such as to aid digestion to the greatest possible degree.

It is tasteless and odorless.

It is miscible with all ordinary foods in the proportions required, without detection.

It is inexpensive, and therefor adapted for general use.

DETROIT, MICH.

A NEW EMMENAGOGUE.

The following is an abstract from a letter written by one of the most prominent gynæcologists of the country, to another:

"Thus far no perfect emmenagogue has been discovered, but I regard the manganese as the best I have met with. It should be styled a regulator of menstruation rather than a pure emmenagogue, for it is useful in the absence of the menses, irregularity of their recurrence, and even in excess of flow.

"The preparation which I now employ is McKesson & Robbins' pills of the binoxide of manganese. Of this preparation I give two grains three times a day throughout the month and during the period.

"I also employ manganese in chlorosis and anæmia, and I think that by its use I obtain better results than I have heretofore done by iron." (See *Medical Record* of March 6th, page 274.)

Specify McK. & R.'s Pills Manganese Binoxide.

Important additions to McK. & R.'s list of Gelatine Coated Pills:

McK. & R. *Cascara Sagrada* and *Nux Vomica*: Ext. Cas. Sagr. gr. ii; Ext. Nux Vom. gr. 1-5.

McK. & R. Cascara Sagrada, Nux Vomica and Belladonna: Ext. Cas. Sag. gr. ii; Ext. Nucis Vom. gr. 1-8; Ext. Bellad. gr. 1-16.

McK. & R. Hydrobromide of Hyoscin 1-100 gr.

McK. & R. Binoxide of Manganese 2 grs.

McK. & R. Valerianate of Quinine ½, 1, 2, and 3 grs.

McK. & R. Valerianates Iron, Quinine, and Zinc: Ferri Valer., Quin. Valer., Zinci Valer., āā gr. i.

McK. & R. Oleate of Manganese 20 per cent. May be used to advantage when the pills cannot be administered.

Always specify McK. & R's.

COCAINE.

Although only eighteen months have elapsed since Koller's announcement of his discovery of the anæsthetic properties of this alkaloid, Cocaine already ranks among the most important agents of the practitioner. In general and dental surgery, ophthalmology, laryngology and general therapeutics, its value is everywhere attested.

We began its manufacture immediately after the announcement of Dr. Koller, and samples of our product were submitted to many noted specialists for their experiments, and the results were highly gratifying. The demand for our manufacture of the salt, solutions, and oleates, has continued to increase, and we desire to express our sincere thanks to the medical, pharmaceutical, and dental professions for their kind encouragement as shown in their recognition of the merits of our preparations. Our appreciation of this will be shown in our constant efforts to supply all their requirements in chemicals and pharmaceuticals, of a quality worthy of their entire confidence.

Special quotations on Terebene and Cocaine for specified quantities. Very respectfully,

McKESSON & ROBBINS.

TEREBENE.

McKESSON & ROBBINS

WERE THE FIRST IN THIS COUNTRY TO MANUFACTURE THIS VALUABLE REMEDY FOR

Winter Cough, Bronchial and Chest Affections, Flatulency, Acidity, and other forms of Dyspepsia.

It may be used as an inhalation, or taken internally in doses of five or six drops on sugar every four hours, gradually increasing the dose to twenty minims.

Terebene was brought to the notice of the medical profession as far back as 1873, by M. Riban, who read a series of papers on this and similar substances before the Pharmaceutical Society of Paris. It has lately been brought into prominence by Dr. Wm. Murrell, of London, who has given it in over 114 cases; he has also notes of its value in 81 out of 94 cases. Dr. Murrell says that much of the Terebene now being sold may be described as inferior, and to this fact he ascribes some irritating effects noted in a few of his cases.

We would therefore caution the physician in prescribing and the druggist in ordering to, in all cases,

SPECIFY McK. & R.

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

GOOD INVESTMENTS

FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

30,000 PHYSICIANS
NOW PRESCRIBE

HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	½ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

MEDICAL ELECTRICITY.

Carl L. Jensen

Sole Originator of

Pepsin in Scales

OR

"Crystal" Pepsin

2039 Green St.
Philadelphia

Physicians desirous of obtaining the genuine article, when prescribing Scale Pepsin or "Cryst." Pepsin, will not alone lend their aid and encouragement to the inventor, but will benefit themselves and patients as well, by simply prescribing this Pepsin thus: "Jensen's Pepsin," drawing a heavy line under the name "Jensen."

The profession generally takes it for granted that druggists are well aware that the physicians never intend to prescribe the imitations of preparations of established merits, which are brought to light solely through the knowledge and technicalities of the inventor or originator, acquired by protracted study and experiments. Imitations have never yet been known to supersede the article imitated, but furnish most convincing testimony to the worth of the article counterfeited. I am continually improving this valuable preparation. Besides its enormous digestive strength, it possesses a keeping quality not before found in any Pepsin preparation, owing to its being of a brittle, scaly texture, reduced to the shape of small granular fragments, it is perfectly soluble and pulverizes easily. It contains no foreign matter like preparations of other make, as Pepsin Manufacturers, heretofore, could not accomplish this without adding large quantities of either starch or sugar of milk.

Physicians who have not yet tried this preparation, or who have been imposed upon, will meet with gratifying results by simply prescribing this Pepsin, thus: "Jensen's Pepsin," as it will prevent substitutions.

Samples promptly forwarded, post-paid.

Faithfully,

CARL L. JENSEN.

Apollinaris

"THE QUEEN OF TABLE WATERS,"

HAS RECEIVED THE

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

DUFFY'S PURE MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

THE DUFFY MALT WHISKEY CO.,
BALTIMORE, MD.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

☞ **Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.** ☜

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE** AS AN APERIENT FOR WOMEN DURING PREGNANCY. In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

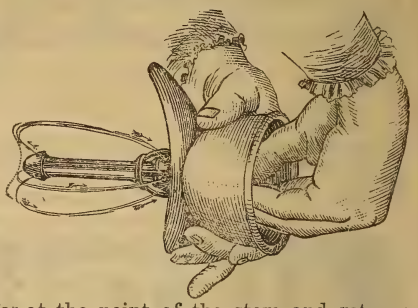
Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

RIO CHEMICAL CO., ST. LOUIS: LONDON: PARIS.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.

PHYSICIANS!

YOUR ATTENTION IS INVITED

—TO THE—

DR. McINTOSH NATURAL UTERINE SUPPORTER.

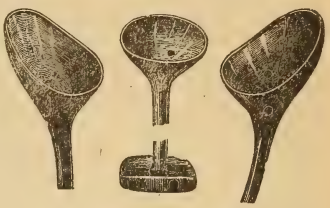
THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.



Anteversion. Prolapsus. Retroversion

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

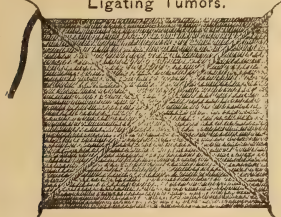
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.



No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.

SNOWDEN'S PERFECTED BINAURAL STETHOSCOPE.
Price, - - $3.00.
Sent per mail on receipt of price.

IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."

A VALUABLE WORK.

A COMPLETE PRONOUNCING

MEDICAL DICTIONARY,

Embracing the Terminology of Medicine and the Kindred Sciences, with their Signification, Etymology, and Pronunciation:

WITH AN APPENDIX

Comprising an Explanation of the Latin Terms and Phrases occurring in Medicine, Anatomy, Pharmacy, etc.; together with the Necessary Directions for Writing Latin Prescriptions, etc., etc.

By JOSEPH THOMAS, M. D., LL.D.

Imperial 8vo. 844 pages. Extra Cloth, $5.00. Sheep, $6.00.

From MEDICAL AND SURGICAL REPORTER.

"There has been real need of a work of this kind, and after a careful examination of the manner in which the author has performed his laborious task, we have no hesitation in saying that he has succeeded in presenting a medical dictionary which for the daily use of the student or the practitioner is superior to any other in the language. He is especially careful in assigning the derivation of the words, their accents and pronunciation, and their exact meaning, according to the usage of the best modern writers. Through the assistance of specialists in various branches of medicine and pharmacy, he has been able to add all the recent introductions to the phraseology and nomenclature of medicine, surgery, pharmacy, chemistry and the allied sciences, and in this respect the work stands a long way ahead of any that has yet been issued."

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

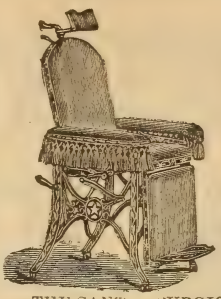
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

BALTIMORE MEDICAL COLLEGE,

BALTIMORE, MD.

The next regular session of this institution will open October 1st, 1886, and close March 15, 1887. The course of instruction, thorough and practical, is delivered by a full corps of teachers and instructors.

Lectures both didactic and clinical are given on all branches taught in the College curriculum.

Adjoining the College is the Maryland General Hospital, under the control of the Faculty, which will afford ample clinical material for instruction in the diseases met with in general practice. Out-door clinic held daily at the Dispensary adjoining the College buildings.

For catalogue and further information, address

Prof. WM. LEE, M. D., Dean,

S. E. Cor. Eutaw and Hoffman Sts., Baltimore Maryland.

UNIVERSITY OF PENNSYLVANIA.

MEDICAL DEPARTMENT—PHILADELPHIA.

PROFESSORS: Joseph Leidy, R. A. F. Penrose, D. Hayes Agnew, William Pepper, William Goodell, James Tyson, H. C. Wood, Theo. G. Wormley, John Ashhurst, jr., William Osler, Edw. T. Reichart, Wm. F. Norris, Geo. Strawbridge, Louis A. Duhring, Louis Starr, Edw. T. Bruen.

The 121st Annual Winter Session will commence Friday October 1, 1886, and continue 7 months.

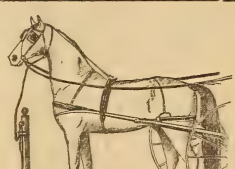
The Preliminary Course will begin Wednesday, Sept. 15th.

Graded Curriculum.—Three Winter Sessions required. Voluntary fourth year.

Practical Instruction in all departments.

For particulars see catalogue, for which address

JAMES TYSON, M. D., Sec'y.



PHYSICIANS who own good horses should use **The Security Hitching Strap** (for hitching upon the street). It is secure, convenient, neat and durable. Holds by the bit and by the neck. No strain on the bridle. S. Birdsall, M. D., Member Med. Soc. State of Pa., Patentee.

If your harness dealer does not keep it, send to **KING & CO.,** Wholesale Harness Manufacturers, Owego, N. Y.

Price, $1.00 by express; $1.25 by mail.

If not satisfactory, money will be refunded.

HARNESS. Hand Made. Best Oak Leather, $8.50, $10, $12, $13.50, $15. Double Sets, $20, $25, $30. Shipped subject to approval. 40-PAGE CATALOGUE free. *Order one.* **KING & CO.,** Wholesale Manufacturers, **Owego, N. Y.**

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

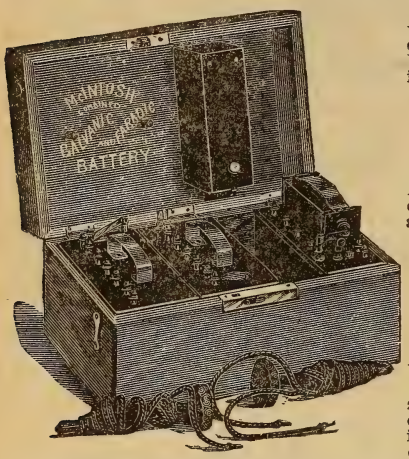
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS NF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2 H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3 P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessertspoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

MATHEY-CAYLUS' GLUTEN

SILVER

1854

CAPSULES

OF

PURE COPAIBA AND OTHER MEDICINES.

SILVER

1854

Adapted and recommended for the cure recent or chronic Gleets, Fluor Albus, etc., etc.

The MATHEY-CAYLUS' CAPSULES, *coated with gluten*, present the most perfect mode for administering Copaiba, Cubebs, Norway Tar, Turpentine, and other remedies, the disagreeable odor and taste of which are often a hindrance to their use. This mode of preparing capsules, which has been approved by the Academy of Medicine, has been recommended in their clinical lectures by eminent Professors in the hospitals of Paris, as well as in those of New York and London.

By the first physicians of the hospitals of Paris, London, and New York.

SPECIAL ADVANTAGES OF MATHEY-CAYLUS' GLUTEN CAPSULES.—Being formed of thin, transparent, and readily assimilated coating, they so cover and disguise the medicine to be given, that it can be taken without disgust, but with ease. In this respect, they differ widely from the gelatine capsules, which have a hard, thick coating, which swells beyond measure, in the stomach, are hard to be swallowed. and which is of great importance, they create disturbance in the digestive functions.

The special advantage of the coating of gluten consists in the fact that, notwithstanding its extra thinness, and although it softens under the action of the gastric juice, it can pass the stomach without breaking, and only in the intestines is the medicinal matter liberated; this accounts for the fact that Mathey-Caylus' Capsules never cause the nausea, eructations, and dyspeptic symptoms, which are complained of by many persons using other preparations.

Finally, their regular ovoid form, which is so favorable to swallowing, their pleasant appearance, which dispels all disgust, and the advantage of being entirely free from taste and smell, recommend the use of these capsules even to the most delicate persons.

Thankful to the Medical Profession for the liberal patronage heretofore bestowed upon us, we hope that they will continue their favors, and we are convinced that they will never have any reason to regret the generous welcome they have given to our preparations.

MATHEY-CAYLUS' CAPSULES are never sold, except in bottles having the following inscription printed in the glass: MATHEY-CAYLUS A PARIS. And each bottle contains 64 capsules, making them the cheapest capsules in the market.

The following different kinds of Mathey-Caylus' Gluten Capsules are now offered:

COPAIBA AND TANNIC ACID,
COPAIBA AND S. N. OF BISMUTH,
COPAIBA AND CATECHU,
COPAIBA AND MAGNESIA,
COPAIBA, CUBEBS AND ALUM,
COPAIBA, CUBEBS AND RHATANY,
COPAIBA AND RHATANY,
COPAIBA AND CITRATE OF IRON,
COPAIBA AND CUBEBS,
COPAIBA PURE,
COPAIBA, CUBEBS AND CARB. OF IRON,
VENICE TURPENTINE, NORWAY TAR, PURIFIED,
CUBEBS AND TURPENTINE,
CUBEBS AND TANNATE OF IRON,
CUBEBS AND ALUM,
CUBEBS PURE,
COPAIBA AND MATICO,
COPAIBA, IRON AND OIL OF SANDAL,
COPAIBA AND OIL OF SANDAL,
COPAIBA, PEPSIN AND BISMUTH,
COPAIBA AND TAR,
COPAIBA, CUBEBS AND OIL OF SANDAL.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium.)

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charite, Necker, Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Prof. Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval after the most searching experiments. This preparation is pleasant to administer, and if certain preliminaries are observed success will be insured.

Sold only in Bottles containing one dose.

TANRET'S ERGOTININE.

ALKALOID AND ACTIVE PRINCIPLE OF SPURRED RYE.

This is a well defined Alkaloid that must not be confounded with Ergotine or other extracts; it is given in doses of from ¼ to ½ Milligramme (1-240th to 1-120th of a grain), in all cases where Ergot is indicated, viz.: Flooding, Post-partum Hemorrhages, Metrorrhagia, etc., etc.

It is put up in the following forms:

Syrup Containing ¼ Milligramme to each teaspoonful; DOSE from 1 to 6 teaspoonsfuls per day.

Solution for hypodermic purposes, Containing 1 Milligramme to each cubic Centimeter; DOSE, from 8 to 10 drops.

The Institute of France has awarded one of its Prizes to Mr. Chas. Tanret for the discovery of these Alkaloids.

Tanret's Pelletierine and Ergotinine are only prepared by Mr. Chas. Tanret, Laureate of the Institute of France, 64 Rue du Rempart, Paris.

Sole Agents for the United States, E. FOUGERA & CO., 30 North William St., N. Y.

PAMPHLET ON PELLETIERINE AND ERGOTININE SENT ON APPLICATION.

BOUDAULT'S PEPSINE

The Only Pepsine Used in the Hospitals of Paris for the Last 30 Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart, in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy every one that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of heir attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of on unce, with a measure containing exactly five grains; also in bottles of 4, 8, and 16 ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE.

Formula of Dr. Corvisart.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in 8 oz. Bottles.

Agents for the United States, E. FOUGERA & CO., New York.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of STILLINGIA, HELONIAS, SAXIFRAGA, MENISPERMUM, AND AROMATICS. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

BATTLE & CO.,

Chemists' Corporation, St. Louis, Mo.

BRANCHES: 38 Southampton Row, Holborn, London, W. C.

5, Rue De La Paix, Paris. 9 and 10 Dalhouse Square, Calcutta

The above *fac-simile* of our label enumerates the constituents of what has been termed by us "Liquor Bismuthi et Hydrastiæ" with the several improvements in its composition that have been made from time to time as experience has suggested.

This remarkable alterative and sedative to mucous surfaces has now been in use by the profession for ten years, being *first* prepared by us in 1872, and it has to a large extent revolutionized practice in the treatment of irritable, inflammatory and ulcerative conditions of the Mucous tract, *as:*

OF THE NASAL PASSAGES (locally).
Nasal Catarrh and Ozæna.

OF THE EYE (locally).
Conjunctivitis; Catarrhal, Gonorrhœal, Neonatorum and Purulent Opthalmia; Ulceration of the Cornea.

OF THE THROAT (locally).
Pharyngitis and Laryngitis; Diphtheria.

OF THE STOMACH AND INTESTINES (internally and locally).
Stomatitis; Gastro Intestinal Catarrh; Gastric Ulcer; Dysentery.

OF THE REPRODUCTIVE ORGANS AND BLADDER (locally).
Gonorrhœa; Urethritis; Cystitis; Vaginitis; Metritis; Uterine, Vaginal and Vesical Catarrh; Ulceration of the Os-Uteri.

Having in our possession the indorsement of physicians who have had the most gratifying success with our preparation of "Bismuth and Hydrastia" in the treatment of the above affections, we do not hesitate to emphasize its value to the Oculist, Gynæcologist or general practitioner.

A Descriptive List of our **Specialties** will be mailed to members of the medical profession upon application, also a sample of the above preparation will be sent to any physician who will pay express charges.

SUPPLIED BY THE WHOLESALE DRUG TRADE.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

COSMOLINE

Unguentum Petrolei

Prepared by E.F.Houghton & Co. Philadelphia, U.S.A.

Put up in 1, 5, 10, 25, 50, and 100-lb. cans. Samples furnished on application. The post-office laws forbid anything of an oleaginous nature being sent through the mail.

In chemical composition, Cosmoline (Unguentum Petrolei) is an oleaginous hydrocarbon, corresponding to the heavy petroleum oils, and containing a large amount of the paraffines and olefines of the formulæ $C_{16}H_{34}$ and $C_{16}H_{32}$. It contains but a small percentage of the paraffines and olefines corresponding to the formulæ C_7H_{16} and C_7H_{14}, respectively, and the offensive and irritating properties of the crude oil have been carefully removed. In the process of purification, no acids, alkalies, or other chemicals are employed, and no injurious additions of any kind are made to the natural product. The result is a semi-solid, translucent substance, with a faint odor and unctuous feel.

Cosmoline (Unguentum Petrolei) melts at about 100° Fah. (38° Cent.); and boils at about 625° Fah. (329° Cent.); its specific gravity is about 0.875 at 60° Fah.

As it contains no oxydizable or organic matter capable of change by putrefaction or fermentation, and is absolutely without affinity for moisture, it offers to the profession an admirable unguent, which can never decompose, ferment, or become rancid in any climate or temperature.

PHILADELPHIA, July 10, 1880.

MESSRS. E. F. HOUGHTON & CO.: I have for a number of years made extensive use of Cosmoline (Unguentum Petrolei), and consider it a most valuable article for surgical purposes. Either as a dressing by itself, or as a vehicle for the application of medicaments, it is greatly superior to lard or other fatty matters, especially by reason of its non-liability to change by time or temperature.

Yours truly, JOHN H. PACKARD, M. D.

1031 WALNUT STREET, PHILADELPHIA.

MESSRS. E. F. HOUGHTON & CO.: I have used extensively Cosmoline (Unguentum Petrolei) both in Dispensary and private practice, with very great satisfaction. As a vehicle in making ointments it is invaluable, and far superior to lard, for the reason that it will not become rancid or undergo chemical change like the latter, when exposed to the atmosphere. I cannot too highly commend it as an application in various skin diseases. Yours truly, JOHN V. SHOEMAKER, A. M., M. D.,

Physician to the Pennsylvania Free Dispensary for Skin Disease.

208 WEST 34TH STREET, NEW YORK.

MESSRS. E. F. HOUGHTON & CO.—*Gents:* I fully appreciate the value of your Cosmoline, or Unguentum Petrolei, and prescribe it frequently in ointments. Fluid Cosmoline I have used constantly for several years, as a lubricant of urethral sounds. It is the cleanest oil I know of for this purpose.

Yours truly, GEO. HENRY FOX.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used, and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

"Alone TO BE Recommended."

WHERE MOTHER'S MILK IS INSUFFICIENT,

Nestle's Milk Food is Alone to be Recommended.

"This food is *especially commendable* because the physiological relations of the infantile digestive organs, particularly the lack of notable salivary and pancreatic secretions, are taken into account in its fabrication—the starch contained in it having been transformed into dextrin."--*Prof. Wm. O. Leube, Ziemssen's Clyclopedia, Vol. VII.*

We also refer the profession to other eminent writers in the same standard medical work, viz: Prof. Juergensen on Catarrhal Pneumonia, Vol. V. Prof. Senator on the Treatment of Rachitis, Vol. XVI. Prof. Birch-Hirschfeld on Scrofulosis and Affections of the Lymphatic Glands in General, Vol. XVI.

In addition to the above mentioned special features of *Nestlé's Milk Food*, it has a world-wide reputation as a food for infants, producing pure blood, firm flesh, hard muscle and tough bone. It will agree with a larger number of children regardless of age, than *any other substitute* for the mother's milk, and we believe that the general use of this food during the past summer has accomplished more for the diminution of infant mortality from Cholera Infantum than any other means known.

Sample sufficient for trial, and pamphlet by Prof. Lebert, sent on appliaton to

CASCARA CORDIAL.

In Habitual Constipation.

The great desideratum in the treatment of chronic constipation has heretofore been a remedy which possessed not only a temperary specific action on the bowels, but which would be followed by no reaction and no repression of secretions, and which would be administered for a sufficient length of time to permit of restoration of normal functions; a remedy which would not only alleviate temporarily the existing mal-condition, but permanently remove the cause upon which it depended for its continuance, and thus effect a radical cure. The extensive trial of Cascara Sagrada by physicians of this country and Europe has shown it to be the drug that most fully meets all these indications. It has been added to the British Pharmacopœia, and its efficacy is attested by all physicians who have given it a trial. Cascara Cordial is prepared to disguise the inherent bitter principle of the drug, and without detracting from its medicinal value, render it acceptable to the most fastidious palate.

As a Vehicle for Nauseous Medicines.

Cascara Cordial has become widely known to the profession. It not only effectually disguises the taste of such inherently bitter medicines as Quinine, but on account of its laxative properties, is a most valuable adjuvant or corrigent to any prescription containing drugs, such as iron, the continued administration of which tends to constipate. It will be seen that Cascara Cordial has a wide range of utility as an agreeable laxative excipient.

To Dispel the Acute Effects of Alcohol and Opium Abuse.

From letters received from physicians, we are led to call the attention of the profession to the use of Cascara Cordial by those addicted to the alcohol and opium habits. The headache and gastric irritation following excessive indulgence in alcohol is avoided by adding a little Cascara Cordial to the alcoholic stimulant taken, or by taking a full dose of the cordial on retiring, after too free indulgence. The severe constipation also often attending indulgence in opium may be relieved by the systematic administration of Cascara Cordial.

We can not assume the responsibility for lack of success physicians may meet with in prescribing the many imitations and spurious varieties of Cascara on the market, and would request those wishing a genuine and reliable preparation to specify P. D. & Co's.

☞ **Samples furnished on application, to those physicians who will pay express charges.**

PARKE, DAVIS & CO.,

Manufacturing Chemists,

60 Maiden Lane, } New York.
21 Liberty Street. }

DETROIT, MICH.

30,000 PHYSICIANS
NOW PRESCRIBE
HYDROLEINE

(HYDRATED OIL,)

For Consumption and Wasting Diseases. It Produces Immediate Increase in Flesh and Weight.

FORMULA.

Each Dose of Two Teaspoonfuls, equal to 120 Drops, contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	½ Grain.
Distilled Water	35 "	Boric Acid	¼ "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	⅛ "

DOSE:

Two teaspoonfuls alone, or with twice the quantity of water, to be taken thrice daily after meals.

Hydroleine (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhua, but a hydro-pancreated preparation containing acids and a medicum of soda. Pancreatin is the digestive principle of fatty foods, and, in the soluble form here used, completely saponifies the oleaginous material so necessary to the reparative process in all wasting diseases.

Lautenbach's researches on the function of the liver would show the beautiful adjustment of therapeutics in preparation of Hydroleine, furnishing, as it does, the acid and soda necessary to prevent self-poisoning by reabsorption of morbid tubercular detritus and purulent matters into the general circulation.

Each bottle in nutritive value exceeds ten times the same bulk of cod liver oil. It is economical in use and certain in result.

Sold at all Drug Stores at $1.00 per Bottle.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," by H. C. BARTLETT, Ph. D., F. C. S., and the experiments which were made, together with cases illustrating the effect of Hydrated Oil in practice, are concisely stated in a Treatise on "Consumption and Wasting Diseases," by G. OVEREND DREWRY, M. D.

Copies of these Works sent free on Application.

WM. F. KIDDER & CO., 83 John Street, New York.

Agents for U. S.

Also exclusive Agents for SVAPNIA, or Bigelow's purified Opium, in SCALES and HALF-GRAIN GRANULES.

THE BEST
—ANTI-SEPTIC—
For Internal and External Use.

FORMULA.—Listerine is the essential Antiseptic constituent of Thyme, Eucalyptus Baptisia, Gaultheria, and Mentha Arvensis in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

ANTISEPTIC, PROPHYLACTIC, DISINFECTANT, NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC, AGREEABLE, STRICTLY PROFESSIONAL and SCIENTIFIC.

LISTERINE comes nearer the Ideal Antiseptic than any preparation now before the Medical World.

Send for New Formula Book and General Reports, establishing its value externally in SURGERY, OBSTETRICS, GYNECOLOGY, LEUCORRHŒA, GONORRHŒA, and all MUCOUS MEMBRANE CATARRHS; internally in TYPHOID and other FEVERS, ZYMOTIC DISEASES, DIPHTHERIA, SCARLET FEVER, DYSPEPSIA, DYSENTERY, DIARRHŒA, all forms of CHOLERA, etc., and as a general PROPHYLACTIC

THE BEST
—ANTI-LITHIC—
For the Uric Acid Diathesis.

FORMULA.—Each fluid drachm of "Lithiated Hydrangea" represents thirty grs. of Fresh Hydrangea, and three grs. of Chemically Pure Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

KIDNEY-ALTERATIVE AND ANTI-LITHIC, RELIABLE, UNIFORM, AND DEFINITE.

The solution and elimination of an excess of uric acid and urates is best attained by an intelligent combination of certain forms of Lithia and a Kidney Alterative.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys through the earlier reports of Drs. Atlee, Horsley, Monkur, Butler, and others, and the well known utility of Lithia in the diseases of the uric acid diathesis, AT ONCE justified the therapeutic claims for Lambert's Lithiated Hydrangea when first announced to the Medical Profession, and it is now regarded by Physicians generally as the best and most soothing Kidney Alterative and Anti-lithic Agent yet known in the treatment of URINARY CALCULUS, GOUT, RHEUMATISM, BRIGHT'S DISEASE, DIABETES, CYSTITIS, HEMATURIA, ALBUMINURIA, and Vesical Irritations generally.

LAMBERT PHARMACAL CO., 116 OLIVE ST., ST. LOUIS.

SCOTT'S EMULSION

OF PURE COD LIVER OIL WITH HYPOPHOSPHITES OF LIME AND SODA.

THE STANDARD EMULSION OF COD LIVER OIL.

The ONLY Preparation of its class that will not SEPARATE nor SPOIL in any climate.

IT IS MADE FROM THE PUREST NORWEGIAN COD LIVER OIL, COMBINED WITH CHEMICALLY PURE HYPOPHOSPHITES AND GLYCERINE.

Acknowledged by leading Physicians in the U. S. and many other Countries to be the most ELEGANT most PALATABLE and EASILY DIGESTED preparation in the World, and can be tolerated longer by children and persons with delicate stomachs than any other.

WE ASK A CAREFUL COMPARATIVE TEST WITH ANY OR ALL SIMILAR PREPARATIONS.

FORMULA: 50 per cent. of Pure Cod Liver Oil, 6 grs. of the Hypophosphites of Lime. and 3 grs. of the Hypophosphite of Soda to a fluid ounce. Emulsified with mucilage and Glycerine.

S. & B's BUCKTHORN CORDIAL, RHAMNUS FRANGULA.

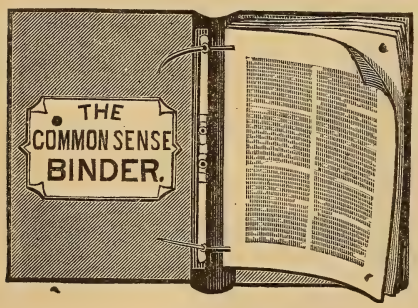
Is giving universal satisfaction to the profession, for its mild but certain and efficient cathartic action. It seems to be *almost* a *specific* for *habitual constipation*, and we are constantly in receipt of the most flattering reports regarding it. The care we use in its preparation—having the bark always the proper age, and properly exhausted—makes it always reliable in its action. Be sure and specify S & B. Buckthorn Cordial.

To those who have for any reason never yet tried these preparations, we will be pleased to send samples free by express.

SCOTT & BOWNE, Mfg. Chemists, 132 & 134 S. 5th Ave., N. Y

RUSSELL'S COMMON SENSE BINDER.

We give below a cut showing the form of this binder, which we have found the best we have used. A number have been prepared, of a size to fit the REPORTER, and are lettered in gilt, with its name. They will be sent by mail, to suit subscribers, on receipt of seventy-five cents.



At the close of a volume, the numbers can be removed from the binder and regularly bound, or they can with equal convenience be left in it, and another binder be used for the next volume.

COLDEN'S Liquid Beef Tonic.

Established 15 Years.
OBSERVE the NAME.
Beware of Imitations.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in Medical Practice.
Differs Essentially from all other Beef Tonics.

COLDEN'S Liquid Beef Tonic is endorsed by scores of physicians, who are growing to realize more and more its importance in repairing, in accordance with the principles of dietetics, the **waste which disease entails.** It consists of the extract of Beef (by Baron Liebig's process) spirit rendered non-injurious to the most delicate stomach by extraction of the Fusel Oil, soluble Citrate of Iron, Cinchona, Gentian and other bitter tonics. An official analysis of this preparation by the eminent Chemist, ARTHUR HILL HASSALL, M. D., F. R. S., and an endorsement by the late SIR ERASMUS WILSON, F. R. S., is printed on the label of each bottle.

As a **blood food,** and a **reliable tonic** in all cases of debility and weakness, Malarial Fever, Anæmia, Chlorosis, Incipient Consumption, etc., it is the best preparation ever used. It acts directly on the sentient Gastric Nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement—an appetite. It strengthens the nervous system when unstrung by disease, and has been employed with remarkable success as a remedy for Drunkenness and the Opium Habit.

Its Range of Action Embraces all Cases of Debility.

In order that physicians may form some idea of the nature of its ingredients, I will upon application in person, or by letter (enclosing a card), send a sample bottle of COLDEN'S LIQUID BEEF TONIC to any physician in regular standing, in the United States. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation, physicians should be particular to mention "COLDEN'S"—*viz.:* "***Ext. carnis, fl. comp. (Colden's.)***" It is put up in pint bottles, and can be had of Wholesale and Retail Druggists generally throughout the United States.

C. N. CRITTENTON, Sole Agent, 115 Fulton St. New-York.

GLENN'S Sulphur Soap.

ALL physicians know that ***skin diseases*** are more or less constitutional, or dependent upon some specific poison in the blood, which if eradicated by internal treatment needs something to remove its appearance from the surface. Experience has proved that the best possible aid in the accomplishment of this end is obtained by the use of ***Sulphur in soap.*** GLENN'S SULPHUR SOAP is the best combination of its kind, and the one now generally used. It is for sale by all Druggists, at **25** cents a cake, or 3 cakes for **60** cents.

CONSTANTINE'S PINE TAR SOAP

Has been on trial among physicians for very many years as a toilet Soap and Healing Agent, and its superior virtues have been unanimously conceded **in all cases where the use of tar is indicated.** Unsolicited expressions of its excellence have been received from the Medical Faculty generally. IT IS THE BEST TAR SOAP MADE. None genuine unless stamped "A. Constantine's Persian Healing Pine-Tar Soap." For sale by all Druggists.

Samples of either of the above-named Soaps will be sent free upon application in person or by letter (enclosing card) to any physician in regular standing in the United States. C. N. Crittenton, 115 Fulton Street, New York. Please mention "THE MEDICAL AND SURGICAL REPORTER."

HORSFORD'S ACID PHOSPHATE,

VS.

DILUTE PHOSPHORIC ACID.

The attention of the profession is respectfully invited to some points of difference between Horsford's Acid Phosphate and the dilute phosphoric acid of the pharmacopœia. Horsford's Acid Phosphate **is a solution of the phosphates of lime, magnesia, potash and iron, in such form as to be readily assimilated by the system,** and containing no pyro- or meta-phosphate of any base whatever. It is not made by compounding phosphoric acid, lime, potash, etc., in the laboratory, but is obtained in the form in which it exists in the animal system. Dilute phosphoric acid is simply phosphoric acid and water, without any base. Experience has shown that while in certain cases dilute phosphoric acid interfered with digestion, Horsford's Acid Phosphate not only caused no trouble with the digestive organs, but promoted in a marked degree their healthful action. Practice has shown in a great variety of cases that it is **a phosphate with an excess of phosphoric acid** that will better meet the requirements of the system than either phosphoric acid or a simple phosphate. "Phosphorus," as such, is not found in the human body, but phosphoric acid in combination with lime, iron and other bases, *i. e.* the phosphates, is found in the bones, blood, brain and muscle. It is the phosphates, and not the simple phosphoric acid, that are found in the urine after severe mental and physical exertions, or during wasting diseases.

We have received a very large number of letters from physicians of the highest standing, in all parts of the country, relating their experience with the Acid Phosphate, and speaking of it in high terms of commendation.

Physicians who have not used Horsford's Acid Phosphate, and who wish to test it, will be furnished a sample on application, without expense, except express charges.

RUMFORD CHEMICAL WORKS,

PROVIDENCE, R. I.

☞ BEWARE OF IMITATIONS.

BROMIDIA

The Hypnotic.

FORMULA:

Every fluid drachm contains 15 grains EACH of pure Chloral Hydrat. and purified Brom. Pot., and ⅛ grain EACH of Gen. Imp., Ext. Cannabis Ind., and Hyoscyam.

DOSE:

One-half to one fluid drachm, in WATER or SYRUP, every hour, until sleep is produced.

INDICATIONS:

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of Fevers, it is absolutely invaluable.

It does not Lock Up the Secretions.

PAPINE

The Denarcotized Opiate.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, etc.

INDICATIONS:

Same as Opium or Morphia.

DOSE:

One fluid drachm represents the Anodyne principle of ⅛ grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA:

Iodia is a combination of Active Principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Pot., and three grains Phos. Iron.

DOSE:

One to two fluid drachms (more or less, as indicated,) three times a day, before meals.

INDICATIONS:

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhœa, Menorrhagia, Leucorrhœa, Amenorrhœa, Impaired Vitality, Habitual Abortion, and General Uterine Debility.

BATTLE & CO.,

Chemists' Corporation, St. Louis, Mo.

BRANCHES: 38 Southampton Row, Holborn, London, W. C.

5, Rue De La Paix, Paris. 9 and 10 Dalhouse Square, Calcutta

PACKER'S TAR SOAP.

ABSOLUTELY PURE AND NON-IRRITATING.

MADE FROM VEGETABLE OILS, PINE TAR, AND GLYCERINE.

A perfect soap should be made from pure and sweet oils, and clean, well-washed alkalies. Such is **Packer's Tar Soap.** It is combined with distilled **pine-tar,** and hence has had the most gratifying effects in the treatment of Dermatic Diseases, as chafing, eczema, erythema, seborrhea, herpes, etc.

As a Disinfectant, Antiseptic, and Detergent, it is admirably adapted for use in ulcers, foul wounds, fetid discharges, bed sores, and similar conditions. For the bath, toilet, and shampoo, it is unrivaled. 25 cents per cake, from Druggists.

It is supplied to Hospitals, Asylums, and Physicians, in one pound bars, at reasonable prices.

P. O. Box 2985. **THE PACKER MFG. CO., 100 Fulton St., New York.**

GOOD INVESTMENTS

FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

They are put up in Cylindrical Tubes, convenient for carrying in Hypodermic or Pocket Case, ten tubes in a box, with twenty Tablets in each Tube.

NOTE.—It will only be necessary, in ordering, to specify the Numbers as above.

These Tablets will be sent by mail on receipt of the proper amount.

Complete list of Hypodermic Tablets, and also Price-Lists, Dose Books, etc., of our various preparations, will be sent by mail to those who desire them.

The Model Vaccine Propagating Establishment of the United States.

BOVINE VIRUS.

We take pleasure in advising Physicians and Druggists, that we have recently organized a VACCINE PROPAGATING ESTABLISHMENT in Chester County on a very extensive scale, and are now prepared to furnish bovine virus of the highest quality, from Lymph obtained for us by Dr. Chas. E. Sajous, of this city, from the Belgian Government Bureau of Vaccination and School of Veterinary Medicine, having assured ourselves, after an extended inquiry, that the best virus was cultivated in Belgium.

An exhaustive pamphlet on Bovine Virus, its production and preservation, with a comparison of the respective merits of Bovine and Humanized Lymph, containing also a description of our Vaccine Farm, will be sent by mail to those who desire it.

Our points will remain active for three weeks, if kept in a cool dry place, after which time they should not be used. We will guarantee 90 per cent. of satisfactory results in primary cases, and will replace with other virus all vaccine points to the above amount which fail in primary vaccinations, when used within the time mentioned above, but not if used after that lapse of time.

Price, per Tube (ten points), - $100.

WILL BE SENT BY MAIL ON RECEIPT OF THE ABOVE AMOUNT.

HIGHEST AWARD

LONDON, 1884,

AND IS SUPPLIED UNDER

ROYAL WARRANT

TO

H. R. H. THE PRINCE OF WALES.

ANNUAL SALE, 10 MILLIONS.

Of all Grocers, Druggists & Min. Wat. Dealers.

BEWARE OF IMITATIONS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of **considerably greater strength** *and* **efficacy** *than heretofore.*

The ordinary dose is a large wineglassful (4 ounces). Most efficacious when taken fasting and mixed with an equal quantity of hot water.

"I know nothing at all equal to Friedrichshall. The LONGER it is taken, the SMALLER is the quantity necessary to effect the purpose."

Sir HENRY THOMPSON, F.R.C.S., London.

OF ALL DRUGGISTS AND MINERAL WATER DEALERS.

SAVORY & MOORE beg to call the attention of the Profession to some of their Special Preparations, the purity and uniform strength of which are guaranteed.

Pancreatic Emulsion. In Consumption, Wasting, LOSS OF THE POWER OF DIGESTION AND ASSIMILATION, this pure drug is the MOST POTENT REMEDY. This is now attested by the published records of numerous medical men, extracts of which accompany each bottle.

Peptodyn, the New Digestive, is a combination of the whole of the digestive secretions, forming an invaluable remedy in the treatment of all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Peptodyn is intended as a general promoter of digestion for persons not necessarily considered in bad health; thus, when taken about a quarter of an hour after a meal, it will be found to assist digestion in a remarkable manner, and prevent the discomfort which often follows the partaking of a full meal by persons in good health.

Pancreatine Powder, for Indigestion and Loss of APPETITE. This palatable and popular remedy effects the digestion and assimilation of all food, especially of FATTY SUBSTANCES, and is therefore invaluable to patients who are unable to digest Cod Liver Oil, and who are thus deprived of its nourishing and invigorating properties.

Gelatine Discs for Hypodermic Use—Of Morphia, CODEIA, ERGOTINE, ATROPIA, STRYCHNIA, APOMORPHIA, etc. The chief features of these discs are their instant solubility, by which hypodermic solutions can be instantly obtained of uniform and reliable strengths; they keep good for an unlimited period in their dry state, and are extremely portable. (Prepared in accordance with Dr. Sansom's recommendation.)
In tubes, each containing 25 discs.

Etherodine (Substitute for Chlorodyne). A clear, bright fluid, pleasant to the taste, readily miscible with water or any suitable menstruum. The therapeutical properties of ETHERODINE are identical with those of CHLORODYNE, but the former is an elegant preparation, and more convenient for use.

Gelatine Discs for Ophthalmic Purposes.
"Much smaller doses of medicaments such as Atropine, Calabar Bean Extract, Sulphate of Zinc, Morphia, etc., etc., suffice to produce a marked effect by this form of application, than when drops are introduced."—*The Lancet.*
In tubes, each containing 100 discs.

Gelatine Lamels for Internal Administration, consist of thin, pliable, and, in most cases, transparent sheets of uniform thickness, accurately divided into squares by raised lines, each square containing an exact dose of the medicine with which the sheet is impregnated.
In sheets, each consisting of 24 squares.

Datura Tatula, for Asthma, Hay Fever, and Chronic BRONCHITIS. Recommended by the Profession as a remedy of great power and usefulness in cases of short and difficult breathing, spasmodic coughing, etc. The most convenient forms for use are—
Datura Tatula Cigars. Datura Tatula—prepared for use by means of a pipe.
Datura Tatula Cigarettes. Datura Tatula Pastilles—for Inhalation.

—TO THE—

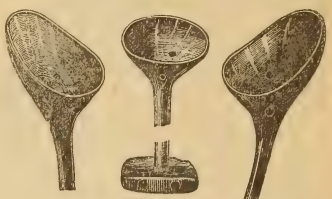
DR. McINTOSH NATURAL UTERINE SUPPORTER.

THIS INSTRUMENT MEETS THE WANTS OF THE PROFESSION MORE PERFECTLY than any other Uterine Supporter ever made. This is proven by the fact that during the past fifteen years more have been sold than of all other Supporters combined. *It never fails to give perfect satisfaction, even in the most difficult cases,* where any instrument can be used.

The **ABDOMINAL PORTION** is a broad morocco leather belt with elastic straps to buckle around the hips, with concave front, so shaped as to hold up the abdomen.

The **UTERINE PORTION** is a cup and stem made of highly-polished hard rubber, very light and durable, shaped to fit the neck of the womb, with openings for the secretions to pass out, as shown by the cuts. Cups are made with extended lips to correct flexions and versions of the womb.

The cup and stem is suspended from the belt by two soft elastic rubber tubes, which are fastened to the front of the belt by simple loops, pass down and through the stem of the cup and up to the back of the belt. These soft rubber tubes being elastic adapt themselves to all the varying positions of the body and perform the service of the ligaments of the womb.



Anteversion. Prolapsus. Retroversion

The instrument is very comfortable to the patient, can be removed or replaced by her at will, can be worn at all times, will not interfere with nature's necessities, will not corrode, and is lighter than metal. It will answer for all cases of Anteversion, Retroversion, or Prolapsus of the Womb. It is used by our leading physicians with never-failing success.

OUR REDUCED PRICE TO PHYSICIANS IS $5.00 EACH.

Instruments sent by mail at our risk on receipt of price; or we can send by express, C. O. D., with express charge for returning money added.

CAUTION.

Owing to the great success of our Supporter, several worthless imitations have been made which are often substituted for our instruments, to the detriment of the patient and the disappointment of the physician. To protect our patrons from imposture, we stamp each pad of the Abdominal belt in gilt letters, "Dr. McIntosh N. U. Supporter, Chicago, Ill."; the base of each cup is stamped "Dr. McIntosh N. U. S. Co., Chicago, Ill., U. S. A."

The box in which the instrument is put up contains directions for the application of the instrument pasted inside the cover, having the fac simile signature of Dr. L. D. McIntosh.

For further information in regard to the instrument, address

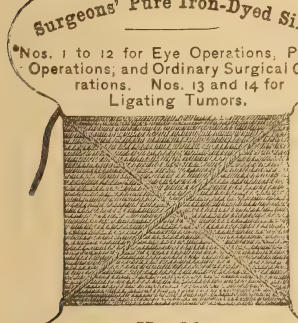
DR. McINTOSH NATURAL UTERINE SUPPORTER CO.,

300 AND 302 DEARBORN STREET, CHICAGO, ILL.

Our valuable Pamphlet on "Displacement of the Womb," giving a more complete description of the Instrument, will be sent you free on application.

Surgeons' Pure Iron-Dyed Silk.

Nos. 1 to 12 for Eye Operations, Plastic Operations, and Ordinary Surgical Operations. Nos. 13 and 14 for Ligating Tumors.

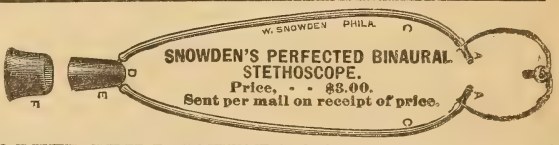


No. 10.

WILLIAM SNOWDEN,

No. 7 South Eleventh Street,

PHILADELPHIA.



IRON-DYED SILK LIGATURE is the best and cheapest for general use. It is round, not plaited, well finished, and durable. Can be waxed, oiled, or carbolized. Can be readily seen. Is not inflammatory. Nos. 1 and 2 will remain in the flesh a long time without causing irritation. It is the best for plastic surgery. Is the most delicate strong ligature. No. 14 is as strong as ever needed. Does not soften and loosen itself, as catgut does. **Price per Reel, 10 Cents.**

A sample card of the Iron-Dyed Silk (14 sizes) will be sent to any address on application.

Used by Profs. PANCOAST, GROSS, LEVIS, and other leading Surgeons.

"I think the Iron-Dyed Silk the best I have ever used."
HUNTER McGUIRE, M. D., Richmond, Va.

WILLIAM SNOWDEN,

Manufacturer and Importer of

Surgical Instruments,

No. 7 SOUTH ELEVENTH ST., PHILADELPHIA.

ESTABLISHED 1821—The oldest Surgical Instrument Manufacturing and Importing House in the United States.

McINTOSH GALVANIC AND FARADIC BATTERY CO.,

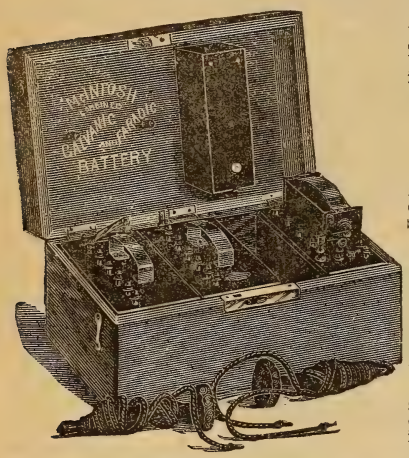
MANUFACTURERS OF THE CELEBRATED

McIntosh Combined Galvanic and Faradic Batteries,

Table, Office, and Family Batteries, Electrodes, Electric Bath Apparatus, Statical Electric Machines, Stereopticons, Solar, Monocular, and Binocular Microscopes.

AND ALL KINDS NF

PHILOSOPHICAL ELECTRICAL APPARATUS.



Schools, Colleges, Physicians, or Hospitals wanting new Apparatus, will do well to favor us with correspondence and obtain estimates. Men of scientific experience have charge of the manufacturing department. We employ the most skillful mechanics, and have the largest facilities in America for manufacturing.

We would call the Special Attention of the Medical Profession to our

Combined Galvanic and Faradic Batteries.

These Batteries are recommended by the Medical Faculty of both America and Europe, and have been adopted by the United States Government for use in Medical Department of the Army and Navy. They are

The First and Only Portable Batteries ever Invented which Give both the Galvanic and Faradic Current,

TWO DISTINCT BATTERIES IN ONE CASE.

No Physician can afford to be without one.

This celebrated Battery is constructed on an improved plan. The zincs and carbons are fastened to hard-rubber plates in sections of six each; this manner of connecting brings the plates nearer together than in any other battery, thus giving less internal resistance. The cells are composed of one piece of hard rubber, and are made in sections of six each with a drip-cup, thus one section can be handled, emptied, and cleaned, as easily and quickly as one cell. The drip-cup is to receive the elements when the battery is not in use. The fluid cannot spill or run between the cells, and there is no danger of breaking, as with glass cells. This is the only battery in which the zinc and carbon plates can be kept clean and always in order by simply rinsing them.

An extra cell (with a zinc and carbon element) is added to the combined batteries, for the purpose of producing the Faradic current. This cell gives as much force as is ever needed, and avoids exhausting the current from the Galvanic cells. All the metal work is finely nickel-plated and highly polished, and every part is put together so that it can be easily replaced by the operator. Our batteries weigh less, occupy less space, give a current of greater intensity and quantity, than any other battery manufactured.

Our illustrated Catalogue, a handsome book giving full description of all our goods, and other valuable information, sent free on application.

McINTOSH GALVANIC AND FARADIC BATTERY CO.
300 & 302 DEARBORN STREET, CHICAGO, ILL.

WHEELER'S TISSUE PHOSPHATES

Bone-Calcium Phosphate $Ca_3 2P.O._4$, Sodium Phosphate $Na_2H.P.O._4$, Ferrous Phosphate $Fe_3 2P.O._4$, Trihydrogen Phosphate $H_3P.O._4$.

WHEELER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphates prepared from the formula of Prof. Dusart, of the University of Paris. Combines with a superior Pemartin Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron, the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild Cherry, uniting with tonic power the property of Calming Irritation and Diminishing Nervous Excitement.

THE SUPERIORITY OF THE ELIXIR consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the Mucous Membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion. Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation, to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous System, should receive the careful attention of good therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychniæ of the U. S. Dispensatory may be added, each fluid drachm of the solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE—For an adult, one tablespoonful three times a day, after eating; from seven to twelve years of age, one dessert-spoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists at One Dollar.

DUFFY'S
PURE
MALT WHISKEY.

For Medicinal Use. Absolutely Pure.
Free from Fusel Oil.

Duffy's Pure Malt Whiskey is the only Whiskey that can be safely recommended by the **Medical Fraternity** to their patients; it has been endorsed and recommended by eminent Physicians and Chemists in all parts of the country. In cases of Pneumonia, Diphtheria, Consumption, Malaria, Hemorrhages, all Pulmonary Complaints, Low Fevers, **Dyspepsia** and **Indigestion,** it is highly recommended. In diseases where any stimulant is required, it is a valuable aid on account of its **absolute purity.** We are the only concern in the United States who are bottling and selling to the **Medical** Profession an absolutely **Pure Malt Whiskey.**

Distinguished Analytists.

NEW YORK, APRIL 24, 1885.

Duffy Malt Whiskey Co.,

GENTLEMEN: Analysis shows the Whiskey *to be free from* Amylic Alcohol (commonly called "Fusel Oil"), but at the same time the Whiskey is shown to contain quantities of Acetates and Valerinates of Ethyl and Amyl, which give to Whiskey a fine aroma, and which constituents are only present in the finest and oldest Whiskeys.

The purity of DUFFY'S MALT WHISKEY (as simple analytical tests will readily convince a Physician or an Expert) should certainly recommend the same to public favor. *In the sick room it certainly should meet with great success.*

Yours respectfully,
HENRY A. MOTT, Ph.D., F. C. S.

GENTLEMEN: I take pleasure in testifying that I have made an analysis of your Pure Malt Whiskey, which gave a very gratifying result. Your Malt Whiskey is entirely free from fusel oil ar any of those similarly obnoxious alcohols which are so often found in whiskeys, therefore it can be recommended as extremely fit for medical purposes.

DR. M. E. ARENDT,
Analytical and Consulting Chemist, Buffalo, N. Y.

LEXINGTON, KY., MARCH 15, 1885.

I hereby certify that I have made analysis of DUFFY'S Malt Whiskey, and found it to be absolutely pure, not containing a trace of fusel oil, or any other deleterious ingredient. It is peculiarly fitted for medicinal or any other purposes where a carefully prepared and unadulterated whiskey is desired.

ALBERT E. MENKE, D. Sc., F. C. S., F. I. C.,
Professor of Organic Chemistry, in the Kentucky State College, late Chemist, Department of Agriculture, Washington, D. C.

BALTIMORE, MD., OCT. 2, 1884.

GENTLEMEN: I have had a careful analysis made of a sample of your Malt Whiskey, as you requested, and find it remarkably free from fusel oil and other objectionable materials so often found in the whiskeys of the present day. Its flavor is quite pleasant and agreeable to both taste and smell, and it is, therefore, well suited to cases that require the use of an alcoholic stimulant.

HARVEY L. BYRD, M. D.,
President of the Faculty, and Professor of the Baltimore Medical College.

OFFICE OF WILLIAM T. CUTTER,
STATE CHEMIST OF CONNECTICUT,
EAST LYME, JULY 15, 1886.

Duffy Malt Whiskey Co., Baltimore, Md.

GENTLEMEN: A few weeks ago a friend sent me a half dozen of your Duffy's Pure Malt Whiskey, and so favorably impressed was I with its quality and purity, it gives one pleasure to subjoin herewith the result of an analysis of it made by me in my official capacity as Connecticut State Chemist. Perhaps you will better appreciate this analysis when I inform you that some years ago while residing near the manufacture of whiskey in Kentucky, I received a letter from twelve of the most eminent surgeons and physicians of New York City, expressing the great difficulty they had experienced in procuring pure whiskey for medicinal purposes, and asking from my long residence in the vicinity of the manufacture of whiskey in Kentucky, as well as my skill as a chemist, if I would furnish them with a pure article of whiskey for the use of the sick. I did as they requested, and for several years furnished them with a whiskey as nearly suitable for their purpose as I could find in Kentucky; but neither at that time, nor during the twenty years that have elapsed since then, have I found or analyzed so pure an article of whiskey seeming to answer, in every respect, what they required, until as stated, a few weeks ago I received a case of your whiskey through a friend. Having a practical, as well as a chemical knowledge of the process of manufacture of whiskey, as conducted in Kentucky, perhaps I am a better judge of its merits than one having only a chemical knowledge. I have analyzed a great many samples of whiskies, wines, ales, etc., and was surprised at the analysis of your Duffy's Pure Malt Whiskey to find it was absolutely pure, as I never found this to be the case in any other whiskies which I had examined. It contains no amylic alcohol (fusel oil) which is generally found in all so-called Bourbon and Rye whiskies, a substance described by medical authorities as having a poisonous effect upon the human system. It is free from any adulterations or artificial colorings; its "mellowness" and fine "bouquet" being the result of a carefully conducted fermentation and distillation, as well as age. It contains no deleterious or injurious qualities, and being a pure malt whiskey, its advantages to those suffering from nervous prostration or mental exhaustion must necessarily be very great. Its absolute purity, as well as scientific mode of manufacture, must commend it to general use and public favor,

Yours resp'y,
WM. T. CUTTER,
Conn. State Chemist.

We are the discoverers and only manufacturers in the World, of an absolutely pure Whiskey.

To any Physician writing to us we will send a **Quart bottle** as a sample, for **Seventy-five cents**, the same neatly packed in a wooden case without mark. Address

UNIVERSITY OF MARYLAND.

SCHOOL OF MEDICINE.

Eightieth Annual Announcement 1886-87. The next Regular session will begin October 1st, 1886. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY.

WM. E. A. AIKEN, M. D. LL. D.,
Emeritus Professor of Chemistry and Pharmacy.
GEORGE W. MILTENBERGER, M. D.,
Professor of Obstetrics.
CHRISTOPHER JOHNSTON, M. D.,
Emeritus Professor of Surgery.
SAMUEL C. CHEW, M. D.,
Professor of Principles and Practice of Medicine and Hygiene.
FRANK DONALDSON, M. D.,
Clinical Professor of Diseases of the Throat and Chest.
WILLIAM T. HOWARD, M. D.,
Professor of Diseases of Women and Children, and Clinical Medicine.
JULIAN J. CHISOLM, M. D.,
Professor of Eye and Ear Diseases.
FRANCIS T. MILES, M. D.,
Professor of Physiology, and Clinical Professor of Diseases of Nervous System.
L. McLANE TIFFANY, M. D.,
Professor of Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy and Clinical Surgery.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics. Clinical Medicine and Dermatology.
R. DORSEY COALE, PH. D.,
Professor of Chemistry and Toxicology.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.

For catalogue and further information address, **Dr. J. EDWIN MICHAEL, Dean, 246 Madison Ave.**

DENTAL DEPARTMENT.

Fifth Annual Announcement. Next regular session begins October 1st, 1886. New and excellen Infirmary and Laboratory, with abundance of clinical material.

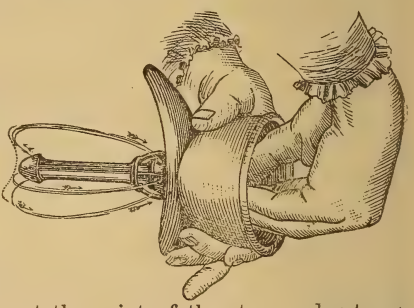
FACULTY.

FRED. J. S. GORGAS, M. D., D. D. S.,
Professor of Principles of Dental Science, Dental Surgery and Dental Mechanism.
JAMES H. HARRIS, M. D., D. D. S.,
Professor of Operative and Clinical Dentistry.
FRANCIS T. MILES, M. D.,
Professor of Physiology.
L. McLANE TIFFANY, M. D.,
Clinical Professor of Oral Surgery.
J. EDWIN MICHAEL, M. D.,
Professor of Anatomy.
I. EDMONDSON ATKINSON, M. D.,
Professor of Materia Medica and Therapeutics.
R. DORSEY COALE, PH. D.,
Professor of Chemistry.
JOHN C. UHLER, M. D., D. D. S.,
Demonstrator of Mechanical Dentistry.
CHAS. L. STEEL, M. D., D. D. S.,
Demonstrator of Operative Dentistry.
HERBERT HARLAN, M. D.,
Demonstrator of Anatomy.
AND EIGHT ASSISTANT DEMONSTRATORS.

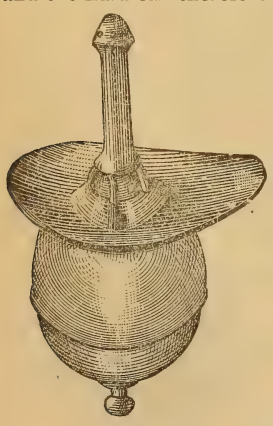
For Catalogues and other information apply to Dr. F. J. S. GORGAS, Dean, 259 Eutaw Street, Baltimore.

"PALLAS" SYRINGE.

VAGINAL AND RECTAL.



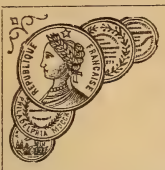
A MOST PERFECT and simply constructed Syringe for medicating and irrigating the vaginal cavity. The novel bulb of this Syringe, when doubled upon itself, as shown in the cut, will cause no fluid to be left, as is so apt to happen with the ordinary bulbs, and when filled will contain just enough fluid for the expansion of the vaginal folds. The hard rubber labial shield, with its plug, when firmly pressed against the labia, will both prevent spilling and soiling of linen, and the fluid can therefore be kept in circulation and in contact with the parts by repeating the pumping motion of the bulb. It will also be noticed that the fluid escapes as a spray from the large holes at the point of the stem and returns through the holes at the root of same, which is provided with hard rubber screen-bars, preventing the folds from interfering with the rapid return of the fluid into the bulb. In filling the bulb, a couple of turns will unscrew it. In handsome case, satin lined. Retail price, $3.75. To physicians, $3.00.



CHRISTIAN JENSEN & CO.,

2207 Fairmount Avenue,

PHILADELPHIA, PA.



HIGHEST AWARDS OF MEDALS AND DIPLOMAS
OVER ALL AMERICAN AND FOREIGN COMPETITORS,
AT MORE THAN THIRTY

International, State and Local Expositions.

Medical Jurors' Award, Philadelphia, 1876.

"ORIGINALITY: The successful application of Rubber as a base for medical and mechanical plasters."
"RELIABILITY and general excellence of manufactures."

A VERDICT UNIVERSALLY SUSTAINED.

Firmly recognizing the fact that the success of the medical practitioner and the surgeon depends in no small degree upon the integrity of the remedial agents and appliances which they employ, we have persistently adhered to the policy of making, in all our products,

BUT ONE QUALITY, AND THAT "THE BEST."

Our facilities for the production of our specialties are unequaled in extent and completeness by any other concern in the World Our establishment represents an industry of which we are the founders, and which owes its universal recognition to our investigations and our efforts to bring these preparations up to Pharmacopœial standards and the necessities of medical and surgical practice.

THE DIFFICULTIES IN THE WAY

of making India-Rubber Combinations conform to Pharmacopœial standards, have been set forth by novices and quacks in the plaster business as an excuse and a cover for omitting the expensive medicinal ingredients upon which the efficiency and value of plasters solely depend. These difficulties were long since overcome by us. The way to get at the facts and discover the Hypocrites and Frauds is by the analysis of competent chemists.

The status of the whole plaster business is well shown by the analysis of Belladonna Plasters, the leading article on the list of spread goods, made in March, 1886, by Dr. Albert B. Prescott, Professor of Chemistry at the University of Michigan, and President of the American Chemical Society, from goods purchased by him in open market. The assays were made by the same process, in parallel operations, for the quantity of total belladonna alkaloids, estimated as atropine, with the following results:

BRAND OF PLASTER.	Per Cent. of Atropine in the Plaster Mass.	Quantity of Atropine in One Plaster (Avg.)
Seabury & Johnson	0.39	0.543 grains.
Grosvenor & Richards	0.17	0.264 "
T. W, Heinemann	0.15	0.230 "
George E. Mitchell (Novelty Plaster Works)	0.05	0.045 "
The Porous Plaster Co. of the Village of Sing Sing, Proprietors of Allcock's Porous Plaster (Star Brand)	0.06	0.062 "

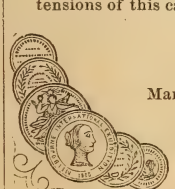
The results of Dr. Prescott's analysis confirm those previously made by Prof. Doremus and Dr. Battershall, and lately by Mr. Wm. Rupp, F. C. S., at their laboratories in this city, and by S. W. Williams, at the laboratory of the College of Pharmacy. Our plasters may, therefore, be depended upon to afford the full and prompt therapeutic effect contemplated by the officinal formula and expected by physicians. That the same effect cannot be expected from the inert preparations put upon the market by other makers is fully proven by the analysis alluded to, and what is shown to be true of belladonna is equally true of all other goods on the list.

OUR READY-MADE MUSTARD PLASTERS

are prepared from mustard of the purest and finest quality, and always give perfect satisfaction. They are so packed as to keep dry and retain their strength under all conditions, for an indefinite time; and *dipping them in water* they are ready for immediate use. They are also cheaper than the home-made article. Spread on cotton cloth or on paper. In yard rolls six inches wide, and in decorated tin boxes, containing ten plasters. In every way superior to all other makes, imported or domestic. The perfection of convenience and efficiency, wholly superseding the clumsy and disagreeable old-style mustard poultices.

DISCHARGED EMPLOYEES AS WOULD-BE COMPETITORS.

We are obliged to issue a word of caution to physicians and the trade, against parties who advertise themselves as manufacturers of plasters, and base their claims to confidence on the assertion that they have, at some time or other, been in the employ of Seabury & Johnson. This claim is usually made to convey the impression that the claimant was our "Superintendent," or occupied some position which made him master of the details of our business, and qualified him to operate works of this class Thus far among those who have attempted to trade upon their past connection with us are a discharged night watchman, a foreman of one of our departments, and a former engineer and general mechanic. Not one of these men possesses or can possess the slightest knowledge of pharmacy, and no man has ever left any department of our factory whose services it was worth while to retain. Nearly every merchant, especially if he be also a manufacturer of anything, has had experiences similar to our own, and in view of the facts stated, will readily understand, when offered goods claimed to be made after the formulas or by the process employed by us, that all such claims are spurious and are made with fraudulent intent, and that the goods will in no way resemble our own, either in their composition or their durability—a fact of which further assurance can be obtained from a careful comparison of analysis of the two makes. We have taken legal steps to protect the trade and ourselves from the fraudulent pretensions of this cass of pretenders, which is liable to be increased every time we discharge an employee.



SEABURY & JOHNSON,

PROPRIETORS OF THE SEABURY PHARMACAL LABORATORIES,

Manufacturers of India-Rubber Pharmacopœial and Surgical Plasters, Antiseptic Dressings and Absorbents, Bandages, Oiled Silk and Muslin, and Surgical Dressings of all Descriptions.

Geo. J. Seabury, President. *J. M. Peters, Treasurer.*
Robert J. Seabury, Secretary.

NOTABLE POINTS

RELATIVE TO

Lactated Food.

IT IS A COOKED FOOD.

By the use of high steam heat the gluten flour used is partially torrefied. This is done while the flour is dry, and during the process it is in constant motion, which insures perfect cooking to every particle.

Routh says, (Infant Feeding, page 380) that by this process, "the starch granules are rendered more separable, the gluten is reduced to a more porous condition, readily acted on by the gastric juice, and as an aliment, therefore, is more nutritious and digestible."

IT IS A PREDIGESTED FOOD.

"You state that it is self-digestive as regards the conversion of insoluble starch into soluble dextrine and maltose. My experiments with it lead me to hold that this is correct." J. MILNER FOTHERGILL.

IT CONTAINS NO UNCHANGED STARCH.

By the peculiar process of manufacture, every particle of the gluten flour is subjected to the action of the malto-diastase, and by it all the starch contained is transformed into soluble carbo-hydrates.

Professor CARL SEILER says, "Examination has proved that all the starch granules are converted, as shown by their behavior to polarized light."

NO CANE SUGAR USED.

The basis of Lactated Food is the pure sugar of milk made by the improved processes of the American Milk Sugar Co. The great value of this article has been shown conclusively. Cane sugar is not used in the composition or preparation of the Food on account of its liability to cause irritation by reason of the acetic fermentation which it creates in the stomach. Milk sugar never causes this fermentation or irritation.

IT IS NON-IRRITATING.

By reason of the fact that Lactated Food is partially digested in process of Preparation, it is assimilated by the feeblest stomach, and no undigested particles pass into the bowels to irritate, and thus cause troublesome and dangerous bowel disorders.

IT IS HIGHLY NUTRITIOUS.

The nutritive elements of Lactated Food are derived from the three great cereals, Wheat, Barley, and Oats. From the Wheat is taken the pure gluten, the most nourishing substance known for the muscles and tissues; from the Barley, all the soluble albuminoid and extractive matter resulting from the most careful malting; and from the Oat, the strengthening properties for which it is so well known. The result is a food which never disappoints, and under which the feeble child or invalid rapidly rallies.

FOR CHOLERA INFANTUM.

It is the chief reliance of many eminent practitioners, and it is the safest food in summer for all young or delicate children.

Another important consideration is its low price, it being much more economical than other foods. We make four sizes, selling for 25 cents, 50 cents, $1 00, and $2.50. *A dollar can will furnish one hundred and fifty meals for an infant.*

If any physician that has not yet made a trial of the Lactated Food will write us, we will send a package of our regular size, postpaid, without charge, with the understanding that it will be given a careful trial as soon as possible.

We shall use every precaution to maintain the high standard of this Food, and to insure perfect satisfaction to the profession in its use.

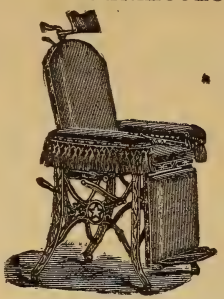
WELLS, RICHARDSON & CO.,

BURLINGTON, VT.

THE CANTON SURGICAL

AND

GYNÆCOLOGICAL CHAIR.



A chair especially constructed for the use of the general practitioner, as well as for the specialist in the treatment of gynæcological cases. For treating diseases of the Eye, Ear, Throat, and Chest, it has no equal. Every chair fully warranted to be first-class.

As a speculum chair it secures ease and comfort to the patient, and at the same time gives the operator such perfect control of all the various changes and positions, that it robs gynæcology of its usual embarrassment and annoyance.

Send for descriptive catalogue.

DR. RABUTEAU'S

[Laureate of the Institute of France]

DRAGEES, ELIXIR, AND SYRUP OF IRON.

"The experiments made in the hospitals of Paris have demonstrated that *Dr. Rabuteau's Dragees, Elixir, and Syrup* regenerate the red globules of the blood with a rapidity never observed with the use of the other ferruginous preparations. These results have been proved by the various *Compi-Globules.*

"The ferruginous preparations of *Dr. Rabuteau* do not cause any constipation, and are perfectly tolerated by the weakest persons."—*Gazette des Hopitaux.*

Dr. Rabuteau's Elixir is prescribed when some difficulty is experienced in swallowing the Dragees; it is especially adapted to weak persons, whose digestive functions need strengthening or stimulating.

Dr. Rabuteau's Syrup is especially prepared for children, who take it readily because of its agreeable taste.

A sample of Rabuteau's Dragees will be sent free to any Physician mentioning *The St. Louis Medical and Surgical Journal.*

Prepared by CLINN & Co., Pharmacists, Paris.

Ducro's Alimentary Elixir,

A COMBINATION UNITING THE PROPERTIES OF

ALCOHOLIC STIMULANTS AND RAW MEAT

This preparation, which has been used with great success in the hospitals of Paris, since 1868, is adapted to the treatment of all diseases requiring the administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia,* etc.

Prepared by EMILE DURIEZ & Co., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER,

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully-prepared formulas for use.

Retail Price, complete, $2.50.

☞A liberal discount allowed to the trade and profession.

☞For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William Street, New York.

Rigollot's Mustard Paper

Is one of the most important and useful discoveries of the age. It is the only preparation which has been adopted by the civil and military hospitals, and the armies and navies of France and England, and which has obtained a medal at the Centennial Exposition at Philadelphia. All other mustard plasters or leaves, of whatever name, are but imitations of the original.

Physicians will find it the most reliable sinapism, prompt and certain in its action, and will therefore always prescribe it. Every sheet, in order to be genuine, must bear the annexed signature of the inventor.

Sold in tin boxes containing 10 sheets, also 25 and 100 sheets, by all respectable chemists throughout the world.

Rigollot

E. FOUGERA & CO., New York Depositaries.

GOOD INVESTMENTS
FOR PHYSICIANS.

1. **Farm Mortgages** bearing **7** per cent. *guaranteed* and **8** per cent. unguaranteed, are unequalled securities, and are safer than Eastern mortgages. Not a dollar of principal or interest has been lost.

2. **Farm Lands** can be bought now at a low price, and will probably sell at an advance of 10 to 15 per cent. within six months. There is nothing more profitable in real estate investments than lands bought in a section where values are all the time increasing.

3. **Small Loans** to thrifty farmers on short time with full security, made through a responsible bank, pay 10 per cent. guaranteed. Nine-tenths of the banking capital of Dakota is used in this way.

4. **County Warrants** are considered among the best investments to be had in the West, and are eagerly sought by capitalists. They are made payable by law from the tax levies. They pay about 12 per cent.

The above investments are made through the *Security Mortgage and Investment Company*, Pierre, Dak., the *First National Bank*, Pierre, Dak., each with $50,000 capital, and the *South Platte Loan and Trust Co. Holdrege*, Neb., capital, $40,000.

Write for full particulars about loans and the *guarantee* given, to

HENRY A. RILEY, Eastern Manager,
170 BROADWAY.

Reference is given to Dr. Daniel G. Brinton, MEDICAL AND SURGICAL REPORTER; Dr. Frank Woodbury, 218 South 16th St., Philadelphia; Dr. Alonzo Clark, 23 East 21st St., New York; Dr. Geo. F. Shrady, 247 Lexington Ave., New York; Dr. William H. Welch, Johns Hopkins University, Baltimore, Md.

TAMAR INDIEN GRILLON.

A laxative, refreshing, and medicated Fruit Lozenge, very agreeable to take, and never causing irritation. Its physiological action assures the immediate relief and effectual cure of

CONSTIPATION,

HÆMORRHOIDS, BILE,
CEREBRAL CONGESTION, HEADACHE,
LOSS OF APPETITE,
INTESTINAL OBSTRUCTIONS, ETC.,

by augmenting the peristaltic movement of the intestine without producing undue secretion of the liquids. Unlike pills and the usual purgatives, it does not predispose to intestinal sluggishness, and the same dose always produces the same effect, that is to say, never needs increasing.

It is recommended by the most eminent physicians of Paris, notably Drs. BELIN and TARDIEU, who prescribe it constantly for the above complaints, and with most marked success.

Paris: E. GRILLON, 27 Rue Rambuteau.

SOLD BY ALL DRUGGISTS.

PRIVATE SCHOOL FOR THE DEAF.

Deaf Children Taught to Speak and Educated through Lip Reading. Aural Training and Defective Speech treated and improved. A Kindergarten Department for Deaf Children from three to six years old. A Training Class for Teachers of Articulation.

School re-opens September 20, 1886, at No. 7 South Merrick Street (opposite Public Buildings), Philadelphia, Pa.

Directions to Parents of Deaf Children for their Treatment from Infancy in order that they may learn Speech and Lip Reading, furnished free on application to **MARY S. GARRETT, Principal.**

And all parents of pupils.

THE VALUE OF MURDOCK'S LIQUID FOOD IS RECOGNIZED IN ALL COUNTRIES, AND IS ENDORSED BY ALL NATIONAL MEDICAL SOCIETIES THAT HAVE INVESTIGATED ITS VALUE.

There never was an essay read before any Medical Society on Raw Food Extracts, except on Murdock's Liquid Food, and counterfeit manufacturers of Extracts have published many of our essays to show the value of their counterfeits.

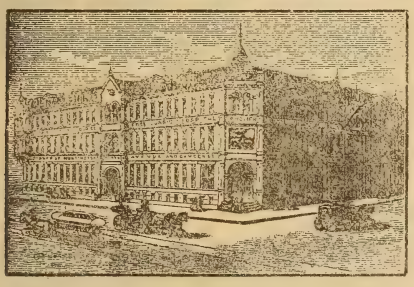
Send for Essay and DISCUSSION before the British Medical Association at Brighton, England, 1886 (Essay), by the Vice-President of the American Medical Association, and others, on the value of MURDOCK'S LIQUID FOOD over all Foods and Extracts known, it being the ONLY Raw Condensed Food free from insoluble matter.

Also essay read before the American Medical Association at Richmond, Va., and Washington, D. C.

Its value was recognized by the profession from results obtained in the Free Hospitals that have been established and supported by our Mr. A. L. Murdock during the last four years.

They now equal

140 FREE BEDS,



And contain 38,000 feet of floor.

Our Liquid Food can be retained by the weakest stomach. Four tablespoonfuls daily will make eight per cent. new blood weekly. When used for infants, never change their food, but add five or more drops of Liquid Food at each feeding, and their lost or needed vitality will be restored in less than thirty days.

Send for the Report of the Chairman of the Section of Obstetrics of the American Institute of Homœopathy, read at Saratoga at the annual meeting of 1886.

Circulars were sent by him to all the Physicians in the United States, asking what their experience was with Murdock's Liquid Food in its use for infants under, as well as over, one year old.

Then what results, with all the different Milk preparations, Grain Foods, Peptonoid Foods, and Beef Extracts, compared with MURDOCK'S LIQUID FOOD.

The returns show that it is the Standard Food and Extract, as the percentage of lives restored was the largest when used.

We extract from the report. After calling attention to the fact that one-quarter of the homœopathic profession are accustomed frequently to prescribe this food for children less than a year old, as well as over, he remarks:

"It is singularly adapted to scrofulous, syphilitic, and tubercula constitutions, its life-restoring power manifesting itself in each with a relative clearness and power corresponding to the order of enumeration. For fair-haired children who are inclined to grow fleshy it is more symptomatically recommended, while Duncan's *acid* babies find it particularly useful. Accordingly, it is chiefly employed for marasmus and anæmic conditions resulting either from non-assimilation of food, or from simple summer complaints. Should a child vomit all milk food and suffer synchronously with diarrhœa or dysentery, the demand for this food is emphatic and unmistakable; also in general irritability of the stomach, particularly if there be sour-smelling diarrhœa, the food passing through undigested. For the prematurely born it stands pre-eminent. For those 'weak and debilitated from any cause. Murdock's Food is probably the best in the world.' Should any indication of cerebral hyperæmia appear, the quantity of food must be dimin shed; so, too, if after its protracted use vomiting and diarrhœa ensue, the child has been overfed. Should the taste or odor of any given bottle chance to be disagreeable, add water until they disappear, and let the purchaser congratulate himself upon getting more nutriment than he paid for. When given in combination with milk in cases of indigestion, the quantity of milk should be diminished until all curds disappear from the stool, the quantity of Food, of course, being proportionately increased."

The Surgical Staff at MURDOCK'S FREE HOSPITAL FOR WOMEN are in daily attendance, except Saturdays, to examine patients and assign beds.

EVERY BED FREE.

Our Free Surgical Hospital for Women, located on Huntington avenue, above West Chester park, contains fifty (50) beds, in charge of a staff of five surgeons, members of the Massachusetts Medical Society.

Our Free Surgical Hospital for Women, located on Gainsborough street, corner of Huntington avenue, contains 50 beds, in charge of a staff of five surgeons, members of the Massachusetts Homœopathic Medical Society.

Our Free Home for Homeless Boys contains 40 beds, and is located at 11 to 21 Causeway street. Many of these boys suffer from Scrofula, Eczema, and other skin diseases, which yield quickly by the use of our Liquid Food.

From the fact that no two beeves or sheep are alike, is the reason of our different brands being different in flavor.

All brands are made by the same formula. The letter represents the day of make, and the figure the tank.

If richer, it is stronger in smell and flavor, and will bear a greater reduction. It cannot be reduced so low but it will be superior to all other preparations in treating chronic cases.

If you cannot obtain Murdock's Liquid Food from your druggist we deliver, free of express, 12 oz. for $1. Any physician that has not used our Liquid Food, we will deliver free to the Boston express 12 oz.

MURDOCK'S LIQUID FOOD CO.,

BOSTON.

CELERINA

NERVE-TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid-Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Impotency, Spermatorrhea, Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Nervous Headache, Neuralgia, Paralysis, Dysmenorrhea, Hysteria, Opium-Habit, Inebriety, Prostatitis, Dyspepsia, and ALL LANGUID or DEBILITATED conditions of the System.—*Indispensable to restore a patient after alcoholic excess.*

DOSE.—One or two teaspoonfuls three or more times a day, as directed by the Physician.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

PREPARED FROM THE ALETRIS FARINOSA OR TRUE UNICORN.

INDICATIONS.—Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to PREVENT Miscarriage, Etc.

DOSE.—One teaspoonful three or four times a day.

Unrivaled as a Uterine Tonic in Irregular, Painful, Suppressed and Excessive Menstruation,

IT RESTORES NORMAL ACTION TO THE UTERUS, AND IMPARTS VIGOR TO THE ENTIRE UTERINE SYSTEM.

☞Where Women have aborted during previous Pregnancies, or in any case where abortion is feared, the Aletris Cordial is indicated, and should be continuously administered during entire gestation.

ACID MANNATE

A MILD, SAFE AND PLEASANT APERIENT.

Prepared from Manna, Purified Cathartic Acid, and Fruit Juices.

INDICATIONS.—Constipation, Biliousness, Congestions, Etc. **INDISPENSABLE AS AN APERIENT FOR WOMEN DURING PREGNANCY.** In teaspoonful doses, 3 times a day, it favors the SECRETION and EXCRETION of bile, and gradually removes the congested and torpid states of the liver, and keeps the bowels in a regular and soluble condition.

DOSE.—ONE or MORE teaspoonfuls as directed by the Physician.

S. H. KENNEDY'S
CONCENTRATED EXTRACT OF
PINUS CANADENSIS

DARK — A NON-ALCOHOLIC LIQUID. — WHITE

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be Used.

Recommended by DR. J. MARION SIMS, and other Prominent Physicians.

Samples FREE to any Physician who will pay Express charges, and mention this Journal.

BOVININE,

BUSH'S FLUID FOOD,

CONTAINING 26.58 PER CENT. OF SOLUBLE ALBUMINOIDS.

The vital principles of Beef and Mutton concentrated. A highly condensed Raw Food Extract. Acceptable to the most delicate taste and smell. Retained by delicate stomachs that reject all other Foods. It assimilates more readily than any other Food known to the Medical Profession. BOVININE under the microscope shows the blood corpuscles in their normal condition strongly marked, while in all other Foods or Extracts this vitally important element is destroyed by the action of heat in cooking.

OSCAR OLDBERG, PH.D., PROF. OF CHEMISTRY AND TOXICOLOGY, AND DEAN OF THE CHICAGO COLLEGE OF PHARMACY, says of it:—I have analyzed Bush's Fluid Food or BOVININE, to find that it contains 26.58 per cent. of soluble Albuminoids."

A. L. LOOMIS, M. D., PROF. OF BELLEVUE MEDICAL COLLEGE, says:—"I prescribe Bush's Fluid Food or BOVININE and prefer it to similar preparations."

J. S. JEWELL, M. D., CHICAGO, says of "BOVININE:"—"I am delighted with it; it is what I have been looking for these twenty years, and it supplies a want that nothing else has been able to fill."

DRS. WARD AND FEWSMITH, speaking for themselves and their colleagues of the HOSPITAL OF ST. BARNABAS, NEWARK, say:—"BOVININE was readily taken by the patients, was easily retained, and in many cases by stomachs which had rejected all other forms of nourishment. We believe BOVININE contains more nutriment, relatively to bulk, than any other preparation known to the Medical Profession."

DR. J. M. RAND, SURGEON TO THE HOSPITAL FOR WOMEN AND CHILDREN, OF NEWARK, N. J., says:—BOVININE has been used with very satisfactory results after many important surgical operations; and, for all patients whose stomachs can't retain or tolerate other foods, we find the BOVININE invaluable."

During the last four months of his sickness, the principal food of my father, GEN'L GRANT, was BOVININE and Milk.
Oct. 1st, 1885. FRED. D. GRANT.

BOVININE is carefully prepared from the formula of the late JAS. P. BUSH, by the

J. P. Bush Mfg. Co., Chicago, Ill., and 2 Barclay St., Astor House, New York.

MURRAY'S CHARCOAL TABLETS.

The increasing demand for a chemically pure CHARCOAL, prepared from only young and tender willow shoots, for medicinal use, has led to the manufacture of these Tablets.

CHARCOAL is so simple and so valuable that it seems ridiculous to extol its qualities, but in our Charcoal Tablets we have the purest form of charcoal from young willow shoots, and in a form that people take with a relish.

PRICE, 25 CENTS A BOX.

Very Popular as a Dentifrice.

Removes the bad odor and taste after the use of Tobacco.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

DITMAN'S SEA SALT.

A Sea Bath at Home,

By dissolving the Sea Salt in ordinary water. Used as a luxury for its exhilarating influence, and as a valuable remedy in Debility, Languor, Rheumatism, and Weakness of the Joints, Tender Feet, Nasal Catarrh, etc. Extracted directly from the "foaming billows" by evaporation, at one of the most salubrious spots on the coast. It possesses all the medicinal advantages of the natural water, and, at the same time, is entirely freed from all organic impurities that are usually found in the surf.

A. J. DITMAN, Chemist,

Broadway and Barclay St., NEW YORK CITY.

FLUID

32° Fah. 0° Cent.

Fluid Cosmoline [*Petroleol*] is a fixed oil of Petroleum, a pure hydro-carbon prepared expressly for medical use. From it all the volatile and otherwise offensive properties of the crude Petroleum have been separated, without the aid of chemicals. Perfectly indifferent to atmospheric action, it remains inalterable in any climate. It is neutral in reaction, bland, soothing, cooling, and may therefore be applied to the most sensitive conditions without irritation. Flowing at 32° Fahr., it may be used may be warmed to any temperature the body can endure. It will be found excellent to relax the skin, to protect irritated surfaces from the air, and to use as a constituent in liniments, ointments and plasters, where an emollient is needed. For these and many other purposes, obvious to the medical profession, it will be found superior to olive oil, or to any vegetable or animal oils, which undergo decomposition and turn **rancid.** It contains no foreign ingredient.

SYR: HYPOPHOS: COMP: C. P.

(McARTHUR.)

For the treatment of Consumption and Tubercular Diseases.

"Dr. McArthur is a sanguine advocate of the Churchill Method. His Syrup of the Hypophosphites is an excellent and PURE preparation; and though we do not concede all the virtues claimed for it as a remedy for Consumption, yet we can testify to its great value from actual trial."

HENRY GIBBONS, M. D.,
Professor of the Principles and Practice of Medicine, University College, San Francisco, editor "Pacific Medical and Surgical Journal."

"I do not hesitate to commend it to the profession as worthy of confidence."

PROFESSOR HARVEY L. BIRD, Baltimore.

"I now prescribe it habitually in my private practice, and ALWAYS WITH BENEFIT when the cases are properly selected."

PROFESSOR JOHN H. LYNCH, M. D., Baltimore, Md.

"Dr. McArthur's chemically pure Syrup of Hypophosphites is becoming thoroughly recognized as an efficient remedy in the treatment of consumption and wasting diseases."

"Dr. McArthur is not only a good chemist and physiologist; he is, above all, a practical physician, who, after years of medical experience, is convinced that, in the treatment of Pulmonary Phthisis and kindred diseases, his preparation of Hypophosphites possesses greater therapeutic efficacy than any medicine hitherto used; and the results of treatment with his Syrup appear amply to bear out his views."

J. J. LAWRENCE, A. M., M. D.,
Editor St. Louis "Medical Brief."

PHYSICIANS WHEN PRESCRIBING WILL PLEASE WRITE THUS:

℞ SYR: HYPOPHOS: COMP: McARTHUR, ONE BOTTLE.

"Alone TO BE Recommended."

WHERE MOTHER'S MILK IS INSUFFICIENT,

Nestle's Milk Food is Alone to be Recommended.

"This food is *especially commendable* because the physiological relations of the infantile digestive organs, particularly the lack of notable salivary and pancreatic secretions, are taken into account in its fabrication—the starch contained in it having been transformed into dextrin."--*Prof. Wm. O. Leube, Ziemssen's Clyclopedia, Vol. VII*

We also refer the profession to other eminent writers in the same standard medical work, viz: Prof. Juergensen on Catarrhal Pneumonia, Vol. V. Prof. Senator on the Treatment of Rachitis, Vol. XVI. Prof. Birch-Hirschfeld on Scrofulosis and Affections of the Lymphatic Glands in General, Vol. XVI.

In addition to the above mentioned special features of *Nestlé's Milk Food*, it has a world-wide reputation as a food for infants, producing pure blood, firm flesh, hard muscle and tough bone. It will agree with a larger number of children regardless of age, than *any other substitute* for the mother's milk, and we believe that the general use of this food during the past summer has accomplished more for the diminution of infant mortality from Cholera Infantum than any other means known.

Sample sufficient for trial, and pamphlet by Prof. Lebert, sent on appliaton to

COCA

CORDIAL.

—A—

PALATABLE PREPARATION

—OF—

Coca Erythroxylon,

CONTAINING

In an agreeable vehicle the active medicinal principle, free from the bitter astringent constituents of the drug.

THE SEDATIVE, tonic, and stimulant effects of Coca Erythroxolon and its preparations, and their wide application in medical practice, are now too well known to the medical profession to need extended comment.

Coca has been extensively used with gratifying success for the relief of morbid conditions depending on nervous exhaustion, in the nervous irritability following excesses of any kind, in neurasthenia, to facilitate digestion in dyspepsia, to relieve the morbid depresion of spirits resulting from exhausting mental labor, in nausea and vomiting of reflex origin, and in the treatment of the alcohol and opium habits.

In a great variety of affections it has proved itself to be a drug ranking in therapeutic importance with opium and quinine.

The Coca Cordial presents the drug in a palatable form, commending it especially to the large class of persons of delicate nervous organization, for whom it is most often indicated.

In its preparation the astringent and bitter constituents of Coca, which are not essential to its medicinal action, have been eliminated, while care has been taken to retain unchanged the active principle cocaine. One fluid-ounce of the cordial represents 60 grains of coca leaves of good quality, the vehicle employed being an agreeable cordial of a rich vinous flavor.

☞ We shall be pleased to send on application a circular more fully descriptive of Coca Cordial and its application, and we trust physicians will communicate to us the results of their experience in the use of this preparation, so far as it is likely to be of general interest to the profession.
